Dear Reader,

each and every year (this last couple of them) I have been quoted as saying the upcoming year will be harsher and perhaps more challenging on us than the last one. And I meant it every time. The crises were looming, the obstacles seemed serious and we were scratching our collective heads trying to find the light at the end of the tunnel.

However, 2017 – and I am saying it in full acceptance of the fact that one year from now I might be repeating myself once again – seems especially ripe with challenges and opportunities alike. The world order as we have known it seems to be uncontrollably collapsing. Values such as truth, allegiance, loyalty, partnership, common platforms are being questioned and put under doubt. Coming into fashion are words and phrases favoring individualism, opportunism (i.e. standing out as unique, different from the rest), and *otherness*. Once again nationalism and radicalism are raising their ugly heads not only in the regions that we have somehow come to accept as the cradle of such but also here in the very heart of Europe. The instinct for cooperation and integration that was once deeply rooted in our European way of thinking is unraveling like the proverbial ball of wool. What had once allowed us to build and protect our way of life and thinking in constructing Europe anew atop the ruins of the war-torn continent, shrivels in confrontation with the populism, fear, hate and distrust omni-present not only in speeches made by politicians and office candidates, but also in discourses held at beer pubs and during family reunions. We face the degradation of values at an unprecedented scale.

Trust has become a rare commodity these days. At the Munich Security Conference in February U.S. Vice-President Michael Pence went to great lengths to assure the gathered statesmen and politicians that the United States remain a strong and unwavering ally of Europe, and reaffirmed the “bedrock commitment” to defend the Allies if push comes to shove. There was applause in the auditorium, yes, but far from frenetic in nature. Skepticism forbade it. The underlining thought – almost palpable at the time – was: *yes, okay, we believe you, but can we trust you that President Trump shares the sentiment?* I dare say that there wasn’t news more eagerly expected in the hours to come than the next POTUS’s tweet to either reconfirm or oppose the Veep’s words.

Not even the Munich conference, most representative as it was, both with respect to the level of invitees and the thoughts provoked by its various sessions, was able to answer the outstanding questions: How do we restore a strong and united Europe? Do we feel the need

for common structures capable of standing up to forces beyond our (local) control? Are we united in believing in the common future, say, after Brexit?

For Slovakia the answer is simple: we must resist the temptation to try to achieve better deals for individual states rather than for the entire EU. United we stand; divided we fall. Also, regaining the trust of EU citizens, of John Smith out there, is of outmost importance, as we have reiterated it at the Bratislava summit last year which had borne the Bratislava roadmap outlining the “back-to-the-EU-roots” process. We must try harder to explain not only what the EU does, but also *why* it does it, to help people feel the ownership of those processes. People out there laugh at us and get angry (rightly so) with EU regulations that they see unnecessary and outrageous – from the shape of the cucumbers to the amount of water used for toilet flushing. All of these decisions and regulations are rational; we have just failed to make them understood by our citizens.

We live in an imperfect world; a world where killing a fellow human being is somehow palatable if it happens far away. A world where societies are deeply torn inside, where right and wrong often loose contours and mix, where the natural craving for leaders has brought on a new batch of vociferators advocating destruction as the right course of action. They promise quick fixes to very complex problems by using a simplified language. They sideline mainstream political parties which often struggle to offer solutions relying on the language of political correctness.

We all know that meaningful solutions are neither easy nor quick. We need to communicate more often with our citizens and speak the language they understand. And we need to listen to them. To you, dear Reader. I do not want you becoming even more estranged, disappointed by empty promises and policies which do not improve your life. I want you to prosper, to grow and feel that those who were elected to do their jobs – on the national as well as European and international level – care about you.

I strongly believe in dialogue as the ideally suited tool for the exchange of ideas and proposals for the change for the better. I am always ready to listen. And I encourage you to do the same.

May the year 2017 prove fruitful to you

Miroslav LAJČÁK

Dear Readers,

Slovakia entered the year 2017 richer by the experience of its historically first Presidency of the Council of the European Union. I note with pleasure and pride that it was extremely successful. We proved that we are a modern, respected and competent country which is able to lead negotiations on complicated topics and in complicated situations, such as the Brexit that has shaken the European Union.

For the Ministry of Economy, the Presidency was a big challenge in which we succeeded. We led up to three councils with different focuses: energy, competitiveness, and trade. We organised three ministerial meetings and 13 large working meetings in Slovakia, and we prepared and conducted complicated negotiations in Brussels and Luxembourg. Other achievements of the Slovak Presidency are the reaching of the historical trade agreement CETA with Canada and the modernisation of protective tools of the trade policy against dumping prices from abroad after three years of fruitless negotiations, which will have a direct positive impact on the US Steel in Košice and its competition with cheap Chinese steel. We also managed to put in place the elimination of unauthorised geoblocking in e-commerce and more equality in e-shopping for Member States. In the field of energy, the European Union under the leadership of the Slovak Republic as the country holding the EU Presidency reached an agreement on safe gas supplies and co-operation between countries in the event of problems.

We were active also at home, mainly when it comes to obtaining new investments and improving the business conditions in Slovakia. The year 2016 was extremely successful in terms of the influx of new investments. We have achieved the best results over the last five-year period in respect to the number of projects and the creation of new jobs. Our country has proven to be attractive for investors, offering a stable and favourable business and political environment. We have attracted new important investors, and successful domestic companies have expanded their existing production. Another positive trend is the influx of investments with a higher added value, such as R&D centres or service centres. These new investments have a large export potential and the investment growth in Eastern Slovakia, previously characterised by relatively small investment volumes, is also positive.

These accomplishments are definitely due, among other things, to the steps we have taken in order to improve the business environment. Thanks to our efforts, the Act on Small and

Medium-Sized Businesses was approved and entered into force in January this year. Among other things, this act defines and enables the different forms of support and subsidies. In this way, we brought the fragmented forms of support provided to SMEs under one roof. At the same time, the Ministry of Economy has extended this support indirectly by means of mentoring and counselling. The main benefits can be summarised in three points: elimination of the administrative burden, support of innovations, and internationalisation of small and medium-sized enterprises.

The new act also establishes the obligation to assess the impacts of new legislation on SMEs. The draft of any relevant act must be consulted with their representatives, which is followed by the quantification of the impacts of the new obligations and the assessment of all variants. These rules also apply to the transposition of European Union legislation and are expected to help prevent over-implementation known as gold-plating.

The Ministry of Economy of the Slovak Republic prepared the National Strategy for Smart Industry, which will be detailed in the form of specific action plans for the automotive industry, robotics, automation and smart energy. We put through the "Concept for Supporting Business Service Centres". We are also willing to support non-industrial and non-manufacturing sectors, including Business Service Centres. These contribute to the stabilisation of production in Slovakia and to increasing its added value, and have positive impacts on professional employment and young people's qualification. Thanks to these centres, Slovakia is becoming a country which, in addition to its strong industrial tradition, also has a potential in the field of finance, IT and innovations.

Our innovative actions also include the historically first project of real support of electromobility by promoting the purchase of electric vehicles and plug-in hybrid cars. We launched this initiative together with the Automotive Industry Association. The growing interest in the purchase of these vehicles suggests that the project has met with a very positive response.

We are continuing our efforts to improve the conditions for entrepreneurship and innovations. We are constantly and successfully working on obtaining new investments, mainly those with a higher added value and mainly in regions which are in need of more jobs. In this context, we are reviewing the investment incentive policy. The Ministry and the SARIO agency currently work with dozens of investment plans and potential investors.

By July, we plan to submit to the Government a proposal for a package of measures in order to enhance the business environment. The aim of this plan is to improve the conditions for businesses, reduce the administrative burden of entrepreneurs, and enhance Slovakia's position in the Doing Business global rating of the business environment. Given the fact that the business areas concern several central authorities, we established the "Top-Level Inter-Sectoral Group for Doing Business" in which these authorities are represented. We focus on the ways of facilitating employment outside a labour relationship, the provision of public administration services to entrepreneurs, the ensuring of a sound competitive environment, the facilitation of the filling in of tax returns, and business support mainly to small and medium-sized entrepreneurs. We also want to improve Slovakia's position in the World Bank's Doing Business rating. We will therefore seek to speed up the start of business activities or the obtaining of building permits. The proposals are continuously discussed in working groups. The discussions will subsequently involve the representatives of business associations and unions. The document will be discussed by the Economic and Social Council, as well. The effect of the measures will depend on the intensity of their implementation. We are also preparing a website for entrepreneurs, which will help them find their way around their duties and obligations related to their business activities.

We also want to ensure fair electricity prices by addressing the system operation tariff, as we recognise that the system operation tariff influences the end price of electricity. This tariff is influenced by the extent of supported renewable energy sources, and the amount of support depends also on the market prices of electricity, i.e. the difference between the market prices of electricity and guaranteed prices for supported electricity producers. In Slovakia, the costs of such support are spread among all customers, including industrial companies, while in some countries customers have

discounts on these costs, which has a positive impact on the end price for such customers. In its Manifesto, the Government committed itself to review the system operation tariff, and the Ministry of Economy SR is planning to present several proposals for the public discussion with the business sphere, employers and the public. It will also be necessary to take into account the possibilities of the state budget and other potential sources and review the proposals from the point of view of (mainly negative) impacts on other customers, as well.

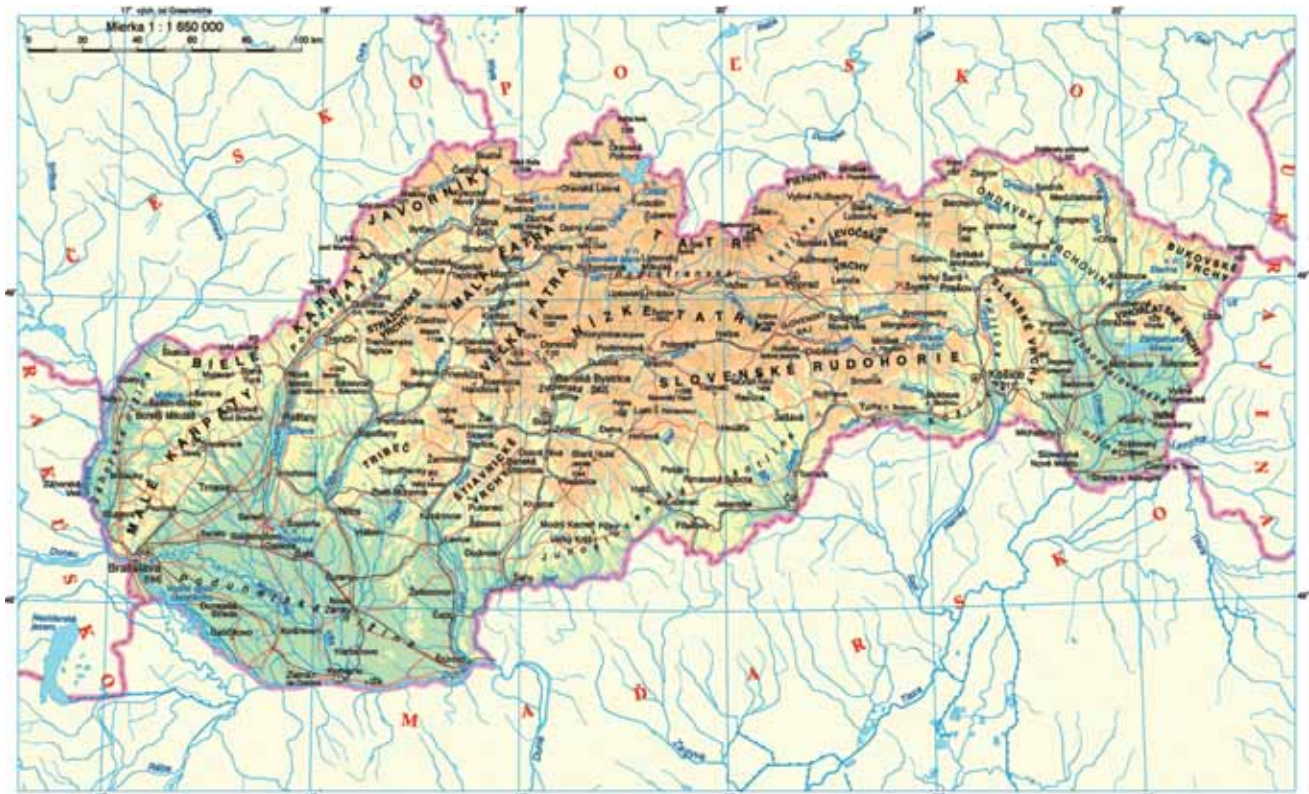

At present, Slovakia is one of the leaders of economic growth among the EU countries. The influx of direct foreign investments in Slovakia is on-going, a number of already well-established companies expand their business activities in our country, and increased emphasis is placed on science, research and production with an added value. It is the result of stability and quality of the business environment in Slovakia. We are not satisfied, though, because there is always something to improve and the innovation train travels at high speed. We cannot and do not want to lag behind.

Peter Žiga
Minister of Economy
of the Slovak Republic

SLOVAKIA - Regions and Districts

SLOVAKIA - Geographical Map

Total area:	49 035 km ²
Capital:	Bratislava
Length of state border:	1652,6 km
Population:	5 397 036 (as of 21. 5. 2011)
Political system:	Parliamentary democracy
Official language:	Slovak
Currency:	Euro, 1€ = 100 cents
Population density:	110,2 (per 1 km ²)
Time zone:	Central European Time (GMT +1 hour)
Country Telephone Code:	++421-

Location:

Slovakia is located in Central Europe. The relief of the country is characterised by great differences. In central and northern Slovakia the countryside is hilly, it is covered with the Carpathian mountain range. The countryside of the southern and eastern Slovakia is low.

Climate:

The territory of Slovakia is situated in the mild climatic belt with regular alternation of four seasons of the year. The average temperature is in winter - 2° C and in summer +21° C. January is the coldest month with night temperatures -10° C and -15° C, the warmest month is July with a daily maximum temperature of approximately +32° C.

National Holidays:

January, 1 st	Establishment of the Slovak Republic
July, 5 th	St. Cyril and St. Methodius Day
August, 29 th	Slovak National Uprising Day
September, 1 st	Slovak Constitution Day
November, 17 th	Day of Fight for Freedom and Democracy

Public holidays:

January, 6 th	Epiphany (The three Sages and Christmas Holiday of Ortodox Christians)
March/April	Good Friday, Easter Monday
May, 1 st	Labour Day
May, 8 th	Triumph Over Fascism Day
September, 15 th	Lady of Sorrows Day
November, 1 st	All Saints Day
December, 24 th	Christmas Eve
December, 25 th	Christmas Day
December, 26 th	Second Day of Christmas

Important Phone Numbers:

The national symbols of the Slovak Republic are the national emblem, the national flag, the national seal and the national anthem.

The national emblem of the Slovak Republic has a red, early Gothic shield with a silver double cross mounted on the central peak of the blue three hill group.

The national flag of the Slovak Republic is composed of three horizontal stripes - white, blue and red (with white at the top, followed by blue and red). In the front section of the national flag is the national emblem of the Slovak Republic.

THE TOWN OF SPIŠSKÁ NOVÁ VES

Gateway to the Slovak Paradise

SPIŠSKÁ NOVÁ VES
www.spiiskanovaves.eu

Slovak Republic, Europe

N 48° 56' 39,01"

E 20° 34' 0,32"

Spišská Nová Ves with its almost 750-year long history is an ideal starting point for the lovers of hiking along harsh but picturesque gorges of the Slovak Paradise (Slovenský raj)

of the town is enhanced by theatres, a gallery, museums, 3D cinemas, indoor swimming pool and a lido, wellness and fitness facilities, tennis grounds, skittle and bowling alleys, a high rope park, a skatepark, a winter stadium, a minigolf area or an indoor shooting range, as well as suburban sports airfield with an opportunity to enjoy parachute jump or sightseeing flight.

1 to October 31, the admirers of water tourism can enjoy boating on the Hornád river in one of the most attractive parts of the national park – the longest river canyon in Slovakia (Prielom Hornádu, 11.75 km long). You can also explore the 'true wilderness' in the Kysel' gorge, reopened 40 years after devastating fires. The gorge is passable thanks to new educational trail Kysel' – Ferrata of the Mountain

National Park, for the admirers of monuments described in UNESCO's World Heritage List and for those interested in the less spectacular but even more precious Gothic and Iron Routes monuments that can be found in the surrounding Spiš region.

The town features the longest fusiform (spindle-shaped) square in Europe with an unforgettable atmosphere, the highest publicly accessible church tower in Slovakia (87 m high), the youngest ZOO in Slovakia. At the Place of Wishes you can express your most secret wishes and send them by ringing a bell to the heavenly heights to be fulfilled. A wide range of cultural and sporting events all year round provides sufficient opportunities for a pleasant stay. Attractiveness

In the close vicinity of the town are situated the largest Slovak ice cave, 25 splendid waterfalls in 8 accessible rocky gorges, more than 300 km of marked hiking trails, 400 km of cycling trails, ski centres, cross-country skiing and nordic walking trails or 13 educational trails.

In the nearby Slovak Paradise you can experience two exciting novelties. From May

Rescue Service. This amazing 'via ferrata' is open from June 15 to October 31.

The combination of nature, history and active relaxation in the Spiš region is complemented by other available natural beauties: first of all the High Tatras (Vysoké Tatry) National Park, which is just 30 km away, but also thermal park in nearby Vrbov, the Pieniny National Park with its

raft tours of the Dunajec river on traditional Goral rafts, the caves of the Slovak Karst (Slovenský kras) National Park, or the cities of Prešov and Košice located in very short distances.

An increasing interest in Spišská Nová Ves is reflected every year in the growing number of its visitors, services concentrated not only in its centre and also in increased business activity.

Take an opportunity to enjoy advantageous family or adrenaline stay in Spišská Nová Ves.

'Family stay full of experiences' (3-day package for families) includes the accommodation in the hotel** with breakfast and family dinner at the day of arrival, free entry to lido and indoor swimming pool during the whole stay, Ceragem massage, ascent to the highest church tower in Slovakia, visit of the Place of Wishes, free entry to the ZOO and AQUATERRA pavilion with a small present for your children and free entry to MONKEYLAND high rope park.

'Weekend adrenaline menu with the sky' (3-day package for 2 persons) offers you an opportunity to 'rent' the sky and enjoy 20-minute flight by a Cessna aircraft with views of the picturesque Slovak Paradise National Park, the majestic High Tatras, historical town Levoča or the Spiš Castle, and afterwards experience a tandem parachute jump from a height of 3,000 m with an experienced instructor. You can also test your strength and courage in

the latest high rope park or test your shooting talent and accuracy at the indoor shooting range from 3 weapons of your choice. You can take 155 steps for an amazing view from the highest church tower in Slovakia, experience the atmosphere of the longest fusiform square in Europe and enter the nearby Slovak Paradise. Bed and breakfast accommodation in guest-house** included.

Find out more about packages in TIC or on website of the town.

Detva

DETVA is situated in the heart of Slovakia, about 220 km from Slovak capital Bratislava. Its area

is known with precious natural and cultural values. Detva is the centre of Podpolanie region, one of the most original Slovak regions, which was named after natural dominant feature of the area – Polana volcano. From 1996 Detva is the centre of the district. Its area is 6,809 hectares and it has about 15,000 inhabitants. Geographical location of Detva in the centre of Slovakia enables good traffic connection

with the neighbouring regions as about roads and railways. The road I/50 (Bratislava – Zvolen – Lučenec – Košice) and the R2 expressway with the connection to Detva is the traffic axis of the area. It will be soon improved by building the R2 highway. Detva is connected with the railway line Zvolen – Lenártovce – Košice, which runs through southern part of the town. The nearest cargo railway stations are in neighbouring villages Víglaš and Kriváň. Airport in Sliač is only 27 km from Detva. Good technical and civic infrastructure is available in the town. In the Strategy of Slovak Republic Improvement Detva is one of innovative progress

poles. Business and employment support is one of the priorities so that the new business zones are being created. With the EU support of its structural funds (2004-2006) Detva town realized reconstruction of some producing parts in PPS factory so that it prepared industrial park for some new investments and for the creation of 538 job positions, mostly in engineering professions. The goal of building of industrial parks and zones for business in Detva and surrounding villages Kriváň and Víglaš is to provide the opportunities for domestic and foreign companies with working places in production, service and quaternary sectors, so that

for domestic companies' goods and services consumption. Detva town owns also allotments of 10 ha area, which is considered to be the future industrial park Detva – Trstená. There is the project documentation prepared for this business plan for building the underground services. In southern part of Detva there are some areas and building sites of stores, services and production. This site is the most lucrative as about the connection with infrastructure but it is capacity limited because of road R2 and also because of limits of protective zones biotopes around Slatina River. They say that the potential of Detva and its surrounding is not used properly. There is a good opportunity not only for visit and getting known of this region but also for investment into business and living in this environmentally pure, clean and beautiful town in the heart of Slovakia.

The Town of Levice

The Town of Levice is situated in the eastern part of the Danubian

Lowland, and is an important centre of the Hron Region with prevailing agriculture and industrial production. The first written mention of Levice dates back to 1156. The dominant part of the town is the Castle of Levice, which was erected in the 13th century to protect the mining towns

of Central Slovakia, and later re-built several times to form a fortress. At present, it houses the Museum of Tekov.

Tourist attention is attracted by the reconstructed historic centre, burgher houses, the teachers' institute, the historic building of a mill, or several sacral buildings. The Calvary of Levice is a rest area with a view of the centre and of the wide surroundings. From the Calvary, one can get, following the natural trail along the

Jewish cemetery, up to the Cross Hill (Križny vrch) with four monuments hidden in the vineyards (the St. Urban statue, a stone well, the Jesus Christ Cross, and the Chapel of the Holy Virgin). During hot summer days, visitors can swim at the Margita - Ilona open-air pool (Kalinčiakovo), and the National Natural Reserve of Horša Valley with typical 20-30 metre high stone walls and preserved folk architecture is also worth mentioning.

Levice also offers a variety of traditional cultural events: the Hunting Days of Levice (April), the Theatre Festival of Levice (April), the Castle Feast of Levice (June), the Fishing

Picnic (August), the Levice Fair (May and October) and other events. The surroundings of the town provide many opportunities for fishing, hunting, Hron river rafting or horse-riding.

The Town of Lučenec

The Town of Lučenec is situated in the south of Central Slovakia, close to the Hungarian borders. The document from 1247 containing the first mention ever about Lučenec refers to this town as an important crossroad of trade routes and the centre of culture of the historical region of Novohrad. Kubinyi Square lies in the heart of the historical centre of the town, with roman-catholic and calvin-

ist church and the historical buildings of Reduta and the Municipal Hall as its main landmarks. The Municipal Hall was renovated in 2016, today you can find there a municipal museum and the information center. The Jewish synagogue built in Art Nouveau style is another important historical attraction. It belongs to the largest of its kind in Slovakia and also in the Central Europe. It was reconstructed in 2016 and nowadays it serves as a multinational cultural centre.

The city park is one of the most beautiful and most precious parks in Slovakia, thanks to the combination of French, English and woodland garden styles, with artificial lake, mini ZOO and lot of leisure time zones for the whole family. On the central square there is a newly build shopping center, the biggest in the region with various shops, restaurants, cafes and cinema. According to the Town's Zoning Plan, industrial sites for the purposes of new investors are located in the Industrial Zone South within the cadastral territory of Lučenec. This industrial zone meets all the require-

ments for technical infrastructure. Industrial Zone South is situated in the south-eastern part of Lučenec. Its total area is 169.6 hectares. Manufacturing halls, warehouses and technical facilities currently occupy 113.2 ha. The industrial zone houses an Industrial Park at a total area of 5,5 ha with complex infrastructure, including roads and lighting. Future investors can dispose of 14 ha of free sites within the industrial zone.

The Town of Komárno

Komárno, located at the confluence of the Danube and Váh Rivers, is one of the oldest settlements in the Carpathian Basin. It is a busy border town lying on the Slovak-Hungarian border. The territory of the town has been inhabited by various tribes due to its strategic location. The town flourished especially during the reign of King Matthias Corvinus who had a renaiss-

sance palace built here. During the Turkish invasion in the 16th and 17th centuries the castle was rebuilt into a well-defended fortress, which is one of the main tourist attractions in the city. It was later expanded and when the building of the system of fortifications was finished, it had the capacity to accommodate an army of 200 000 soldiers. The town became the strategic military base of the Austro-Hungarian Monarchy. After granting the

town the status of free royal town in 1745 by Maria Theresa, lots of historic buildings were erected; baroque palaces were built by the local nobles and wealthy citizens. Unfortunately, the baroque town was hit by two devastating earthquakes in 1763 and 1783. After the earthquakes the buildings were renovated or rebuilt. Nowadays, the majority of the historic and cultural sites are well preserved. The County and Town Halls, the Courthouse, Zichy Palace, St. Andrews Church, the Danube Museum, the Officers' Pa-

vilion and other buildings are examples of some of the many historic sights. An exceptional tourist attraction of the town is Europe Place, which was built in the historic centre of the town in 1999-2000. Houses are erected in its courtyard, which represent the typical architecture of 45 European countries. At present Komárno is one of the most important towns in the Nitra region.

Snina

The City of Snina (216 m.a.s.l.) lies in the heart of a virgin nature, at the confluence of rivers Cirocha

and Pčolinka, surrounded by its landmark and symbol of the city - the mountain Sninský kameň (1005 m.a.s.l.). This year, the city celebrates the 700th anniversary of the first written reference.

Snina is a part of the region Horný Zemplín. It is also an entering point of hiking and biking trails in the Protected Landscape Area Vihorlat and Poloniny National Park, embracing nature reservations, recorded in the UNESCO World Heritage List in 2007.

The City of Snina has 20,500 inhabitants. In recent years

it has been changing its face mainly due to reconstruction and new construction projects, such as new city square, schools' renovations in 2013 and a restoration of a classical mansion of 18th Century, including a historically eminent statue of Hercules and the Old Park.

Sninské Rybníky, a pound, located only 3 km from the city center, has become an important touristic attraction of the region. Particular importance belongs to the bio swimming pool that operates on water purification basis, using natural aquatic plants and algae, situated on 3510 sq.m., with three profound zones from 10 to 300 cm.

Tvrdošín

The most important monument of the town is a Gothic Wooden All Saints Church from the half of 15th century which

was given Europa Nostra award for its protection and in 2008 was listed in World Cultural Heritage UNESCO. There is also a Maria Medvecká Gallery who was a national painter and Schurger Art Gallery focused on modern art. Excellent accommodation facilities in the hotel Limba offers a wide range of trips around the town and hiking or day trips to the West Tatras, protected landscape area Oravice, Orave Dam, Polish town Zakopane. The visitors of the town can spend wonderful moments relaxing in the town part Oravice. The recreational resort located in the mountainous environment offers hiking for both beginners and professional hikers. Each season of the year there are ideal conditions

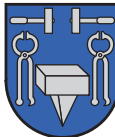

for recreation, sports, hiking and cycling, down hill skiing as well as cross country skiing. While walking along the Educational Trail we can observe unique fauna and flora and Relaxing Trail is suitable and available for the disabled. The are open air thermal pools and the modern water park called Meander with geothermal water with healing properties for locomotor system which are located near the ski lift. Oravice offers absolutely stunning combination of skiing and relaxing in the pools with thermal water.

Jelšava

Jelšava is situated on the Gothic Route at the boundary between Slovenské Rudohorie and Slovenský Kras. It has a long tradition of

ironworks, mining and craft industries. The oldest written mention dates back to 1243. In the 14th century, the Old Castle of Jelšava was the seat of the Jelšava estate. In the 17th–19th century, it was the economic centre of Gemer. The life in the town was largely influenced by the development of the magnesite industry, mainly at the end

of the 1960s. We can find in its proximity the Hrádok recreation area and the Aragonite Cave of Ochtná. The town is rich in cultural monuments. The principal landmarks are the Roman Catholic Church and the Coburg Manor House at the main square. Other architectonic sites include the Protestant Church, the Town Hall, the Reduta building, the former County House and the building of the historically first pharmacy in Gemer. The town centre is a protected cultural zone.

Vráble

The Town of Vráble is situated within the agricultural area of the Danubian Lowland in southern Slovakia. The oldest

written mention about the town is from the Bill of King Belo IV of 1265. From the 14th century until 1848, Vráble was the seat of prelates of the Archdiocese of Esztergom. The most valuable monument is the Neo-Romanesque Roman-Catholic church. Wine-growing has been

popular in Vráble since the 18th century. The area north-west from the town centre is characterised by wine houses with original architecture and the production of quality wines. After the partial downsizing of industrial production in the 1990s, the town began to build an industrial park. Today, this industrial park houses companies which provide jobs to the inhabitants of the Vráble region.

Šamorín

The town of Šamorín is situated nearby the capital city of Bratislava on the plain along the Danube. There are

8 projects listed in the Memorial Fund. Visitors of the town are informed by 5-language boards at the national cultural sights. The population of the town is over 13000 while the number of unemployed is about 300. The proportion of the economically active population is above state average.

The number of manufacturers on the territory of the town shows the advantageous geographical location of the town and the effort to meet the requirements of private entrepreneurs. There is also an industrial park consisting of a group of small and medium businesses.

GREAT MORAVIAN EMPIRE – OLD-SLAVONIC EMPIRE (805-905) - 9th century

"I mind the disregard for the culture that is centuries older."

Alexander the Great (356-323 B.C.)

■ NITRA, MIKULČICE, DEVÍN - centres, towns, castles

■ Rulers: **Mojmír I.** (830 - 846), **Rastislav** (846 - 870), **SVĚTOPLUK I.** (870 - 9. 3. 894), **Mojmír II.** (894-907).

Territory of the empire: Slovakia, Moravia, Pannonia, Czechia

■ Slavic gods: Perun, Triglav, Dazhbog – god of the Sun, Radegast, Zhiva (Siva) – goddess of life and bioenergy; Slavic priests used meditations and breathing

exercises to accumulate and balance energy;

■ **863-885** Constantine-Cyril and archbishop Methodius with Rastislav and King Světopluk founded the material, spiritual and culture traditions of Slavonic people and devised the alphabet;

■ **866** They founded the Great Moravian training college – school, where 200 pupils finished their studies; literature – writings, poems, code of law;

■ **869** The Old Slavonic language became the fourth liturgical language in the world along with Greek, Hebrew and Latin;

■ Methodius (815-6. 4. 885) studied law; archbishop in Great Moravia and Pannonia-Sirmium - Srem. Mitrovica

■ Constantine the Philosopher – Cyril (827-14. 2. 869) devised the alphabet and spelling, and created words for communication from Greek;

■ **880** The pope issued the bull *Industriae tuae* by which he took under protection the independent Great Moravian Empire

■ Byzantine writing on Slavonic people: "Slavic tribes are accustomed to freedom and will not let themselves

enslave. They keep open house for foreigners and accompany them as their guests from one place to another, wherever the guests wish. Their way of life is rough, but they are note evil-minded."

■ **~ 889** – Czech lands annexed to the Great Moravian Empire;

■ **~ 906** Magyars invaded Great Moravia from the East, subverted the Empire and settled in Pannonia;

■ **890 -1000** ➔

Dissemination of material and spiritual culture From Great Moravia to Bulgaria, Czech lands (Bořivoj I.- in 882 christened by Archbishop Methodius), to the Yugoslav nations and to Kievan Rus.

Methodius' followers spreading culture and literature: Climent in Ohrid, Sava, Naum, Gorazd.

Centres of Slavic culture after Great Moravia: Prague, Kiev, Cracow, Novgorod, Ohrid. In Bulgaria, Methodius is commemorated on 17 July; the Methodius' cult was laid by the Czech king Charles IV.

■ **9th century** – Slovakia and Moravia abounded in spiritual Slavic culture reflecting the maturity of the Byzantine and Western-European letters; it was the basis of the civilisation of Central-European culture (**own state, own writing, own church province, accepted by the Frankish Empire - 884, own books, own liturgical language – Old Slavonic, successful foreign diplomatic policy**).

Central-European civilization area – Great Moravia, the cradle of material and spiritual culture; laid the foundations of a new literary language through which the Slavs got involved in the world cultural course of events throughout Europe. MIKULČICE: palace, 10 churches etc.

Air transport

There are 6 international airports in Slovakia that can be used for both passenger and cargo flights:

- M.R.Štefánik airport Bratislava
- Airport Košice
- Airport Poprad-Tatry
- Airport Sliač
- Airport Piešťany
- Airport Žilina

As the potential of Slovak airports is not yet fully exploited, regular and also irregular connection of Slovakia to Europe and the rest of the world is secured through Vienna Schwechat airport. Schwechat airport is the main international airport of Austria and is only 50 km distant from Bratislava. There is also regular train and bus connection between Bratislava and Schwechat. Another large international airport accessible is Budapest airport, main airport of Hungary, distant 250 km from Bratislava. It is also possible to use airport Ruzyne in Prague that has regular flights to M. R. Štefánik airport in Bratislava.

MicroStep®
spol. s r.o.

COMPLEX CNC CUTTING MACHINES ▶ cutting of sheets, pipes, profiles, domes, elbows
 ■ combination of technologies on one machine ■ wide range of additional accessories
 ■ material flow automation ■ CAPP applications for production management ■ CAM software ■ robotic applications

PLASMA / LASER / OXYFUEL / WATERJET / DRILLING / TAPPING / MARKING

Since its inception in 1991, the company MicroStep, spol. s r. o. has been involved in design and manufacturing of CNC cutting machines equipped with plasma, laser, oxyfuel and waterjet technologies as well as routing and drilling machines. Over the years, the company has become one of the leading suppliers of cutting equipment and has supplied more than 2,200 machines worldwide in cooperation with strong channel partners spread in 54 countries. More than 30 % of the company's products are complex machines which require continuous development and search for new, innovative technical solutions. Today, MicroStep is able to offer the full range of contemporary used cutting technologies along with a great variety of additional equipment and software for drilling, tapping, countersinking, laser marking, inkjet marking, microprecision marking, process synchronization (scanners, CCD cameras) and material handling. As a producer of not only machine mechanics but also control systems and CAM software the company delivers solutions that perfectly fit actual customers' demands and are future-proof with respect to machine extensions in size and additional technologies.

Moreover, MicroStep machines can process several types of material including sheets, pipes, profiles, domes and elbows while implementing advanced processes such as automatic welding seam preparation. All of MicroStep's machines are operated by iMSNC®, a multi-tasking PC-based control system developed and produced in-house.

Our goal is to provide solutions that improve everyday job in the factories – they assure higher precision, minimize downtimes, as-

sure more convenient and more effective operation and easier maintenance.

We achieve this through higher automation levels, interconnection of control systems, CAM software and ERP systems at customer's site (our production management software MPM has already found its application in several enterprises in Europe and Asia – either integrated into customer's ERP system or standalone), and through development of more sophisticated equipment. And our customers obviously agree: e.g. our patent pending technology ACTG – a system that reduces the setup time of bevel head from hours to a couple of minutes – has already been delivered with more than 250 systems and is proving its high relevancy in daily operations worldwide.

The cutting equipment is going through a massive change worldwide. New systems bring new possibilities to cutting processes so there is a continuous need for integration of these technologies into CNC machines. This puts new demands on machine mechanics and controls. Thanks to the continuous effective R&D in the fields of new mechanical components, electronic modules and control systems software, MicroStep has been able to adapt quickly on the new trends. In addition to our own R&D base we work closely with departments of the Slovak Technical University in Bratislava and the Institute of Materials & Machine Mechanics of the Slovak Academy of Sciences on utilization of latest achievements in design and control of machinery. Thanks to our constant search for innovations we have quickly become a valued partner for many renowned suppliers.

SETTING THE STANDARD

SPINEA
EXCELLENCE IN MOTION

Thanks to their revolutionary technical design and excellent properties, the TwinSpin reduction gears have become products demanded by the global leaders in every field in which precision down to hundredths or thousandths of a millimetre is required.

Vďaka prevratnému technickému riešeniu a vynikajúcim vlastnostiam sa stali reduktory TwinSpin žiadaným artiklom svetových lídrov v každej oblasti, kde sa vyžaduje presnosť na stotiny či tisíciny milimetra.

VILLA MERIBEL
VYSOKÉ TATRY

The Art Nouveau Villa Meribel was originally built by a famous Budapest prosecutor László Magyari in 1894 in time of the so-called “**Belle époque**” meaning the “**Beautiful Time**”, and it is experiencing a renaissance after 122 years, having underwent particularly delicate renovation, whilst preserving the original heritage features. The extraordinary villa is situated in the heart of High Tatras, in the center of Tatranska Lomnica, near the cable car to the Skalnaté Pleso and Lomnica Peak and the ski area. Villa offers 9 magnificent spacious apartments – suites on three floors. A high level of comfort is enhanced by a car park in front of the villa and by a ski room with a modern equipment. The ethereal private wellness Meribel oasis will meet your expectations. The Finnish sauna with ice bucket, steam bath and Jacuzzi provide for a delight in well-being and relax.

is a family hotel located in a beautiful environment of the Low Tatras mountains at the south side of the Chopok peak.

Currently, the hotel is being run by Kič family who transformed it into a successful Wellness & Congress resort in the spirit of the motto "Hotel in the Forest, Forest in the Hotel". We provide accommodation, gastronomy, wellness and sport services at the highest level. Hotel Partizán is ranked among the hotels with the most hotel services in Slovakia and is well known for its effort to surprise hotel guests with something new every single time.

It is always our utmost priority to fulfil all your expectations and we sincerely hope that your stay at our hotel will be a pleasant experience.

www.partizan.sk/en

is situated in the heart of nature and offers great opportunities for sport activities.

It is a nice place not only for family holiday but also for company events, including teambuilding activities and family reunions or weddings. If you are looking for an active rest and pleasant atmosphere, visit Hotel Mýto***.

We are looking forward to your visit.

Slovak University of Technology in Bratislava

Vazovova 5, 812 43 Bratislava
Slovak Republic
www.stuba.sk

UNIVERSITY PROFILE

The Slovak University of Technology in Bratislava (STU), the largest and most significant university of technology in the Slovak Republic, is a modern European educational and research institution. It offers university education mainly in technical, technological, technical-economic, technical-information and technical-artistic fields of study. Its activities reach back to the rich old tradition of the Mining

Academy in Banská Štiavnica, established by the Empress Maria Theresa in 1762.

Our education system is based on scientific research, as well as on artistic, engineering and other creative activities. The STU faculties, departments, institutes and experts cooperate directly with industrial companies and social organisations, actively taking part in international cooperation.

FACTS AND FIGURES

Number of faculties / university institutes	7 / 1	Number of study programmes in the Slovak language	233 (B: 56, M: 62, D: 115)*
Graduates during its existence	151 300	Number of study programmes in the English language	11 (B: 6, M: 3, D: 2)*
Number of students	14 300	Number of national research projects	482
Number of trainees for lifelong learning	5 815	Number of international projects – Research projects – Educational projects	104 64 40
Number of teaching and research staff – Teaching staff – Research staff	1 543 1 118 425	Number of industrial contracts	1057
		Number of institutions/countries in international cooperation	299 / 47

* B: Bachelor, M: Master, D: Doctoral level

THE STU - FACULTIES AND UNIVERSITY CENTRES

Faculty of Civil Engineering (SvF)

Areas of activities: building constructions, building environment technology, construction technologies, environment protection constructions, geodesy and cartography, land constructions, transportation constructions, mathematical-computational modelling, water constructions and water systems

<http://www.svf.stuba.sk/>

Faculty of Mechanical Engineering (SJF)

Areas of activities: applied mechanics, automation, chemical and food machines and devices, engineering technologies and materials, environmental technology, fluid, thermal, hydraulic and production machinery, mechatronics, meteorology, production quality systems, traffic engineering

<http://www.sjf.stuba.sk/>

Faculty of Electrical Engineering and Information Technology (FEI)

Areas of activities: automation and management, electrical and heavy current power engineering, electronics, engineering for power materials, informatics, photonics, physics, telecommunications

<http://www.fei.stuba.sk/>

Faculty of Chemical and Food Technology (FCHPT)

Areas of activities: biotechnologies, chemical engineering, environmental engineering, food chemistry and technologies, fuels and polymers, inorganic and organic technologies, inorganic, organic, analytical and physical chemistry

<http://www.fchpt.stuba.sk/>

Faculty of Architecture (FA)

Areas of activities: architecture and urban development, landscape and garden architecture, product design

<http://www.fa.stuba.sk/>

Faculty of Materials Science and Technology in Trnava (MTF)

Areas of activities: applied informatics and automation, industrial management, material engineering, processing and application of non-metals, production machinery and systems, production technologies

<http://www.mtf.stuba.sk/>

Faculty of Informatics and Information Technologies (FIIT)

Areas of activities: computer engineering, data mining, informatics, information systems, security, software engineering, web ontology

<http://www.fiit.stuba.sk/>

Institute of Management (UM)

Areas of activities: business management, entrepreneurship education, industrial economy, urban planning

<http://www.um.stuba.sk/>

STUDY SYSTEM AT THE STU

The University offers study within accredited study programmes, in degree courses leading to Bachelor's, Engineer's, Master's, and Doctoral degrees. The credit system is compatible with the ECTS (European Credit Transfer System under the Bologna Declaration of the ministers of EU coun-

tries), enabling the bilateral student mobility in EU countries' universities, as well as within the framework of the broader European and world-wide area. The STU has been an ECTS label holder since 2012.

The system of education is connected with the prestigious partner universities in the framework of international programmes (Erasmus+) using modern methods of education, laboratories and

practical training. It is aimed at branches of study that offer stable opportunities for students' employment in the labour market. Teaching takes place in modern classrooms furnished with the top laboratory and programming equipment.

STUDY PROGRAMMES AT THE STU IN ENGLISH LANGUAGE

The STU offers university education in the English language mainly in technical, technological, technical-economic, technical-information and in the technical-artistic fields of study. Study programmes are updated for each academic year.

Detailed information with description of study programmes, course structure, key learning outcomes and programme directors can be found at:

<https://lnk.sk/hoDH>

SERVICES FOR STUDENTS

- well-equipped libraries and study rooms featuring
- over 400,000 library units,
- 7 dormitories with a capacity for 5,900 students
- free Internet access
- online access to international databases
- canteens and buffets in student dorms and faculty premises
- basic medical care in student dorms
- sport facilities (sport centres, playgrounds, fitness centers
- and swimming pools)

APPLIED RESEARCH AT STU

<https://lnk.sk/NTX1>

Applied Research and Development in ICT

Priority research fields are as follows:

Optimization of electronic services – virtual computing environment for data processing and electronic services – Cloud computing and analysis of extensive data including methods for data-mining and process-mining; Coordinator: Prof. RNDr. Gabriel Juhás, PhD.

Collaborative programming in hierarchical teams including collaboration at a distance; Coordinator: Prof. Ing. Pavol Návrát, PhD.

Design and evaluation of user characteristics of software applications in terminal devices including mobile devices based on detailed recording and analysis of user's behavior of information systems and their further processing; Coordinator: Prof. Ing. Mária Bielíková, PhD.

Mobile and fixed networks based on LTE, DVB and IP standards, applications for mobile and multimedia networks and systems; Coordinator: Prof. Ing. Ivan Baroňák, PhD.

Computer vision, computer graphics and interactive computer technologies, data visualization methods in 3D space, new methods of user interaction with the computer; Coordinator: doc. Ing. Pavel Čičák, PhD.

Design and testing of built-in systems on various platforms; Coordinator: Prof. Ing. Ján Murgaš, PhD.

Modeling of objects and phenomena in space, new methods of digital image processing and data visualization; Coordinator: Prof. academic sculptor Peter Paliatka

Applied Research and Development in the Field of Electrical Technology Engineering

Research areas are mainly as follows:

Preparation, characterization and optimization of micro/nano-electronic structures and systems, mainly based on organic materials for applications in sensorics and photonics; Coordinator: Prof. Ing. Daniel Donoval, DrSc.

Electrical Energy – Questions of stability and safety of power systems, measures in terms of installation of new energy sources, implementation of smart technologies into power systems, photovoltaic structures and systems for efficient utilization of solar energy, dielectric and insulation systems in electrical energy; Coordinator: Prof. Ing. František Janiček, PhD.

Electrical technology and new construction materials for applications in new nuclear-power and nuclear facilities (fusion reactor, HTR reactors, and accelerators); computer modeling focusing on nuclear energy and technology; Coordinator: Prof. Ing. Vladimír Slugeň, DrSc.

Development of new testing and measuring methods of microwave, optical sensor and communication systems for practical applications; Coordinator: Prof. Ing. Viktor Smieško, PhD.

Applied Research and Development in the Field of Industrial Biotechnology

Development of new production strains of microorganisms and enzymes and their use in biocatalysis; Coordinator: Prof. Ing. Michal Rosenberg, PhD.

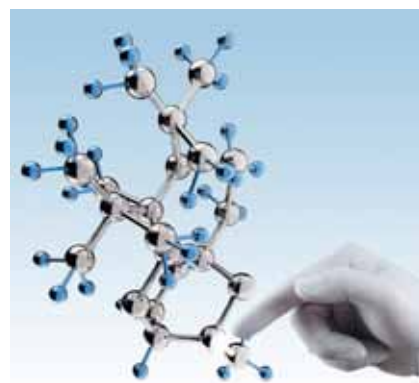

Biocatalysis and biotransformation of products, such as chemical specialities, flavors, food and feed additives, culture for bioremediation, enzymes for organic synthesis, biopolymers, etc.; Coordinator: doc. Ing. Milan Polakovič, PhD.

Development of new progressive biomaterials and structural analysis of biomaterials; Coordinator: Prof. Ing. Ján Híveš, PhD.

Applied Research and Development in the Field of Chemical Engineering

Research and development of new materials with specific properties (especially aluminum-based materials); Coordinator: Prof. Ing. Ján Híveš, PhD.

Research and development of technological and material use of biomass; Coordinator: Prof. Ing. Ľudovít Jelemenský, PhD.

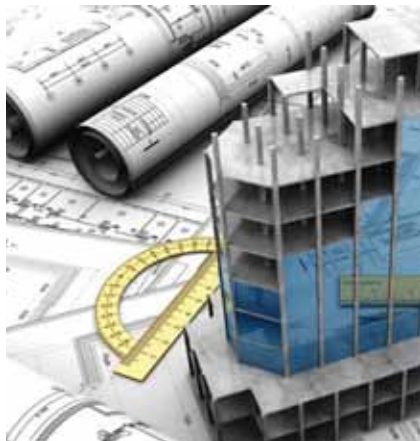

Research and development in the field of control and management of chemical processes; Coordinator: Prof. Ing. Miroslav Fikar, DrSc.

Research and development in the field of advanced technologies focused on environmental aspects of chemical technologies / green chemistry (new technologies for waste water treatment, new separation technologies and waste processing); Coordinator: Prof. Ing. Miloslav Drtíl, PhD.

Applied Research and Development in the Field of Civil Engineering

A Regional Center for Research of Safety and Reliability of Structures is created within Science Park of the Slovak University of Technology in Bratislava as a competence center for applied research and development and technology transfer in the field of research of physical and chemical characteristics of civil structures and materials, structural and dynamics analysis of support structures, buildings for area protection and monitoring, building and phenomena modeling in space.

Systems for improving structural and environmental quality of buildings; *Coordinator: prof. Ing. Anton Puškár, PhD.*

Design methods of skeletons in extreme situations; *Coordinator: prof. Ing. Juraj Králik, PhD.*

Materials for progressive civil structures and low-energy civil engineering; *Coordinator: prof. Ing. Mikuláš Šveda, PhD.*

Integrated management of water sources in the conditions of the global changes; *Coordinator: prof. Ing. Andrej Šoltész, PhD.*

Methods of geodetic monitoring and modeling of buildings and phenomena on surface; *Coordinator: prof. Ing. Ján Hefty, PhD.*

Applied Research in the Centre of Materials Research – Slovakia

Aims of the Centre

Aim of Centre of Materials Research - Slovakia is the integration of high-end ion technologies into the STU research facility. The activities of the centre are equally utilised for the purposes of both in-house and external research and in a wide scale of services oriented on the support in research, development and technology transfer of new materials, nanostructures, surface functions using plasma and ion technologies into production processes for external industrial and other users in a broad range of applications.

Centre of Materials Research – Slovakia carries out basic and applied research in the areas of materials science as well as modification and analysis of solid surfaces using ion beams.

The effect of ion bombardment on the generation and modification of thin films is studied experimentally and by using computer simulation. In addition to the relationships between structure and properties, the research is focused on various possible applications.

An important component of the research and development of new thin film systems is the use of low-energy ions and the use of pulsed plasma for generating metastable phases, high film densities, extraordinary adhesion of films, nanostructures or special textures.

A closed cooperation and interaction with industrial partners is focused on the technology transfer of modern ion technologies and the development of high-tech equipment in the field. *Coordinator: doc. Ing. Maximilán Strémy, PhD.*

Applied research in the Centre of Automation and Informatisation

The scientific workplace of **Automation and ICT Implementation of Production Processes and Systems (AIVPS)**, as a flexible system of automated technological control and production systems will enable the optimisation of the technological and production processes depending on the real needs of the entrepreneurial practice.

Laboratories of the Centre:

Laboratory of control SYSTEMs

The laboratory of control systems represents the lowest management level of production and technological processes. It includes the collection and processing of technological process information, as well as the control of algorithms through programmable logic controllers and industrial controllers which are able to communicate

with the master system at a higher level.
Departments of the laboratory:

- A/ Research workplace of complex processes**
- B/ Research workplace of development and design of control systems**
- C/ Research workplace of simulation of technological processes**

Laboratory of iCIM

The specialised laboratory will cover technology and the visualisation level of corporate governance. The laboratory and its offices will be connected not only with each other but also with the master system and the level of corporate governance. The laboratory designed in this way will provide space for research and development in a wide range of hardware, communication and management of automated software tools, knowledge-based systems, archiving and distribution of knowledge to higher-level systems.

Laboratory of the information and control systems integration

The laboratory serves as an integrated information system at the enterprise management level.

A project component is the implementation providing mutual collaboration and inter-connection of individual laboratory modules and integration between the ERP and ECM systems. *Coordinator: Dr.h.c., prof. h. c., prof. Dr. Ing. Oliver Moravčík*

PROMOTION OF TECHNOLOGY AND KNOWLEDGE TRANSFER INTO PRACTICE

Innovations through Promotion of Start-up and Spin-off Projects

Coordinator: Ing. Lenka Bednárová, PhD.
Responsible for the activity, Director of the University Technology Incubator

More intensive seeking of start-up and spin-off projects:

STU has experience with promotion of promising start-up projects. Over the last 8 years more than 40 fresh companies have been supported by the University Technology Incubator, which was established in 2005. The incubator's activity will

be more efficient; it will be situated directly in the University Science Park in close contact with the students and university employees.

Education and promotion when establishing new companies:

The incubator will provide support and guidance for the students and employees establishing start-up/spinoff companies and developing innovative companies.

Promotion of Technology and Knowledge Transfer into Practice

Coordinator: Ing. Milan Belko, PhD., Responsible for the activity.

A Center for Technology Transfer (CTT) is established:

The Center will map technologies, procedures, innovative solutions in university environment, monitor market requirements, identify commercial partners, and evaluate the commercial potential of technology. The Center also maintains a database of intellectual property items for licensing and present research results with commercial potential to interested persons from the industrial field.

Promotion of the Use of Intellectual Property Rights

Slovak University of Technology in Bratislava established a Center for Intellectual Property Protection (CIPP). The center's function is to register items of intellectual property; assist with contracts and licenses drafting and assist to researchers and staff of university at negotiations with commercial partners. *Coordinator: JUDr. Lucia Rybanská*

UNIVERSITY OF ŽILINA

www.uniza.sk

The University of Žilina was established on 1 September 1953 by the separation from the Czech College of Technology in Prague as the nationwide College of Railway Transport. In 1960 as College of Transport was relocated from Prague to Žilina. Its name has been changed several times (College of Transport, College of Transport and Communication) and its profile extended by many areas of science, technology, economics, management and also by natural and social sciences. It is unique in Slovakia as it has a long tradition of providing education in the fields of transport and communications. It is situated in a unique area of the university campus in Veľký Diel. The University of Žilina provides education at all three levels of higher education both in full-time and part-time forms in more than 200 accredited study programmes. Over the last 64 years more than 72 000 students have graduated from the university; more than 2 000 of them have been awarded the PhD. degree. Currently, there are 8 200 students studying at the university. Research teams of faculties and institutes solve problems of basic and applied research on the national and international levels in compliance with the profile of the university. Almost 800 scientists solve not only tasks belonging to the Slovak or international grant systems but also

tasks directly implemented in conditions of engineering industry. Thanks to the structural funds in the total 13 university application research centres, a university science park and a research centre have been established. Annual research capacity of the University of Žilina is over 1 million hours.

More information is given at
www.uniza.sk

FACULTY OF OPERATION AND ECONOMICS OF TRANSPORT AND COMMUNICATIONS

The Faculty is the only one in Slovakia which provides comprehensive higher education in the field of Operation and Economics of Transport and Communications. The primary mission of the Faculty of Operation and Economics of Transport and Communications is to provide higher education and creative scientific research in the field of transport technology, economics, logistics, mail services and electronic communications. Each year, the faculty is evaluated by the academic ranking and rating agencies and it is regularly ranked in the Top Tier. Faculty provides university education within the 25 ac-

credited programs. Study programs are provided in full-time and part-time reflect the actual needs of domestic and foreign labor market.

The Faculty of Operation and Economics of Transport and Communications consists of the following 7 departments:

- Dept. of Railway Transport
- Dept. of Road and Urban Transport
- Dept. of Air Transport
- Dept. of Water Transport
- Dept. of Communications
- Dept. of Economics
- Dept. of Quantitative Methods and Economic Informatics

More information is given at
www.fpedas.uniza.sk

FACULTY OF MECHANICAL ENGINEERING

The Faculty of Mechanical Engineering of the University of Žilina provides university level technical education, building atop its research and development activities as well as its wide cooperation with national and international industry. The principal goal of the faculty is to provide means for research and development of scientific knowledge and education focusing mainly on the sphere of mechanical engineering, and on technically-oriented disciplines in general.

The Faculty of Mechanical Engineering maintains a long tradition of research and pedagogy within the sphere of mechanical engineering, especially in research concerning parameters of structures and

machines, of their operation and maintenance, new technologies and materials. The goals of the educational activities include efficient education supported by information and communication technologies for all three levels of university study (B.Sc., M.Sc., Ph.D.), continuing education and distance education in all spheres in which the faculty specializes, implementation of new content and forms of education, laying special emphasis on firm basics of natural science, expansion into new spheres, which are eventually becoming more perspective, wider education in foreign languages and becoming more open to foreign students.

The Faculty provides education in 7 Bachelor study programs: Computer Design and Simulation, Mechanical Engineering Technologies, Energy and Environmental Technology, Industrial Engineering, Vehicles and Engines, Materials and Technologies in Automobile Production, Mechanical Engineering,

11 Master study programs: Automated Production Systems, Machining and Bearing Production, Computer Aided Design and Simulations in Mechanical Engineering, Mechanical Engineering Technologies, Industrial Materials, Machines and Equipment Design, Industrial Engineering and Management, Environmental Technique, Vehicle Maintenance, Vehicles and Engines, Mechanical Engineering,

8 Doctoral study programs: Automated Production Systems, Mechanical Engineering Technologies, Industrial Materials, Machine Parts and Mechanisms, Computer Aided Design and Machine

Mechanics, Energy Machines and Equipment, Rail Vehicles, Industrial Engineering and Management.

More information is given at
www.fstroj.uniza.sk

FACULTY OF ELECTRICAL ENGINEERING

The Faculty of Electrical Engineering of the University of Žilina is one of the leading engineering faculties in Slovakia. The research and innovation activities are strongly focused on Intelligent Transport Systems, Intelligent Power Electrical Systems, Smart Energy Grids, Biomedical Engineering, Robotics, Photonics, Safety Systems, Material Technologies, Structural Health Monitoring and Information and Communication Technologies. The

activities flexibly reflect long tradition of the faculty in line with the worldwide trends in these fields. Annual research capacity of nearly 135 000 hours, highly experienced human resources and large recent investments into modern research and innovation infrastructure counting for several M€ form unique environment for creativity and novel ideas. The faculty is very active and quite successful in acquiring resources for supporting research and innovation activities from national and European competitive resources. Successful cooperation with industrial partners and other actors forming innovation chain is one the cornerstones for the faculty progress.

The faculty provides quality education with high added value in 7 bachelor, 9 master and 6 doctoral study programmes covering wide range of traditional low and high power electrical engineering including information, communication and control technologies as well as new and interdisciplinary fields such as biomedical engineering, robotics, telematics and photonics. Recent technological developments are effectively transformed into education process in order to provide students with the state of art knowledge for increasing their potential and competitiveness in the labour market.

More information is given at
www.fel.uniza.sk or can be provided based on request sent to:
sekrdek@fel.uniza.sk.

The Faculty of Electrical Engineering is your reliable, creative, progressive, competitive and flexible partner in research, innovation and education activities.

FACULTY OF CIVIL ENGINEERING

The Faculty of Civil Engineering of the University of Žilina was established in Prague as a part of the Railway University in October 1-st, 1953. At that time, The Railway University had five faculties; one of them was the Faculty of Civil Engineering. This university was relocated from Prague to Žilina and, contemporaneously, it changed its name to the Technical University of Transport. The Faculty of Transport merged with our faculty and both created the new Faculty of Operation and Economics of Transport in 1961. The new Faculty of Civil Engineering was re-established as an independent subject in 1990.

At present, the faculty includes eight departments, Centre of Excellence for Transportation Constructions, Centre for Applied Research and Accredited laboratory. Faculty prepares specialists for the area of structural and transportation engineering, buildings and technology and construction management.

The Faculty has finished the complex accreditation and has obtained rights to provide education in 4 Bachelor's study programs: Geodesy and Cartography, Buildings, Civil Engineering (study in Slovak or English language) and Technology and Construction Management; 8 Master's study programs: Bearing Structures of Buildings, Buildings, Engineering Structures and Transport Constructions, Transport Infrastructure Planning, Technology and Management of Constructions, Roadway Engineering, Civil Engineering Structures, Railway Engineering and 4 doctoral study programs: Theory and Structures of Buildings, Theory and Structures of Engineering Constructions, Applied Mechanics, Technology and Management of Constructions

Recent scientific and research activities are focused to solving theoretical problems of planning, designing, fabrication and rehabilitation of transportation structures and buildings, optimisation of construction technology, experimental and numerical analyses and modelling of structures and processes, computer based numerical simulations, analyses and evaluation of existing structures, determination of remaining lifetime of transportation constructions, decreasing of environmental impacts on outdoor climate, ground and water, energy efficiency of buildings, low energy and passive houses. Significant results have been achieved in theoretical analyses, measuring and diagnostics of transportation structures subjected to dynamic loading.

The international research activities of the faculty have been focused to the European Union research projects of the 5th, 6th and 7th Framework Programme (FP5, FP6, FP7). We participated in two projects of FP5 (INTRANSNET and ECOSERVE). We have coordinated the 6th framework project ETRA.CC (2005-2007) and we have participated at solving the project SPENS, focused to construction of pavements and project ARCHES dealing with the development and application of new composite materials based on carbon and glass fibres.

As far as the mobility activities concern, the faculty participates in particular in the European programme ERASMUS by supporting mobility of students and teachers. Main objective of the Programme is to create a European Higher Education Area and support innovation throughout Europe, which enables the students to complete the entire semester at a similar Faculty in European.

More information is given at
www.svf.uniza.sk

FACULTY OF MANAGEMENT SCIENCE AND INFORMATICS

The Faculty primarily specialises in management of extensive systems which include issues connected with management and optimisation of transfer of products, passengers and information. The departments of the Faculty focus on the design of integrated interactive information systems for decision-making support including economic issues and technical background. They also concentrate on management, information and transport systems of small, medium and large-sized networks. The Faculty's research and educational goals require profound mathematical knowledge. It is therefore important to cover applied mathematics and to design mathematical models as the basis for algorithmic information, decision-making processes and their optimisation.

The Faculty concentrates on the following scientific fields:

- Analysis, synthesis and design of integrated information and control systems;
- Creation of integrated systems for decision-making support including its economic correlations and technical equipment requirements;
- Management, marketing, logistics and enterprising in the field of transport and communication systems;
- Problem solving in transport and communication systems and relative tasks of control;
- Control and optimisation of transport of goods and passengers;

- Control and optimisation of database creation, transmission and data processing;
- Analysis, synthesis and design of multimedia information systems;
- Analysis, synthesis and design of geographical information systems;
- Design and implementation of simulation components for communication networks and systems;
- Design and implementation of technologies for information and control systems;
- Services and architectures of information-communication networks;
- Packet networks performance and modelling.

More information is given at
www.fri.uniza.sk

FACULTY OF SECURITY ENGINEERING

At present the Faculty of Security Engineering of the University of Žilina is a faculty of managerial and technological specialization. It educates specialists with a university degree for the needs of public administration, rescue and security systems and entrepreneurial subjects in the field of crisis management with emphasis on the protection of the population, economy and environment.

The basic role of the faculty is to provide university education in accredited study programmes of bachelor, engineering and postgraduate studies; to promulgate knowledge by means of creative scientific research in the field of crisis management and to implement continuing education that is related to its accredited study programmes. Bachelor, engineering and postgraduate study programmes are realized in full-time or part-time forms of study

The educational and scientific-research activity at the FSE UNIZA is realized by departments and by other research and educational workplaces.

Study Programmes:

- Crisis management
- Emergency services
- Security management
- Critical infrastructure

Specialised workplaces at FSE UNIZA:

- Centre of crisis event simulations
- Department of Security and Safety Research
- Fire-chemical laboratory
- Student information centre
- Laboratory of crisis management
- Laboratory of crisis transportation protection

Activities of FSE towards students:

Motivation scholarships, Studies and apprenticeships abroad (1-2 semesters), Firefighting sport, Faculty ball, Lectures from industry experts, Excursions, Life-long education courses (H&S, PSA, ADR...), Involvement in research projects, Job workshop, Faculty sport's day, Shooting practice, FSE Alumni club, FSE donates blood.

More information is given at
www.fbi.uniza.sk

FACULTY OF HUMANITIES

Faculty of Humanities was established in August 1998 as the Faculty of Science and became the youngest faculty of the University of Žilina. The profile of the faculty has been gradually transformed, departments of social sciences and humanities were established and the spectrum of offered study programmes enabling students to find jobs on the European labour market was extended.

At the moment, there are five departments at the Faculty of Humanities:

- Department of English Language and Literature
- Department of Mediamatics and Cultural Heritage
- Department of Music
- Department of Pedagogical Studies
- Department of Philosophy and Religious Studies

In addition, the faculty also offers a supplementary course of pedagogical studies for university students and graduates and further education for teachers of elementary and secondary schools.

At present the **following study programmes are running** at the faculty:

- Mediamatics and Cultural Heritage
- Teaching of subjects (joint honours programmes):
 - English Language and Literature
 - Citizenship Education
 - Mathematics
 - Religious Studies
 - Musical Arts
- Teaching of Citizenship Education

The mission of the Faculty of Humanities is to develop and support education, science and research in the perspective of humanities and their traditions, and through a wider range of humanities contribute to the credit of the University of Žilina as a high quality research university.

New study programme Intercultural and Interreligious Communication and Mediation will be offered in the near future. Other study programmes concerning the fields of teacher training education and humanities are in the process of finalization.

More information can be found at
www.fhv.uniza.sk

The Faculty of Medicine of Comenius University

is an internationally recognised and sought-after scientific and research institution offering study programmes in general medicine and dentistry.

www.fmed.uniba.sk

The Faculty of Law of Comenius University

is the biggest faculty of law in Slovakia and is the country's most advanced centre for legal studies and education in the law.

www.flaw.uniba.sk

The Faculty of Arts of Comenius University

trains professionals in the humanities, social sciences and philological studies. Several of its study programmes are unique in Slovakia.

www.fphil.uniba.sk

The Faculty of Natural Sciences of Comenius University

is the biggest faculty of natural sciences in Slovakia, providing study programmes in the fields of biology, chemistry, geology, geography, land use and conservation, environmental management and the teaching of natural sciences.

www.fns.uniba.sk

The Faculty of Education of Comenius University

trains pedagogues and teaches professionals for their careers in schools and social services. The faculty also engages in the development of study programmes as well as science and research in pedagogy, humanities and social sciences.

www.fedu.uniba.sk

The Faculty of Pharmacy of Comenius University

is the only faculty of its kind in Slovakia that trains future specialists on medicaments by integrating knowledge from several disciplines such as natural sciences, medicine and pharmaceutical sciences.

www.fpharm.uniba.sk

The Faculty of Physical Education and Sport of Comenius University

is the oldest and only educational institution of its kind in Slovakia that trains highly-qualified specialists for a variety of professions related to physical education and sport.

www.fsport.uniba.sk

The Jessenius Faculty of Medicine of Comenius University,

with its seat in Martin, can boast of its reputation as the best-performing school in the ranking of Slovak universities in the field of medicine and health-care sciences. It offers study programmes in general medicine, dentistry, nursing and also non-medical specialties such as midwifery and public health.

www.jfmed.uniba.sk

The Faculty of Mathematics, Physics and Informatics of Comenius University

is regarded as the best faculty of natural sciences in Slovakia according to the Academic Ranking and Rating Agency. The aim of the faculty is to foster scientific knowledge in the field of mathematics, physics and information sciences.

www.fmph.uniba.sk

The Faculty of Roman Catholic Theology of Cyril and Methodius of Comenius University

is one of the biggest educational institutions in Catholic theology in Slovakia, preparing theologians for their priestly vocations.

www.frcth.uniba.sk

The Evangelical Lutheran Theological Faculty of Comenius University

offers study programmes in Lutheran theology as part of preparation of clergy for the Evangelical Lutheran Church of the Augsburg Confession in Slovakia as well as abroad.

www.fevth.uniba.sk

The Faculty of Management of Comenius University

prepares graduates to excel in their future management positions in governmental institutions or businesses, whether they decide to pursue their careers in Slovakia or abroad. It is the only faculty in Slovakia that has regularly ranked as an Excellent Business School in the evaluation of the independent agency EDUNIVERSAL since 2009.

www.fm.uniba.sk

The Faculty of Social and Economic Sciences of Comenius University

develops and successfully applies theoretical knowledge in the fields of social and political sciences, European studies and international relations, social anthropology, public policies and economics, as well as social and occupational psychology.

www.fses.uniba.sk

COMENIUS UNIVERSITY IN BRATISLAVA

THE BEST PLACE FOR STUDY AND RESEARCH

Comenius University in Bratislava is the oldest and biggest university in the Slovak Republic. Established in 1919, the university draws on the tradition of Academia Istropolitana that was founded in 1465 in Bratislava by Matthias Corvinus, the King of Hungary. Since its founding the university has ranked among the best educational institutions on the national level and it has become an internationally recognised centre of scientific study and research. Being the most comprehensive provider of classical university education in Slovakia, Comenius University has retained the status of the Slovak national university.

Comenius University in Bratislava has 13 faculties and serves 25,000 students each year within all three degree study programmes, 21,000 of whom are full-time students. Comenius University offers diverse study programmes encompassing a broad range of human knowledge – from medicine, humanities and social sciences, to natural sciences, mathematics and theology.

Almost 2,500 international students from 70 countries enjoy studying at the oldest university in Slovakia. Students who wish

to attend foreign universities as part of our study abroad programme can choose from 340 European universities located in 30 countries, all of which have concluded bilateral agreements with Comenius University as part of the Erasmus+ programme. The most visited countries by our students as part of the LLP/ERASMUS programme include Spain, Germany and the Czech Republic.

With almost 2,000 doctoral students, Comenius University in Bratislava is also a major scientific institution. Comenius University participates in the most advanced research projects in various scientific disciplines (primarily biology, biochemistry, chemistry, computer sciences, clinical medicine, ecology, geosciences, materials science and engineering, molecular biology and genetics, neurosciences, pharmacology, physics, life sciences and space sciences). Comenius University also participates in hundreds of domestic and international science and research projects. Comenius University continues to rank among the top 500 of prestigious world university rankings.

COMENIUS UNIVERSITY SCIENCE PARK IN BRATISLAVA

Comenius University Science Park (CUSP) is focused on science and research in fields of:

- **biomedicine,**
- **biotechnology,**
- **enviro-medicine,**
- **and social challenges of the 21st century in matters of bioethics, law and socio-economic rights.**

CUSP serves as a bridge among academic, public, and private/industrial spheres on national and international level. CUSP is located in Mlynská dolina in Bratislava. Around 40% of research outputs in Slovakia are produced in this region.

CU's Science Park uniqueness lies in the combination and availability of the latest advanced technology, top scientists, and practical application of results. To sum it up, CUSP serves as a platform allowing academic research to interact closely with private sector to respond more effectively to public requirements and needs. Accordingly, CUSP focuses on the development and popularization of science and research based on cooperation with various business entities. CUSP currently works on joint research activities with more than 20 companies, where 10 of them have already relocated to CUSP's premises.

CUSP is designed for 149 permanent employees and around 90 external employees – CUSP will offer together nearly **250 jobs**. In addition to scientists and researchers, there is operating and management personnel.

CUSP has about **80 laboratories** dedicated to research activities in fields of biotechnology, molecular biology, genetics, chemistry, microbiology, virology, physiology, ethology, cell biology, plant physiology, environmental medicine and geographical information system for example. In addition, there are few conference rooms of different size available for negotiations, which are equipped with the modern tele-presence system and various technical and security areas (warehouses, IT server rooms etc.).

WHAT KIND OF UNIQUE EQUIPMENT CAN BE FOUND AT CUSP?

- set of unique instruments for molecular medicine, such as Microarray readers, Genome analyzers, DNA scanners, devices for cell incubation and monitoring their growth,
- set of unique instruments for chemical analysis, enabling highly distinctive analysis of molecules,
- set of spectral instruments and optical systems that enable analysis of molecules,
- in the field of environmental medicine, there is a set of top geophysical instruments and systems for the determination of geophysical and geological characteristics of the country.

VISION: TODAY WE DEVELOP YOUR FUTURE.

IMPACTS:

- CUSP primarily serves researchers from Comenius University in Bratislava but also researchers from abroad.
- CUSP will serve as a complex technological, life-sciences oriented spin-off/start up incubator for Comenius University in Bratislava and the private sector.
- Intensive involvement of PhD. students and young researchers.

ACTIVITIES:

BIOMEDICINE FOR THE 21ST CENTURY:

- new diagnostic procedures – genomics, proteomics
- new diagnostic procedures – metabolomics
- new substances and materials for the diagnostics

ENVIRON-MEDICINE FOR THE 21ST CENTURY:

- biotic and abiotic factors of the country and their influence
- geographical information system and environmental health

BIOTECHNOLOGY FOR THE 21ST CENTURY

- design and selection of specific recombinant proteins and peptides with therapeutic potential
- research in phytoremediation and fixation of CO₂ in biomass and practical application of its results

SOCIAL CHALLENGES FOR THE 21ST CENTURY:

- bioethical challenges in cultural framework
- law challenges
- socio-economic challenges

The need of consolidation of market positions of the Farmers and Food Producers is still more and more actual topic not just in Slovakia, but also in EU. It would be good if Slovakia was able to take advantage of this boom. Unfortunately, during last years, we have not done step forward in this direction, but backwards.

Retail chains dominate to the market, which is represented by more than 60 % of food products from foreign countries on the shelves in markets. There is significant absence of legally binding rules to prevent abuse of dominant position of retail chains. It turns out that primary producers should be more involved into marketing organizations and use their synergies to ensure input. Unfortunately, in this respect we are still at the beginning and are not moving into right direction.

It is very important that European Union included the topic of abuse of dominant position of retail chains into the schedule tasks for 2017. This topic belongs to big problems of Slovak farmers and food producers.

The European Union also opened very important discussion about the future of The Common Agricultural Policy 2021-2028. It is forced to drawn into the debate also Slovak farmers and food producers.

Therefore we, as representatives of a self-governmental organisation, but also representatives of Ministry, government and Slovak MEPs, have to do everything to adopt the reform in the most acceptable way.

The public still perceives the Slovak agrifood complex rather negatively - especially as the recipient of large grants. It is necessary to change this and to improve missing Slovak patriotism. It is not enough just to talk about the importance of buying local food, but it also calls for targeted support, and especially long-term sustainable campaign. We have already made intensive preparatory work and we believe, that we will manage to put it into practice soon. We understand, that to be truly successful, we need to get the best possible support.

We started negotiations with several business networks, which will continue. We discuss our internal structures, but also outside them, because the situation is very important. We consider current situation to be alarming. None of our neighbouring countries, that had entered EU at the same time as Slovakia, has such a low percentage of local food sold on the domestic market.

Time will show, whether these negative trends can be changed, or if the Slovak producers will be under pressure to release more space for the import of foreign agricultural and food products. Trade itself admits that there is a potential that could contribute to increasing the representation of domestic agri-food goods in its supply. This is one of the key challenges for our chamber. All efforts would be useless, if there is not local sufficient domestic production available to the market.

Ing. Milan SEMANČÍK
President of the Slovak Agricultural and Food
Chamber

Slovak Chamber of Agriculture and Food (SPPK) represents non-governmental, autonomous and statutory organisation, which was established in line with the Law No. 30/1992 Coll. as amended. The basic role of the Chamber is to enforce the justified common interests of its members, mainly in the process of the agricultural and social policy field. Chamber also takes part in the creation of the state policy concerning the support and protection of its member entrepreneurs to ensure the further development of agricultural production and food processing in the Slovak Republic.

Membership

The members of SPPK are natural and legal entities providing the business activities in agriculture, food industry and in biological, technical and commercial services for agriculture and food processing industry, as well as the other non-governmental organisations operating in the agri-business. The membership in the Chamber is voluntary since January 2005.

Internal organization

Headquarters of SPPK is placed in Bratislava with 15 employees. SPPK also has 38 Regional agricultural and food chambers (RPPK) operating in regions of Slovakia. The "regional" chamber can be established also on the other than just territorial basis. There are also four subjects with the statute of RPPK in accordance to the Statute of SPPK and the Law above. The activities of the Chamber are supervised by the official bodies – the General Assembly, the Board of Directors, the President and the Supervisory board.

Internal Communication

The Chamber is using the wide-spread net of its regional chambers in the whole territory of Slovakia. The central office communicates with the regional chambers using the internet and

emails, but also regular meetings to discuss the actual issues. The Slovak Agricultural and Food Chamber is the only autonomous organisation in the Slovak Republic combining the entrepreneurs operating in agricultural primary production, food processing industry and services for agriculture. SPPK is communicating also to its member associations as well as to the other agricultural autonomous organisations. All the members of SPPK have direct access to the regional office in which they are registered, but also to the central office in Bratislava.

Activities

The Chamber's activities are focused to:

- Lobbying for interests of its members at national and international level
- Legislation – legal sector
- Providing of business information service
- Guidance and education
- Co – operation with the international organizations

Co-operation with national and international partners

The Chamber is cooperating and communicating also with the state bodies accordingly to the conditions set out in the Law and in the Agreement on a Co-operation between the Council of the Agricultural Statutory Undertakers and the Ministry of Agriculture of the Slovak Republic to search for the solutions of the problems in agriculture and food sector. SPPK pays extra attention to development of the international contacts and representatives of the SPPK participate at the regular meetings of the representatives of the agricultural chambers from the "Visegrad four" countries (Slovakia, Czech Republic, Hungary and Poland). The representatives of Chamber cooperate also with other agricultural chambers within the European Union.

Member associations of food processing

SPPK organizes associations of the food processing industry – see below:

Message by the President of the Slovak Chamber of Commerce and Industry

25 years ago, the Slovak Chamber of Commerce and Industry (SOPK/SCCI) began to proudly develop the long tradition of the chambers of commerce and industry within the territory of the present-day Slovak Republic. Since its establishment in 1992, it has become the most representative association of the business sphere in Slovakia. It has managed to create an effective regional structure ensuring daily services to businesses. Its highly professional staff members are able to respond to the requirements of the Chamber members. The SCCI Arbitration Court has long been the most respected place of arbitration in the Slovak Republic.

The SCCI's international position reaches far beyond the status of the Slovak economy in the European and global dimensions. The SCCI holds a leadership position in the International Chamber of Commerce and in the World Chambers Federation. It plays a key role within the Eurochambers European Association of Chambers of Commerce and Industry and the Silk Road Chamber of International Commerce. Its social mission and level are recognised and appreciated more abroad than at home. But this is a Slovak specificity: not to be proud of ourselves.

During its 25-year long work, the SCCI has always been able to respond to the fundamental social and economic challenges of our country.

During the initial period, it was mainly the handling of the economic transition process and clear support to processes resulting in the independence and establishment of a new state within the economic and international context. It was also the handling of the process of succession of the former Czechoslovak Chamber of Commerce and Industry (ČSOPK) in all areas which were of outmost importance for the Slovak Republic since 01 January 1992, such as the certification agenda, the arbitration proceedings or the international recognition of arbitration decisions. The SCCI President played a key role as Chief Negotiator of the Government of the Slovak Republic with respect to the Association Agreement which opened the way to Slovakia's entry in the European Union. Since its very establishment, the Slovak Chamber of Commerce and Industry has also been a clear advocate of the rule of law and transparency in the economic reconstruction, as a result of which it came into conflicts with the former ruling power. This relationship culminated with the cancellation of mandatory membership in the chamber and in the efforts to neutralise it. Most member companies, however, clearly appreciated the principled stance of the SCCI management, and thanks to their support the chamber managed the process of its internal transformation. The SCCI also played an important role in the process of Slovakia's accession to the OECD. It created the Slovak BIAC Committee at the OECD, which significantly helped the integration into this prestigious international institution.

The preparation of Slovakia's entry in the European Union was the key priority for the entire structure of the Slovak Chamber of Commerce and Industry for several years. Whether it was the specific preparation of businesses for the different segments of the EU's internal market by means of seminars, publications or special helplines, close co-operation with the Slovak Government,

or the establishment of the Economic and Social Committee of the Slovak Republic chaired by the SCCI, all this contributed to the successful implementation of the European Union requirements and smooth integration of the Slovak economy into the EU's internal market.

An equally important challenge was the introduction of the euro as national currency. Here again, the SCCI played a key role amongst all business institutions with respect to the communication with the Government and entrepreneurs during the period of the preparation and the launch of the new currency. This position was proven by the fact that the Slovak Government appointed the SCCI President to chair the Price Council of the Slovak Republic, the task of which was to prevent unjustified price increases before the introduction and during the first year after the introduction of the euro currency.

In addition to its standard functions, the Chamber focuses mainly on ethics in business. Being aware of the fact that ethical entrepreneurship is only possible in an ethical and transparent environment, we were one of the initiators and signatories of the declaration on the "Rule of Law", which was adopted by the Government as its action programme in 2015. The SCCI considers it important to develop this programme into new areas and make a major shift in the field of ethics, fight against corruption and increased personal accountability at the level of society.

The SCCI management is entering in its new five-year term with a firm resolution to further work as a stable representative of the business sphere that produces values and promotes the material and intellectual development of the Slovak society. We will place considerable emphasis on the fact that only a business-friendly climate in Slovakia will create the prerequisites for fulfilling the basic functions of the state in the field of social care, health-care, education, culture, international relations or defence. The support of entrepreneurship vis-à-vis daily confrontation with the international competition must become the fundamental interest of each political representation.

We will react efficiently and strategically to the international development dynamics and its effects on the Slovak Republic with special regard of the developments within the European Union, which are fundamental when it comes to their impacts on our economic and social situation. The sustainability of the development and quality of life, the challenges in the field of digitisation and the development of new economic and industrial activities, as well as reactions to the new growth barriers of the Slovak economy mainly in the field of education, labour force quality and structure will be on our daily agenda.

Peter MIHÓK
Chairman of the ICC World Chambers Federation
President of the Slovak Chamber of Commerce and Industry

1992 – 2017

BRIDGE TO THE WORLD OF BUSINESS

Dear Partners,

Your decision to do business in Slovakia is a wise one. The Slovak Republic is well known for its high level of culture, qualified workforce, advantageous geographical position in the centre of Europe on the border between the West and the East, favourable taxation system, and extensive transport communication network. To do business in Slovakia means to hold a stake in the expansion of a region which, in the future, will have increasing significance for European trade and prosperity. Your investments and personal effort will therefore soon be rewarded with a fast return and high profit. During the course of your business activities, you will often need help and advice from someone who is familiar with this environment and who has been active in it from the very beginning. That is why the Slovak Chamber of Commerce and Industry (SCCI) wants to be your first point of contact and your partner when entering Slovakia. The SCCI is an independent public and legal institution which, in a similar way to the Chamber of Commerce in your home country, provides a full range of services to its members and other domestic business groups, as well as interested parties from abroad.

We will provide you with valuable contacts!

Some things that the SCCI will arrange for you:

- ✓ contacts with domestic businesses
- ✓ contacts with professionally-oriented sections
- ✓ finding suppliers
- ✓ finding manufacturers
- ✓ finding importers
- ✓ finding companies suitable for joint ventures and acquisitions
- ✓ the corporate profiles of companies and institutions
- ✓ in the event of your visit, recommendations and the organisation of meetings, including secretarial services, accommodation, transport, etc.
- ✓ advertising in the SCCI newsletter, which is distributed to all SCCI members, as well as foreign consular offices in the Slovak Republic, consular offices of the Slovak Republic abroad, representative offices of foreign companies in Slovakia, government institutions, and Slovak businesses.

We will prepare the ground for you!

For your trade mission in the Slovak Republic, the SCCI will arrange:

- ✓ meetings with Slovak businesses
- ✓ a comprehensive programme for mission participants (accommodation, transport, cultural programmes, and other services on request)
- ✓ background information required for negotiations

We will meet all your needs!

For seminars, lectures, or training the SCCI offers:

- ✓ the attendance of Slovak participants
- ✓ a venue, including the necessary equipment (audio-video), translations, and refreshments
- ✓ advertising, invitations, and media publicity
- ✓ accommodation, transport, and transfers

We will introduce you to a specific environment!

In addition, upon request, the SCCI can arrange:

- ✓ marketing studies
- ✓ statistical overviews
- ✓ consultations on legal, financial, taxation, and customs matters
- ✓ information on business conditions and opportunities
- ✓ translations of acts, rules, and regulations
- ✓ information on import regulations (limits, quotas, restrictions, and certifications)
- ✓ participation at exhibitions and trade fairs
- ✓ information about options and conditions for investing, capital investment, and private ownership in the Slovak Republic
- ✓ interpreting and translation services
- ✓ other services upon request

Arbitration Court

The Arbitration Court of the SCCI is an independent body that also offers its services to you. It resolves property claims between entrepreneurs arising from business and economic relations. It realises consultation and advisory activities to settle such claims.

Information on investment conditions in the Slovak Republic is available in all offices of the SCCI.

The Region of Banská Bystrica

Number of inhabitants:	653 024
Area:	
– Total:	9 454 km ²
– Forests and woodland (%)	49 %
– Agricultural land (%)	44 %
Protected area (%)	34,82 %
Population density (people per km ²)	69
Urban population:	53 %
Number of municipalities:	516

The Banská Bystrica Region lies in the southern part of central Slovakia. It is the largest self-governing region in Slovakia. It borders Žilina Region in the north, Prešov Region in the north-east, Košice Region in the east and Hungary in the south. Primarily due to its terrain, which is mostly covered by forests and agricultural land, the population density in the region is the lowest in Slovakia. There are 516 municipalities in its territory, out of which 24 are towns. The residential structure is represented by all settlement formations from medium-sized towns through small towns, rural municipalities to scattered provincial settlements. The capital of the region is the city of Banská Bystrica with approximately 77 000 inhabitants.

The Banská Bystrica Region territory belongs to the top regions from the perspective of the country and nature surroundings, in some cases even in the international scale. There are five national parks located in the Banská Bystrica region, either fully or partially. These are the Low Tatras, Veľká Fatra, Muránska Planina (plateau), the Slovak Paradise and the Slovak Karst (the UNESCO Biosphere Reserve). There are also protected landscape areas of Cerová Vrchovina (highlands), Poľana (UNESCO Biosphere Reserve), Ponitrie and the Štiavnica Mountains, national nature preserves and a great number of protected areas, localities and objects with lower rate of protection.

The road system consists of 3.203 km of roads out of which 639 km are 1st class roads and 119 km expressways and feeders. There are two important transportation routes crossing the

Banská Bystrica Region. The north-south transit route marked within the European road system as E 77 /Varšava-Krakow-Banská Bystrica-Zvolen-Šahy-Budapešť/ and west-east marked as E 571 /Bratislava-Košice/. Currently there are ongoing state investments in construction of the expressway R2.

Two railway lines crossing the region territory connect the south of Slovakia with north and west with east on the routes: Bratislava – Zvolen – Košice - Čierna nad Tisou - Ukraine and Žilina – Zvolen – Lučenec - Republic of Hungary, which are interlinked with a dense network of railways of regional importance.

Air transport is available via the Sliač Airport located between towns of Banská Bystrica and Zvolen, and this belongs to the network of international airports. Two smaller airports Očová and Boľkovce are used predominantly for purposes of recreational flying.

The most important development area in the Banská Bystrica Self-governing Region (BBSK) is the territory of Banská Bystrica and Zvolen districts, due to concentration of universities and research and development facilities as well as a high number of economically active population with university and upper secondary education.

The university education in the BBSK is provided by four universities: Matej Bel University in Banská Bystrica, Technical University in Zvolen, Academy of Arts in Banská Bystrica and

Jan Albrecht Music and Art Academy in Banská Štiavnica. They present a great potential on which the region can build its future not only in the context of Slovakia but also in the European context.

Besides university education, the education in BBSK is ensured through a network of primary schools, secondary vocational schools and grammar schools as well as educational institutions which provide lifelong learning in courses and trainings accredited by the Ministry of Education of the Slovak Republic. There are 29 grammar schools and 57 secondary vocational schools, out of which 61 are state schools, 20 of them are private and 5 are church schools.

The Banská Bystrica region is an attractive tourist area thanks to its historical sights, natural beauties, cultural and sports events and tradition in organising exhibitions. Nearly half of the region area is covered by forests, which create ideal conditions for the development of tourism, agrotourism, winter sports, water sports and game hunting.

The leading industry sector in the region is metallurgy (from the viewpoint of revenues and employment) which represents over 60% of the total industry export of the region. Further important sectors are pulp and paper industry, pharmaceutical industry, wood processing industry, engineering industry and production of construction materials. The northern part of the region has relatively high degree of industrialization. The southern part of the region is a basis of the food processing industry and other sectors complementary to the agriculture. Significant industries are also forest industry, logging and wood processing.

Foreign capital is concentrated in 1854 firms, which represent 9,96 % of the entire number of business entities listed in Business Register. The most successful of them are Slovalco, a.s. Žiar nad Hronom, Knauf Insulation, s.r.o. Nová Baňa, Evonik Fermas s.r.o. Slovenská Ľupča, Continental Automotive Systems Slovakia s.r.o., Zvolen, Johnson Controls Lučenec s.r.o., Witzenmann Slovakia, spol. s r.o. Vlkanová, Küster - automobilová technika spol. s r.o. Vlkanová.

The priority of development of the region is to stay attractive for foreign investors. As the main reasons to invest in the region are considered:

- Strategic location in the centre of Europe with great export potential–market of 300 million people in 1000 km radius
- Optimal transport connection with significant European centres – Vienna , Budapest, Bratislava, Prague, Krakow, Kiev
- Diversity of economic sectors
- Significant potential needed to establish the links with foreign contractors – local subcontractors from the region
- Qualified labour force
- Established manufacturing infrastructure
- Authorized Regional innovation strategy of the Banská Bystrica Region establishes favourable conditions in the region for further development of science, research and innovation
- Excellent natural and climatic conditions for the development of tourism related to winter, summer leisure activities and health resorts services – spas
- Wide range of available cultural, social and sports related activities

The Region of Bratislava

Bratislava, the capital city of the Slovak Republic, is a town with location at the confluence of the rivers Danube and Moravia, on the ridge of the Little Carpathian Mountains and at the place where Austrian, Hungarian and Slovak frontiers meet in one point. It predetermines for ages the role of Bratislava as an important trading place, crossroad of transport routes, area of political life, business, financial services, industry, agriculture, education, culture and sport. Whether called Preslau, Pressburg, Pozsony or Bratislava, the hospitality, architecture, excellent food and good wines dominate its friendly atmosphere.

Bratislava and Bratislava Region became to be the most developed Region of Slovakia from economical, social, research and technical point of view. The strongest economic position (25% of GDP) of Bratislava among Slovak regions mirrors also a strong position of Bratislava within the country.

THE BRATISLAVA REGIONAL CHAMBER OF SCCI

will arrange for you:

- contacts with domestic businesses
- search for suppliers
- search for manufacturers
- search for importers

The Region of Košice

THE BASIC INFORMATION

The modern history of Košice Regional Chamber of Commerce and Industry starts in 1992 when it was re-established by the Act No. 9/1992 on chambers of commerce and industry. By this act, National Council of Slovakia established Slovak Chamber of Commerce and Industry (SCCI) as an independent legal subject. Present day activities of The Košice Regional Chamber of Slovak Chamber of Commerce and Industry are a continuation of the Chamber's long history which goes back to 1850. Košice Regional Chamber is the oldest chamber in Slovakia and one of the oldest in Central Europe.

Košice Regional Chamber is a regional office of The Slovak Chamber of Commerce and Industry and ensures the operation of the Chamber in the Košice Self-governing Region. The scope of the Košice Regional Chamber includes the following districts: Gelnica, Košice, Košice surrounding, Michalovce, Rožňava, Sobrance, Spišská Nová Ves, Trebišov.

Košice Regional Office of The Slovak Chamber of Commerce and Industry represents entrepreneurs, businesses and member companies of the SCCI operating in the region of Košice and plays an important role in domestic and foreign trade with a special focus on the markets of the Eastern Europe and Russia.

The most important kinds of industries allocated in the region are metallurgy, engineering, chemistry and textile production.

SERVICES AND ACTIVITIES PROVIDED BY KOŠICE REGIONAL CHAMBER OF SCCI

The Region of Nitra

The Nitra Region in the Context of Foreign Investments

Only very few Slovak regions have such excellent preconditions for the development of international contacts and cooperations as has the Nitra region. This region extends from the mountain ranges Povazsky Inovec and Tribec in the north to the river Danube in the south and geographically it covers the prevailing part of South-western Slovakia.

This region is identical with the chamber region of the Regional Chamber of Commerce and Industry Nitra. The chamber region begins approx. 80 km easternly from the Slovak capital Bratislava and is surrounded by the other chamber regions Trnava, Trenčín, Banská Bystrica. The centre of the region is the historically famous town Nitra with approx. 78 351 inhabitants. The total geographic surface of the region represents approx. 6 344 sqkm and the number of its population is about 686 662 residents. The total number of the entrepreneurial subjects in 2013 was approx. 73 957. The traditional industrial branches of the region are the machine engineering, metal processing, electrical engineering, chemical industry, building material production and the automobile industry. Based on the excellent climatic and soil conditions very important are also the agricultural production and the food processing industry.

Concerning the size of entrepreneurial subjects there are typical here small and middle sized companies, which went through the transformation process to the market economy easier and more flexibly as many big factories in other parts of the Slovak Republic. In the recent ten years there was established here a large number of new producing companies by local Slovak entrepreneurs, which are successful not only on the Slovak but also on international markets.

The objective advantages of the region have been invented also by well-known foreign companies, from which many are present here with strong investment projects. To the most important foreign investments of the region belong such manufacturing plants as for example the HEINEKEN SLOVAKIA JSC Hurbanovo /beer and malt production/, Giesecke & Devrient Slovakia Ltd. /smart plastic cards/, MATADOR AUTOMOTIVE JSC Vrable /automobileparts/, IDO EET Ltd. /special engineering production/, SLOVENSKÉ ENERGETICKÉ STROJÁRNE JSC Tlmače /produces and supplies steam boilers for combustion of coal, oil, gas and biomass/, Duslo JSC, Šaľa /fertilizer production/, Low&Bonar Slovakia, a.s. /industrial and coated fabrics and composite materials/, KABELSCHLEPP SYSTEMTECHNIK Ltd. /systems of energy carriers/, Pastorkalt JSC /production and delivery of refrigeration equipment/. The most important investors came to the region from Germany, Austria and Holland. Besides these direct investments a large number of local industrial companies cooperate very intensively with partners in the European Union supplying for them semi-products or carrying out certain finalizing operations on their final products.

The region has very good transport infrastructure with dense network of roads which contributes to the further intensification of the international contacts. The administrative centre of the region the town Nitra has direct highway connection with the capital Bratislava and thus also with the Slovak-austrian border. Thanks to this highway connection and the good geographical position three international airports /Bratislava, Vienna, Budapest/ are available within three hours. In the town Nove Zámky 30 km southernly from Nitra there is one international railway junction and in the suburb of the town Komárno is the second most important river port of Slovakia on the river Danube. After the opening of the Rhine-Main-Danube channel the region has direct ship connection with the Black and North Sea.

Nowadays, the main task of the Regional Chamber of Commerce and Industry Nitra in the international sphere is the further support of commercial and cooperational contacts between Slovak and foreign companies. This target is based on the high interest of the local entrepreneurial circles for the intensification of business contacts mainly with the countries of the European Union and of Middle Europe. It is expected that thanks to the geographical proximity and good infrastructure, this region will attract the interest of further foreign investors. Naturally, the Regional Chamber of Commerce and Industry Nitra will be always ready to equip them with basic orientation in the current Slovak environment and to provide professional advisory services in all spheres of the economic life.

The Region of Prešov

The Prešov Regional Chamber of the Slovak Chamber of Commerce and Industry

The Slovak Chamber of Commerce and Industry, an integral part of which is the Prešov Regional Chamber (PRC SCCI), is an association of business concerns formed in order to boost the economic prosperity of its members, encourage their business activities both in Slovakia and abroad and assist in the creation of a positive business climate. The SCCI is a public institution established by Act 9/1992 of the National Council of the Slovak Republic and declared in Act 121/1996 of the National Council.

Membership in the Chamber is voluntary and its members are both natural and legal persons performing business activities in various fields of economy, with exception of agriculture and food industries.

The members have the right to:

- Use all services provided by the SCCI
- Service price discounts in accordance with the chamber's valid price list of services
- Propose and elect bodies
- Submit proposals for the improvement of the chamber's activities

The primary aim of PRC SCCI is to provide high-quality services to the business community in the Prešov region, to assist in tackling their business-related problems, to predict, analyse and define the needs of entrepreneurs and to offer solutions in the form of both tested and first-time services.

Provided standard services of the SCCI's Prešov Regional Chamber:

- Issuing of ATA carnets and certificates
- Counselling and consultations related with export and import of goods
- Counselling on the possibilities of financing business activities through the Structural Funds (ŠF)
- Services in the field of education
- Development of international trade relations - by organising trade missions at home and abroad
- Organisation of the participation of companies for fairs and exhibitions
- Publishing, distribution and sale of specialised publications

The plan for the Chamber's activities for each year is approved at the plenary session of the PRC SCCI and is outlined on our web-site www.po.sopk.sk. Members of the PRC SCCI are kept regularly informed about all events organised by the Chamber.

- the territory of the SCCI's Prešov Regional Chamber is the Prešov Self-governing Region
- the PRC SCCI also has an office in Poprad

The Region of Zilina NORTH-SLOVAKIA COUNTY

The situation of Slovak Republic's economy is frequently discussed in Slovakia and abroad, and the debate is greatly confused. The analysis is often mixed up with wishful thinking, simple lobbyism etc. A few neutral figures:

GDP IN CONSTANT PRICES – changes in %
Slovakia

EXCHANGE RATE - Month - VI.
SKK / 1 CZK, Slovakia: Czechia
brief history

Twenty-four years have elapsed since the Slovak Republic acquired independence. In these approximately 24 years the Slovak Republic had to prove evidence of its capability to manage the development of the county, assuring its political stability and economic development.

After three years of independence, the economy of the Slovak Republic acquired from the London „The Economist Intelligence Unit“ the best rating among Czech Republic, Poland and Hungary - countries in transition. The rating was supported mainly by agreed aims and practical economic policy of individual states within the goals of the International Monetary Fund, macro-economic indicators etc.

The Slovak Chamber of Commerce and Industry (SCCI) as a public - legal institution plays the role of the major representative of the entrepreneurial and business sphere in the Slovak Republic. The Regional Chamber of the SCCI in Zilina represents and co-ordinates the interests of its members in matters of business activity inland and abroad, renders services and protects them from unfair business relations in the following districts : Zilina, Martin, Dolný Kubín, Liptov. Mikuláš, Turčianske Teplice, Ružomberok, Čadca, Namestovo, Tvrdošín, Bytča, Kysucké N. Mesto. The members of Regional Chamber SCCI Zilina come from the most industrial sectors including engineering, machinery, metallurgy,

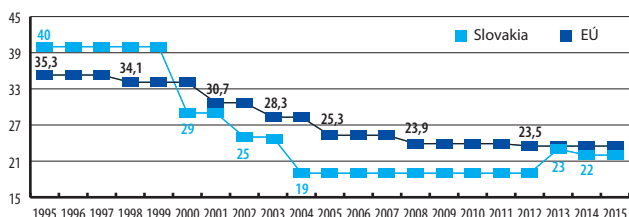

building industry, wood processing, paper industries, chemical industries, textile, food industries, electrotechnical, electronic industries, automotive, energy, tourist and travel, etc. **The most important companies**, suppliers, hotels, spa of Zilina County in that branches you can watch in "CATALOGUE FIRMS of SCCI Zilina County" – issue by chamber of commerce and industry Zilina.

Our County located at the North-West of Slovakia is one of the most industrialized areas in the republic. Zilina is the city of the County. The region is connected to the international trucks roads, Core European Corridors:

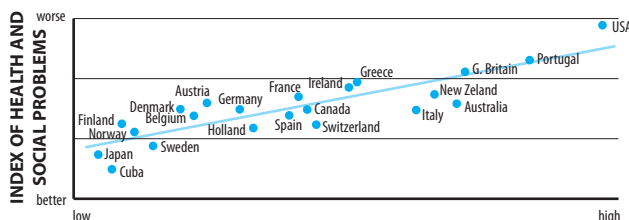

- I. **E 50:** ...-Paris-Praha-Brno-Zlín-Zilina-Martin-Ružomberok-Liptovský Mikuláš-Presov-Košice-Kyjev,...and
- II. **E75:** - Koper-Wien-BA-/...-Belgrade-Szeged-Bratislava-Zilina-Zwardon-Biala-Katowice/Krakow-Warsaw-Minsk-Moscow...)
- III. **R3/59/65:** Krakow-D.Kubín-Martin-Kremnica-Zvolen-Budapest

North-Slovakia is a transport junction of international railways systems in the direction Poland, Czechia, Ukraine or to south – Hungary, former countries of Yugoslavia, etc. Air transport is secured via the International **Airport at Zilina**. The distance of the Airport from Martin is 37 km, to Liptov 70 km.
