Dear Reader,

if I had learned anything in the previous nine months of my tenure as the President of the 72nd General Assembly of the United Nations, it is that a number of politicians tend to take a short view on the world matters. It might be understandable to some extent: national leaders are often too overwhelmed coping with everyday issues – from addressing economic problems and in general taking care of business of running the nation to their own political survival. But more often than not being too close to a situation does not help; one needs to step back and get a little perspective, to see the whole forest instead of individual trees.

The year 2018 has already brought about sweeping changes affecting a number of places around the world – including my home country Slovakia –, and called in question a whole lot of issues, which we had thought were already solved and decided upon. The world of 2018 is not a safer place than it was a year ago. Not by a long shot.

As I have repeatedly pointed out in my speeches at various fora, we are spending way too much time and money reacting to conflicts and crisis situations worldwide, and not enough on preventing them. And by “conflicts” I mean more than just military engagements; I mean also collisions of worldviews, aggressive pursue of one’s goals regardless of the consequences, enforcing stubbornly one’s vision of the world while neglecting and often even suppressing different opinions. Survival of the fittest has once more seemingly become the overreaching trend.

This has also brought about a kind of estrangement between common men and women and political forces. We see logic and reason defeated by emotions and passions. Some call it post-fact or post-truth world. Citizens have a hard time navigating through floods of information, it is ever harder to distinguish truth from falsehoods. I see it therefore more pressing than ever to talk to our citizens. To confirm them the relevance and credibility of established institutions, to show them the power of diplomacy. Because, if we don’t speak to them, somebody else will.

The answer to all of these challenges lies in understanding and accepting that no man – and no nation, however strong it might be – can survive alone. Protectionism might work for a while, might even result in the strengthening of mechanisms or the economy, but ultimately it will fail as a policy.

In an increasingly globalized world, no single person or country can face problems alone. In the same way, if a person or country fails to respond, it could affect us all. Which is why if we want the next generation to be born into a better world, we only have one option. And that is strong multilateralism, with the United Nations system at its core.

Cooperation between nations has brought us tremendous benefit. It has shown us that working together yields more and better results than when we act alone. Multilateralism has also a major role in advancing peace. It has allowed us to rally in support of peace agreements, and to mobilize against threats to international peace and security. There are old and new threats to rally against – from political violence to international terrorism to irregular migration.

When we think of consequences of conflict, we often first think of death and human suffering, the highest price humanity can pay. Furthermore, financial and economic costs are also crippling and can set societies back by years – even decades. And, in turn, can contribute to human suffering.

We need to significantly strengthen prevention capacities. We need dialogue, open exchange of ideas and suggestions from humanitarian and political negotiators. We need to identify gaps, and delays, which currently exist. And we need to build a prevention toolbox that is capable of making changes happen. We have common but differentiated responsibilities for the state of our planet. To meet them, we need bold, and innovative partnerships. They must transcend traditional separations between sectors, parties, governments or societies.

We do come from diverse backgrounds. We do hold different positions on the world’s most pressing issues. Our interests, at times, do diverge. But we have seen that convergence can be found – particularly when it comes to our human dignity, peace, the protection of our environment, and our common humanity. Multilateralism cannot be a competition where the most powerful prevail. Multilateralism cannot be something we opt into, only when it suits our interests. Multilateralism cannot see dialogue to be replaced by a sequence of monologues. If we go in this direction, we risk undermining all of the progress we have made since World War II.

The problems we face are dire. More people are fleeing their homes now than in any period since the WWII. Conflict and violence have made our world the deadliest it has been in decades. We are grappling with international terrorism, which has uprooted our traditional view of peace and security. Climate change also poses a major threat – not from bombs or bullets, but through silently eroding the capacity of the world to sustain us. No single action, or initiative, is enough to combat any of these threats.

Multilateralism and cooperation is no longer an option.

They are a necessity.

Miroslav LAJČÁK
President of the 72nd UNGA
Minister of Foreign and European Affairs of
the Slovak Republic

Dear Readers,

We have started another year and the good news is that the Slovak economy is doing well. Among other things this is confirmed by evaluations of rating agencies that value dynamic economy growth, steady inflow of foreign investments, reduction of public debt and stable public finances. In 2019 the growth of the Slovak economy should gradually accelerate to 4.5%. The Ministry of Economy will continue to work on its priorities, but we are also preparing for new challenges that will emerge this year.

Year 2018 began successfully for the economy department, when parliament passed a new important law on regional investment aid. The law responds to current challenges and trends in this area. We have redefined the investment aid philosophy so that we have a legislative instrument to help us reduce regional differences and to direct investment aid especially to the least developed districts in central and eastern Slovakia. With the help of the new law we have completely changed the architecture of providing investment incentives. Investment support will shift from West to East and from direct to indirect investment incentives. By this law we said definitive goodbye to the period when we were the so-called "assembly workshops" country and we have created a space for building a modern economy with high added value. We will also support investments into research and development.

The Slovak Investment and Trade Development Agency (SARIO) has elaborated approximately one hundred investment projects, thank to which 5 billion EUR could be reinvested in Slovakia. There are investors from all over the world, from the automotive, engineering or electrotechnical industry, as well as from the tourism. Two-thirds of these investments should be directed to the eastern and central Slovakia, half to the least developed districts.

The changes that we want to make in the field of energy are waiting for us in the legislative area. At the ministry we are already working on a new legislation on renewable energy sources. We want to preserve all rights for existing manufacturers, perform so-called centralization of the electricity purchase and establish local resource institute. In any case, changes we are preparing will not boost the price of the final electricity prices for customers. At the same time we are preparing the reform of tariff for system operation.

I believe that our measures from the first anti-bureaucracy package we are working on along with a number of ministries and deputy prime minister for investment, have touched entrepreneurs in a positive way. Last year, we introduced a change of

more than 147 laws, 68 decrees, 8 measures, and 12 government orders, and in such a way we declared war on bureaucracy. For example, an extract from the property title, Business Register and Trade Register, as well as extract from the Criminal Register, will be no longer enclosed to various applications by citizens or entrepreneurs, but they will be viewed directly by the authorities themselves. Furthermore, they will be able to do that in real time. We are currently evaluating how are the first proposed measures applied in practice, but we are also working on the second package of measures. Same as in the first case, we are trying to include measures that are proposed by the entrepreneurs themselves. We are doing the reform based on people's experience from practice and not from the table. I believe that by common forces we can simplify the life of entrepreneurs in Slovakia and they will have more space to do their business instead of the administration.

I look forward to the further support we are preparing in the field of electromobility and intelligent solutions for self-government. In both cases it is a support for new progressive areas whose further development means benefits for citizens, and at the same time it is moving Slovakia towards modern ecologically-oriented countries. Last year, we have successfully launched a subsidy program to support a sale of electric cars and plug-in hybrids. The project continues this year as well. I hope I am not disclosing more than I should when I say that this year we want to continue supporting electromobility by another project. But this time we want to focus on the infrastructure. The Ministry is actively working on the Smart City concept. We realize that more intelligent solutions for cities mean more convenience for citizens. The concept mainly enables small and medium-sized enterprises to enforce and implement their progressive ideas into practice in Slovakia and hopefully abroad as well. The Ministry has decided to financially support deployment of smart solutions in Slovakia and will announce a call intended for small and medium-sized entrepreneurs.

In conclusion, I would like to inform you that my fellow members are finalizing the Economic Policy Strategy by 2030. This is an important strategic document we want to present to the public this year. Slovakia lacks a comprehensive concept of economic policy, and we want to define the country's priorities in this area so that Slovakia has a diversified, competitive and growing economy by 2030.

Last but not least, I would like to wish all of us to meet the goals we have set for ourselves in work area and also in private life.

Peter Žiga
Minister

SLOVAKIA - Regions and Districts

SLOVAKIA - Geographical Map

Total area:	49 035 km ²
Capital:	Bratislava
Length of state border:	1652,6 km
Population:	5 397 036 (as of 21. 5. 2011)
Political system:	Parliamentary democracy
Official language:	Slovak
Currency:	Euro, 1€ = 100 cents
Population density:	110,2 (per 1 km ²)
Time zone:	Central European Time (GMT +1 hour)
Country Telephone Code:	++421-

Location:

Slovakia is located in Central Europe. The relief of the country is characterised by great differences. In central and northern Slovakia the countryside is hilly, it is covered with the Carpathian mountain range. The countryside of the southern and eastern Slovakia is low.

Climate:

The territory of Slovakia is situated in the mild climatic belt with regular alternation of four seasons of the year. The average temperature is in winter - 2° C and in summer +21° C. January is the coldest month with night temperatures -10° C and -15° C, the warmest month is July with a daily maximum temperature of approximately +32° C.

National Holidays:

January, 1 st	Establishment of the Slovak Republic
July, 5 th	St. Cyril and St. Methodius Day
August, 29 th	Slovak National Uprising Day
September, 1 st	Slovak Constitution Day
November, 17 th	Day of Fight for Freedom and Democracy

Public holidays:

January, 6 th	Epiphany (The three Sages and Christmas Holiday of Orthodox Christians)
March/April	Good Friday, Easter Monday
May, 1 st	Labour Day
May, 8 th	Triumph Over Fascism Day
September, 15 th	Lady of Sorrows Day
November, 1 st	All Saints Day
December, 24 th	Christmas Eve
December, 25 th	Christmas Day
December, 26 th	Second Day of Christmas

Important Phone Numbers:

158 (112) Police	0961 011111	Foreigner's Police
155 (112) First Aid	1181	Information on Telephone Numbers
150 (112) Fire-Service	12149	Information on International Telephone Numbers

The national symbols of the Slovak Republic are the national emblem, the national flag, the national seal and the national anthem.

The national emblem of the Slovak Republic has a red, early Gothic shield with a silver double cross mounted on the central peak of the blue three hill group.

The national flag of the Slovak Republic is composed of three horizontal stripes - white, blue and red (with white at the top, followed by blue and red). In the front section of the national flag is the national emblem of the Slovak Republic.

GREAT MORAVIAN EMPIRE – OLD-SLAVONIC EMPIRE (805-905) - 9th century

"I mind the disregard for the culture that is centuries older."

Alexander the Great (356-323 B.C.)

■ NITRA, MIKULČICE, DEVÍN - centres, towns, castles

■ Rulers: **Mojmír I.** (830 - 846), **Rastislav** (846 - 870), **SVĚTOPLUK I.** (870 - 9. 3. 894), **Mojmír II.** (894-907).

Territory of the empire: Slovakia, Moravia, Pannonia, Czechia

■ Slavic gods: Perun, Triglav, Dazhbog – god of the Sun, Radegast, Zhiva (Siva) – goddess of life and bioenergy; Slavic priests used meditations and breathing

exercises to accumulate and balance energy;

■ **863-885** Constantine-Cyril and archbishop Methodius with Rastislav and King Světopluk founded the material, spiritual and culture traditions of Slavonic people and devised the alphabet;

■ **866** They founded the Great Moravian training college – school, where 200 pupils finished their studies; literature – writings, poems, code of law;

■ **869** The Old Slavonic language became the fourth liturgical language in the world along with Greek, Hebrew and Latin;

■ Methodius (815-6. 4. 885) studied law; archbishop in Great Moravia and Pannonia-Sirmium - Srem. Mitrovica

■ Constantine the Philosopher – Cyril (827-14. 2. 869) devised the alphabet and spelling, and created words for communication from Greek;

■ **880** The pope issued the bull *Industriae tuae* by which he took under protection the independent Great Moravian Empire

■ Byzantine writing on Slavonic people: "Slavic tribes are accustomed to freedom and will not let themselves

enslave. They keep open house for foreigners and accompany them as their guests from one place to another, wherever the guests wish. Their way of life is rough, but they are note evil-minded."

■ **~ 889** – Czech lands annexed to the Great Moravian Empire;

■ **~ 906** Magyars invaded Great Moravia from the East, subverted the Empire and settled in Pannonia;

■ **890 -1000** ➔

Dissemination of material

and spiritual culture From

Great Moravia to Bulgaria, Czech lands (Bořivoj I.- in 882 christened by Archbishop Methodius), to the Yugoslav nations and to Kievan Rus.

Methodius' followers spreading culture and literature: Climent in Ohrid, Sava, Naum, Gorazd.

Centres of Slavic culture after Great Moravia:

Prague, Kiev, Cracow, Novgorod, Ohrid. In Bulgaria, Methodius is commemorated on 17 July; the Methodius' cult was laid by the Czech king Charles IV.

■ **9th century** – Slovakia and Moravia abounded in spiritual Slavic culture reflecting the maturity of the Byzantine and Western-European letters; it was the basis of the civilisation of Central-European culture (**own state, own writing, own church province, accepted by the Frankish Empire - 884, own books, own liturgical language – Old Slavonic, successful foreign diplomatic policy**).

Central-European civilization area – Great Moravia, the cradle of material and spiritual culture; laid the foundations of a new literary language through which the Slavs got involved in the world cultural course of events throughout Europe. MIKULČICE: palace, 10 churches etc.

THE TOWN OF SPIŠSKÁ NOVÁ VES

Gateway to the Slovak Paradise

Slovak Republic, Europe

N 48° 56' 39,01"

E 20° 34' 0,32"

Spišská Nová Ves with its 750-year long history is an ideal starting point for the lovers of hiking along harsh but picturesque gorges of the Slovak Paradise (Slovenský raj) National Park, for the admirers of monuments described in UNESCO's World Heritage List and for those interested in the less spectacular but even more precious Gothic and Iron

town is enhanced by theatres, a gallery, museums, 3D cinemas, indoor swimming pool and a lido, wellness and fitness facilities, tennis grounds, skittle and bowling alleys, a high rope park, a skatepark, an ice hockey stadium or an indoor shooting range, as well as suburban sports airfield with an opportunity to enjoy parachute jump or sightseeing flight.

In the close vicinity of the town you can find the largest Slovak ice cave, 25 splendid waterfalls in 9 accessible rocky gorges, more than 300 km of marked hiking trails, 400 km of cycling trails, ski

the admirers of water tourism can enjoy boating on the Hornád river in one of the most attractive parts of the national park – the longest river canyon in Slovakia (Prielom Hornádu, 11.75 km long). You can also explore the 'true wilderness' in the Kysel' gorge, reopened 40 years after devastating fire. The gorge is passable thanks to new educational trail Kysel' – Ferrata of the Mountain Rescue Service. This amazing 'via ferrata' is open from June 15 to October 31.

The combination of nature, history and active relaxation in the Spiš region

Routes monuments that can be found in the surrounding Spiš region.

The town features the longest fusiform (spindle-shaped) square in Europe with an unforgettable atmosphere, the highest publicly accessible church tower in Slovakia (87 m high), the youngest ZOO in Slovakia. At the Place of Wishes you can express your most secret wishes and send them by ringing a bell to the heavenly heights to be fulfilled. A wide range of cultural and sport events all year round provides sufficient opportunities for a pleasant stay. Attractiveness of the

centres, cross-country skiing and nordic walking trails or 13 educational trails.

In the nearby Slovak Paradise you can experience two exciting novelties. From May 1 to October 31,

is complemented by other available natural beauties: first of all the High Tatras (Vysoké Tatry) National Park, which is just 30 km away, but also thermal park in nearby Vrbov, the Pieniny National Park with

its raft tours of the Dunajec river on traditional Goral rafts, the caves of the Slovak Karst (Slovenský kras) National Park, or the cities of Prešov and Košice located in short distances.

for your children and free entry to MONKEYLAND high rope park.

'Romantic stay in the company of beloved person' (3-day package for couples) wants to pamper you by the perfect accommodation, catering services and relax in wellness centre of the 4*hotel, as well as enable you to express your romantic desires and touch an old medieval bell at the unique Place of Wishes. To make your stay unforgettable, use the opportunity to climb up to the highest church tower in Slovakia or dress in gothic costumes and make yourself a romantic photo.

'Weekend adrenaline menu with the sky' (3-day package for 2 persons) offers you an opportunity to 'rent' the sky and enjoy 20-minute flight with views of the picturesque Slovak Paradise National Park, the majestic High Tatras, historical town Levoča or the Spiš Castle, and afterwards experience a tandem parachute jump from a height of 3,000 m with an experienced instructor. You can also test your strength and cour-

age in high rope park or test your shooting talent at the indoor shooting range from 3 weapons of your choice. You can take 155 steps for an amazing view from the highest church tower in Slovakia, experience the atmosphere of the longest fusiform square in Europe and enter the nearby Slovak Paradise. Bed and breakfast accommodation in guest-house** included.

Find out more about packages in TIC or on website of the town.

Detva

DETVA is situated in the heart of Slovakia, about 220 km from Slovak capital Bratislava. Its area is known with precious natural and cultural values. Detva is the centre of Podpolanie region, one of the most original Slovak regions, which was named after natural dominant feature of the area – Polana volcano. From 1996 Detva is the centre of the district. Its area is 6,809 hectares and it has about 15,000 inhabitants. Geographical location of Detva in the centre of Slovakia enables good traffic connection with the neighbouring regions as about roads and railways. The road I/50 (Bratislava – Zvolen – Lučenec – Košice) and the R2 expressway with the connection to Detva is

the traffic axis of the area. It will be soon improved by building the R2 highway. Detva is connected with the railway line Zvolen – Lenártovce – Košice, which runs through southern part of the town. The nearest cargo railway stations are in neighbouring villages Víglaš and Kriváň. Airport in Sliač is only 27 km from Detva. Good technical and civic infrastructure is available in the town. In the Strategy of Slovak Republic Improvement Detva is one of innovative progress poles. Business and employment support is one of the priorities so that the new business zones are being created. With the EU support of its structural funds (2004-2006) Detva town realized reconstruction of some producing parts in PPS factory so that it prepared industrial park for some new investments and for the creation of 538 job positions, mostly in engineering professions. The goal of building of industrial parks and zones for business in Detva and surrounding villages Kriváň and Víglaš is to provide the opportunities for domestic and foreign companies with working places in production, service and quaternary sectors, so that

for domestic companies' goods and services consumption. The Town of Detva prepared an area for the construction of the Detva – Trstená industrial park. The new production will focus on mechanical engineering and will create over 500 new jobs for the inhabitants of the town and of the region. There is also an area for small and medium-sized enterprises in the proximity of the industrial park. In southern part of Detva there are some areas and building sites of stores, services and production. This site is the most lucrative as about the connection with

infrastructure but it is capacity limited because of road R2 and also because of limits of protective zones biotopes around Slatina River. They say that the potential of Detva and its surrounding is not used properly. There is a good opportunity not only for visit and getting known of this region but also for investment into business and living in this environmentally pure, clean and beautiful town in the heart of Slovakia.

The Town of Humenné

Humenné, often referred to as the gateway to Upper Zemplín, lies in northeast Slovakia at the confluence of the Laborec and Cirocha Rivers. Geomorphologically, it is part of the Beskydian Piedmont. The town fulfils a bold vision of a modern urban area with quality conditions for the life of its citizens. The town of Humenné evolved from an early Slavic settlement. A deposit of Celtic

coins discovered in the village of Ptičie offers evidence of Celtic-Dacian peoples residing in the vicinity of the future town. The oldest surviving written records about Humenné were made in 1317, Humenné received its official town privileges in 1479. The dominant landmark of the town is its **historical manor-house**, built at the site of a medieval watercastle. Its history is tightly knit with the **Drugeth family**, a noble house of Neapolitan origin, that came to the territory

of Slovakia with king Charles Robert of Anjou. After 1684, the manor of Humenné switched ownership between the Zichy, Wandernáth, Csáky and later Andrassy noble families. The former **Franciscan monastery**, now a Roman-catholic parish church - national cultural landmark of Slovakia. Represents the easternmost gothic structure in Europe. Other features that might also capture your attention are the town's reconstructed pedestrian zone with the **Fountain of Love** and the **Stream of Time**, **Valaškovský bridge (1900)** - built using the same technique as the Eiffel Tower in Paris, the manor-house's park with its collection of rare tree species and historical sculptures, as well as the centre of town with **memorial dedi-**

cated to the fallen of the World War II, with the statue of **St John of Nepomuk** and with memorial of **Milan Rastislav Štefánik**. The **Church of Our Lady of Sorrows**, built in classicist style, accompanied by a 14 chapels of the **Calvary**, was constructed at the end of the 19th. Since 2000, the statue of the good soldier Švejk has been situated at the Humenne railway station. A non-traditional gallery of figures and dominants of the town, it was established in August 2013, in **graffiti style**.

The Town of Lučenec

The Town of Lučenec is situated in the south of Central Slovakia, close to the Hungarian borders. The document from 1247 containing the first mention ever about Lučenec refers to this town as an important crossroad of trade routes and the centre of culture of the historical region of Novohrad. Kubinyi Square lies in the heart of the historical centre of the town, with a roman-catholic and calvin-

ist church and the historical buildings of Reduta and the Municipal Hall as its main landmarks. The Municipal Hall was renovated in 2016, today you can find there a municipal museum and the information center. The Jewish synagogue built in Art Nouveau style is another important historical attraction. It belongs to the largest of its kind in Slovakia and also in the Central Europe. It was reconstructed in 2016 and nowadays it serves as a multinational cultural centre.

The city park is one of the most beautiful and most precious parks in Slovakia, thanks to the combination of French, English and woodland garden styles, with artificial lake, mini ZOO and lot of leisure time zones for the whole family. On the central square there is a newly build shopping center, the biggest in the region with various shops, restaurants, cafes and cinema. According to the Town's Zoning Plan, industrial sites for the purposes of new investors are located in the Industrial Zone South within the cadastral territory of Lučenec. This industrial zone meets all the require-

ments for technical infrastructure. Industrial Zone South is situated in the south-eastern part of Lučenec. Its total area is 169.6 hectares. Manufacturing halls, warehouses and technical facilities currently occupy 113.2 ha. The industrial zone houses an Industrial Park at a total area of 5,5 ha with complex infrastructure, including roads and lighting. Future investors can dispose of 14 ha of free sites within the industrial zone.

The Town of Tvrdošín

The town of Tvrdošín is located in the north of Slovakia at the Polish border, about 40 km from town Zákopane. Visitors will be attracted by Wooden Gothic Church from the middle of the 15th century, which was awarded by EUROPA NOSTRA (1994) for its protection and listed in UNESCO (2008). Maria Medvecká Gallery and Art Gallery Schürger are visited by many visitors. Tvrdošín is the starting point for rafters sailing down the river Orava. There is an indoor

tennis hall, sports hall and a table tennis hall, a football stadium, playgrounds with artificial grass, fitness centers, an artificial ice rink (in winter season) and floorball playground (in summer season). From the touristic point of view, the most famous is its town part Oravice. The recreation center in a beautiful mountain environment offers a wide range of hiking from easy to difficult level, cycling and winter sports. The picturesque valleys, with gorges and busts, are surrounded by the hills of the Western Tatras, Skorušina and Oravská Magura. In the protected

natural environment, there are rare fauna and flora species that bring a lot of moments of peace and relaxation for tourists. Open-air pools with geothermal calcium-sulphate-magnesium water rich in iron, which have beneficial effects on locomotory,

urinary tract and kidney diseases, are open all year round. Just a few hundred meters from the swimming pools is a ski lift with a 4-seater heated chairlift. The ski park offers the possibility of accommodation directly at the ski lift to the visitors and a unique combination of skiing and relaxation in thermal water pools. Close to the ski lift there is also a water park named Meander Park with thermal water. One large area (Tatra National Park) and one small

protected area of nature surround the Oravice area. An educational path provides a nice tourist experience, pleasant relaxation and enrichment combined with new knowledge about the natural values of this area. It has two routes. Part A is 14.6 km long (22 stops with educational boards, seats and sightseeing towers), Part B is 3.2 km long (9 stops). Another, a 2.4 km long relaxation walk is used all year round for summer and winter sports. It is also used by disabled citizens to whom, after staying in thermal swimming pools, it allows a safe space for physical activity. Its route includes shelters, benches and information boards with information about the fauna and flora of this area. The surroundings of Tvrdošín offer interesting hiking trips the to Western Tatras - Roháče, water dams - Oravská Priehrada, Lip-tovská Mara and other attractive places of the Orava region.

Piešťany

Piešťany, the most known thermal spa town in Slovakia with its unique sulphuric

thermal water and mud. Mainly the reumatic diseases are treated here. The health power of these natural curative sources is expressed by the man breaking the crutch against his knee. The statue of crutch breaker became a symbol of the town with the well known slogan in Latin language „Surge et Ambula – Get up and walk.

The town is located in the western part of Slovakia, only 80 km nothern from capital Bratislava. It is easy reachable by highway and offers a wide selection of relax and therapy. There are excellent conditions for almost all kinds of sports. The town has rich cultural and social life year round and sufficient quantity of accommodation and gastronomic facilities.

The official opening of summer season starts each first Saturday of June with a great happening. You all are cordially invited to visit Piestany - „get up and walk“ to Piešťany, you will be always welcome.

Zvolen

Zvolen is one of the oldest towns in Slovakia. Owing to its advantageous geographical

position and favourable natural conditions its area situated at the confluence of the Hron and the Slatina rivers in the south-west part of the picturesque Zvolenská kotlina valley basin was settled already in prehistoric times. After the Tartar invasion he renewed its privileges on 28th December 1243 and so the settlement was upgraded to the category of royal towns for good. Nowadays the distinguished past of the town and especially frequent royal stays in the Middle Ages can be traced in its most important historical dominant sites – **Zvolenský zámok (Zvolen Castle)** and **Pustý hrad (the Deserted Castle)**. The central place of the town is **Námestie SNP (Square of the Slovak National Uprising)** with the pedestrian precinct which, with its area, belongs to the largest ones

in Central Europe. In the territory of the town are found not only several significant cultural monuments, but also valuable communities of fauna and flora and unique natural formations. The large collection of coniferous and deciduous woody species, roses and succulent plants is concentrated in the area of **Borová Hora Arboretum**. Zvolen and its surroundings are also known for great concentration of mineral springs and in the proximity are situated popular spas of Sliach and Kováčová.

Poltár

Poltár is situated at the foot of Slovenské Rudohorie mountain in the northwest of Lučenecká kotlina basin. The town – Poltár

and its surroundings are suitable for summer and winter tourism. There is a modern outdoor swimming pool with extensive area and additional services which is built in the suburb of the town. We have something for devotees of agrotourism, cycling, horse riding, fishing and hunting. The city has prepared for tourists

accommodation, catering and additional services. Local government prepares different cultural, social and sports events for residents and visitors of the town. Close to the town, in the area Kúpna baňa, there are rare protected species of plants. There are very interesting sightseings in our town - the technical cultural monument, the old stone Turkish bridge over the river Ipel.

Jelšava

Jelšava is situated on the Gothic Route at the boundary between Slovenské Rudohorie and Slovenský Kras. It has a long tradition of

ironworks, mining and craft industries. The oldest written mention dates back to 1243. In the 14th century, the Old Castle of Jelšava was the seat of the Jelšava estate. In the 17th–19th century, it was the economic centre of Gemer. The life in the town was largely influenced by the development of the magnesite industry, mainly at the end

of the 1960s. We can find in its proximity the Hrádok recreation area and the Aragonite Cave of Ochtná. The town is rich in cultural monuments. The principal landmarks are the Roman Catholic Church and the Coburg Manor House at the main square. Other architectonic sites include the Protestant Church, the Town Hall, the Reduta building, the former County House and the building of the historically first pharmacy in Gemer. The town centre is a protected cultural zone.

Vráble

The Town of Vráble is situated within the agricultural area of the Danubian Lowland in southern Slovakia. The oldest

written mention about the town is from the Bill of King Belo IV of 1265. From the 14th century until 1848, Vráble was the seat of predialists of the Archdiocese of Esztergom. The most valuable monument is the Neo-Romanesque Roman-Catholic church. Wine-growing has been

popular in Vráble since the 18th century. The area north-west from the town centre is characterised by wine houses with original architecture and the production of quality wines. After the partial downsizing of industrial production in the 1990s, the town began to build an industrial park. Today, this industrial park houses companies which provide jobs to the inhabitants of the Vráble region.

Air transport

There are 6 international airports in Slovakia that can be used for both passenger and cargo flights:

- M.R.Štefánik airport Bratislava
- Airport Košice
- Airport Poprad-Tatry
- Airport Sliač
- Airport Piešťany
- Airport Žilina

As the potential of Slovak airports is not yet fully exploited, regular and also irregular connection of Slovakia to Europe and the rest of the world is secured through Vienna Schwechat airport. Schwechat airport is the main international airport of Austria and is only 50 km distant from Bratislava. There is also regular train and bus connection between Bratislava and Schwechat. Another large international airport accessible is Budapest airport, main airport of Hungary, distant 250 km from Bratislava. It is also possible to use airport Ruzyne in Prague that has regular flights to M. R. Štefánik airport in Bratislava.

MicroStep®
spol. s r.o.

COMPLEX CNC CUTTING MACHINES ▶ cutting of sheets, pipes, profiles, domes, elbows
 ■ combination of technologies on one machine ■ wide range of additional accessories
 ■ material flow automation ■ CAPP applications for production management ■ CAM software ■ robotic applications

PLASMA / LASER / OXYFUEL / WATERJET / DRILLING / TAPPING / MARKING

Since its inception in 1991, the company MicroStep, spol. s r. o. has been involved in design and manufacturing of CNC cutting machines equipped with plasma, laser, oxyfuel and waterjet technologies as well as routing and drilling machines. Over the years, the company has become one of the leading suppliers of cutting equipment and has supplied more than 2,450 machines worldwide in cooperation with strong channel partners spread in 55 countries. More than 30 % of the company's products are complex machines which require continuous development and research for new, innovative technical solutions. Today, MicroStep is able to offer the full range of contemporarily used cutting technologies along with a great variety of additional equipment and software for drilling, tapping, countersinking, laser marking, inkjet marking, microprecision marking, process synchronization (scanners, CCD cameras) and material handling. As a producer of not only machine mechanics but also control systems and CAM software the company delivers solutions that perfectly fit actual customers' demands and are future-proof with respect to machine extensions in size and additional technologies.

Moreover, MicroStep machines can process several types of material including sheets, pipes, profiles, domes and elbows while implementing advanced processes such as automatic welding seam preparation. All of MicroStep machines are operated by iMSNC®, a multi-tasking PC-based control system developed and produced in-house.

Our goal is to provide solutions that improve everyday job in the factories – assure higher precision, minimize downtimes,

assure more convenient and more effective operation and easier maintenance.

We achieve this through higher automation levels, interconnection of control systems, CAM software and ERP systems at customer's site (our production management software MPM has already found its application in several enterprises in Europe and Asia – either integrated into customer's ERP system or standalone), and through development of more sophisticated equipment. And our customers obviously agree: e.g. our patent pending technology ACTG – a system that reduces the setup time of bevel head from hours to a couple of minutes – has already been delivered with more than 350 systems and is proving its high relevancy in daily operations worldwide.

The cutting equipment is going through a massive change worldwide. New systems bring new possibilities to cutting processes so there is a continuous need for integration of these technologies into CNC machines. This puts new demands on machine mechanics and controls. Thanks to the continuous and effective R&D in the fields of new mechanical components, electronic modules and control systems software, MicroStep has been able to adapt quickly to the new trends. In addition to our own R&D base we work closely with departments of the Slovak Technical University in Bratislava and the Institute of Materials & Machine Mechanics of the Slovak Academy of Sciences on utilization of latest achievements in design and control of machinery. Thanks to our constant search for innovations we have also quickly become a valued partner for many renowned suppliers.

MicroStep®
spol. s r.o.

Mondi SCP, a.s. is the biggest private employer in Liptov region and maintains strong roots of paper production - the paper making tradition in Ružomberok reached 138 years in 2018.

Mondi SCP, a.s. Ružomberok is the largest pulp and paper producer in Slovakia. Every day we give high added value to a domestic renewable resource – wood, which comes from certified forests with FSC and PEFC chain of custody certifications or from controlled sources. Conveniently located in Central Europe, we are able to deliver our products to our customers on time and in the requested quality. We export almost 95% of our production abroad so millions of people are in touch with our products every day. We regularly invest into state-of-the-art-technologies and do our best to minimise our impact on the environment.

With the initiative “Mondi SPC, our best neighbour” we strongly support our region where we operate. Based on a Memorandum signed with the town of Ružomberok, we support various projects in the areas of environment, sport, health, social services, culture and education. The quality of what we do is demonstrated by numerous prestigious awards we have won including PPI Awards for efficiency improvements, supply chain management, managing risk and safety as well as our environmental strategy.

SLOVAK POLYSTYRENE PRODUCER

Company IZO4 Ltd was established in 2004. Company is located in the Eastern Slovakia. It is one of the market leaders in area of producing and processing of polystyrene in Slovakia, and probably the largest Slovakian producers.

IZO4 Ltd specializes in production of thermal and sound insulations from expanded polystyrene, launching the first products to the market in year 2005.

Currently the production volume is 400 000 m³ per year, and still rising. This success was achieved thanks to perfect equipment from German company Erlenbach, and perseverant customer care.

Main aim of the company is to sustain, and even strengthen its position on Slovakian market, with innovative methods of implementing the expanded polystyrene in construction processes. New investor entered the company in 2012, and currently all the processes are set up to fulfill the designated aims.

Project: **Upgrade of Gabčíkovo locks**

Upgrade of Gabčíkovo locks is part of a Global Project which aims to upgrade the Gabčíkovo locks to ensure good navigation status in the Slovak part of the Danube and along the Rhine – Danube core network corridor.

Gabčíkovo locks are located at river km 1,820 of the Danube river. The current structure of the locks consists of several infrastructure components which need to be upgraded/replaced to maintain stable and safe navigation. The Gabčíkovo water structure is characterized by two lock chambers and a hydropower plant.

Project financing: Project is co-financed by the European Union's Connecting Europe Facility
Total budget of the project: 144 665 000 EUR
Co-financing from the EU: 122 965 250 EUR
Project Duration: 02/2016 – 12/2020

Main objectives of the project are:

- Ensure a good navigation status along the Slovak section of the Danube by increasing safety, reliability and efficiency of operations of the Gabčíkovo locks.
- Supporting modal split by fostering the use of inland waterway transport and eliminating bottlenecks along the Rhine-Danube core network corridor.

Project: **DaReM - Danube Rehabilitation Measures**

The beneficiary of project is Ministry of Transport and Construction of the Slovak Republic. The implementing bodies are Waterborne Transport Development Agency, Water management construction state enterprise and Slovak Water-management Enterprise. The aim of the project is to propose and implement measures to ensure the sustainable of a fairway on an inland waterway of international importance on the Danube River, in the reservoir Hrušov in the range of rkm1845 to rkm1868.

Project financing: Project is co-financed by the European Union's Connecting Europe Facility
Total budget: 9 750 000 EUR
Co-financing from the EU: 8 287 500 EUR
Project Duration: 02/2017 – 12/2020

Main objectives of the project are:

- to ensure sustainable assurance of fairway on an inland waterway of international significance on the Danube River and mitigation of negative impacts of sedimentation in reservoir Hrušov in the range of rkm 1845 to rkm 1868,
- to enhance the quality and safety of navigation,
- to remove bottlenecks on the Slovak part of the Danube waterway,
- to create conditions for the elaboration and appreciation of sediments in relation to the demands of the environment and the market.

VODOHOSPODÁRSKA VÝSTAVBA, STATE ENTERPRISE

A 65-year-long history and more than 350 water, hydro-power and engineering structures in Slovakia briefly describe the tradition of the VODOHOSPODÁRSKA VÝSTAVBA, STATE ENTERPRISE (hereinafter also VV, s. e.). The company, which is a sectoral organization of the Ministry of the Environment of the Slovak Republic, was established in 1953 as a „Water management and development center“ in order to prepare and create significant investments in the development of water management. Besides the operation of the Gabčíkovo-Nagymaros Water Structure System and the Žilina Water Structure, the main activities of the VV, s. e. also include ensuring technical and security supervision of water structures, and in the case of water structures of I. and II. category, the VV, s. e. has been the only authorized organization in Slovakia to conduct such supervision for almost 40 years.

Gabčíkovo-Nagymaros Water Structure System

The Gabčíkovo-Nagymaros Water Structure System belongs to the largest water projects in Europe. At present, it consists of the Gabčíkovo water structure and the safety measure objects of the Nagymaros water structure. The Gabčíkovo water structure has been in operation since 1992, protecting adjacent areas against floods, enabling smooth navigation through two lock chambers throughout the whole year at the Slovak side of the river Danube, as well as producing the ecological „green“ water energy.

Contributions of the Gabčíkovo Water Structure

- Increased flood safety of the area
- Created an international waterway
- Developed the infrastructure for obtaining ecologically clean electricity
- Stopped erosion of the bottom of the old flow of the Danube
- Improved living conditions of aquatic animals and wild forest animals
- Increased the capacity of ground water resources
- Enabled the use of the Bratislava port throughout the year
- Established ideal conditions for the development of water sports, tourism and recreation

Gabčíkovo-Nagymaros Water Structure System	1978 - 1997

Žilina Water Structure

The Žilina Water Structure was built as the 19th hydroelectric project on the longest river in Slovakia, the river Váh. It was put into operation in 1998 and its main energy component is the hydroelectric power plant. The main water management part of the Žilina Water Structure consists of a dam, which allows a controlled transfer of flood flow through the city.

Contributions of the Žilina Water Structure

- Flood protection of the area
- Utilization of the hydro-energetic potential of the river Váh
- Improved living conditions of aquatic animals and wild forest animals
- Disposal of uncontrolled landfills located in the area of interest during the construction of the water structure
- Protection of the Teplička nad Váhom and Gbeľany water sources
- Sanitization of contaminated groundwater
- Creation of conditions for recreation, angling, cycling, roller skating and water sports practice

VILLA MERIBEL
VYSOKÉ TATRY

The Art Nouveau Villa Meribel was originally built by a famous Budapest prosecutor László Magyari in 1894 in time of the so-called “**Belle époque**” meaning the “**Beautiful Time**”, and it is experiencing a renaissance after 122 years, having underwent particularly delicate renovation, whilst preserving the original heritage features. The extraordinary villa is situated in the heart of High Tatras, in the center of Tatranska Lomnica, near the cable car to the Skalná Pleso and Lomnica Peak and the ski area. Villa offers 9 magnificent spacious apartments – suites on three floors. A high level of comfort is enhanced by a car park in front of the villa and by a ski room with a modern equipment. The ethereal private wellness Meribel oasis will meet your expectations. The Finnish sauna with ice bucket, steam bath and Jacuzzi provide for a delight in well-being and relax.

TECHNICAL UNIVERSITY OF KOŠICE

History of TUKE

The Technical University of Košice was founded in 1952, but its roots must be sought much deeper in the past. As early as 1657 the Universitas Cassoviensis was established in Košice, but technical education in Slovakia was only elevated to higher - education level in 1762, when the Austro-Hungarian monarch Maria Theresa established the Mining Academy in Banská Štiavnica.

The true birth of the Košice Technical College came on 8th July 1952.

Vision

The Technical University of Košice will be

- a leading university of technology on a national basis and
- a respected university of technology on the international scale,
- having a strong degree of autonomy,
- sufficiently diversified financial resources,
- available for a wide range of applicants,
- developing scientific knowledge based on its own original findings,
- providing excellent education on all three levels of tertiary education, as well as
- lifelong education,
- meeting the expected needs of industries, region and society by its research,
- substantially involved in providing services to general public.

Mission

TUKE will provide its environment with scientific and technological knowledge basis, innovation and

workforce, in order to form beneficial and sustainable future and high quality of life. This will be achieved at TUKE by innovative research and excellent education in all scientific branches of respective University Faculties.

TUKE today

- among 5 % of the world's top universities
- 10 % of international students from 40 various countries
- establishment of startup companies in USP TECHNICOM even during studies
- international mobilities in terms of 265 partnerships in 31 countries worldwide
- almost 100 % success of fresh graduates in the job market
- more than 25 kinds of sports, folk and singing ensemble, student television, radio and others

UNIVERSITY PROFILE

The Slovak University of Technology in Bratislava (STU), the largest and most significant university of technology in the Slovak Republic, is a modern European educational and research institution. It offers university education mainly in technical, technological, technical-economic, technical-information and technical-artistic fields of study. Its activities reach back to the rich old tradition of the Mining

Academy in Banská Štiavnica, established by the Empress Maria Theresa in 1762.

Our education system is based on scientific research, as well as on artistic, engineering and other creative activities. The STU faculties, departments, institutes and experts cooperate directly with industrial companies and social organisations, actively taking part in international cooperation.

FACTS AND FIGURES

Number of faculties/university institutes	7/1
Graduates during its existence	159 113
Number of students	13 108
Number of trainers for lifelong learning	3 904
Number of teaching and research staff	
– teaching staff	1052
– research staff	404

Number of study programmes	
– in the Slovak language	170 (B: 54, M: 58, D: 58)
– in the English language	9 (B: 6, M: 2, D: 2)
Number of projects based on industrial contracts	334
Number of research project	825
Number of institutions in international cooperation	337

STUDY SYSTEM AT THE STU

The University offers study within accredited study programmes, in degree courses leading to Bachelor's, Engineer's, Master's, and Doctoral degrees. The credit system is compatible with the ECTS (European Credit Transfer System under the Bologna Declaration of the ministers of EU coun-

tries), enabling the bilateral student mobility in EU countries' universities, as well as within the framework of the broader European and world-wide area. The STU has been an ECTS label holder since 2012.

The system of education is connected with the prestigious partner universities in the framework of international programmes (Erasmus+) using modern methods of education, laboratories and

practical training. It is aimed at branches of study that offer stable opportunities for students' employment in the labour market. Teaching takes place in modern classrooms furnished with the top laboratory and programming equipment.

STUDY PROGRAMMES AT THE STU IN ENGLISH LANGUAGE

The STU offers university education in the English language mainly in technical, technological, technical-economic, technical-information and in the technical-artistic fields of study. Study programmes are updated for each academic year.

Detailed information with description of study programmes, course structure, key learning outcomes and programme directors can be found at:

COMENIUS UNIVERSITY IN BRATISLAVA

THE BEST PLACE FOR STUDY AND RESEARCH

Comenius University in Bratislava is the oldest and biggest university in the Slovak Republic. Established in 1919, the university draws on the tradition of Academia Istropolitana that was founded in 1465 in Bratislava by Matthias Corvinus, the King of Hungary. Since its founding the university has ranked among the best educational institutions on the national level and it has become an internationally recognised centre of scientific study and research. Being the most comprehensive provider of classical university education in Slovakia, Comenius University has retained the status of the Slovak national university.

Comenius University in Bratislava has 13 faculties and serves almost 24,000 students each year within all three degree study programmes, 20,000 of whom are full-time students. Comenius University offers diverse study programmes encompassing a broad range of human knowledge – from medicine, humanities and social sciences, to natural sciences, mathematics and theology.

Almost 2,200 international students from 76 countries enjoy studying at the oldest university in Slovakia. Students who would like to attend foreign universities within the study abroad programme

can choose from 425 European universities from 29 countries. As a part of the Erasmus+ programme each of them have signed the bilateral agreement with Comenius University (CU). Erasmus+ mobilities are realised vice-versa. Spain, Germany and Czech Republic represent the countries with the most frequented mobilities. Moreover in 2015 it has been launched also the cooperation with the rest of the world. Since then Comenius University has carried out Erasmus+ mobilities with partners from Ukraine, Serbia, Georgia, China, Canada and the United States.

With almost 1,900 doctoral students, Comenius University in Bratislava is also a major scientific institution. Comenius University participates in the most advanced research projects in various scientific disciplines (primarily biology, biochemistry, chemistry, computer sciences, clinical medicine, ecology, geosciences, materials science and engineering, molecular biology and genetics, neurosciences, pharmacology, physics, life sciences and space sciences). Comenius University also participates in hundreds of domestic and international science and research projects. Comenius University continues to rank among the top 500 of prestigious world university rankings.

Comenius University in Bratislava

COMENIUS UNIVERSITY SCIENCE PARK IN BRATISLAVA

Comenius University Science Park (CUSP) is focused on science and research in fields of:

- **biomedicine,**
- **biotechnology,**
- **enviro-medicine,**
- **and social challenges of the 21st century in matters of bioethics, law and socio-economic rights.**

CUSP serves as a bridge among academic, public, and private/industrial spheres on national and international level. CUSP is located in Mlynská dolina in Bratislava. Around 40% of research outputs in Slovakia are produced in this region.

CU's Science Park uniqueness lies in the combination and availability of the latest advanced technology, top scientists, and practical application of results. To sum it up, CUSP serves as a platform allowing academic research to interact closely with private sector to respond more effectively to public requirements and needs. Accordingly, CUSP focuses on the development and popularization of science and research based on cooperation with various business entities. CUSP currently works on joint research activities with 10 companies.

CUSP is designed for 149 permanent employees and around 90 external employees – CUSP will offer together nearly **250 jobs**. In addition to scientists and researchers, there is operating and management personnel.

CUSP has about **80 laboratories** dedicated to research activities in fields of biotechnology, molecular biology, genetics, chemistry, microbiology, virology, physiology, ethology, cell biology, plant physiology, environmental medicine and geographical information system for example. In addition, there are few conference rooms of different size available for negotiations, which are equipped with the modern tele-presence system and various technical and security areas (warehouses, IT server rooms etc.).

WHAT KIND OF UNIQUE EQUIPMENT CAN BE FOUND AT CUSP?

- set of unique instruments for molecular medicine, such as Microarray readers, Genome analyzers, DNA scanners, devices for cell incubation and monitoring their growth,
- set of unique instruments for chemical analysis, enabling highly distinctive analysis of molecules,
- set of spectral instruments and optical systems that enable analysis of molecules,
- in the field of environmental medicine, there is a set of top geophysical instruments and systems for the determination of geophysical and geological characteristics of the country.

VISION: TODAY WE DEVELOP YOUR FUTURE.

IMPACTS:

- CUSP primarily serves researchers from Comenius University in Bratislava but also researchers from abroad.
- CUSP will serve as a complex technological, life-sciences oriented spin-off/start up incubator for Comenius University in Bratislava and the private sector.
- Intensive involvement of PhD. students and young researchers.

ACTIVITIES:

BIOMEDICINE FOR THE 21ST CENTURY:

- new diagnostic procedures – genomics, proteomics
- new diagnostic procedures – metabolomics
- new substances and materials for the diagnostics

ENVIRON-MEDICINE FOR THE 21ST CENTURY:

- biotic and abiotic factors of the country and their influence
- geographical information system and environmental health

BIOTECHNOLOGY FOR THE 21ST CENTURY

- design and selection of specific recombinant proteins and peptides with therapeutic potential
- research in phytoremediation and fixation of CO₂ in biomass and practical application of its results

SOCIAL CHALLENGES FOR THE 21ST CENTURY:

- bioethical challenges in cultural framework
- law challenges
- socio-economic challenges

The need of consolidation of market positions of the Farmers and Food Producers is still more and more actual topic not just in Slovakia, but also in EU. It would be good if Slovakia was able to take advantage of this boom. Unfortunately, during last years, we have not done step forward in this direction, but backwards.

Retail chains dominate to the market, which is represented by more than 60 % of food products from foreign countries on the shelves in markets. There is significant absence of legally binding rules to prevent abuse of dominant position of retail chains. It turns out that primary producers should be more involved into marketing organizations and use their synergies to ensure input. Unfortunately, in this respect we are still at the beginning and are not moving into right direction.

It is very important that European Union included the topic of abuse of dominant position of retail chains into the schedule tasks for 2017. This topic belongs to big problems of Slovak farmers and food producers.

The European Union also opened very important discussion about the future of The Common Agricultural Policy 2021-2028. It is forced to drawn into the debate also Slovak farmers and food producers.

Therefore we, as representatives of a self-governmental organisation, but also representatives of Ministry, government and Slovak MEPs, have to do everything to adopt the reform in the most acceptable way.

The public still perceives the Slovak agrifood complex rather negatively - especially as the recipient of large grants. It is necessary to change this and to improve missing Slovak patriotism. It is not enough just to talk about the importance of buying local food, but it also calls for targeted support, and especially long-term sustainable campaign. We have already made intensive preparatory work and we believe, that we will manage to put it into practice soon. We understand, that to be truly successful, we need to get the best possible support.

We started negotiations with several business networks, which will continue. We discuss our internal structures, but also outside them, because the situation is very important. We consider current situation to be alarming. None of our neighbouring countries, that had entered EU at the same time as Slovakia, has such a low percentage of local food sold on the domestic market.

Time will show, whether these negative trends can be changed, or if the Slovak producers will be under pressure to release more space for the import of foreign agricultural and food products. Trade itself admits that there is a potential that could contribute to increasing the representation of domestic agri-food goods in its supply. This is one of the key challenges for our chamber. All efforts would be useless, if there is not local sufficient domestic production available to the market.

Ing. Milan SEMANČÍK
President of the Slovak Agricultural and Food
Chamber

Slovak Chamber of Agriculture and Food (SPPK) represents non-governmental, autonomous and statutory organisation, which was established in line with the Law No. 30/1992 Coll. as amended. The basic role of the Chamber is to enforce the justified common interests of its members, mainly in the process of the agricultural and social policy field. Chamber also takes part in the creation of the state policy concerning the support and protection of its member entrepreneurs to ensure the further development of agricultural production and food processing in the Slovak Republic.

Membership

The members of SPPK are natural and legal entities providing the business activities in agriculture, food industry and in biological, technical and commercial services for agriculture and food processing industry, as well as the other non-governmental organisations operating in the agri-business. The membership in the Chamber is voluntary since January 2005.

Internal organization

Headquarters of SPPK is placed in Bratislava with 15 employees. SPPK also has 38 Regional agricultural and food chambers (RPPK) operating in regions of Slovakia. The "regional" chamber can be established also on the other than just territorial basis. There are also four subjects with the statute of RPPK in accordance to the Statute of SPPK and the Law above. The activities of the Chamber are supervised by the official bodies – the General Assembly, the Board of Directors, the President and the Supervisory board.

Internal Communication

The Chamber is using the wide-spread net of its regional chambers in the whole territory of Slovakia. The central office communicates with the regional chambers using the internet and

emails, but also regular meetings to discuss the actual issues. The Slovak Agricultural and Food Chamber is the only autonomous organisation in the Slovak Republic combining the entrepreneurs operating in agricultural primary production, food processing industry and services for agriculture. SPPK is communicating also to its member associations as well as to the other agricultural autonomous organisations. All the members of SPPK have direct access to the regional office in which they are registered, but also to the central office in Bratislava.

Activities

The Chamber's activities are focused to:

- Lobbying for interests of its members at national and international level
- Legislation – legal sector
- Providing of business information service
- Guidance and education
- Co – operation with the international organizations

Co-operation with national and international partners

The Chamber is cooperating and communicating also with the state bodies accordingly to the conditions set out in the Law and in the Agreement on a Co-operation between the Council of the Agricultural Statutory Undertakers and the Ministry of Agriculture of the Slovak Republic to search for the solutions of the problems in agriculture and food sector. SPPK pays extra attention to development of the international contacts and representatives of the SPPK participate at the regular meetings of the representatives of the agricultural chambers from the "Visegrad four" countries (Slovakia, Czech Republic, Hungary and Poland). The representatives of Chamber cooperate also with other agricultural chambers within the European Union.

Member associations of food processing

SPPK organizes associations of the food processing industry – see below:

Message by the President of the Slovak Chamber of Commerce and Industry

The year 2018 is marked by the 25th anniversary of the Slovak Republic and 25 years of the independent Slovak economy. The Slovak Chamber of Commerce and Industry (SCCI) is not only an integral part of the 25-year-long history of entrepreneurship in Slovakia, but also of its future. The main message of the economic development in Slovakia over the past 25 years is that we have clearly demonstrated our viability and proved that Slovakia was not that part of the former federation for which others lost out economically. The key message for Slovakia and its future is to remain proud and bold, to be able to correctly set its priorities and ensure future sustainability. This is where I see the future of the Slovak Chamber of Commerce and Industry both from the point of view of internal developments and in confrontation with the external environment.

From the economic perspective, I would like to highlight three interlinked areas, characterised by mutually dependent interactions, i.e. areas which must be addressed simultaneously: education, research and development, and the restructuring of the Slovak economy. I consider them – not only with respect to the economic development, but also at the level of society – to be the main challenges for the government, the business sector and for the Slovak Chamber of Commerce and Industry.

Since its establishment in 1992, the Slovak Chamber of Commerce and Industry has been the most representative group of the business sphere in Slovakia. It has managed to create an efficient regional structure which provides daily services to businesses. Its highly professional staff are able to react to the demands of the Chamber's members. The SCCI Arbitration Court has long been the most recognised place of arbitration within the Slovak Republic. During its 25-year-long activities, the SCCI has always been able to respond to the critical social and economic challenges of our country.

The international position of the SCCI reaches far beyond the weight of the Slovak economy in European and global dimensions. Its social mission and level are definitely better appreciated and recognised abroad than at home. The SCCI holds a leader's position in the International Chamber of Commerce and in the World Chambers Federation. It plays a key role within the Association of European Chambers of Commerce and Industry Eurochambres and in

the Silk Road Chamber of International Commerce. Through its involvement in these institutions, the SCCI represents and coordinates the common business interests of its members in Slovakia and abroad. It has also set up the underlying relations and structures that enable Slovak entrepreneurs to directly establish contacts with European and world business organisations. It closely cooperates with the European Commission, the countries of the Central European Initiative and with other international economic institutions and associations. The creation of the advisory Committee for Business and Industry (BIAC) of the OECD, the Economic and Social Committee (ECOSOC) as the advisory body of the European Commission, and of the National Committee of the International Chamber of Commerce (ICC Slovakia) represents the basic steps towards full participation of Slovak economic entities in the decision-making processes within the international economy.

Besides its standard functions, the Chamber is currently focusing on ethics in business. Being aware of the fact that ethical business can only be done in an ethical and transparent environment, we became one of the initiators and signatories of the "Rule of Law" appeal, which was accepted by the Government in 2015 as part of its action programme. The SCCI considers it important to spread this programme into new areas and achieve major progress in the field of ethics, fight against corruption and increased personal responsibility in society.

The Slovak business community entered the year 2018 with mainly positive expectations. Their fulfilment, however, will be influenced not only by our own activities, but also by other internal and external factors which will either confirm or hinder the expected development. It is therefore necessary to restore a better quality of dialogue between the political decision-making sphere and business institutions, as we witnessed during the formation of the Slovak Republic, the transition period or while dealing with the impacts of the economic crisis at the end of the 2000s. Such dialogue has always brought results and solutions that have moved us forward.

I am convinced that this publication can partly contribute to improving the business and economic relations and contacts between Slovak businesses and their foreign partners.

Peter Mihók
President of the Slovak Chamber of Commerce
and Industry
Chairman of the ICC World Chambers Federation

BRIDGE TO THE WORLD OF BUSINESS

Dear Partners,

Your decision to do business in Slovakia is a wise one. The Slovak Republic is well known for its high level of culture, qualified workforce, advantageous geographical position in the centre of Europe on the border between the West and the East, favourable taxation system, and extensive transport communication network. To do business in Slovakia means to hold a stake in the expansion of a region which, in the future, will have increasing significance for European trade and prosperity. Your investments and personal effort will therefore soon be rewarded with a fast return and high profit. During the course of your business activities, you will often need help and advice from someone who is familiar with this environment and who has been active in it from the very beginning. That is why the Slovak Chamber of Commerce and Industry (SCCI) wants to be your first point of contact and your partner when entering Slovakia. The SCCI is an independent public and legal institution which, in a similar way to the Chamber of Commerce in your home country, provides a full range of services to its members and other domestic business groups, as well as interested parties from abroad.

We will provide you with valuable contacts!

Some things that the SCCI will arrange for you:

- ✓ contacts with domestic businesses
- ✓ contacts with professionally-oriented sections
- ✓ finding suppliers
- ✓ finding manufacturers
- ✓ finding importers
- ✓ finding companies suitable for joint ventures and acquisitions
- ✓ the corporate profiles of companies and institutions
- ✓ in the event of your visit, recommendations and the organisation of meetings, including secretarial services, accommodation, transport, etc.
- ✓ advertising in the SCCI newsletter, which is distributed to all SCCI members, as well as foreign consular offices in the Slovak Republic, consular offices of the Slovak Republic abroad, representative offices of foreign companies in Slovakia, government institutions, and Slovak businesses.

We will prepare the ground for you!

For your trade mission in the Slovak Republic, the SCCI will arrange:

- ✓ meetings with Slovak businesses
- ✓ a comprehensive programme for mission participants (accommodation, transport, cultural programmes, and other services on request)
- ✓ background information required for negotiations

We will meet all your needs!

For seminars, lectures, or training the SCCI offers:

- ✓ the attendance of Slovak participants
- ✓ a venue, including the necessary equipment (audio-video), translations, and refreshments
- ✓ advertising, invitations, and media publicity
- ✓ accommodation, transport, and transfers

We will introduce you to a specific environment!

In addition, upon request, the SCCI can arrange:

- ✓ marketing studies
- ✓ statistical overviews
- ✓ consultations on legal, financial, taxation, and customs matters
- ✓ information on business conditions and opportunities
- ✓ translations of acts, rules, and regulations
- ✓ information on import regulations (limits, quotas, restrictions, and certifications)
- ✓ participation at exhibitions and trade fairs
- ✓ information about options and conditions for investing, capital investment, and private ownership in the Slovak Republic
- ✓ interpreting and translation services
- ✓ other services upon request

Arbitration Court

The Arbitration Court of the SCCI is an independent body that also offers its services to you. It resolves property claims between entrepreneurs arising from business and economic relations. It realises consultation and advisory activities to settle such claims.

Information on investment conditions in the Slovak Republic is available in all offices of the SCCI.

The Region of Banská Bystrica

Number of inhabitants:	653 024
Area:	
– Total:	9 454 km ²
– Forests and woodland (%)	49 %
– Agricultural land (%)	44 %
Protected area (%)	34,82 %
Population density (people per km ²)	69
Urban population:	53 %
Number of municipalities:	516

The Banská Bystrica Region lies in the southern part of central Slovakia. It is the largest self-governing region in Slovakia. It borders Žilina Region in the north, Prešov Region in the north-east, Košice Region in the east and Hungary in the south. Primarily due to its terrain, which is mostly covered by forests and agricultural land, the population density in the region is the lowest in Slovakia. There are 516 municipalities in its territory, out of which 24 are towns. The residential structure is represented by all settlement formations from medium-sized towns through small towns, rural municipalities to scattered provincial settlements. The capital of the region is the city of Banská Bystrica with approximately 77 000 inhabitants.

The Banská Bystrica Region territory belongs to the top regions from the perspective of the country and nature surroundings, in some cases even in the international scale. There are five national parks located in the Banská Bystrica region, either fully or partially. These are the Low Tatras, Veľká Fatra, Muránska Planina (plateau), the Slovak Paradise and the Slovak Karst (the UNESCO Biosphere Reserve). There are also protected landscape areas of Cerová Vrchovina (highlands), Poľana (UNESCO Biosphere Reserve), Ponitrie and the Štiavnica Mountains, national nature preserves and a great number of protected areas, localities and objects with lower rate of protection.

The road system consists of 3.203 km of roads out of which 639 km are 1st class roads and 119 km expressways and feeders. There are two important transportation routes crossing the

Banská Bystrica Region. The north-south transit route marked within the European road system as E 77 /Varšava-Krakow-Banská Bystrica-Zvolen-Šahy-Budapešť/ and west-east marked as E 571 /Bratislava-Košice/. Currently there are ongoing state investments in construction of the expressway R2.

Two railway lines crossing the region territory connect the south of Slovakia with north and west with east on the routes: Bratislava – Zvolen – Košice - Čierna nad Tisou - Ukraine and Žilina – Zvolen – Lučenec - Republic of Hungary, which are interlinked with a dense network of railways of regional importance.

Air transport is available via the Sliač Airport located between towns of Banská Bystrica and Zvolen, and this belongs to the network of international airports. Two smaller airports Očová and Boľkovce are used predominantly for purposes of recreational flying.

The most important development area in the Banská Bystrica Self-governing Region (BBSK) is the territory of Banská Bystrica and Zvolen districts, due to concentration of universities and research and development facilities as well as a high number of economically active population with university and upper secondary education.

The university education in the BBSK is provided by four universities: Matej Bel University in Banská Bystrica, Technical University in Zvolen, Academy of Arts in Banská Bystrica and

Jan Albrecht Music and Art Academy in Banská Štiavnica. They present a great potential on which the region can build its future not only in the context of Slovakia but also in the European context.

Besides university education, the education in BBSK is ensured through a network of primary schools, secondary vocational schools and grammar schools as well as educational institutions which provide lifelong learning in courses and trainings accredited by the Ministry of Education of the Slovak Republic. There are 29 grammar schools and 57 secondary vocational schools, out of which 61 are state schools, 20 of them are private and 5 are church schools.

The Banská Bystrica region is an attractive tourist area thanks to its historical sights, natural beauties, cultural and sports events and tradition in organising exhibitions. Nearly half of the region area is covered by forests, which create ideal conditions for the development of tourism, agrotourism, winter sports, water sports and game hunting.

The leading industry sector in the region is metallurgy (from the viewpoint of revenues and employment) which represents over 60% of the total industry export of the region. Further important sectors are pulp and paper industry, pharmaceutical industry, wood processing industry, engineering industry and production of construction materials. The northern part of the region has relatively high degree of industrialization. The southern part of the region is a basis of the food processing industry and other sectors complementary to the agriculture. Significant industries are also forest industry, logging and wood processing.

Foreign capital is concentrated in 1854 firms, which represent 9,96 % of the entire number of business entities listed in Business Register. The most successful of them are Slovalco, a.s. Žiar nad Hronom, Knauf Insulation, s.r.o. Nová Baňa, Evonik Fermas s.r.o. Slovenská Ľupča, Continental Automotive Systems Slovakia s.r.o., Zvolen, Johnson Controls Lučenec s.r.o., Witzenmann Slovakia, spol. s r.o. Vlkanová, Küster - automobilová technika spol. s r.o. Vlkanová.

The priority of development of the region is to stay attractive for foreign investors. As the main reasons to invest in the region are considered:

- Strategic location in the centre of Europe with great export potential–market of 300 million people in 1000 km radius
- Optimal transport connection with significant European centres – Vienna , Budapest, Bratislava, Prague, Krakow, Kiev
- Diversity of economic sectors
- Significant potential needed to establish the links with foreign contractors – local subcontractors from the region
- Qualified labour force
- Established manufacturing infrastructure
- Authorized Regional innovation strategy of the Banská Bystrica Region establishes favourable conditions in the region for further development of science, research and innovation
- Excellent natural and climatic conditions for the development of tourism related to winter, summer leisure activities and health resorts services – spas
- Wide range of available cultural, social and sports related activities

The Region of Bratislava

Bratislava, the capital of Slovakia, is located on the confluence of rivers Danube and Moravia on the foot of the Small Carpathians and where three borders meet – Austrian, Hungarian and Slovak. For many years, this exceptional location predetermines the role of Bratislava as an important trading place, a crossroads of transport routes, an area of political life, business, financial services, industry, agriculture, education, culture and sports. Whether called Preslau, Pressburg, Pozsony or Bratislava, the hospitality, architecture, excellent food and good wines dominate its friendly atmosphere.

Bratislava and Bratislava Region has become the most developed part of Slovakia from an economic, social, science, research and technical point of view. The strongest economic position (25% GDP) of Bratislava among Slovak regions reflects also a strong position of Bratislava within the country itself.

The Region of Nitra

The Nitra Region in the Context of Foreign Investments

Only very few Slovak regions have such excellent preconditions for the development of international contacts and cooperations as has the Nitra region. This region extends from the mountain ranges Povazsky Inovec and Tribec in the north to the river Danube in the south and geographically it covers the prevailing part of South-western Slovakia.

This region is identical with the chamber region of the Regional Chamber of Commerce and Industry Nitra. The chamber region begins approx. 80 km easternly from the Slovak capital Bratislava and is surrounded by the other chamber regions Trnava, Trenčín, Banská Bystrica. The centre of the region is the historically famous town Nitra with approx. 77 374 inhabitants. The total geographic surface of the region represents approx. 6 344 sqkm and the number of its population is about 680 779 residents. The total number of the entrepreneurial subjects in 2016 was approx. 70 015. The traditional industrial branches of the region are the machine engineering, metal processing, electrical engineering, chemical industry, building material production and the automobile industry. Based on the excellent climatic and soil conditions very important are also the agricultural production and the food processing industry.

Concerning the size of entrepreneurial subjects there are typical here small and middle sized companies, which went through the transformation process to the market economy easier and more flexibly as many big factories in other parts of the Slovak Republic. In the recent ten years there was established here a large number of new producing companies by local Slovak entrepreneurs, which are successful not only on the Slovak but also on international markets.

The objective advantages of the region have been invented also by well-known foreign companies, from which many are present here with strong investment projects. To the most important foreign investments of the region belong such manufacturing plants as for example the HEINEKEN SLOVAKIA JSC Hurbanovo /beer and malt production/, Giesecke & Devrient Slovakia Ltd. /smart plastic cards/, MATADOR AUTOMOTIVE JSC Vrable /automobileparts/, IDO EET Ltd. /special engineering production/, SLOVENSKÉ ENERGETICKÉ STROJÁRNE JSC Tlmače /produces and supplies steam boilers for combustion of coal, oil, gas and biomass/, Duslo JSC, Šaľa /fertilizer production/, Low&Bonar Slovakia, a.s. /industrial and coated fabrics and composite materials/, KABELSCHLEPP SYSTEMTECHNIK Ltd. /systems of energy carriers/, Pastorkalt JSC /production and delivery of refrigeration equipment/. The most important investors came to the region from Germany, Austria and Holland. Besides these direct investments a large number of local industrial companies cooperate very intensively with partners in the European Union supplying for them semi-products or carrying out certain finalizing operations on their final products.

The region has very good transport infrastructure with dense network of roads which contributes to the further intensification of the international contacts. The administrative centre of the region the town Nitra has direct highway connection with the capital Bratislava and thus also with the Slovak-austrian border. Thanks to this highway connection and the good geographical position three international airports /Bratislava, Vienna, Budapest/ are available within three hours. In the town Nove Zamky 30 km southernly from Nitra there is one international railway junction and in the suburb of the town Komárno is the second most important river port of Slovakia on the river Danube. After the opening of the Rhine-Main-Danube channel the region has direct ship connection with the Black and North Sea.

Nowadays, the main task of the Regional Chamber of Commerce and Industry Nitra in the international sphere is the further support of commercial and cooperational contacts between Slovak and foreign companies. This target is based on the high interest of the local entrepreneurial circles for the intensification of business contacts mainly with the countries of the European Union and of Middle Europe. It is expected that thanks to the geographical proximity and good infrastructure, this region will attract the interest of further foreign investors. Naturally, the Regional Chamber of Commerce and Industry Nitra will be always ready to equip them with basic orientation in the current Slovak environment and to provide professional advisory services in all spheres of the economic life.

The Region of Prešov

The Prešov Regional Chamber of the Slovak Chamber of Commerce and Industry

The Slovak Chamber of Commerce and Industry, an integral part of which is the Prešov Regional Chamber (PRC SCCI), is an association of business concerns formed in order to boost the economic prosperity of its members, encourage their business activities both in Slovakia and abroad and assist in the creation of a positive business climate. The SCCI is a public institution established by Act 9/1992 of the National Council of the Slovak Republic and declared in Act 121/1996 of the National Council.

Membership in the Chamber is voluntary and its members are both natural and legal persons performing business activities in various fields of economy, with exception of agriculture and food industries.

The members have the right to:

- Use all services provided by the SCCI
- Service price discounts in accordance with the chamber's valid price list of services
- Propose and elect bodies
- Submit proposals for the improvement of the chamber's activities

The primary aim of PRC SCCI is to provide high-quality services to the business community in the Prešov region, to assist in tackling their business-related problems, to predict, analyse and define the needs of entrepreneurs and to offer solutions in the form of both tested and first-time services.

Provided standard services of the SCCI's Prešov Regional Chamber:

- Issuing of ATA carnets and certificates
- Counselling and consultations related with export and import of goods
- Counselling on the possibilities of financing business activities through the Structural Funds (ŠF)
- Services in the field of education
- Development of international trade relations - by organising trade missions at home and abroad
- Organisation of the participation of companies for fairs and exhibitions
- Publishing, distribution and sale of specialised publications

The plan for the Chamber's activities for each year is approved at the plenary session of the PRC SCCI and is outlined on our web-site www.po.sopk.sk. Members of the PRC SCCI are kept regularly informed about all events organised by the Chamber.

- the territory of the SCCI's Prešov Regional Chamber is the Prešov Self-governing Region
- the PRC SCCI also has an office in Poprad

The Region of Zilina NORTH-SLOVAKIA COUNTY

The situation of Slovak Republic's economy is frequently discussed in Slovakia and abroad, and the debate is greatly confused. The analysis is often mixed up with wishful thinking, simple lobbyism etc. A few neutral figures:

GDP IN CONSTANT PRICES – changes in %
Slovakia

EXCHANGE RATE - Month - VI.
SKK / 1 CZK, Slovakia: Czechia
brief history

Twenty-five years have elapsed since the Slovak Republic acquired independence. In these approximately 25 years the Slovak Republic had to prove evidence of its capability to manage the development of the county, assuring its political stability and economic development.

After three years of independence, the economy of the Slovak Republic acquired from the London „The Economist Intelligence Unit“ the best rating among Czech Republic, Poland and Hungary - countries in transition. The rating was supported mainly by agreed aims and practical economic policy of individual states within the goals of the International Monetary Found, macro-economic indicators etc.

The Slovak Chamber of Commerce and Industry (SCCI) as a public - legal institution plays the role of the major representative of the entrepreneurial and business sphere in the Slovak Republic. The Regional Chamber of the SCCI in Zilina represents and co-ordinates the interests of its members in matters of business activity inland and abroad, renders services and protects them from unfair business relations in the following districts : Zilina, Martin, Dolny Kubin, Liptov. Mikulas, Turcianske Teplice, Ruzomberok, Cadca, Namestovo, Tvrdošov, Bytca, Kysucke N. Mesto. The members of Regional Chamber SCCI Zilina come from the most industrial sectors including engineering, machinery, metallurgy,

building industry, wood processing, paper industries, chemical industries, textile, food industries, electrotechnical, electronic industries, automotive, energy, tourist and travel, etc. **The most important companies**, suppliers, hotels, spa of Zilina County in that branches you can watch in "CATALOGUE FIRMS of SCCI Zilina County" – issue by chamber of commerce and industry Zilina.

Our County located at the North-West of Slovakia is one of the most industrialized areas in the republic. Zilina is the city of the County. The region is connected to the international trucks roads, Core European Corridors:

- I. **E 50:** ...-Paris-Praha-Brno-Zlin-Zilina-Martin-Ruzomberok-Liptovsky Mikulas-Presov-Kosice-Kyjev,...and
- II. **E75:** - Koper-Wien-BA-/...-Belgrade-Szeged-Bratislava-Zilina-Zwardon-B.Biala-Katowice/Krakow-Warsaw-Minsk-Moscow...)
- III. **R3/59/65:** Krakow-D.Kubin-Martin-Kremnica-Zvolen-Budapest

North-Slovakia is a transport junction of international railways systems in the direction Poland, Czechia, Ukraine or to south – Hungary, former countries of Yugoslavia, etc. Air transport is secured via the International **Airport at Zilina**. The distance of the Airport from Martin is 37 km, to Liptov 70 km.

Ekologická stopa je ľudská spotreba prepočítaná na biologicky aktívnu plochu nevyhnutnú k produkcii spotrebovaného a k odbúraní odpadu. Uvádza teda, akou veľkou plochou Zem je priemernej kvalite potrebuje človek pre svoju ročnú spotrebu. **Jednotkou je "globálny hektár"** na hlavu, čo je hektár biologicky aktívneho povrchu planéty o priemernej produktivite. Pre každého obyvateľa planéty je k dispozícii 2,1 hektáru plochy. Ľudia dnes prekračujú bioproduktivitu Zeme v priemere o tretinu a vytvárajú teda hlbší ekologický stopu, ako je Schopná obnovy. Naposledy sa ekologická stopa ľudstva rovnala bioproduktivite Zeme v polovici 80 rokov.
