Dear Reader,

Year 2019 will be remembered as a year of another fierce fight for democratic values and for our sustainable security since the fall of the Berlin wall, 30 years ago:

United States and Russia have withdrawn from the Intermediate-range Nuclear Forces (INF) Treaty.

On which European security was very much dependent. It seems the new nuclear arms race is under way. The world, in the meantime faces another crucial problem: we have the last 12 years to avoid irreversible climatic changes.

Before the upcoming European elections in May 2019, we fight for stability in Europe in the times of Brexit and a massive destabilization in the information space. Especially in this space, we can expect an unprecedented wave of hybrid attacks in relation to the elections. For those organizing these attacks this is an opportunity to weaken the trust of the citizens in democratic institutions built up over the last 60 years - especially the election processes. We ought to appreciate the unity of the member states that the EU was able to demonstrate in negotiations with the United Kingdom and in defending common rules.

The fight for (un)European future, including the use of hybrid attacks is still ongoing in our eastern neighborhood and in the countries of Western Balkans. We can observe first-hand the developments on these territories thanks to ongoing Slovak presidency in the Organization for Security and Co-operation in Europe. How to support sustainable solutions to regional conflicts that have a direct impact on the security of the EU member states?

We in Slovakia are currently also faced with the unprecedented disinformation campaigns, trying to degrade the enormous efforts and successes of the Slovak diplomacy of the last 20 years, ever since our path towards the integration to Euro-Atlantic structures began.

Slovakia though cannot think or act in isolation. Our sovereignty is strong only when linked to shared sovereignty with our allies in NATO and in the EU. Together with them especially, we are bound by a series of treaties for the last 15 years. We were able, back then to jump on a nearly missed train after the 1998 elections and successfully join the European and Euro-Atlantic security integration processes.

Let us remind ourselves today of the deep structural reforms since 1999 until our accession to the EU and NATO in the spring of 2004. Let us not forget the role of civil society, academia and professional associations contributing to the first round of national conventions on the EU between 2001 and 2003. These were followed by a referendum in 2003 where 94% of citizens supported our path to EU integration. We should also not forget our efforts to build democratic and security structures that led us to our accession to NATO.

However, shall we question the relevance of this crucial anchor because of massive disinformation, demagoguery or foreign political interests? Do we want to fail our partners, with which our economic and social success is closely linked?

Our security as a supporting pillar of our sovereignty could only be shared security with our allies. Whether it is through intergovernmental system of guarantees of the NATO Alliance, emanating from the Article 5 of the Washington treaty, or through European common security and defense policy. How much would our economy had to invest into our own security and defense, should we become "independent"? Where would we find these funds? Would we take it from the areas of education, culture, science or in health care, agriculture or regional development? Do we realize how nonsensical are the discussions about the investments of our allies into our own security or about European funds pouring into all aforementioned areas?

**Ministry of Foreign and
European Affairs of the
Slovak Republic**

Slovak Republic
phone: +421 2 5978 1111
fax: +421 2 5978 3333
e-mail: info@mzv.sk
www.mzv.sk

Another pillar of our sovereignty is internal security of Slovak republic as a member of Schengen system. Would this internal security be more effective without massive investments of the EU into common effort to secure the borders, into stabilizing the neighborhood and into the modern tools detecting security threats? Would we be building new fences around our country, just like the one being planned for US-Mexico border? Would we return to border checks for every citizen and businessperson traveling to other countries? This would not just be about controlling those coming if, but also about restricting the free movement of citizens, companies and students, as well as restricting business between our companies and those from the abroad.

Is this what our citizens, believing in conspiracies sharing and spreading the messages of "national sovereignty" and questioning our credibility in Europe want?

We will get the answers to these questions this year.

New generations with new visions and hopes are coming to this world in the meantime:

We do not have to agree on everything the French President Emmanuel Macron declared in his vision of deeply integrated Europe.

However, it is true that our societies have been lacking a visionary for a long time. A visionary that brings idealistic ideas, of which parts we can start bringing to life in order to make the EU more effective now. In open and critical dialogue of course, as this is what democracy is about, freedom and equality of citizens and all member states of EU as well as NATO.

Groundbreaking projects of Marc Zuckerberg, Elon Musk or our own Slovak inventors and inventions - from flying cars, through ecological habitable capsule, software applications to top-class computer security - boost our optimism.

We also welcome a fresh wind of deterring fight of the new generation of teenagers for the future of the world: Greta Thunberg - for the opportunity to live in a sustainable environment without the climate change, Emma Gonzales - for safe society without weapons carried in public or Malala Yousafzai - for education, equal rights for girls and women in their lives.

Whom should we listen and follow then in our lives? Extremists and populists, or these youthful people bringing the values back to life?

Destruction versus youth and hope. Whom do we give a chance? I, myself vote for the second option.

Miroslav Lajčák,
Minister of Foreign and European affairs
of the Slovak republic

Dear readers,

Slovakia entered 2019 with a balanced state budget for the first time in its history. It was also thanks to the excellent condition of the Slovak economy that we managed to achieve the accomplishment that had for years been seen as an ambitious milestone. Even though experts predict a downturn from the last year's growth in gross domestic product at 4.3%, Slovakia will, nevertheless, maintain one of the fastest-growing GDP rates in the EU in 2019. Estimates by Slovak experts still remain above the four-percent level. This development was also confirmed by OECD chief José Ángel Gurría during his February visit to Bratislava, who said that the Slovak economy was currently enjoying a remarkable expansion. Economic estimates remain optimistic. But we need to say openly that, now perhaps even more than in the past, the situation will be influenced by external factors. Outstanding issues include the development in the trade relations between the EU and the US, as well as the final form and subsequent consequences of Great Britain leaving the Union. Therefore, we need to take advantage of the current good times to seek and adopt the best possible solutions.

The long-term priorities pursued by the ministry of economy economy ministry include attracting investors primarily to the regions with higher unemployment rates, and investments with a higher value-added, or those related to research and development. Over recent years we have been successful in this in cooperation with the Slovak Investment and Trade Development Agency (SARIO) and we continue to see a strong interest in Slovakia among potential investors. We are currently working on approximately 80 projects worth 4.432 billion euros in total, half of which involves the least developed districts and nearly two-thirds focus on eastern Slovakia. The parliament approved new legislation last year, prepared by the ministry of economy to reinvent the investment aid architecture. The legislation has been designed to shift the investors' interest from west to east, from direct towards indirect investment incentives, while the emphasis is put

on higher value-added investments. Examples of such investments made last year include, for instance, the opening of a new production plant by Japanese company Minebea in Košice, as well as the beginning of the construction of a Mubea plant in Kežmarok.

This year, we have to gradually introduce a new, reformed support framework for renewable energy sources that is about to bring the most crucial changes to the energy sector in the past ten years. We are modernising the entire system of support for energy generation from renewable sources which I believe will lead to an increase in green power generation this year. The first step already taken by the ministry was freeing the capacities for new green energy sources, having discontinued the so-called stop-situation in their construction after a longer period of time. We are introducing a novelty – a local source. It allows producers to generate "green" power exclusively for their own consumption directly at an offtake point. Such generation will be exempt from the system operation tariff. Another measure we are now working on is auctions. The ministry will open an auction this year for new larger capacities over 500 kilowatts based on which the state will select a renewable power generation facility to support. The final price will thus come from the results of a competition.

This year, for the first time ever, the Ministry of Economy of the Slovak republic will provide financial compensation from the state budget to energy intensive undertakings to reduce their electricity costs. The main goal of this measure is to increase the competitiveness of eligible undertakings vis-a-vis companies abroad. The entire process is transparent; compensations will be provided to the undertakings in line with the criteria based on the EC Guidelines on State aid for environmental protection and energy 2014-2020. It means that compensations will be provided to all applicants that meet the conditions laid down by the legislative framework in a truly non-discriminatory manner. 40 million euros has

been allocated in the state budget for this measure and I believe that the businesses will really benefit from it.

Another agenda that we have continuously been working on is removing the redundant red tape. The ministry of economy has already prepared three anti-bureaucratic packages and coordinates activities with respect to the so-called gold-plating, that is, national legislation that goes beyond what the EU actually requires from Slovakia. The first tangible impacts of the measures from the first package, adopted in June 2017, should be experienced by the businesses and entrepreneurs this year. Just to remind you, the first package included, among other things, the cancellation of the mandatory health service at work, the introduction of a service to track changes on certificates of title in the land registry, the super-deduction of research and development expenditures up to 100%, as well as the preparation of an analysis to simplify the calculation of tax base for small and medium-sized enterprises. It was after this analysis that the ministry of finance decided to adopt new legislation on corporate income tax which should significantly simplify and reduce the administrative burden on small and medium-sized businesses.

The most important measure included in the second package, approved in May last year, is the anti-bureaucratic law. Thanks to this legislation, state authorities and institutions no longer require that natural and legal persons submit the most frequently requested statements, certificates and other documents – such as certificates of title, statements from the register of criminal records, company or small trade registers. The last package of measures was approved by the government this year. These measures focus on the development of e-government services and enhancing the effectiveness in the processes for starting a new business and opening new establishments. They should considerably simplify and streamline business licensing rules and eliminate various obligations and mandatory submission of various certificates, for example, for hygiene

or building permit procedures. The packages are estimated to bring entrepreneurs annual savings of around 100 million euros. In addition to lower financial costs, entrepreneurs will also save effort and time. I would like to point out that we are not preparing the anti-bureaucratic packages for the sake of the ministry's image or nice-looking statistics. The aim of the ministry of economy is to contribute to creating a stable environment in which honest entrepreneurs can fully focus on their own business without being overwhelmed by the unnecessary red tape, regulation, and administration which the state is able to handle alone with better communication.

The ministry of economy has also long concerned itself with one of the new phenomena of our times – electric mobility. The government has approved The Action Plan for the Development of Electric Mobility in the Slovak Republic prepared by the ministry of economy. Over the next two years, 15 concrete measures should be implemented to support the development of this type of mobility in Slovakia. It should result not only in a higher number of electric cars driving on our roads but also in the development of the necessary infrastructure and investments in research and development of components for electric cars. Once again, but using our own funds this time, we want to launch a project to promote the sales of electric cars. We will also support the building of the necessary infrastructure. One of the important items on the action plan agenda is to provide more support for research, development, and competitive and sustainable manufacturing of batteries for electric cars. Slovakia is an automotive superpower and electric mobility is the hottest trend in the automotive industry, therefore, if we want to remain among the industry leaders, we have to support this new direction.

I believe that the ministry will successfully turn all these plans into actual measures that will bring about the desired effect. As I wish our plans to be a success, I also wish you to be successful both in your private and professional life.

Peter Žiga
Minister of Economy of the Slovak Republic

SLOVAKIA - Regions and Districts

SLOVAKIA - Geographical Map

Total area:	49 035 km ²
Capital:	Bratislava
Length of state border:	1652,6 km
Population:	5 397 036 (as of 21. 5. 2011)
Political system:	Parliamentary democracy
Official language:	Slovak
Currency:	Euro, 1€ = 100 cents
Population density:	110,2 (per 1 km ²)
Time zone:	Central European Time (GMT +1 hour)
Country Telephone Code:	++421-

Location:

Slovakia is located in Central Europe. The relief of the country is characterised by great differences. In central and northern Slovakia the countryside is hilly, it is covered with the Carpathian mountain range. The countryside of the southern and eastern Slovakia is low.

Climate:

The territory of Slovakia is situated in the mild climatic belt with regular alternation of four seasons of the year. The average temperature is in winter - 2° C and in summer +21° C. January is the coldest month with night temperatures -10° C and -15° C, the warmest month is July with a daily maximum temperature of approximately +32° C.

National Holidays:

January, 1 st	Establishment of the Slovak Republic
July, 5 th	St. Cyril and St. Methodius Day
August, 29 th	Slovak National Uprising Day
September, 1 st	Slovak Constitution Day
November, 17 th	Day of Fight for Freedom and Democracy

Public holidays:

January, 6 th	Epiphany (The three Sages and Christmas Holiday of Orthodox Christians)
March/April	Good Friday, Easter Monday
May, 1 st	Labour Day
May, 8 th	Triumph Over Fascism Day
September, 15 th	Lady of Sorrows Day
November, 1 st	All Saints Day
December, 24 th	Christmas Eve
December, 25 th	Christmas Day
December, 26 th	Second Day of Christmas

The national symbols of the Slovak Republic are the national emblem, the national flag, the national seal and the national anthem.

The national emblem of the Slovak Republic has a red, early Gothic shield with a silver double cross mounted on the central peak of the blue three hill group.

The national flag of the Slovak Republic is composed of three horizontal stripes - white, blue and red (with white at the top, followed by blue and red). In the front section of the national flag is the national emblem of the Slovak Republic.

GREAT MORAVIAN EMPIRE – OLD-SLAVONIC EMPIRE (805-905) - 9th century

"I mind the disregard for the culture that is centuries older."

Alexander the Great (356-323 B.C.)

■ NITRA, MIKULČICE, DEVÍN - centres, towns, castles

■ Rulers: **Mojmír I.** (830 - 846), **Rastislav** (846 - 870), **SVĚTOPLUK I.** (870 - 9. 3. 894), **Mojmír II.** (894-907).

Territory of the empire: Slovakia, Moravia, Pannonia, Czechia

■ Slavic gods: Perun, Triglav, Dazhbog – god of the Sun, Radegast, Zhiva (Siva) – goddess of life and bioenergy; Slavic priests used meditations and breathing

exercises to accumulate and balance energy;

■ **863-885** Constantine-Cyril and archbishop Methodius with Rastislav and King Světopluk founded the material, spiritual and culture traditions of Slavonic people and devised the alphabet;

■ **866** They founded the Great Moravian training college – school, where 200 pupils finished their studies; literature – writings, poems, code of law;

■ **869** The Old Slavonic language became the fourth liturgical language in the world along with Greek, Hebrew and Latin;

■ Methodius (815-6. 4. 885) studied law; archbishop in Great Moravia and Pannonia-Sirmium - Srem. Mitrovica

■ Constantine the Philosopher – Cyril (827-14. 2. 869) devised the alphabet and spelling, and created words for communication from Greek;

■ **880** The pope issued the bull *Industriae tuae* by which he took under protection the independent Great Moravian Empire

■ Byzantine writing on Slavonic people: "Slavic tribes are accustomed to freedom and will not let themselves

enslave. They keep open house for foreigners and accompany them as their guests from one place to another, wherever the guests wish. Their way of life is rough, but they are note evil-minded."

■ **~ 889** – Czech lands annexed to the Great Moravian Empire;

■ **~ 906** Magyars invaded Great Moravia from the East, subverted the Empire and settled in Pannonia;

■ **890 -1000** ➔

Dissemination of material

and spiritual culture From

Great Moravia to Bulgaria, Czech lands (Bořivoj I.- in 882 christened by Archbishop Methodius), to the Yugoslav nations and to Kievan Rus.

Methodius' followers spreading culture and literature: Climent in Ohrid, Sava, Naum, Gorazd.

Centres of Slavic culture after Great Moravia:

Prague, Kiev, Cracow, Novgorod, Ohrid. In Bulgaria, Methodius is commemorated on 17 July; the Methodius' cult was laid by the Czech king Charles IV.

■ **9th century** – Slovakia and Moravia abounded in spiritual Slavic culture reflecting the maturity of the Byzantine and Western-European letters; it was the basis of the civilisation of Central-European culture (**own state, own writing, own church province, accepted by the Frankish Empire - 884, own books, own liturgical language – Old Slavonic, successful foreign diplomatic policy**).

Central-European civilization area – Great Moravia, the cradle of material and spiritual culture; laid the foundations of a new literary language through which the Slavs got involved in the world cultural course of events throughout Europe. MIKULČICE: palace, 10 churches etc.

THE TOWN OF SPIŠSKÁ NOVÁ VES

Gateway to the Slovak Paradise

Slovak Republic, Europe

N 48° 56' 39,01"

E 20° 34' 0,32"

Spišská Nová Ves with its 750-year long history is an ideal starting point for the lovers of hiking along harsh but picturesque gorges of the Slovak Paradise (Slovenský raj)

(87 m high), the youngest ZOO in Slovakia. At the Place of Wishes you can express your most secret wishes and send them by ringing a bell to the heavenly heights to be fulfilled. A wide range of cultural and sport events all year round provides sufficient opportunities for a pleasant stay. Attractiveness of the town is enhanced by theatres, a gallery, museums, 3D cinemas,

gorges, more than 300 km of marked hiking trails, 400 km of cycling trails, ski centres, cross-country skiing and nordic walking trails or 13 educational trails.

In the nearby Slovak Paradise you can experience two exciting novelties. From May 1 to October 31, the admirers of water tourism can enjoy boating on the Hornád river in one of the most attractive parts of the

National Park, for the admirers of monuments described in UNESCO's World Heritage List and for those interested in the less spectacular but even more precious Gothic and Iron Routes monuments that can be found in the surrounding Spiš region.

The town features the longest fusiform (spindle-shaped) square in Europe with an unforgettable atmosphere, the highest publicly accessible church tower in Slovakia

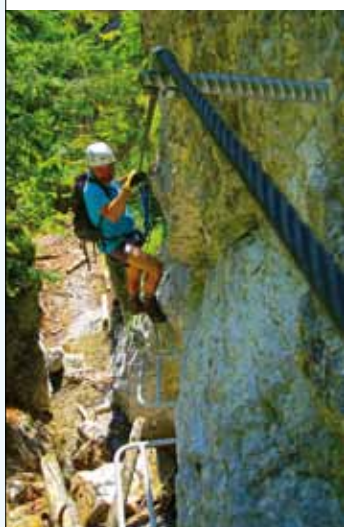

indoor swimming pool and a lido, wellness and fitness facilities, tennis grounds, skittle and bowling alleys, a high rope park, a skatepark, an ice hockey stadium or an indoor shooting range, as well as suburban sports airfield with an opportunity to enjoy parachute jump or sightseeing flight.

In the close vicinity of the town you can find the largest Slovak ice cave, 25 splendid waterfalls in 9 accessible rocky

national park – the longest river canyon in Slovakia (Prielom Hornádu, 11.75 km long). You can also explore the 'true wilderness' in the Kysel' gorge, reopened 40 years after devastating fire. The gorge is passable thanks to new educational trail Kysel' – Ferrata of the Mountain Rescue Service. This amazing 'via ferrata' is open from June 15 to October 31.

The combination of nature, history and active

relaxation in the Spiš region is complemented by other available natural beauties: first of all the High Tatras (Vysoké Tatry) National Park, which is just 30 km away, but also thermal park in nearby Vrbov, the Pieniny National Park with its raft tours of the Dunajec river on traditional Goral rafts, the caves of the Slovak Karst (Slovenský kras) National Park, or the cities of Prešov and Košice located in short distances.

high rope park and discounted entry to ALEX park – large indoor entertainment park for children.

'Romantic stay in the company of beloved person' (3-day package for couples) wants to pamper you by the perfect accommodation, catering services and relax in wellness centre of the 4*hotel, as well as enable you to express your romantic desires and touch an old medieval bell at the unique Place of Wishes. To make your stay unforgettable, use the opportunity to climb up to the highest church tower in Slovakia or dress in gothic costumes and make yourself a romantic photo.

'Weekend adrenaline menu with the sky' (3-day package for 2 persons) offers you an opportunity to 'rent' the sky and enjoy 20-minute flight with views of the picturesque Slovak Paradise National Park, the majestic High Tatras, historical town Levoča or the Spiš Castle, and afterwards experience a tandem parachute jump from a height of 3,000 m with an experienced instructor. You can also

test your strength and courage in high rope park or test your shooting talent at the indoor shooting range from 3 weapons of your choice. You can take 155 steps from the highest church tower in Slovakia, experience the atmosphere of the longest fusiform square in Europe and enter the nearby Slovak Paradise. Bed and breakfast accommodation in guest-house** included.

Find out more about packages in TIC or on website of the town.

Prievidza

The Heart of the Upper Nitra Region

PRIEVIDZA

The first settlements of nowadays Prievidza date back to the Stone Age. During the Bronze Age, the area of Prievidza was settled by the Urnfield People who built a settlement at what is today known as Námestie slobody square. The region of Prievidza is believed to have been part of the Nitra Principality in the 7th and 8th centuries and later of the Great Moravian Empire. The first written mention of Prievidza dates back to 1113. In the 1st half of the 14th century, Prievidza was located at the crossroad of important merchant routes, which contributed to the development of trade

Queen Mary granted the town privileges to Prievidza on January 28, 1383.

Prievidza, situated in the middle of the Upper Nitra Valley, is surrounded by hills and mountains. The town is often considered the starting point on the way to the neighbouring Bojnice, but it also has its own historic monuments. The square-shaped main square features an unusual sculpture of a female figure with a gun. This monument reminding us of the resistance in 1946–1951 was created by architect Štefan Lukačovič and sculptor Rudolf Pribiš, and is in strong contrast with the more traditional Saint Trinity Column located in the northern part of the square.

Near the square, there is

and largest monument of the town – the Pily residential area built for mining families in SORELA style after 1950. This residential unit is unique because of the sgraffitti that decorate the house facades. The sgraffitti were created by several important Slovak artists.

Basic information about Prievidza:

Location: Upper Nitra Basin, surrounded by the mountains of Žiar, Vtáčnik, Strážovské vrchy and its part Magura and partly by the Small Fatra Mountains

Size: 43.06 km²

Population: 46,185 (data from 2019)

Phone no.: +421 46 5179 110,

+421 46 542 69 41

and crafts. The oldest local crafts include pottery and metal processing, later also weaving, thanks to which the predominantly agricultural and market centre changed into a trade and craft centre.

the Gothic Saint-Barthélemy Church from the 14th century with well-preserved rib vaulting from around 1400. The original furnishings of the classic discreet interior destroyed by fire in 1678. The most precious piece of furniture is the monstrance of John Corvinus.

The decorations of this church are in sharp contrast with the Saint Trinity Church, which is managed by the Piarists and is situated a few streets further. The Piarist

church with detailed ceiling frescos and an opulent altar with many finely shaped angels shows typical Romanesque and Gothic features. The light mosaic of green and blue stained-glass windows between the angels illuminates the church facade with mystic glow. Thanks to its unique decorations and furnishings, the church is one of the most beautiful Baroque buildings in Central Europe.

The sgraffitti of Prievidza represent the most important

Detva

DETVA is situated in the heart of Slovakia, about 220 km from Slovak capital Bratislava. Its area is known with precious natural and cultural values. Detva is the centre of Podpolanie region, one of the most original Slovak regions, which was named after natural dominant feature of the area – Polana volcano. From 1996 Detva is the centre of the district. Its area is 6,809 hectares and it has about 15,000 inhabitants. Geographical location of Detva in the centre of Slovakia enables good traffic connection with the neighbouring regions as

Foto: archiv MsÚ

about roads and railways. The road I/16 (Zvolen – Lučenec – Rožňava – Košice) and the R2 expressway with the connection to Detva is the traffic axis of the area. Detva is connected with the railway line Zvolen – Lenártovce – Košice, which runs through southern part of the town. The nearest cargo railway stations are in neighbouring villages Víglaš and Kriváň. Airport in Sliač is only 27 km from Detva. Good technical and civic infrastructure is available in the town. In the Strategy of Slovak Republic Improvement Detva is one of innovative progress poles. Business and employment support is one of the priorities so that the new business zones are being created. With the EU support of its structural funds (2004 - 2006) Detva town realized reconstruction of some producing parts in PPS factory so that it prepared industrial park for some new investments and for the creation of 538 job positions, mostly in engineering professions. The goal of building of industrial parks and zones for business in Detva and surrounding villages Kriváň and Víglaš is to provide the opportunities for domestic and foreign companies with work-

ing places in production, service and quaternary sectors, so that for domestic companies' goods and services consumption. The Town of Detva prepared an area for the construction of the Detva – Trstená industrial park. The new production will focus on mechanical engineering and will create over 500 new jobs for the inhabitants of the town and of the region. There is also an area for small and medium-sized enterprises in the proximity of the industrial park. In southern part of Detva there are some areas and building sites of stores, services and production. This site is the most lucrative

as about the connection with infrastructure but it is capacity limited because of road R2 and also because of limits of protective zones biotopes around Slatina River. They say that the potential of Detva and its surrounding is not used properly. There is a good opportunity not only for visit and getting known of this region but also for investment into business and living in this environmentally pure, clean and beautiful town in the heart of Slovakia.

The Town of Lučenec

The Town of Lučenec is situated in the south of Central Slovakia, close to the Hungarian borders. The document from 1247 containing the first mention ever about Lučenec refers to this town as an important crossroad of trade routes and the centre of culture of the historical region of Novohrad. Kubinyi Square lies in the heart of the historical centre

of the town, with roman-catholic and calvinist church and the historical buildings of Reduta and the Municipal Hall as its main landmarks. The Municipal Hall was renovated in 2016, today you can find there a municipal museum and the information center. The neologic synagogue built in Oriental-Byzantine style is another important historical attraction. It is one of the largest in Slovakia. It was reconstructed in 2016 and nowadays it serves as a multinational cultural centre. The city park is one of the most beautiful and most precious parks in Slovakia, thanks to the combination of French, English and woodland garden styles, with artificial lake, mini

ZOO and lot of leisure time zones for the whole family. On the central square there is a newly build shopping center, the biggest in the region with various shops, restaurants, cafes and cinema. According to the Town's Zoning Plan, industrial sites for the purposes of new investors are located in the Industrial Zone South within the cadastral territory of Lučenec. This industrial zone meets all the requirements for technical infrastructure. Industrial Zone South is situated in the south-eastern part of

Lučenec. Its total area is 169.6 hectares. Manufacturing halls, warehouses and technical facilities currently occupy 113.2 ha. The industrial zone houses an Industrial Park at a total area of 6 ha with complex infrastructure, including roads and lighting. Future investors can dispose of 35 ha of free sites within the industrial zone and 0.4 ha within the Industrial Park.

Town of Nováky

The Town of Nováky is located in the centre of the Hornonitrianska valley. It is situated 140 km away from Bratislava and forms part of the Trenčín Self-Governing

Region. The first written mention about Nováky dates back to 1113 and is recorded in the Zobor Document of the Zobor Abbey.

The Town of Nováky is the most industrial town of the Upper Nitra Region. It has chemical industry – Fortis-

five thousand inhabitants. There are a few athletic clubs in Nováky which have made considerable achievements in Slovakia, especially in waterpolo and canoe. The

The citizens and tourists can spend their free time visiting the swimming hall, the National Water Polo Centre, sports facilities, the town park, or fishing and rowing on the lake or visiting a cultural programme in the cultural centre.

At present, Nováky is a small, but attractive and clean, and absolutely native-Slovak town with approximately

Považská Bystrica

Považská Bystrica is situated in the heart of the Upper Váh Region. Since

long ago, the town has been connected to one of the most significant waterways in Slovakia – the Váh River. The surroundings of the Váh River and several water dams,

especially the beautiful Nosice, are among popular and much-sought-after destinations for bikers and lovers of water and fishing. This attractive town, with 40,000 inhabitants living on 90,56 square kms, is surrounded by a ring of Javorníky, Strážov and Súľov Mountains with the narrowest limestone canyon in Central Europe – the less than 4 metres wide Manín

Gorge. The original nature formations in the rocks of Manín and adjacent Kostolec Gorges were carved by the currents of the Manín Creek for thousands of years. When walking through Považská Bystrica, you will pass by many historical monuments such as St. Helena Chapel located within a residential estate. For an unforgettable view of town and its surrounding, climb to the ruins of the Považský Castle, standing high above the once important commerce road which connected

Northern and Southern Europe. While discovering the secrets of Považská Bystrica, make sure not to miss the Fair of Považská Bystrica, Helena Feast and many other cultural events which are full of lifetime memories and experiences.

Vysoké Tatry

The Town of Vysoké Tatry has an area of 360 km² and is therefore one of the largest

towns in Slovakia. It covers a major part of the mountains of the same name and consists of 15 town districts, originally independent settlements that were gradu-

ally integrated into a single territorial unit. The administrative centre of the town is Starý Smokovec which, together with Tatranská Lomnica, is one of the most important tourist centres in the Tatra mountains. The Town of Vysoké Tatry was estab-

lished in 1947 and has 3,973 permanent inhabitants. The wide offer of accommodation and sports facilities and the number of tourist attractions attract visitors from all over the world, in particular those who can appreciate clean air, the mountain climate and traditional Slovak hospitality.

The Museum of the Tatra National Park together with the botanical garden in Tatranská Lomnica represent specialised expositions focusing on the presentation of animate and inanimate nature and human activity in this region. In the

framework of the **"Tatras without Barriers"** project, several foot trails for people with limited motor skills have been built. The most visited one is the trail leading from Starý Smokovec to Rainer's Chalet. The trail is named after British Queen Elisabeth II who unveiled a commemorative plaque during her visit to Slovakia in 2008. The town and the national park form a coherent mountainous complex that offers its visitors many activities and sites of interest about which you can learn more at www.tatry.sk and www.regiontatry.sk

Tvrdošín

If you visit the town in the north of Slovakia, you can experience the "scent of the Middle Ages" for a while in the wooden Gothic Church of All Saints from the mid-15th century, which is inscribed in the UNESCO Cultural Heritage List. Admirers of 20th century art and Slovak modernism and post-modernism can visit the Gallery of M. Medvecká and the Schürger Art Gallery. The modern, recently

renovated Hotel Limba with its attractive location directly in the town centre offers high-quality accommodation, catering, congress, sports and recreation services under one roof. Two conference halls and a lounge provide an ideal space for organising various social or corporate

The Limba Hotel

system. There is a ski park, an aquatic park and the beautiful Juráň Valley, as well. The recreation centre within the splendid mountainous environment offers a wide range of opportunities for hiking, cycling and skiing. The attractiveness of this region is enhanced by the protected natural area with rare fauna and flora.

events. The hotel offers to hotel guests discounted entry tickets to the thermal spa in Oravice, surrounded by the Western Tatras mountains (Tvrdošín town district at a 23km distance). Oravice is a spa centre with thermal water that has positive effects on the musculoskeletal

Oravice

Zvolen

Zvolen is one of the oldest towns in Slovakia. Owing to its advantageous geographical

position and favourable natural conditions its area situated at the confluence of the Hron and the Slatina rivers in the south-west part of the picturesque Zvolenská kotlina valley basin was settled already in prehistoric times. After the Tartar invasion he renewed its privileges on 28th December 1243 and so the settlement was upgraded to the category of royal towns for good. Nowadays the distinguished past of the town and especially frequent royal stays in the Middle Ages can be traced in its most important historical dominant sites – **Zvolenský zámok (Zvolen Castle)** and **Pustý hrad (the Deserted Castle)**. The central place of the town is **Námestie SNP (Square of the Slovak National Uprising)** with the **pedestrian precinct** which, with its area, belongs to the largest ones

in Central Europe. In the territory of the town are found not only several significant cultural monuments, but also valuable communities of fauna and flora and unique natural formations. The large collection of coniferous and deciduous woody species, roses and succulent plants is concentrated in the area of **Borová Hora Arboretum**. Zvolen and its surroundings are also known for great concentration of mineral springs and in the proximity are situated popular spas of Sliač and Kováčová.

Krupina

Krupina is one of the oldest towns in Slovakia. Krupina received town privileges in 1238. The oldest written reference

was built dates back to 1135 to a deed of King Belo II. The town Krupina is located in the district Banská Bystrica, on north-south route, from the Polish to the Hungarian borders. It lies in the valley of the river Krupinica, at

the middle altitude 280m. From the geographical point of view it belongs to the unit Krupina plateau, subunit Bzovík highlands and it forms the foothills of the Štiavnica hills. It is the cultural and administrative centre of Hont with advanced industry, services, transport a rich cultural, social, sporting life and many historical monuments.

Air transport

There are 6 international airports in Slovakia that can be used for both passenger and cargo flights:

- M.R.Štefánik airport Bratislava
- Airport Košice
- Airport Poprad-Tatry
- Airport Sliač
- Airport Piešťany
- Airport Žilina

As the potential of Slovak airports is not yet fully exploited, regular and also irregular connection of Slovakia to Europe and the rest of the world is secured through Vienna Schwechat airport. Schwechat airport is the main international airport of Austria and is only 50 km distant from Bratislava. There is also regular train and bus connection between Bratislava and Schwechat. Another large international airport accessible is Budapest airport, main airport of Hungary, distant 250 km from Bratislava. It is also possible to use airport Ruzyne in Prague that has regular flights to M. R. Štefánik airport in Bratislava.

TRADITION IN THE PAPER

The company is the largest private employer in the Liptov region and preserves strong roots of the paper production – tradition of the industrial paper production in Ružomberok will celebrate its 140th anniversary in 2020.

Mondi SCP is the largest timber processor and the largest producer of pulp and paper in Slovakia. Every day, it gives a high added value to our domestic renewable raw material – wood that comes from well-managed forests with the FSC and PEFC certificates or from controlled sources.

Located in the centre of Europe, they are able to ensure steady deliveries of their products to customers on time and of the requested quality. They export almost 95% of their production abroad hence their products touch the lives of millions of people around the world. Every day.

Mondi SCP regards the environment as one of the most important areas in its processes. The processes are managed by an integrated management system (ISM) consisting of quality, environmental and occupational safety systems. The company annually completes the ISO 9001, 14011 and 18001, EU Ecolabel certification, as well as the FSC/PEFC certification.

In recent years, the company has taken a number of measures to reduce the impact of production on the environment to a minimum. They regularly invest in state-of-the-art technologies (so-called BAT technologies), they are energy-efficient and produce

green energy. They have managed to reduce emissions significantly and the quality of water achieves excellent parameters.

The latest investments of Mondi SCP include the recovery boiler RB3. Installed was also an NCG gases back-up combustion equipment and a scrubber has been put into a trial operation at the Hlboltová municipal waste water treatment plant. Long-term low emission values in the air and their positive trend reflects the improved quality of the air in Ružomberok compared to the previous period.

With its latest investment in a new paper machine, Mondi SCP has joined the circulating economy. The product of this machine will be a new type of paper – cardboard with white surface that combines the strength, the possibility of printing and the appearance benefits of kraft top white paper with the economic benefits of recycled bottom layer. It is expected that more than 200,000 tonnes of recycled paper will be processed. Kraft top white focuses on the growing kraft top white packaging markets such as retail packaging, point-of-sale marketing, flexible packaging, e-commerce, durable consumer goods, and other specialized uses.

They do not forget about the region they operate either. They support various "Mondi SCP, Our Best Neighbour" program environmental projects on a regular basis. Since 2011, they regularly support environmentally-focused projects in the region of Lower Liptov with the sum of EUR 50 000. Communities, schools, civic and NGO organizations and the Lower Liptov organizations may submit their projects. During these 8 years, already 158 projects were supported that have improved the lives of people and visitors of the Lower Liptov region. Every year, they support also the environmental projects of their employees. 210 projects of their employees have beautified the surroundings of the communities they live in.

The quality of what they do has been attested by – from the Great Employer Award, through awards for outstanding environmental achievements, the Award for Efficiency, and the Supply Chain Management Award.

KVALITA, KTORÁ NESTARNE

Pletiarska výroba a výroba pančuchových výrobkov má pod Tatrami v meste Svit viac ako 80-ročnú tradíciu. Prvé pančuchové pletacie stroje boli inštalované v roku 1934, zakladateľom firmy a tradície tejto pletiarenskej výroby bol český podnikateľ Tomáš Baťa. Dnes je pokračovateľom tejto výrobnéj tradície akciová spoločnosť TATRASVIT SVIT-SOCKS, a.s. so sídlom vo Svite. Výroba pančuchových výrobkov je dnes realizovaná na moderných pletiarenských a úpravárenských strojoch, ktoré umožňujú zvládnuť najnáročnejších výrobných technológií. Tatrasvit vyrába výrobky nielen pre bežné každodenné nosenie, ale aj pre športovcov, pre ľudí so zdravotnými problémami a pracovné ponožky. Ročný objem výroby predstavuje cca 3 milióny párov ponožiek pre deti a dospelých a dvesto tisíc pančuchových nohavíc pre deti a ženy v plnom veľkostnom a farebnom sortimente. Hlavnú skupinu tvoria výrobky z bavlny a to buď v prevedení 100% bavlna, alebo bavlna v kombinácii s elastickými materiálmi, strieborným vláknom, Coolmaxom a pod.

QUALITY THAT NEVER GETS OLD

Knitting production and the production of stocking-like products has more than 80 years of tradition under the High Tatras, in the town of Svit. The first stocking knitting machines were installed in 1934. The founder of this company and tradition of knitting production was a Czech businessman, Tomáš Baťa. Today, the continuator of this tradition is a company called TATRASVIT SVIT-SOCKS, a. s. with its residency in Svit. Nowadays, the production of the stocking-like products is executed on modern knitting and finishing machines, which allow the management of even the most difficult production technologies. Production of the company is not focused only for casual everyday use, but also for special use such as functional sport, medical and work socks. The yearly volume of production is approximately 3 million pairs of socks for children and adults and two hundred thousand pairs of pantyhose for children and women in the full range of sizes and colours. The main group of products is made up of cotton products, either 100% cotton or a combination of cotton and elastic materials or silver thread, Coolmax and so on.

VODOHOSPODÁRSKA VÝSTAVBA, STATE ENTERPRISE

More than 65-year-long history and approximately 350 water, hydro-power and engineering structures in Slovakia briefly describe the tradition of the VODOHOSPODÁRSKA VÝSTAVBA, STATE ENTERPRISE (hereinafter also VV, s. e.). The company, which is a sectoral organization of the Ministry of the Environment of the Slovak Republic, was established in 1953 as a „Water management and development center“ in order to prepare and create significant investments in the development of water management. Besides the operation of the **Gabčíkovo-Nagymaros Water Structure System** and the **Žilina Water Structure**, the main activities of the VV, s. e. also include ensuring technical and security supervision of water structures, and in the case of water structures of I. and II. category, the VV, s. e. has been the only authorized organization in Slovakia to conduct such supervision for 40 years.

Upgrade of Gabčíkovo locks

Strategic objective of the project is to increase the efficiency, reliability and thus the competitiveness of the Danube waterway, which is part of the Trans-European Transport Network (TEN-T). The project also addresses the need to strengthen the sustainability of waterway transport between Slovakia and other countries of the Danube waterway and in accordance with the TEN-T policy of the European Union.

Main project activities:

- Modernisation of upper and lower gates
- Upgrade of filling and emptying system
- Measures to stabilise the lock subsoil
- Creation of an expert control system

Project financing:

Project is co-financed by the European Union program (Connecting Europe Facility)

Project budget according to the grant agreement:	144 665 000 €
Co-financing from the EU according to the grant agreement:	122 965 250 € (85 %)

Project duration: 02/2016 – 12/2020

Beneficiary:

Implementing authority:

DaReM – Danube Rehabilitation Measures

Main objectives of the project is:

- to ensure sustainable assurance of fairway on an inland waterway of international significance on the Danube River and mitigation of negative impacts of sedimentation in reservoir Hrušov in the range of rkm 1845 to rkm 1868,
- to enhance the quality and safety of navigation,
- to remove bottlenecks on the Slovak part of the Danube waterway,
- to create conditions for the elaboration and appreciation of sediments in relation to the demands of the environment and the market,
- to increase flood control measures,
- to improve animal welfare.

Project financing:

Project is co-financed by the European Union program (Connecting Europe Facility)

Project budget according to grant agreement:	9 750 000 €
Co-financing from the EU according to grant agreement:	8 287 500 € (85 %)

Project duration: 02/2017–12/2020

Beneficiary:

Implementing authorities:

Construction of a Pedestrian and Cycle Bridge Dobrohošť - Dunakiliti

The total length of the new transport link	2,5 km (2515,61 m)
The length of the bridge together with the inundation bridges on the Slovak and Hungarian territory	0,5 km (497,65 m)
The very length of the bridge over the Danube River	0,25 km (250,25 m)
The total width of the bridge	4,9 m
Maximum bridge load	12 t
Maximum bridging height	10 m
Bridge location	Danube rkm 1841,5

VODOHOSPODÁRSKA VÝSTAVBA, STATE ENTERPRISE, will maintain the objects related to the Pedestrian and Cycle Bridge Dobrohošť – Dunakiliti in the territory of the Slovak republic. Hungary will maintain the objects related to the Pedestrian and Cycle Bridge Dobrohošť – Dunakiliti in the territory of Hungary.

TECHNICAL UNIVERSITY OF KOŠICE

History of TUKE

The Technical University of Košice was founded in 1952, but its roots must be sought much deeper in the past. As early as 1657 the Universitas Cassoviensis was established in Košice, but technical education in Slovakia was only elevated to higher - education level in 1762, when the Austro-Hungarian monarch Maria Theresa established the Mining Academy in Banská Štiavnica.

The true birth of the Košice Technical College came on 8th July 1952.

Vision

The Technical University of Košice will be

- a leading university of technology on a national basis and
- a respected university of technology on the international scale,
- having a strong degree of autonomy,
- sufficiently diversified financial resources,
- available for a wide range of applicants,
- developing scientific knowledge based on its own original findings,
- providing excellent education on all three levels of tertiary education, as well as
- lifelong education,
- meeting the expected needs of industries, region and society by its research,
- substantially involved in providing services to general public.

Mission

TUKE will provide its environment with scientific and technological knowledge basis, innovation and

workforce, in order to form beneficial and sustainable future and high quality of life. This will be achieved at TUKE by innovative research and excellent education in all scientific branches of respective University Faculties.

TUKE today

- among 5 % of the world's top universities
- 13 % of international students from 42 various countries
- establishment of startup companies in USP TECHNICOM even during studies
- international mobilities in terms of 265 partnerships in 31 countries worldwide
- almost 100 % success of fresh graduates in the job market
- more than 25 kinds of sports, folk and singing ensemble, student television, radio and others

UNIVERSITY PROFILE

The Slovak University of Technology in Bratislava (STU), the largest and most significant university of technology in the Slovak Republic, is a modern European educational and research institution. It offers university education mainly in technical, technological, technical-economic, technical-information and technical-artistic fields of study. Its activities reach back to the rich old tradition of the Mining

Academy in Banská Štiavnica, established by the Empress Maria Theresa in 1762.

Our education system is based on scientific research, as well as on artistic, engineering and other creative activities. The STU faculties, departments, institutes and experts cooperate directly with industrial companies and social organisations, actively taking part in international cooperation.

FACTS AND FIGURES

Number of faculties/university institutes	7/1
Graduates during its existence	162 569
Number of students	11 130
Number of teaching and research staff	
– teaching staff	1030
– research staff	435

Number of study programmes	
– in the Slovak language	170 (B: 55, M: 57, D: 58)
– in the English language	9 (B: 3, M: 4, D: 2)
Number of projects based on industrial contracts	251
Number of research project	738
Number of institutions in international cooperation	600

* B: Bachelor, M: Master, D: Doctoral level

THE STU - FACULTIES AND UNIVERSITY CENTRES

Faculty of Civil Engineering (SvF)

Areas of activities: building constructions, building environment technology, construction technologies, environment protection constructions, geodesy and cartography, land constructions, transportation constructions, mathematical-computational modelling, water constructions and water systems

<http://www.svf.stuba.sk/>

Faculty of Mechanical Engineering (SjF)

Areas of activities: applied mechanics, automation, chemical and food machines and devices, engineering technologies and materials, environmental technology, fluid, thermal, hydraulic and production machinery, mechatronics, meteorology, production quality systems, traffic engineering

<http://www.sjf.stuba.sk/>

Faculty of Electrical Engineering and Information Technology (FEI)

Areas of activities: automation and management, electrical and heavy current power engineering, electronics, engineering for power materials, informatics, photonics, physics, telecommunications

<http://www.fei.stuba.sk/>

Faculty of Chemical and Food Technology (FCHPT)

Areas of activities: biotechnologies, chemical engineering, environmental engineering, food chemistry and technologies, fuels and polymers, inorganic and organic technologies, inorganic, organic, analytical and physical chemistry

STUDY SYSTEM AT THE STU

The University offers study within accredited study programmes, in degree courses leading to Bachelor's, Engineer's, Master's, and Doctoral degrees. The credit system is compatible with the ECTS (European Credit Transfer System under the Bologna Declaration of the ministers of EU coun-

tries), enabling the bilateral student mobility in EU countries' universities, as well as within the framework of the broader European and world-wide area. The STU has been an ECTS label holder since 2012.

The system of education is connected with the prestigious partner universities in the framework of international programmes (Erasmus+) using modern methods of education, laboratories and

practical training. It is aimed at branches of study that offer stable opportunities for students' employment in the labour market. Teaching takes place in modern classrooms furnished with the top laboratory and programming equipment.

STUDY PROGRAMMES AT THE STU IN ENGLISH LANGUAGE

The STU offers university education in the English language mainly in technical, technological, technical-economic, technical-information and in the technical-artistic fields of study. Study programmes are updated for each academic year.

Detailed information with description of study programmes, course structure, key learning outcomes and programme directors can be found at:

<https://lnk.sk/hoDH>

SERVICES FOR STUDENTS

- well-equipped libraries and study rooms featuring
- over 400,000 library units,
- 7 dormitories with a capacity for 5,900 students
- free Internet access
- online access to international databases
- canteens and buffets in student dorms and faculty premises
- basic medical care in student dorms
- sport facilities (sport centres, playgrounds, fitness centers
- and swimming pools)

COMENIUS UNIVERSITY IN BRATISLAVA

TOP CHOICE WITH **100 YEAR** TRADITION

Comenius University in Bratislava is a modern European university which in 2019 is celebrating its 100th anniversary. It is the only Slovak university to be regularly ranked in the international rankings of the best universities in the world. With thirteen faculties, it offers the widest selection of study programmes (over 800) at three levels, and several of these study programmes are the only ones of their kind offered in Slovakia. There is a wide range of areas of human knowledge to choose from when studying, be it in medicine, the humanities and social sciences, the natural sciences, mathematics, theology, and much more.

Comenius University is a research institution that runs hundreds of domestic and international research projects. As a result, many of our students engage in important research during their studies and can actively participate in projects, grants, and professional internships (including abroad).

Every year Comenius University sends the highest number of students abroad out of all Slovak universities, and it receives the most international students, including from such places as Germany, Norway, Greece, Iran, Austria, and Iceland.

The Jessenius Faculty of Medicine of Comenius University,

with its seat in Martin, can boast of its reputation as the best-performing school in the ranking of Slovak universities in the field of medicine and health-care sciences. It offers study programmes in general medicine, dentistry, nursing and also non-medical specialties such as midwifery and public health.

www.jfmed.uniba.sk

The Faculty of Mathematics, Physics and Informatics of Comenius University

is regarded as the best faculty of natural sciences in Slovakia according to the Academic Ranking and Rating Agency. The aim of the faculty is to foster scientific knowledge in the field of mathematics, physics and information sciences.

www.fmph.uniba.sk

The Faculty of Roman Catholic Theology of Cyril and Methodius of Comenius University

is one of the biggest educational institutions in Catholic theology in Slovakia, preparing theologians for their priestly vocations.

www.frcth.uniba.sk

The Evangelical Lutheran Theological Faculty of Comenius University

offers study programmes in Lutheran theology as part of preparation of clergy for the Evangelical Lutheran Church of the Augsburg Confession in Slovakia as well as abroad.

www.fevth.uniba.sk

The Faculty of Management of Comenius University

prepares graduates to excel in their future management positions in governmental institutions or businesses, whether they decide to pursue their careers in Slovakia or abroad. It is the only faculty in Slovakia that has regularly ranked as an Excellent Business School in the evaluation of the independent agency EDUNIVERSAL since 2009.

www.fm.uniba.sk

The Faculty of Social and Economic Sciences of Comenius University

develops and successfully applies theoretical knowledge in the fields of social and political sciences, European studies and international relations, social anthropology, public policies and economics, as well as social and occupational psychology.

www.fses.uniba.sk

Comenius University Science park (Cusp), as a research centre, performs concentrated innovative research primarily in the fields of biomedicine, biotechnology, enviro-medicine and inter-disciplinary research and cross-connects these fields with the practice. Cusp serves as a bridge among academia and industry whereby its primary purpose is to effectively respond to public requirements and needs. Cusp possesses state of the art research infrastructure, top scientists and know-how which further enhances the possibility to actively collaborate with private and public sector, as evidenced by the current collaboration with 12 companies. In conjunction with this, an inherent part of Cusp activities is the popularization of science and research in the form of active presentations, interactions with various business entities and active support of innovative ideas, and innovative start-ups, spin-offs regionally as well as internationally through the action of Cusp Incubator.

Within the Cusp operates Technology transfer office with major task of mediation the transfer of science and research results into the economic practice, in other words it supports research departments in the process of technology transfer and provides guidance in the whole process of legal protection and commercialization of intellectual property.

Cusp has laboratories fully equipped for research activities in the fields of genomics and proteomics, metabolomics, research of new substances and materials for diagnostics, biotic and abiotic factors of the environment, environmental health and molecular biology and biotechnology.

Cusp infrastructure can be actively used by over 180 employees from Comenius University and other partner entities. Except scientists and researchers, PhD. and pre-graduate students are intensively involved in the research projects.

What kind of unique equipment can be found at CUSP?

- set of instruments for genomics, such as Next Generation DNA sequencers, Microarray readers, systems for digital PCR
- set of instruments for metabolomics and analysis of molecules such as GC tandem MS and LC-MS/MS or high-resolution spectrometer
- set of instruments for molecular biology and biotechnology, such as equipment for recombinant protein expression and purification, fermentation technologies
- set of instruments for cell biology, such as confocal microscopy or flow cytometry
- set of instruments for geology and geophysics, such as equipment for the analysis of physical properties of natural and anthropogenic moulds, high-pressure reactor system, magnetometer

Vision: Today we develop your future

Biomedicine for the 21st century

- in the fields of genomics and proteomics, new diagnostic procedures are developed and the latest methods for the detection of the genetic nature of monogenic and polygenic as well as infectious diseases based on the whole-genome sequencing principles are actively used
- in the field of metabolomics, the major goal is to broaden the knowledge, develop new methods and individualized approaches for the detection, diagnostics and screening of the chosen groups of human diseases
- developing new substances and materials for research, diagnostics, and for the use in the molecular medicine

Enviro-medicine for the 21st century

- developing methods for the detection, minimization and prevention of negative effects caused by biotic and abiotic factors on the health of the population acting in anthropized ecosystems
- evaluation of the impact of the environment on the health of the population using the geographical information systems (GIS)

Biotechnology for the 21st century

- design, selection and production of specific recombinant proteins and peptides with therapeutic potential
- construction of express systems for heterologous expression
- bacteriophages isolation and creation of phage collection usable in medicine and food industry

Activities

- as a specialized research entity with the focus on the biomedicine, genomics, biotechnology, metabolomics, and enviro-medicine, CUSP offers infrastructure capacity not only to staff members, but also scientists and researchers from other faculties of Comenius University and private partners and integrates research activities of different university departments
- CUSP serves as a complex technological, life-sciences oriented spin-off/start up incubator for Comenius University in Bratislava and the private sector
- CUSP offers help and active support with technology transfer
- an inherent part of CUSP activities is to train students of Comenius University

We Must Be Active

The European Union has found itself in a crucial period that will have a fundamental impact on the functioning, competitiveness and future development of all its Member States. We are living in the period when we cannot afford to fall asleep, close our eyes and pretend that the preparation of the Slovak Agricultural Policy after 2020 does not concern us. We must not identify ourselves with the mistaken beliefs that someone within the European structures will automatically deal with the priority issues of Slovak farmers and food producers, such as ceilings, definitions of an active farmer or reduction of bureaucracy. We must not accept the opinion that a small country like Slovakia cannot influence serious European issues. There are issues that we have to work on by ourselves and, by means of expert discussions on domestic and European soil, we must convey the opinions and ideas of our farmers and food producers on increasing their competitiveness within the European Union and beyond.

The Slovak Agriculture and Food Chamber (SPPK) is the most representative agricultural and food self-governing organisation in Slovakia and the only one established under the law. The SPPK members manage almost 63 per cent of agricultural land in Slovakia. The members of the chamber are large agricultural companies, small agricultural undertakings, family farms, small farmers, young farmers, food companies and companies representing the services in the agri-food industry.

In view of this definition and the fact that the Slovak Agriculture and Food Chamber is the largest agri-food self-governing organisation in Slovakia, its role in the management of the state agricultural policy and international lobbying is unique.

With the approaching end of the current programming period, we are intensifying our lobbying abroad. Back in 2017, SPPK initiated the preparation of the important document Bratislava Declaration, which was signed by self-governing organisations from the agri-food sector of ten European Union Member States – the Visegrad Four countries and the countries of the Baltic and Balkan regions.

By signing this Declaration the countries agreed that we need a stronger, fairer and simpler Common Agricultural Policy (CAP) based on the following principles: fair and equal conditions for farmers in all EU Member States, maintaining a strong CAP budget, simplification of the CAP, fair functioning of the food chain, risk management, and

preservation of agricultural production in EU's rural areas.

We dedicated the year 2018 to many official and unofficial meetings at the European and national level. We organised a big international conference on the CAP in Bratislava. We initiated the Czecho-Slovak meetings "For a Better CAP" at the level of the ministers of agriculture, chairs of the parliamentary agricultural committees of both countries and chairs of the Agrarian Chamber of the Czech Republic and of the Slovak Agriculture and Food Chamber.

The autumn of 2018 was marked by SPPK's entry in the most prestigious European organisation representing European farmers. The renewal of our membership in COPA COGECA was one of our priorities. We acknowledge its importance and the obtaining of many important information in connection with the newly prepared Common Agricultural Policy at each of the COPA COGECA working groups meetings.

The regular meetings with the Czech self-governing organisations within the Consortium in Brussels are also important for the preparation of the new CAP.

The discussions with the MEPs confirm that without a strong Slovak representation in the European Parliament and directly in the Committee for Agriculture and Rural Development, our farmers and food producers have reduced possibilities for an effective promotion of their demands and for lobbying in favour of the domestic agri-food sector.

At the beginning of 2019, we called 11 relevant political parties to present candidates who would be nominated, in case they are elected, for the European Parliament's Committee on Agriculture and Rural Development.

This is essential for an optimal development of the Slovak countryside and the promotion of the interests of domestic farmers and food producers at the European level, as in the current election period, this committee works without a Slovak representative, which needs to be changed.

Without influential and respected representatives within the European structures, it will be very hard to create a more favourable position for Slovakia.

Bc. Emil Macho
President of the Slovak Agricultural
and Food Chamber

Slovak Agricultural and Food Chamber

<http://www.sppk.sk>

Slovak Chamber of Agriculture and Food (SPPK) represents non-governmental, autonomous and statutory organisation, which was established in line with the Law No. 30/1992 Coll. as amended. The basic role of the Chamber is to enforce the justified common interests of its members, mainly in the process of the agricultural and social policy field. Chamber also takes part in the creation of the state policy concerning the support and protection of its member entrepreneurs to ensure the further development of agricultural production and food processing in the Slovak Republic.

Membership

The members of SPPK are natural and legal entities providing the business activities in agriculture, food industry and in biological, technical and commercial services for agriculture and food processing industry, as well as the other non-governmental organisations operating in the agri-business. The membership in the Chamber is voluntary since January 2005.

Internal organization

Headquarters of SPPK is placed in Bratislava with 15 employees. SPPK also has 38 Regional agricultural and food chambers (RPPK) operating in regions of Slovakia. The "regional" chamber can be established also on the other than just territorial basis. There are also four subjects with the statute of RPPK in accordance to the Statute of SPPK and the Law above. The activities of the Chamber are supervised by the official bodies – the General Assembly, the Board of Directors, the President and the Supervisory board.

Internal Communication

The Chamber is using the wide-spread net of its regional chambers in the whole territory of Slovakia. The central office communicates with the regional chambers using the internet and

emails, but also regular meetings to discuss the actual issues. The Slovak Agricultural and Food Chamber is the only autonomous organisation in the Slovak Republic combining the entrepreneurs operating in agricultural primary production, food processing industry and services for agriculture. SPPK is communicating also to its member associations as well as to the other agricultural autonomous organisations. All the members of SPPK have direct access to the regional office in which they are registered, but also to the central office in Bratislava.

Activities

The Chamber's activities are focused to:

- Lobbying for interests of its members at national and international level
- Legislation – legal sector
- Providing of business information service
- Guidance and education
- Co – operation with the international organizations

Co-operation with national and international partners

The Chamber is cooperating and communicating also with the state bodies accordingly to the conditions set out in the Law and in the Agreement on a Co-operation between the Council of the Agricultural Statutory Undertakers and the Ministry of Agriculture of the Slovak Republic to search for the solutions of the problems in agriculture and food sector. SPPK pays extra attention to development of the international contacts and representatives of the SPPK participate at the regular meetings of the representatives of the agricultural chambers from the "Visegrad four" countries (Slovakia, Czech Republic, Hungary and Poland). The representatives of Chamber cooperate also with other agricultural chambers within the European Union.

Member associations of food processing

SPPK organizes associations of the food processing industry – see below:

Message by the President of the Slovak Chamber of Commerce and Industry

The year 2018 brought a major shift in civil awareness, a political generational change, as well as further polarisation of society. On the other hand, it was interesting that, along with the escalation of the social situation, we achieved very good economic results both at the level of the macro-economy and in the micro-sphere. The booming economy contributed to improving the social situation, which was accompanied by huge unemployment decline to its historical minimum, and to the growth of employees' average incomes. Household consumption became one of the engines of the economic growth. Another clear positive aspect of the year 2018 is the fact that the economy developed independently from the internal political turbulences.

In the economic field, the year 2019 begins with a good starting position from the short-term perspective and with a balanced state budget; there are, however, some signs both from the internal and external environments indicating risks for the future development. We all know well that no economic growth lasts forever and that we are currently experiencing its peak. The results of the economic survey conducted by the Slovak Chamber of Commerce and Industry prove that businesses are entering the year 2019 with less optimism compared to the previous period.

Since its establishment in 1992, the Slovak Chamber of Commerce and Industry (SOPK) became the most representative entrepreneurs' association in Slovakia. It managed to create an effective regional structure providing for daily services for business entities. Its highly professional staff is capable of responding to the demands of the Chamber's members. The SOPK Arbitration Court has long been the most recognised place of arbitration in the Slovak Republic. During 27 years of its activities, SOPK has always been able to respond to the principal social and economic challenges faced by our country.

The international position of SOPK reaches far beyond the weight of the Slovak economy in European and global dimensions. Its social mission and level are more evaluated and appreciated abroad than at home. SOPK holds a leadership position in the International Chamber of Commerce and in the World Chambers Federation. It plays a key role within Eurochambres – The Association of European Chambers of Commerce and Industry, and in the Silk Road Chamber for International Commerce. Through its engagement in these institutions, SOPK repre-

sents and coordinates the joint business interests of its members in Slovakia and abroad. SOPK set up the basic framework and structures enabling Slovak entrepreneurs to directly establish contacts with European and global business structures. It closely collaborates with the European Commission, the countries of the Central European Initiative as well as other international economic institutions and associations. The establishment of the advisory Committee for Business and Industry at the OECD (BIAC), the Economic and Social Committee (ECOSOC) as the advisory body of the European Commission, and of the National Committee of the International Chamber of Commerce Slovak Republic (ICC Slovakia) represent the essential steps to ensure full participation of Slovak economic entities in the decision-making processes within the international economy.

In addition to its standard functions, the Chamber currently focuses on ethics in business. Recognising that ethical business can only be conducted within an ethical and transparent environment, we became one of the initiators and signatories of the call "Rule of Law", which was also adopted by the Government in 2015 in the form of its action programme. SOPK considers it important to promote this programme in other areas as well, thus achieving a major shift in ethical issues, fight against corruption, and in increasing personal liability in society as a whole.

The year 2019 is ahead of us. It is also up to us how this year will be – how we will behave at the level of the state and within the micro-sphere, and whether we will be able to find a joint answer to the risks of development; how the state authorities will spend the funds and whether these funds are used for areas ensuring the competitiveness of the Slovak economy and, hence, its growth dynamics and sustainable social policy. The private sector is the key player in this game, and it is therefore necessary to involve it in the debates on tackling current and future challenges and accept it as an equal partner of the political decision-making sphere. At the end of the day, its achievements largely depend on the legislative, social and bureaucratic environment in which it operates. All this determines the success of the private sector and consequently the success of the Slovak economy as a whole. The year 2019 will show whether we are able to make investments that will bring future benefits in the period when – as we usually say – the economy is booming.

Peter Mihók
President of the Slovak Chamber of Commerce
and Industry
Honorary Chair of the ICC World Chambers Federation

BRIDGE TO THE WORLD OF BUSINESS

Dear Partners,

Your decision to do business in Slovakia is a wise one. The Slovak Republic is well known for its high level of culture, qualified workforce, advantageous geographical position in the centre of Europe on the border between the West and the East, favourable taxation system, and extensive transport communication network. To do business in Slovakia means to hold a stake in the expansion of a region which, in the future, will have increasing significance for European trade and prosperity. Your investments and personal effort will therefore soon be rewarded with a fast return and high profit. During the course of your business activities, you will often need help and advice from someone who is familiar with this environment and who has been active in it from the very beginning. That is why the Slovak Chamber of Commerce and Industry (SCCI) wants to be your first point of contact and your partner when entering Slovakia. The SCCI is an independent public and legal institution which, in a similar way to the Chamber of Commerce in your home country, provides a full range of services to its members and other domestic business groups, as well as interested parties from abroad.

We will provide you with valuable contacts!

Some things that the SCCI will arrange for you:

- ✓ contacts with domestic businesses
- ✓ contacts with professionally-oriented sections
- ✓ finding suppliers
- ✓ finding manufacturers
- ✓ finding importers
- ✓ finding companies suitable for joint ventures and acquisitions
- ✓ the corporate profiles of companies and institutions
- ✓ in the event of your visit, recommendations and the organisation of meetings, including secretarial services, accommodation, transport, etc.
- ✓ advertising in the SCCI newsletter, which is distributed to all SCCI members, as well as foreign consular offices in the Slovak Republic, consular offices of the Slovak Republic abroad, representative offices of foreign companies in Slovakia, government institutions, and Slovak businesses.

We will prepare the ground for you!

For your trade mission in the Slovak Republic, the SCCI will arrange:

- ✓ meetings with Slovak businesses
- ✓ a comprehensive programme for mission participants (accommodation, transport, cultural programmes, and other services on request)
- ✓ background information required for negotiations

We will meet all your needs!

For seminars, lectures, or training the SCCI offers:

- ✓ the attendance of Slovak participants
- ✓ a venue, including the necessary equipment (audio-video), translations, and refreshments
- ✓ advertising, invitations, and media publicity
- ✓ accommodation, transport, and transfers

We will introduce you to a specific environment!

In addition, upon request, the SCCI can arrange:

- ✓ marketing studies
- ✓ statistical overviews
- ✓ consultations on legal, financial, taxation, and customs matters
- ✓ information on business conditions and opportunities
- ✓ translations of acts, rules, and regulations
- ✓ information on import regulations (limits, quotas, restrictions, and certifications)
- ✓ participation at exhibitions and trade fairs
- ✓ information about options and conditions for investing, capital investment, and private ownership in the Slovak Republic
- ✓ interpreting and translation services
- ✓ other services upon request

Arbitration Court

The Arbitration Court of the SCCI is an independent body that also offers its services to you. It resolves property claims between entrepreneurs arising from business and economic relations. It realises consultation and advisory activities to settle such claims.

Information on investment conditions in the Slovak Republic is available in all offices of the SCCI.

The Region of Banská Bystrica

Number of inhabitants:	653 024
Area:	
– Total:	9 454 km ²
– Forests and woodland (%)	49 %
– Agricultural land (%)	44 %
Protected area (%)	34,82 %
Population density (people per km ²)	69
Urban population:	53 %
Number of municipalities:	516

The Banská Bystrica Region lies in the southern part of central Slovakia. It is the largest self-governing region in Slovakia. It borders Žilina Region in the north, Prešov Region in the north-east, Košice Region in the east and Hungary in the south. Primarily due to its terrain, which is mostly covered by forests and agricultural land, the population density in the region is the lowest in Slovakia. There are 516 municipalities in its territory, out of which 24 are towns. The residential structure is represented by all settlement formations from medium-sized towns through small towns, rural municipalities to scattered provincial settlements. The capital of the region is the city of Banská Bystrica with approximately 77 000 inhabitants.

The Banská Bystrica Region territory belongs to the top regions from the perspective of the country and nature surroundings, in some cases even in the international scale. There are five national parks located in the Banská Bystrica region, either fully or partially. These are the Low Tatras, Veľká Fatra, Muránska Planina (plateau), the Slovak Paradise and the Slovak Karst (the UNESCO Biosphere Reserve). There are also protected landscape areas of Cerová Vrchovina (highlands), Poľana (UNESCO Biosphere Reserve), Ponitrie and the Štiavnica Mountains, national nature preserves and a great number of protected areas, localities and objects with lower rate of protection.

The road system consists of 3.203 km of roads out of which 639 km are 1st class roads and 119 km expressways and feeders. There are two important transportation routes crossing the

Banská Bystrica Region. The north-south transit route marked within the European road system as E 77 /Varšava-Krakow-Banská Bystrica-Zvolen-Šahy-Budapešť/ and west-east marked as E 571 /Bratislava-Košice/. Currently there are ongoing state investments in construction of the expressway R2.

Two railway lines crossing the region territory connect the south of Slovakia with north and west with east on the routes: Bratislava – Zvolen – Košice - Čierna nad Tisou - Ukraine and Žilina – Zvolen – Lučenec - Republic of Hungary, which are interlinked with a dense network of railways of regional importance.

Air transport is available via the Sliač Airport located between towns of Banská Bystrica and Zvolen, and this belongs to the network of international airports. Two smaller airports Očová and Boľkovce are used predominantly for purposes of recreational flying.

The most important development area in the Banská Bystrica Self-governing Region (BBSK) is the territory of Banská Bystrica and Zvolen districts, due to concentration of universities and research and development facilities as well as a high number of economically active population with university and upper secondary education.

The university education in the BBSK is provided by four universities: Matej Bel University in Banská Bystrica, Technical University in Zvolen, Academy of Arts in Banská Bystrica and

Jan Albrecht Music and Art Academy in Banská Štiavnica. They present a great potential on which the region can build its future not only in the context of Slovakia but also in the European context.

Besides university education, the education in BBSK is ensured through a network of primary schools, secondary vocational schools and grammar schools as well as educational institutions which provide lifelong learning in courses and trainings accredited by the Ministry of Education of the Slovak Republic. There are 29 grammar schools and 57 secondary vocational schools, out of which 61 are state schools, 20 of them are private and 5 are church schools.

The Banská Bystrica region is an attractive tourist area thanks to its historical sights, natural beauties, cultural and sports events and tradition in organising exhibitions. Nearly half of the region area is covered by forests, which create ideal conditions for the development of tourism, agrotourism, winter sports, water sports and game hunting.

The leading industry sector in the region is metallurgy (from the viewpoint of revenues and employment) which represents over 60% of the total industry export of the region. Further important sectors are pulp and paper industry, pharmaceutical industry, wood processing industry, engineering industry and production of construction materials. The northern part of the region has relatively high degree of industrialization. The southern part of the region is a basis of the food processing industry and other sectors complementary to the agriculture. Significant industries are also forest industry, logging and wood processing.

Foreign capital is concentrated in 1854 firms, which represent 9,96 % of the entire number of business entities listed in Business Register. The most successful of them are Slovalco, a.s. Žiar nad Hronom, Knauf Insulation, s.r.o. Nová Baňa, Evonik Fermas s.r.o. Slovenská Ľupča, Continental Automotive Systems Slovakia s.r.o., Zvolen, Johnson Controls Lučenec s.r.o., Witzenmann Slovakia, spol. s r.o. Vlkanová, Küster - automobilová technika spol. s r.o. Vlkanová.

The priority of development of the region is to stay attractive for foreign investors. As the main reasons to invest in the region are considered:

- Strategic location in the centre of Europe with great export potential–market of 300 million people in 1000 km radius
- Optimal transport connection with significant European centres – Vienna , Budapest, Bratislava, Prague, Krakow, Kiev
- Diversity of economic sectors
- Significant potential needed to establish the links with foreign contractors – local subcontractors from the region
- Qualified labour force
- Established manufacturing infrastructure
- Authorized Regional innovation strategy of the Banská Bystrica Region establishes favourable conditions in the region for further development of science, research and innovation
- Excellent natural and climatic conditions for the development of tourism related to winter, summer leisure activities and health resorts services – spas
- Wide range of available cultural, social and sports related activities

The Region of Bratislava

Bratislava, the capital of Slovakia, is located on the confluence of rivers Danube and Moravia on the foot of the Small Carpathians and where three borders meet – Austrian, Hungarian and Slovak. For many years, this exceptional location predetermines the role of Bratislava as an important trading place, a crossroads of transport routes, an area of political life, business, financial services, industry, agriculture, education, culture and sports. Whether called Preslau, Pressburg, Pozsony or Bratislava, the hospitality, architecture, excellent food and good wines dominate its friendly atmosphere.

Bratislava and Bratislava Region has become the most developed part of Slovakia from an economic, social, science, research and technical point of view. The strongest economic position (25% GDP) of Bratislava among Slovak regions reflects also a strong position of Bratislava within the country itself.

THE BRATISLAVA REGIONAL CHAMBER OF SCCI

will arrange for you:

- contacts with domestic businesses
- search for suppliers
- search for manufacturers
- search for importers
- search for companies suitable for joint ventures, acquisitions and partnerships
- company and institution corporate profile
- organization of meetings of entrepreneurs, business missions abroad, including accommodation, transfers etc. advertising in Chamber's newsletter which is distributed to all members as well as trade offices of foreign embassies in the Slovak Republic, trade offices of Slovak embassies abroad, representative offices of foreign companies in Slovakia, governmental institutions and Slovak businesses advisory on customs, taxes, certification and doing business in SR
- customs and certification services (issue of ATA Carnets, authentication of certificates of origin of goods, commercial invoices, powers of attorney, "force majeure", contracts, letters of reference),

For trade missions in the Slovak Republic we arrange for you:

- full service (premises, presentation technique, interpreters, refreshment...)
- advertising, invitations and media publicity
- meetings of Slovak and foreign businesses comprehensive programme for mission participants (accommodation, transport, cultural programme and other upon request)
- back-ground information required for negotiations

THE SPECIAL ACTIVITIES OF BRC SCCI:

Small and Medium-sized Enterprise Rating Project („SME Rating Project“)

- the special service provided only for Slovak enterprises that enables SMEs to purchase and obtain an objective and professional point of view of their business (in short time) at <http://www.ratingmsp.sk>

Asses your partner

- the special service that enables to get all publicly accessible information about any Slovak company including its payment ability and discipline

The Region of Košice

BASIC INFORMATION

Košice Regional Chamber is the oldest chamber in Slovakia and one of the oldest in Central Europe. The modern history of Košice Regional Chamber of Commerce and Industry starts in 1992 when it was re-established. Present day activities of the Košice Regional Chamber of Slovak Chamber of Commerce and Industry are a continuation of the Chamber's long history which goes back to 1850. Košice Regional Chamber is a regional office of The Slovak Chamber of Commerce and Industry in the Košice Self-governing Region. The territory of the Košice region includes following districts: Gelnica, Košice, Košice surrounding, Michalovce, Rožňava, Sobrance, Spišská Nová Ves, Trebišov. Košice Regional Chamber represents entrepreneurs, businesses and member companies of the SCCI operating in the region and plays an important role in local, domestic and also international trade with a special focus on the markets of Central Europe and Ukraine.

KRC SCCI has an extensive experience in cross border cooperation on various levels and cooperates closely with foreign partners. KRC organizes trade missions, conferences and workshops in collaboration with its partners in the neighboring regions and has effectively and successfully conducted various cross-border cooperation projects in recent years.

The most important sectors of industries allocated in the region are ICT, metallurgy, engineering, chemistry, food processing and agriculture.

SERVICES AND ACTIVITIES PROVIDED BY KOŠICE REGIONAL CHAMBER OF SCCI

1. Services in the development of regional, national and international trade and relations
 - organizing international and local trade conferences, business forums and networking events,
 - organizing visits to domestic and foreign companies.
 - extensive cooperation with foreign diplomatic representations in Slovakia, Slovak representations abroad, foreign chambers of commerce and Slovak public administration bodies.
2. Services in the field of certificates of origin of goods and ATA carnets
3. Education services - organizing workshops, seminars and training sessions on current issues
4. Commercial dispute resolution services
5. SCCI Information and Advisory Services
6. Advertising and promotion of members
7. Young Entrepreneur Platform (support for young entrepreneurs under the age of 30)

The Region of Nitra

The Nitra Region in the Context of Foreign Investments

Only very few Slovak regions have such excellent preconditions for the development of international contacts and cooperations as has the Nitra region. This region extends from the mountain ranges Povazsky Inovec and Tribec in the north to the river Danube in the south and geographically it covers the prevailing part of South-western Slovakia.

This region is identical with the chamber region of the Regional Chamber of Commerce and Industry Nitra. The chamber region begins approx. 80 km easternly from the Slovak capital Bratislava and is surrounded by the other chamber regions Trnava, Trenčín, Banská Bystrica. The centre of the region is the historically famous town Nitra with approx. 77 374 inhabitants. The total geographic surface of the region represents approx. 6 344 sqkm and the number of its population is about 680 779 residents. The total number of the entrepreneurial subjects in 2016 was approx. 70 015. The traditional industrial branches of the region are the machine engineering, metal processing, electrical engineering, chemical industry, building material production and the automobile industry. Based on the excellent climatic and soil conditions very important are also the agricultural production and the food processing industry.

Concerning the size of entrepreneurial subjects there are typical here small and middle sized companies, which went through the transformation process to the market economy easier and more flexibly as many big factories in other parts of the Slovak Republic. In the recent ten years there was established here a large number of new producing companies by local Slovak entrepreneurs, which are successful not only on the Slovak but also on international markets.

The objective advantages of the region have been invented also by well-known foreign companies, from which many are present here with strong investment projects. To the most important foreign investments of the region belong such manufacturing plants as for example the HEINEKEN SLOVAKIA JSC Hurbanovo /beer and malt production/, Giesecke & Devrient Slovakia Ltd. /smart plastic cards/, MATADOR AUTOMOTIVE JSC Vrable /automobileparts/, IDO EET Ltd. /special engineering production/, SLOVENSKÉ ENERGETICKÉ STROJÁRNE JSC Tlmače /produces and supplies steam boilers for combustion of coal, oil, gas and biomass/, Duslo JSC, Šaľa /fertilizer production/, Low&Bonar Slovakia, a.s. /industrial and coated fabrics and composite materials/, KABELSCHLEPP SYSTEMTECHNIK Ltd. /systems of energy carriers/, Pastorkalt JSC /production and delivery of refrigeration equipment/. The most important investors came to the region from Germany, Austria and Holland. Besides these direct investments a large number of local industrial companies cooperate very intensively with partners in the European Union supplying for them semi-products or carrying out certain finalizing operations on their final products.

The region has very good transport infrastructure with dense network of roads which contributes to the further intensification of the international contacts. The administrative centre of the region the town Nitra has direct highway connection with the capital Bratislava and thus also with the Slovak-Austrian border. Thanks to this highway connection and the good geographical position three international airports /Bratislava, Vienna, Budapest/ are available within three hours. In the town Nove Zámky 30 km southernly from Nitra there is one international railway junction and in the suburb of the town Komárno is the second most important river port of Slovakia on the river Danube. After the opening of the Rhine-Main-Danube channel the region has direct ship connection with the Black and North Sea.

Nowadays, the main task of the Regional Chamber of Commerce and Industry Nitra in the international sphere is the further support of commercial and cooperational contacts between Slovak and foreign companies. This target is based on the high interest of the local entrepreneurial circles for the intensification of business contacts mainly with the countries of the European Union and of Middle Europe. It is expected that thanks to the geographical proximity and good infrastructure, this region will attract the interest of further foreign investors. Naturally, the Regional Chamber of Commerce and Industry Nitra will be always ready to equip them with basic orientation in the current Slovak environment and to provide professional advisory services in all spheres of the economic life.

The Region of Prešov

The Prešov Regional Chamber of the Slovak Chamber of Commerce and Industry

The Slovak Chamber of Commerce and Industry, an integral part of which is the Prešov Regional Chamber (PRC SCCI), is an association of business concerns formed in order to boost the economic prosperity of its members, encourage their business activities both in Slovakia and abroad and assist in the creation of a positive business climate. The SCCI is a public institution established by Act 9/1992 of the National Council of the Slovak Republic and declared in Act 121/1996 of the National Council.

Membership in the Chamber is voluntary and its members are both natural and legal persons performing business activities in various fields of economy, with exception of agriculture and food industries.

The members have the right to:

- Use all services provided by the SCCI
- Service price discounts in accordance with the chamber's valid price list of services
- Propose and elect bodies
- Submit proposals for the improvement of the chamber's activities

The primary aim of PRC SCCI is to provide high-quality services to the business community in the Prešov region, to assist in tackling their business-related problems, to predict, analyse and define the needs of entrepreneurs and to offer solutions in the form of both tested and first-time services.

Provided standard services of the SCCI's Prešov Regional Chamber:

- Issuing of ATA carnets and certificates
- Counselling and consultations related with export and import of goods
- Counselling on the possibilities of financing business activities through the Structural Funds (ŠF)
- Services in the field of education
- Development of international trade relations - by organising trade missions at home and abroad
- Organisation of the participation of companies for fairs and exhibitions
- Publishing, distribution and sale of specialised publications

The plan for the Chamber's activities for each year is approved at the plenary session of the PRC SCCI and is outlined on our web-site www.po.sopk.sk. Members of the PRC SCCI are kept regularly informed about all events organised by the Chamber.

- the territory of the SCCI's Prešov Regional Chamber is the Prešov Self-governing Region
- the PRC SCCI also has an office in Poprad

The Region of Trnava

Trnava Region

the region with its rich history, spiritual and cultural life, with fertile lowlands and protecting mountains, with rivers connecting people, the region of education, the region of good bread and good wine.

Location

Trnava region spreads across the south-western part of Slovakia. In the west it borders with the Czech Republic, in the south-west with Austria, in the south with Hungary. It takes to reach the capital Bratislava by car about 1 hour and the Vienna International Airport about 2 hours.

Trnava Region in numbers /Statistics 31. 12. 2018/

Number of population:	563 591
Area (km ²):	4 146 km ²
Number of profit companies:	23 776
Number of physical persons /small entrepreneurs/:	34 751
Rate of unemployment (%):	2.31 %

Taking into account the big interest of investors the Trnava region is one of the most dynamic regions in Slovakia.

Transport and infrastructure

The region has a well-developed road and railway transport system. Railways and highways connect the region of Trnava with Bratislava, Czech Republic, Austria and Hungary.

Education

In Trnava region there are a great number of technical and vocational schools provide machinery, transport, electrical, chemical, agriculture, food-preparation and other kinds of education. Secondary schools are aimed at business and services. The Slovak Technical University in Trnava offers degrees in industrial technologies, technical materials, industrial ecology, management and applied information systems. The Trnava University and The University of St. Cyril and Method offer possibilities to study in a large scale of humanities and natural sciences.

The most important advantages of Trnava region

- the growth of foreign capital in industry
- the most using of arable soil
- concentrated presence of foreign investors

Contact:

Trnava Regional Chamber
Slovak Chamber of Commerce and Industry
Trhová 2, 917 01 Trnava, Slovakia
Phone: +421 33 55 12 588 / 744

- qualified working force
- many of industrial parks
- suitable logistic position
- concentration of national institutions
- existence of three Universities
- important cultural and historical sights
- existence of geothermal and healing spas

Economy

The region of Trnava has its tradition in both kinds of production: industrial and also agricultural. The industrial production includes machinery, automotive, electrical engineering, chemistry, metal working, building construction, pharmaceutical industry, printing. The main industrial centres are these towns: Trnava, Skalica, Senica, Galanta, Piešťany and Hlohovec. The industry of agriculture and food is developed especially in the southern districts of Galanta and Dunajská Streda. The region of Trnava is a significant source of energy production for the whole area of Slovakia with its Nuclear Power Plant Jaslovské Bohunice and Water Power Plant in Gabčíkovo.

Foreign investors in Trnava region

Amylum Group (Holland), Schaeffler Skalica, spol. s r.o. (Germany), PCA Slovakia, a.s. (France), SAMSUNG Electronics Slovakia, s.r.o. (South Korea), Bekaert Hlohovec, a.s. (Belgium), ZF a.s. (Germany), SLOVENSKÉ LIEČEBNÉ KÚPELE, a.s. , Protherm/Vaillant (Germany), Johns Manville Slovakia, a.s. (USA), Semikron, s.r.o. (Germany), Bodet & Horst s.r.o. (Germany), JASPLASTIK-SK s r.o. (Hungary), Eissmann Automotive Slovakia (Germany), Wertheim, s.r.o. (Austria), Fremach Trnava, s.r.o. (Belgium), Boge Elastmetal Slovakia (Germany), Webasto-Edscha Cabrio Slovakia (Germany)

The Region of Zilina NORTH-SLOVAKIA COUNTY

The situation of Slovak Republic's economy is frequently discussed in Slovakia and abroad, and the debate is greatly confused. The analysis is often mixed up with wishful thinking, simple lobbyism etc. A few neutral figures:

GDP IN CONSTANT PRICES – changes in %
Slovakia

EXCHANGE RATE - Month - VI.
SKK / 1 CZK, Slovakia: Czechia
brief history

Twenty-six years have elapsed since the Slovak Republic acquired independence. In these approximately 26 years the Slovak Republic had to prove evidence of its capability to manage the development of the country, assuring its political stability and economic development.

After three years of independence, the economy of the Slovak Republic acquired from the London „The Economist Intelligence Unit“ the best rating among Czech Republic, Poland and Hungary - countries in transition. The rating was supported mainly by agreed aims and practical economic policy of individual states within the goals of the International Monetary Fund, macro-economic indicators etc.

The Slovak Chamber of Commerce and Industry (SCCI) as a public - legal institution plays the role of the major representative of the entrepreneurial and business sphere in the Slovak Republic. The Regional Chamber of the SCCI in Zilina represents and co-ordinates the interests of its members in matters of business activity inland and abroad, renders services and protects them from unfair business relations in the following districts : Zilina, Martin, Dolný Kubín, Liptov, Mikuláš, Turčianske Teplice, Ružomberok, Čadca, Namestovo, Tvrdošín, Bytča, Kysucké N. Mesto. The members of Regional Chamber SCCI Zilina come from the most industrial sectors including engineering, machinery, metallurgy,

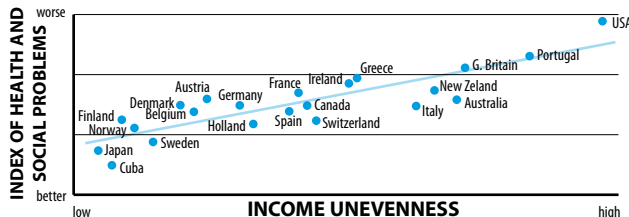

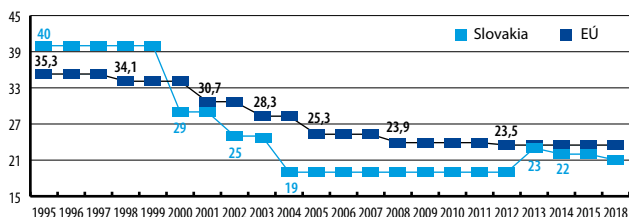

building industry, wood processing, paper industries, chemical industries, textile, food industries, electrotechnical, electronic industries, automotive, energy, tourist and travel, etc. **The most important companies**, suppliers, hotels, spa of Zilina County in that branches you can watch in "CATALOGUE FIRMS of SCCI Zilina County" – issue by chamber of commerce and industry Zilina.

Our County located at the North-West of Slovakia is one of the most industrialized areas in the republic. Zilina is the city of the County. The region is connected to the international trucks roads, Core European Corridors:

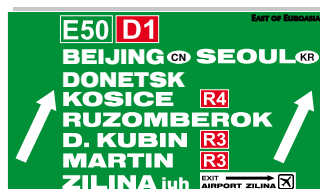

- I. **E 50:** ...-Paris-Praha-Brno-Zlín-Zilina-Martin-Ružomberok-Liptovský Mikuláš-Presov-Košice-Kyjev,...and
- II. **E75:** - Koper-Wien-BA-/...-Belgrade-Szeged-Bratislava-Zilina-Zwardon-Biala-Katowice/Krakow-Warsaw-Minsk-Moscow...)
- III. **R3/59/65:** Krakow-D.Kubín-Martin-Kremnica-Zvolen-Budapest

North-Slovakia is a transport junction of international railways systems in the direction Poland, Czechia, Ukraine or to south – Hungary, former countries of Yugoslavia, etc. Air transport is secured via the International **Airport at Zilina**. The distance of the Airport from Martin is 37 km, to Liptov 70 km.

Ekologická stopa je ľudská spotreba prepočítaná na biologicky aktívnu plochu nevyhnutnú k produkcii spotrebovaného a k odbúraní odpadu. Uvádza teda, akou veľkou plochou Zem je priemernej kvalite potrebuje človek pre svoju ročnú spotrebu. **Jednotkou je "globálny hektár"** na hlavu, čo je hektár biologicky aktívneho povrchu planéty o priemernej produktivite. Pre každého obyvateľa planéty je k dispozícii 2,1 hektáru plochy. Ľudia dnes prekračujú bioproduktivitu Zeme v priemere o tretinu a vytvárajú teda hlbší ekologický stopu, ako je Schopná obnovy. Naposledy sa ekologická stopa ľudstva rovnala bioproduktivite Zeme v polovici 80 rokov.

INTERNATIONAL AIRPORT ZILINA
GATEWAY TO NORTH-SLOVAKIA
