## SHARVAN bike – The First Fully Adjustable, Folding Bike in the World

There is probably nothing more satisfying than giving the world something new – a groundbreaking, innovative product, never seen before. This is how the engineers at LPH Group, Slovakia, felt in April 2017, when they utilized more than 30 years of experience in the automotive industry to produce the Sharvan bike, a high-end city bike, the first of its kind on Earth.

Sharvan's unique, patented design, using the latest plastic and metal components, contains three features that, combined, make it unlike any other mass-produced bicycle. The frame of the bike expands easily, to comfortably fit both children and adults. It folds to a very compact size when not in use. And, thanks to its removable color frame covers, you can change its look for any occasion or style.

The Sharvan bike's first prototype premiered in 2019 at the prestigious EUROBIKE FAIR in Friedrichshafen, Germany. Now, in 2020, its first series is going into production. The Sharvan bike currently comes in three standard models – Classic, City, and Country, and an e-bike version is coming soon. To date, 70% of Sharvan bike parts come from EU nations, primarily Slovakia, and the long-term plan is to raise this percent even further.

To learn more about the Sharvan bike, visit our website, [sharvan.bike](https://sharvan.bike), as well as our Facebook and Instagram fan pages.

Ladies and Gentlemen,

I am glad, that you are about to read this useful business information source in its 20th edition. As it serves the international business community, let me stress, that besides contacts to your local and regional partners in Slovakia, the Directory brings you also the network of Slovak economic diplomats in 65 countries, who could be supportive in your business projects and plans. Do not hesitate to use their expertise and knowledge. In this regard, do not forget as well our EU representations in remaining countries all over the world.

Would I compose my address three months ago, I would probably write about bright future of our national, European and world economy with huge economic growth predictions and stable social perspectives. As you all know corona virus has changed it all and we are at the eve of a deep economic recession worldwide. The pandemic showed us how fragile our globally connected world is. In fact, it showed the limits of globalization; how quickly and substantively can the economic and social situation change all over the world. The positive news is that the economic recovery should occur soon. However, the world will never be the same again, as it was in precorona times. The Slovak economic diplomacy will take all available measures to restore as quickly as possible the performance of the Slovak and European economy and to overcome negative effects of the deep global economic crisis caused by the pandemic.

The new Slovak government clearly confirmed the active role Slovakia is playing in our European environment and in the transatlantic partnership, both creating cornerstones of our foreign and economic policy. Membership in the European Union and the North Atlantic Treaty Organization was our free decision, bringing us back to our political and social roots, creating condition for our security and prosperity.

I am writing this article in the days of the 75th anniversary of the end of the World War II. European integration project was designed to prevent wars and install peace on the European continent and we are successful building our approach on values of democracy, freedom, security, human rights, territorial integrity. We should never forget the very essence of European integration and be vigilant by defending our key principles especially in today's time of fake news and hoaxes. We shouldn't and can't be silent, when many, even goal directed, try to misinterpret or even false the history or today's reality. To the contrary, we

should be very vocal and clearly describe the reality and defend our positions.

While the European Union is our decisive environment, we will maintain and further promote good relations to our neighbors and in our region, further promoting the extension of the European space of stability and prosperity. Slovakia is sharing its positive experiences with transformation process with candidate countries in the Balkans and Ukraine.

The high openness of the Slovak economy brings us to continuous search for sales and investments opportunities of Slovak businesses in foreign markets. It is therefore crucial for the Slovak Republic to have a coherent, modern, professional economic diplomacy, which aims at promoting export, finding new investment opportunities, cooperation on innovation, information technology and support for Slovak companies seeking to penetrate international markets. As coordinator of cooperation between relevant domestic actors, Ministry of International and European Affairs will put in place innovative tools to show the potential of the Slovak economy. We will streamline the setting up of coordination mechanisms created by representatives of the Government, the private sector and the academic community.

Key competitive factors as strategic location in the middle of Europe, excellent human resources, high level technologies in specific areas should be connected with strengthening of the role of research, development and innovation activities in our economy.

In cooperation with the Ministry of Economy we are preparing strategic material, which will include, inter alia, a professional, scientific comparison of the development and dynamism of foreign trade with selected countries, in particular the Visegrad 4, identifying potential of possible new markets and attractive export goods with higher added value.

Slovakia will primarily promote the expansion of economic cooperation in the EU internal market with key partners and neighboring countries. In the context of the post-brexit redefinition of economic relations between the EU and the United Kingdom, Slovakia seeks to achieve an ambitious and balanced EU agreement on future relations with the UK in the economic field while maintaining a high degree of trade cooperation.

While the EU is the key import partner for 88 countries, membership in the EU opens

**Ministry of Foreign and

www.mzv.sk

Slovakia huge potential for economic cooperation worldwide. We will pay particular attention in our business contacts to economic and scientific cooperation with the US, China, Japan, India, Indonesia and Korea. Slovak Republic will use regional platforms such as 3 Seas Initiative and 17 + 1 (CN + 17 CEEC) to promote its economic interests and to seek opportunities for engaging in economically beneficial infrastructural projects. The same priority of economic diplomacy will have the territories in close EU neighborhood. In order to diversify foreign trade, it will monitor the possibilities of performing at dynamically growing markets of Asia, Africa and Latin America using here also the tools of the Official development assistance.

We will use our membership in international economic organizations and participating in the multilateral economic fora to shape new global and regional policies and create a global environment conducive to multilateral economic cooperation. Slovakia supports the steps leading to the reform of the WTO with a view to its streamlining and adaptability to address new challenges. We will continue to promote the development of an open and transparent multilateral trading system based on the rules and act against the tendency of introducing protectionist measures adversely affecting foreign trade.

Dear readers,

recalling these days the end of the World War II, in autumn we will celebrate the 75th anniversary of the adoption of UN Charter. Aiming at peaceful, prosperous and just world after decades of hard work we have achieved a substantive progress, but much remains yet to be done. Let me name the most prominent task - fight against climate change, where the necessary progress is still lacking behind.

In autumn, we will start with our EU partners the Conference on the Future of the European Union, an extremely demanding exercise aiming at further steps of internal changes of integration scheme, but also at adequate external position in the complex world with US, China and the EU as main players.

It does not lack on heavy challenges my country, our partners and allies and the whole world are confronted with. Nevertheless, I am confident, that we will cope and find positive solutions for our common future, though the development will most probably not follow a linear line of mankind's growth of well-being as last months have taught us. In this endeavor a close cooperation of the government with the business community plays a decisive role and I am looking forward to our common work and relay on your support and assistance.

Ivan Korčok  
Minister of Foreign and European affairs  
of the Slovak Republic

Dear readers,

I wish I could address you by promising bright outlooks and 'fruitful' months ahead, and also by saying that the new government has taken over this country in a condition from which it can move forward. Unfortunately, the opposite is true. Instead of getting down to work right away, for example, by facilitating the removal of various nonsensical barriers to doing business or by slimming down our energy bills, 2020 will forever be remembered as the year of corona crisis.

It will affect every aspect of life, whether we like it or not, yet the economy will take the hardest hit. Who would have thought just a year ago that all those shops and businesses would end up closed for such a long time? Such measures bring many associated problems, from unpaid rent, through holidays purchased in travel agencies, to unmarketable merchandise and the outage of earnings needed to cover even the basic business expenditures. We are living in times which, for many years to come, will not be remembered as stable and beneficial in economic terms.

This is why one of my top priorities is to help the economy to get swiftly to 'ground zero', that is to a point from where we intended to start. Although the plans on my table as minister are bulky and bold, they are doable and beneficial. Their common denominator reflects the main objective of the economic policy – to increase the competitiveness of Slovak businesses. To this end, the Government has set up a new Council for Competitiveness and Productivity. Any proposals or documents which could influence the business environment will reach the Government only subject to prior scrutiny and recommendation by the new Council.

The first month of my tenure as minister has defined the way in which our solutions for the economy will develop – investment incentives only for the least developed regions, support of the young and skilful with new ideas, the most efficient use of EU funds and the broadest possible support to the employers and self-employed by eliminating red tape and making the everyday life of businesses easier.

Our set of solutions for businesses, known as "Smart Hundred" will soon become reality and I will be gladly watching the effects it will produce. Most of the solutions on the list begin with the verb "abolish", referring to the need to eliminate many useless regulations, barriers and obligations. Apart from making the life of employers easier across the board, the measures will benefit specific sectors, such as car transport, gastro business, artists, builders, architects, etc. Specific attention is given to domestic companies and their gains in labour productivity, value-added and the creation of unique know-how. Not only these measures, but all economic-political decisions will be based on facts and data. In the energy sector, priority is given to security and reliability of energy supplies and to solutions aimed at reducing the price of electricity for end-users.

Last but not least, our objective is to keep the industrial sector of Slovakia competitive so that it continues to play a key role in the national economy.

Dear readers,

In conclusion, I would like to wish you loads of enthusiasm so that we, pulling together, recharge the energy that the economy of Slovakia has temporarily lost due to the corona crisis and, in the months ahead, use the opportunities which come with every crisis.

Richard Sulík  
Deputy Prime Minister and  
Minister of Economy of the Slovak Republic

When we were forecasting the development of the Slovak economy and of the European and global economy for 2020, no one in our country or abroad counted with such a small thing – a small invisible virus that virtually changed everything within a few weeks. Coronavirus is certainly the most used word in the world today. This is because, though nobody can see it, its consequences are fatal and will have long-term effects. It has an impact on society, the economy as well as individuals. Already today we can say without exaggeration and emotion that the world after coronavirus will no longer be the world as it was before. We must particularly be aware of this in Europe where the epicentre of this disease is currently located. We suddenly walk on half-empty streets, and the fun we used to have and life in shopping malls without actual content are over. We have come to the period of realising our own weaknesses, but also our interdependence and, perhaps, the need to review the value categories of the world in which we live.

#### What can we expect?

It is very hard today to give a clear answer to the seemingly simple question. In Europe, it will depend on the intensity of the disease; in the world, on how the other continents will be hit, especially Africa, Latin America and the Indian subcontinent. All this will depend on the enormous responsibility of governments and, in particular, of each one of us. What is clear, though, is that the problems will not disappear with the first warm rays of the sun. In the economic sector, what awaits us after the disease is over is a long and slow recession, with an impact mainly on social and personal consumption. Many will review their business plans and investments, and the new situation will, certainly, also bring new opportunities. Government policies in the areas of public finances and public investment, as well as support for the business environment, will play an important role. All this can speed up the process of economic recovery and the transition to standard conditions of economic activities. It will be of particular importance to have a solution that is not dominated by a political or party approach, but by the interest of individual countries and communities and, hence, by the interest of citizens, regardless of their political or religious orientation. Only by a concerted effort of all those with human, intellectual or financial capacity can this process be successful.

#### What will come after the coronavirus?

Society as well as individuals will have to change. If we consider this contagious disease only as an episode of human development, there will be new contagious diseases coming, which will for sure be much worse and will have more drastic impacts. With respect to the economy, we must realise that globalisation has come to its post-peak period, both in terms of control of individual economic activities by several multinational corporations as well as in the area of global supply networks. This amazing link also has a negative effect by creating global channels for the spread of diseases, epidemics or economic problems from continent to continent. Supporting the creation of smaller and more compact undertakings creates greater economic and social stability, as well as better conditions for tackling the problems that arise. It also creates better conditions for the use of people's

talents and abilities and their innovative activities. The strengthening of further concentration of capital and power destroys not only the market economy but democratic society as well. Food self-sufficiency and security will also be an important factor for the future, and will have to be addressed at the national level. The states must also guarantee the quality of food links in the chain and their impact on population health.

#### Conclusion

The period we are experiencing is very unusual. Many suddenly have a lot of time because they cannot do what they were accustomed to, while others have no time at all because they care about the survival of their company or family. However, each of us should take the time and think about how to go on with our lives or businesses. We have become the victims of boundless consumption that determines our behaviour to which we subordinate our lives. We explain civil liberties as an opportunity to do anything regardless of our surroundings and the environment in which we live. We have become individualists, ruthlessly exercising our rights that we define ourselves, to the detriment of others. We take much more from this world than we give, regardless of the future. And then we suddenly face an invisible virus and are surprised because we have to give up the joys of our lives. It is important to realise that our way of life today deprives our children of their future. Let us think during these unusual days about ourselves, about the environment and society in which we live and about what we leave behind. Life is not just material values, it is also spirituality, our inner life and our ability to talk to ourselves.

The national symbols of the Slovak Republic are the national emblem, the national flag, the national seal and the national anthem.

The national emblem of the Slovak Republic has a red, early Gothic shield with a silver double cross mounted on the central peak of the blue three hill group.

The national flag of the Slovak Republic is composed of three horizontal stripes - white, blue and red (with white at the top, followed by blue and red). In the front section of the national flag is the national emblem of the Slovak Republic.

# GREAT MORAVIAN EMPIRE – OLD-SLAVONIC EMPIRE (805-905) - 9th century

*"I mind the disregard for the culture that is centuries older."*

Alexander the Great (356-323 B.C.)

■ NITRA, MIKULČICE, DEVÍN - centres, towns, castles

■ Rulers: **Mojmír I.** (830 - 846), **Rastislav** (846 - 870), **SVĚTOPLUK I.** (870 - 9. 3. 894), **Mojmír II.** (894-907).

Territory of the empire: Slovakia, Moravia, Pannonia, Czechia

■ Slavic gods: Perun, Triglav, Dazhbog – god of the Sun, Radegast, Zhiva (Siva) – goddess of life and bioenergy; Slavic priests used meditations and breathing

exercises to accumulate and balance energy;

■ **863-885** Constantine-Cyril and archbishop Methodius with Rastislav and King Světopluk founded the material, spiritual and culture traditions of Slavonic people and devised the alphabet;

■ **866** They founded the Great Moravian training college – school, where 200 pupils finished their studies; literature – writings, poems, code of law;

■ **869** The Old Slavonic language became the fourth liturgical language in the world along with Greek, Hebrew and Latin;

■ Methodius (815-6. 4. 885) studied law; archbishop in Great Moravia and Pannonia-Sirmium - Srem. Mitrovica

■ Constantine the Philosopher – Cyril (827-14. 2. 869) devised the alphabet and spelling, and created words for communication from Greek;

■ **880** The pope issued the bull *Industriae tuae* by which he took under protection the independent Great Moravian Empire

■ Byzantine writing on Slavonic people: "Slavic tribes are accustomed to freedom and will not let themselves

enslave. They keep open house for foreigners and accompany them as their guests from one place to another, wherever the guests wish. Their way of life is rough, but they are note evil-minded."

■ **~ 889** – Czech lands annexed to the Great Moravian Empire;

■ **~ 906** Magyars invaded Great Moravia from the East, subverted the Empire and settled in Pannonia;

■ **890 -1000** ➔

**Dissemination of material**

**and spiritual culture** From

Great Moravia to Bulgaria, Czech lands (Bořivoj I.- in 882 christened by Archbishop Methodius), to the Yugoslav nations and to Kievan Rus.

Methodius' followers spreading culture and literature: Climent in Ohrid, Sava, Naum, Gorazd.

Centres of Slavic culture after Great Moravia:

Prague, Kiev, Cracow, Novgorod, Ohrid. In Bulgaria, Methodius is commemorated on 17 July; the Methodius' cult was laid by the Czech king Charles IV.

■ **9th century** – Slovakia and Moravia abounded in spiritual Slavic culture reflecting the maturity of the Byzantine and Western-European letters; it was the basis of the civilisation of Central-European culture (**own state, own writing, own church province, accepted by the Frankish Empire - 884, own books, own liturgical language – Old Slavonic, successful foreign diplomatic policy**).

Central-European civilization area – Great Moravia, the cradle of material and spiritual culture; laid the foundations of a new literary language through which the Slavs got involved in the world cultural course of events throughout Europe. MIKULČICE: palace, 10 churches etc.

# THE TOWN OF SPIŠSKÁ NOVÁ VES

## Gateway to the Slovak Paradise

**Slovak Republic, Europe**  
**N 48° 56' 39,01"**  
**E 20° 34' 0,32"**

Spišská Nová Ves with its more than 750-year long history is an ideal starting point for the lovers of hiking along harsh but picturesque

publicly accessible church tower in Slovakia (87 m high). At the Place of Wishes, which reminds us of the famous gothic bell foundry workshop of Master Konrád (1357), you can express your most secret wishes and send them by ringing a bell to the heavenly heights to be fulfilled. The town has got a unique atmosphere thanks to many architecturally valuable historical buildings which

A wide range of cultural and sport events all year round provides sufficient opportunities for a pleasant stay. Attractiveness of the town is enhanced by theatres, a gallery, museums, 3D cinemas, indoor swimming pool and a lido, wellness and fitness facilities, tennis grounds, skittle and bowling alleys, a high rope park, a skate park, an ice hockey stadium or an indoor

gorges of the Slovak Paradise (Slovenský raj) National Park, for the admirers of the UNESCO World Heritage sites and for those interested in the less spectacular but even more precious Gothic and Iron Routes monuments that can be found in the surrounding Spiš region.

The town features the longest lenticular (spindle-shaped) square in Europe with an unforgettable atmosphere and the highest

include seven wonders, such as the Town Hall, the Art Nouveau building of Reduta and the Provincial House with its so called Levoča gate. One of the four zoological gardens in Slovakia is situated here. Right next to it there is the Monkeyland high rope park. Children can also have fun in Alex park, one of the largest indoor amusement parks in Slovakia or in the experimental gallery called LaborARTorium.

shooting range, as well as suburban sports airfield with an opportunity to enjoy parachute jump or sightseeing flight.

In the close vicinity of the town you can find the largest Slovak ice cave, 25 splendid waterfalls in 9 accessible rocky gorges, more than 300 km of marked hiking trails, 400 km of cycling trails, ski centres, cross-country skiing and nordic walking trails or 13 educational trails.

In the nearby Slovak Paradise you can experience true wilderness. From May 1 to October 31, the admirers of water tourism can enjoy boating on the Hornád river in one of the most attractive parts of the national park – the longest river canyon in Slovakia (Prielom Hornádu, almost 12 km long). You can explore amazing 'Via Ferrata' that will enchant you with its wild beauty and unique environment. The Kyseľ

perfect accommodation, catering services and relax in wellness centre of the 4\*hotel, as well as enable you to express your romantic desires and touch an old medieval bell at the unique Place of Wishes. To make your stay unforgettable, use the opportunity to climb up to the highest church tower in Slovakia or dress in gothic costumes and make yourself a romantic photo.

gorge is passable thanks to new educational trail Kysel' – Ferrata of the Mountain Rescue Service. This secured trail is open from June 15 to October 31.

The combination of nature, history and active relaxation in the Spiš region is complemented by other available natural beauties: first of all the High Tatras (Vysoké Tatry) National Park, which is just 30 km away, but also thermal park in nearby Vrbov, the Pieniny National Park with its raft tours of the Dunajec

river on traditional Goral rafts, the caves of the Slovak Karst (Slovenský kras) National Park, or the cities of Prešov and Košice located in short distances.

Take an opportunity to enjoy advantageous family or romantic stay in Spišská Nová Ves.

**'Family stay full of experiences'** (3-day package for families) includes accommodation in the hotel\*\* with breakfast and family dinner at the day of arrival,

free entry to lido and indoor swimming pool during the whole stay, ascent to the highest church tower in Slovakia, free entry to the ZOO and Aquaterra pavilion with a small present for your children, free entry to MONKEYLAND high rope park and discounted entry to ALEX park – indoor entertainment park for children.

**'Romantic stay in the company of beloved person'** (3-day package for couples) wants to pamper you by the

## Detva

DETVA is situated in the heart of Slovakia, about 220 km from Slovak capital Bratislava. Its area is known with precious natural and cultural values. Detva is the centre of Podpolanie region, one of the most original Slovak regions, which was named after natural dominant feature of the area – Polana volcano. From 1996 Detva is the centre of the district. Its area is 6,809 hectares and it has about 15,000 inhabitants. Geographical location of Detva in the centre of Slovakia enables good traffic connection with the neighbouring regions as

about roads and railways. The road I/16 (Zvolen – Lučenec – Rožňava – Košice) and the R2 expressway with the connection to Detva is the traffic axis of the area. Detva is connected with the railway line Zvolen – Lenártovce – Košice, which runs through southern part of the town. The nearest cargo railway stations are in neighbouring villages Víglaš and Kriváň. Airport in Sliač is only 27 km from Detva. Good technical and civic infrastructure is available in the town. In the Strategy of Slovak Republic Improvement Detva is one of innovative progress poles. Business and employment support is one of the priorities so that the new business zones are being created. With the EU support of its structural funds (2004 - 2006) Detva town realized reconstruction of some producing parts in PPS factory so that it prepared industrial park for some new investments and for the creation of 538 job positions, mostly in engineering professions. The goal of building of industrial parks and zones for business in Detva and surrounding villages Kriváň and Víglaš is to provide the opportunities for domestic and foreign companies with work-

ing places in production, service and quaternary sectors, so that for domestic companies' goods and services consumption. The Town of Detva prepared an area for the construction of the Detva – Trstená industrial park. The new production will focus on mechanical engineering and will create over 500 new jobs for the inhabitants of the town and of the region. There is also an area for small and medium-sized enterprises in the proximity of the industrial park. In southern part of Detva there are some areas and building sites of stores, services and production. This site is the most lucrative

as about the connection with infrastructure but it is capacity limited because of road R2 and also because of limits of protective zones biotopes around Slatina River. They say that the potential of Detva and its surrounding is not used properly. There is a good opportunity not only for visit and getting known of this region but also for investment into business and living in this environmentally pure, clean and beautiful town in the heart of Slovakia.

## The Town of Nováky

The Town of Nováky is located in the centre of the Hornonitrianska valley. It is situated 140 km away from Bratislava and forms part of the Trenčín Self-Governing Region. The first written mention about Nováky dates back to 1113 and is recorded in the Zobor Document of the Zobor Abbey.

The Town of Nováky is the most industrial town of the Upper Nitra Region. It has chemical industry – Fortischem a.s., energy industry – Slovenské elektrárne a.s., závod Elektrárne Nováky, and mining industry – Hornonitrianske bane Prievidza a.s.

At present, Nováky is a small, but attractive and clean, and absolutely native-Slovak town with approximately

five thousand inhabitants. There are a few athletic clubs in Nováky which have made considerable achievements in Slovakia, especially in waterpolo and canoe. The waterpolo players' team is the multi-champion of Slovakia. The canoeists have achieved considerable results at the European and world level.

The citizens and tourists can spend their free time visiting the swimming hall, the Natio-

nal Water Polo Centre, sports facilities, the town park, or fishing and rowing on the lake or visiting a cultural programme in the cultural centre.

## The Town of Lučenec

The Town of Lučenec is situated in the south of Central Slovakia, close to the Hungarian borders. The document from 1247 containing the first mention ever about Lučenec refers to this town as an important crossroad of trade routes and the centre of culture of the historical region of Novohrad. Kubinyi Square lies in the heart of the historical centre

of the town, with roman-catholic and calvinist church and the historical buildings of Reduta and the Municipal Hall as its main landmarks. The Municipal Hall was renovated in 2016, today you can find there a municipal museum and the information center. The neologic synagogue built in Oriental-Byzantine style is another important historical attraction. It is one of the largest in Slovakia. It was reconstructed in 2016 and

nowadays it serves as a multinational cultural centre. The city park is one of the most beautiful and most precious parks in Slovakia, thanks to the combination of French, English and woodland garden styles, with artificial lake, mini

ZOO and lot of leisure time zones for the whole family. On the central square there is a newly build shopping center, the biggest in the region with various shops, restaurants, cafes and cinema. According to the Town's Zoning Plan, industrial sites for the purposes of new investors are located in the Industrial Zone South within the cadastral territory of Lučenec. This industrial zone meets all the requirements for technical infrastructure. Industrial Zone South is situated in the south-eastern part of

Lučenec. Its total area is 169.6 hectares. Manufacturing halls, warehouses and technical facilities currently occupy 113.2 ha. The industrial zone houses an Industrial Park at a total area of 6 ha with complex infrastructure, including roads and lighting. Future investors can dispose of 35 ha of free sites within the industrial zone and 0.4 ha within the Industrial Park.

## Sabinov

The first written mention of this settlement dates back to 1248. King Andrew III granted the Spiš

Privileges to this town on 28 January 1299. On 13 April 1405, Sabinov acquired the status of a free royal town. After the Reformation at the end of the 15th century, Sabinov became part of Confesio pentapolitana. In the 19th century, it was still a less developed settlement, yet its development continued during the years of the first Czechoslovak Republic. The town was severely hit by the tragic events of World War II. Sabinov was the district seat within the territorial structure of the first Slovak Republic. After the war, the town became industrialised. In 1964, it served as stage scenery for the first Czechoslovak movie awarded the most prestigious prize of the American Film Academy – the Oscar. The citizens of Sabinov often remember the making of The Shop on

Main Street movie. The best-known landmark of the town – the Church of the Beheading of Saint John the Baptist is situated on the main square. Next to the church, there is a Renaissance bell tower, the Church of the Assumption of Mary and the former Piarist college. Today, Sabinov is a developed town with over 12,000 citizens. It has a rich cultural life and is represented by various sportsmen and artists. Tourists like coming back to visit this Oscar town. The satisfaction of the locals proves that the beating heart of the town and its overall nature contributes to the comfort of all.

## Tvrdošín

The most important monument of the town is the wooden Gothic church from the mid-15th century, which was awarded the Europa

Nostra prize for its restoration and was entered in the UNESCO World Cultural Heritage List (2008).

town district in the immediate vicinity of Poland, situated in a beautiful mountainous area with rare flora and fauna, offers a wide range of light and alpine hiking, cycling and skiing opportunities. The swimming pools with geothermal sulphate-calcium-magnesium water with high iron content, known for its beneficial effects on musculoskeletal diseases, and the aquatic park with rehabilitation services are open all year round.

## Air transport

There are 6 international airports in Slovakia that can be used for both passenger and cargo flights:

- M.R.Štefánik airport Bratislava
- Airport Košice
- Airport Poprad-Tatry
- Airport Sliač
- Airport Piešťany
- Airport Žilina

As the potential of Slovak airports is not yet fully exploited, regular and also irregular connection of Slovakia to Europe and the rest of the world is secured through Vienna Schwechat airport. Schwechat airport is the main international airport of Austria and is only 50 km distant from Bratislava. There is also regular train and bus connection between Bratislava and Schwechat. Another large international airport accessible is Budapest airport, main airport of Hungary, distant 250 km from Bratislava. It is also possible to use airport Ruzyne in Prague that has regular flights to M. R. Štefánik airport in Bratislava.

## The taste of Slovakia

### The TAMI brand

The TAMI brand is a joint project between the dairies Tatranská mliekareň in Kežmarok and AGRO TAMI, a.s. Nitra. These are two strong Slovak partners that have united in order to create a complete range of dairy products. Both companies have a long history and both are stable leaders on the Slovak dairy food market.

The TAMI brand covers a wide portfolio of products: cheese, yoghurts, spreads, fresh and UHT milk, cream, butter, desserts, whipped cream, curd cheese. The company is an innovative leader on the Slovak market – it keenly follows new trends and applies them to its portfolio, either in the form of a new range of products or by widening the choice of flavours. We keep our competition by having our customers satisfied with the quality of our products.

- We protect the environment.
- Individual approach for privat label
- We focus on quality for customers.
- We meet the legislation of the EU, BRC standard, strict Slovak regulations

[www.tami.sk](http://www.tami.sk)

[www.agrotami.sk](http://www.agrotami.sk)

## SUSTAINABLE by DESIGN

Mondi SCP is the largest wood processor and the largest producer of pulp and paper in Slovakia. For several centuries, the paper making has been inseparable from the region of Lower Liptov. The availability of raw materials such as wood, water and energy in the vicinity has had a positive effect on the mill's development. For many years, we give a high added value to our domestic renewable raw material – wood, which comes from well-managed forests with the FSC and PEFC certificates or from controlled sources.

There are not many industrial companies in the world that can boast such a long tradition of production – Ružomberok mill celebrates 140 years of the industrial production this year. The result of our production is a product you come across every day. You get in touch with our paper every day – from the early morning coffee with sugar wrapped in paper, through sanitary products made from our pulp, printing your documents at work, drawings made by your children at school to reading books or buying cinema tickets in your leisure time – all of this on Mondi SCP paper. Conveniently located in Central Europe, we are able to deliver our products to customers on time and of the required quality. We export almost 95% of the production abroad.

### GROW. CREATE. INSPIRE. TOGETHER.

We are the biggest private employer in the region. We currently employ more than 1300 employees internally and several thousand as external contractors – within the supply chain. There are qualified and hardworking people that stand behind the success of the Mondi SCP story. We also care about the region where we operate. We support various projects in the areas of environment, sport, health, social services, culture and education.

### SUSTAINABILITY

In recent years, our company has taken several measures to minimise the impact of the production on the environment. We continuously invest in the best available technology (the so-called BAT technologies), we are almost energy-efficient and produce green energy. After all the investments, we can see positive trends, which lead to reduction of emissions from Mondi SCP. The water quality also achieves excellent parameters. Our company constantly monitors the latest developments in the technology market. With every investment we do, beside the technology improvements, we are also caring for the environment. Our latest investment of EUR 340 mil. in a new 300,000 tonnes containerboard machine and related pulp mill upgrades will increase our sustainable production by using state-of-the-art technologies and using wastepaper to produce new products. The quality of what we do is demonstrated by numerous prestigious awards we have won, including the PPI Awards for efficiency improvements, supply chain management, managing risk and safety, as well as our environmental strategy.

## The MicroStep Experience

**MicroStep®**

### Multi-functional CNC cutting machines

- Cutting with plasma, laser, oxyfuel and waterjet
- Sheets, pipes, profiles and domes cut by a single machine
- Technology combinations & a wide range of accessories
- 3D cutting, drilling, tapping, countersinking and marking
- Automatic material handling systems
- 2D CAM, 3D CAM & CAPP production management software

[www.microstep.com](http://www.microstep.com)

The brand **MATADOR** was established in 1905. Driven by our firmly established values we started to write a new success story. The shareholders started to transform the company from a leading tyre producer to a first class TIER 1 supplier.

Made in  
Slovakia

## SHARVAN bike – The First Fully Adjustable, Folding Bike in the World

There is probably nothing more satisfying than giving the world something new – a groundbreaking, innovative product, never seen before. This is how the engineers at LPH Group, Slovakia, felt in April 2017, when they utilized more than 30 years of experience in the automotive industry to produce the Sharvan bike, a high-end city bike, the first of its kind on Earth.

Sharvan's unique, patented design, using the latest plastic and metal components, contains three features that, combined, make it unlike any other mass-produced bicycle. The frame of the bike expands easily, to comfortably fit both children and adults. It folds to a very compact size when not in use. And, thanks to its removable color frame covers, you can change its look for any occasion or style.

The Sharvan bike's first prototype premiered in 2019 at the prestigious EUROBIKE FAIR in Friedrichshafen, Germany. Now, in 2020, its first series is going into production. The Sharvan bike currently comes in three standard models – Classic, City, and Country, and an e-bike version is coming soon. To date, 70% of Sharvan bike parts come from EU nations, primarily Slovakia, and the long-term plan is to raise this percent even further.

To learn more about the Sharvan bike, visit our website, [sharvan.bike](https://sharvan.bike), as well as our Facebook and Instagram fan pages.

# TECHNICAL UNIVERSITY OF KOŠICE

## History of TUKE

The Technical University of Košice was founded in 1952, but its roots must be sought much deeper in the past. As early as 1657 the Universitas Cassoviensis was established in Košice, but technical education in Slovakia was only elevated to higher - education level in 1762, when the Austro-Hungarian monarch Maria Theresa established the Mining Academy in Banská Štiavnica.

The true birth of the Košice Technical College came on 8th July 1952.

## Vision

The Technical University of Košice will be

- a leading university of technology on a national basis and
- a respected university of technology on the international scale,
- having a strong degree of autonomy,
- sufficiently diversified financial resources,
- available for a wide range of applicants,
- developing scientific knowledge based on its own original findings,
- providing excellent education on all three levels of tertiary education, as well as
- lifelong education,
- meeting the expected needs of industries, region and society by its research,
- substantially involved in providing services to general public.

## Mission

TUKE will provide its environment with scientific and technological knowledge basis, innovation and

workforce, in order to form beneficial and sustainable future and high quality of life. This will be achieved at TUKE by innovative research and excellent education in all scientific branches of respective University Faculties.

## TUKE today

- among 5 % of the world's top universities
- 17 % of international students from 47 various countries
- establishment of startup companies in USP TECHNICOM even during studies
- international mobilities in terms of 341 partnerships in 33 countries worldwide
- almost 100 % success of fresh graduates in the job market
- more than 25 kinds of sports, folk and singing ensemble, student television, radio and others

## TUKE Faculties

Faculty of Mining, Ecology, Process Control and Geotechnologies

Faculty of Materials, Metallurgy and Recycling

Faculty of Mechanical Engineering

Faculty of Electrical Engineering and Informatics

Faculty of Civil Engineering

Faculty of Economics

Faculty of Manufacturing Technologies

Faculty of Arts

Faculty of Aeronautics

# Slovak University of Technology in Bratislava

Vazovova 5, 812 43 Bratislava  
Slovak Republic  
[www.stuba.sk](http://www.stuba.sk)

## UNIVERSITY PROFILE

The Slovak University of Technology in Bratislava (STU), the largest and most significant university of technology in the Slovak Republic, is a modern European educational and research institution. It offers university education mainly in technical, technological, technical-economic, technical-information and technical-artistic fields of study. Its activities reach back to the rich old tradition of the Mining

Academy in Banská Štiavnica, established by the Empress Maria Theresa in 1762.

Our education system is based on scientific research, as well as on artistic, engineering and other creative activities. The STU faculties, departments, institutes and experts cooperate directly with industrial companies and social organisations, actively taking part in international cooperation.

## FACTS AND FIGURES

Number of faculties/university institutes	7/1
Graduates during its existence	165 000
Number of students	11 000
Number of teaching and research staff	
– teaching staff	1027
– research staff	411

Number of study programmes	
– in the Slovak language	174 (B: 58, M: 59, D: 57)
– in the English language	14 (B: 3, M: 5, D: 6)
Number of projects based on industrial contracts	250
Number of research project	740
Number of institutions in international cooperation	651

\* B: Bachelor, M: Master, D: Doctoral level

## THE STU - FACULTIES AND UNIVERSITY CENTRES

### Faculty of Civil Engineering (SvF)

**Areas of activities:** building constructions, building environment technology, construction technologies, environment protection constructions, geodesy and cartography, land constructions, transportation constructions, mathematical-computational modelling, water constructions and water systems

<http://www.svf.stuba.sk/>

### Faculty of Mechanical Engineering (SjF)

**Areas of activities:** applied mechanics, automation, chemical and food machines and devices, engineering technologies and materials, environmental technology, fluid, thermal, hydraulic and production machinery, mechatronics, meteorology, production quality systems, traffic engineering

<http://www.sjf.stuba.sk/>

### Faculty of Electrical Engineering and Information Technology (FEI)

**Areas of activities:** automation and management, electrical and heavy current power engineering, electronics, engineering for power materials, informatics, photonics, physics, telecommunications

<http://www.fei.stuba.sk/>

## Faculty of Chemical and Food Technology (FCHPT)

**Areas of activities:** biotechnologies, chemical engineering, environmental engineering, food chemistry and technologies, fuels and polymers, inorganic and organic technologies, inorganic, organic, analytical and physical chemistry

<http://www.fchpt.stuba.sk/>

## Faculty of Architecture (FA)

**Areas of activities:** architecture and urban development, landscape and garden architecture, product design

<http://www.fa.stuba.sk/>

## Faculty of Materials Science and Technology in Trnava (MTF)

**Areas of activities:** applied informatics and automation, industrial management, material engineering, processing and application of non-metals, production machinery and systems, production technologies

<http://www.mtf.stuba.sk/>

## Faculty of Informatics and Information Technologies (FIIT)

**Areas of activities:** computer engineering, data mining, informatics, information systems, security, software engineering, web ontology

<http://www.fiit.stuba.sk/>

## Institute of Management (UM)

**Areas of activities:** business management, entrepreneurship education, industrial economy, urban planning

<http://www.um.stuba.sk/>

## STUDY SYSTEM AT THE STU

The University offers study within accredited study programmes, in degree courses leading to Bachelor's, Engineer's, Master's, and Doctoral degrees. The credit system is compatible with the ECTS (European Credit Transfer System under the Bologna Declaration of the ministers of EU coun-

tries), enabling the bilateral student mobility in EU countries' universities, as well as within the framework of the broader European and world-wide area. The STU has been an ECTS label holder since 2012.

The system of education is connected with the prestigious partner universities in the framework of international programmes (Erasmus+) using modern methods of education, laboratories and

practical training. It is aimed at branches of study that offer stable opportunities for students' employment in the labour market. Teaching takes place in modern classrooms furnished with the top laboratory and programming equipment.

## STUDY PROGRAMMES AT THE STU IN ENGLISH LANGUAGE

The STU offers university education in the English language mainly in technical, technological, technical-economic, technical-information and in the technical-artistic fields of study. Study programmes are updated for each academic year.

Detailed information with description of study programmes, course structure, key learning outcomes and programme directors can be found at:

<https://lnk.sk/hGV9>

## SERVICES FOR STUDENTS

- well-equipped libraries and study rooms featuring
- 7 dormitories with a capacity for 5,900 students
- free Internet access
- online access to international databases
- canteens and buffets in student dorms and faculty premises
- basic medical care in student dorms
- sport facilities (sport centres, playgrounds, fitness centers
- and swimming pools)

COMENIUS UNIVERSITY IN BRATISLAVA

# THE BEST PLACE FOR YOUR STUDY

Comenius University in Bratislava is a modern European university which in 2019 celebrated its 100th anniversary. It is the only Slovak university to be regularly ranked in the international rankings of the best universities in the world. With thirteen faculties, it offers the widest selection of study programmes (over 800) at three levels, and several of these study programmes are the only ones of their kind offered in Slovakia. There is a wide range of areas of human knowledge to choose from when studying, be it in medicine, the humanities and social sciences, the natural sciences, mathematics, theology, and much more.

Comenius University is a research institution that runs hundreds of domestic and international research projects. As a result, many of our students engage in important research during their studies and can actively participate in projects, grants, and professional internships (including abroad).

Every year Comenius University sends the highest number of students abroad out of all Slovak universities, and it receives the most international students, including from such places as Germany, Norway, Greece, Iran, Austria, and Iceland.

# OUR FACULTIES

## THE FACULTY OF MEDICINE OF COMENIUS UNIVERSITY

is an internationally recognised and sought-after scientific and research institution offering study programmes in general medicine and dentistry.

[www.fmed.uniba.sk](http://www.fmed.uniba.sk)

## THE FACULTY OF PHYSICAL EDUCATION AND SPORT OF COMENIUS UNIVERSITY

is the oldest and only educational institution of its kind in Slovakia that trains highly-qualified specialists for a variety of professions related to physical education and sport.

[www.fsport.uniba.sk](http://www.fsport.uniba.sk)

## THE JESSENIUS FACULTY OF MEDICINE OF COMENIUS UNIVERSITY

with its seat in Martin, can boast of its reputation as the best-performing school in the ranking of Slovak universities in the field of medicine and health-care sciences. It offers study programmes in general medicine, dentistry, nursing and also non-medical specialties such as midwifery and public health.

[www.jfmed.uniba.sk](http://www.jfmed.uniba.sk)

## THE FACULTY OF LAW OF COMENIUS UNIVERSITY

is the biggest faculty of law in Slovakia and is the country's most advanced centre for legal studies and education in the law.

[www.flaw.uniba.sk](http://www.flaw.uniba.sk)

## THE FACULTY OF MATHEMATICS, PHYSICS AND INFORMATICS OF COMENIUS UNIVERSITY

is regarded as the best faculty of natural sciences in Slovakia according to the Academic Ranking and Rating Agency. The aim of the faculty is to foster scientific knowledge in the field of mathematics, physics and information sciences.

[www.fmph.uniba.sk](http://www.fmph.uniba.sk)

## THE FACULTY OF ARTS OF COMENIUS UNIVERSITY

trains professionals in the humanities, social sciences and philological studies. Several of its study programmes are unique in Slovakia.

[www.fphil.uniba.sk](http://www.fphil.uniba.sk)

## THE FACULTY OF ROMAN CATHOLIC THEOLOGY OF CYRIL AND METHODIUS OF COMENIUS UNIVERSITY

is one of the biggest educational institutions in Catholic theology in Slovakia, preparing theologians for their priestly vocations

[www.frcth.uniba.sk](http://www.frcth.uniba.sk)

## THE FACULTY OF NATURAL SCIENCES OF COMENIUS UNIVERSITY

is the biggest faculty of natural sciences in Slovakia, providing study programmes in the fields of biology, chemistry, geology, geography, land use and conservation, environmental management and the teaching of natural sciences.

[www.fns.uniba.sk](http://www.fns.uniba.sk)

## THE EVANGELICAL LUTHERAN THEOLOGICAL FACULTY OF COMENIUS UNIVERSITY

offers study programmes in Lutheran theology as part of preparation of clergy for the Evangelical Lutheran Church of the Augsburg Confession in Slovakia as well as abroad.

[www.fevth.uniba.sk](http://www.fevth.uniba.sk)

## THE FACULTY OF EDUCATION OF COMENIUS UNIVERSITY

trains pedagogues and teaches professionals for their careers in schools and social services. The faculty also engages in the development of study programmes as well as science and research in pedagogy, humanities and social sciences.

[www.fedu.uniba.sk](http://www.fedu.uniba.sk)

## THE FACULTY OF MANAGEMENT OF COMENIUS UNIVERSITY

prepares graduates to excel in their future management positions in governmental institutions or businesses, whether they decide to pursue their careers in Slovakia or abroad. It is the only faculty in Slovakia that has regularly ranked as an Excellent Business School in the evaluation of the independent agency EDUNIVERSAL since 2009.

[www.fm.uniba.sk](http://www.fm.uniba.sk)

## THE FACULTY OF PHARMACY OF COMENIUS UNIVERSITY

is the only faculty of its kind in Slovakia that trains future specialists on medicaments by integrating knowledge from several disciplines such as natural sciences, medicine and pharmaceutical sciences.

[www.fpharm.uniba.sk](http://www.fpharm.uniba.sk)

## THE FACULTY OF SOCIAL AND ECONOMIC SCIENCES OF COMENIUS UNIVERSITY

develops and successfully applies theoretical knowledge in the fields of social and political sciences, European studies and international relations, social anthropology, public policies and economics, as well as social and occupational psychology.

[www.fses.uniba.sk](http://www.fses.uniba.sk)

## Comenius University Science park (CUSP),

as a research centre, performs concentrated innovative research primarily in the fields of biomedicine, biotechnology, enviro-medicine and interdisciplinary research and cross-connects these fields with the practice. CUSP serves as a bridge among academia and industry whereby its primary purpose is to effectively respond to public requirements and needs. CUSP possesses state of the art research infrastructure, top scientists and know-how which further enhances the possibility to actively collaborate with private and public sector, as evidenced by the current collaboration with 12 companies. In conjunction with this, an inherent part of CUSP activities is the popularization of science and research in the form of active presentations, interactions with various business entities and active support of innovative ideas, and innovative start-ups, spin-offs regionally as well as internationally through the action of CUSP Incubator.

Within the CUSP operates Technology transfer office with major task of mediation the transfer of science and research results into the economic practice, in other words it supports research departments in the process of technology transfer and provides guidance in the whole process of legal protection and commercialization of intellectual property. CUSP has laboratories fully equipped for research activities in the fields of genomics and proteomics, metabolomics, research of new substances and materials for diagnostics, biotic and abiotic factors of the environment, environmental health and molecular biology and biotechnology. CUSP infrastructure can be actively used by over 180 employees from Comenius University and other partner entities. Except scientists and researchers, PhD. and pre-graduate students are intensively involved in the research projects.

## WHAT KIND OF UNIQUE EQUIPMENT CAN BE FOUND AT CUSP?

- set of instruments for genomics, such as Next Generation DNA sequencers, Microarray readers, systems for digital PCR
- set of instruments for metabolomics and analysis of molecules such as GC tandem MS and LC-MS/MS or high-resolution spectrometer
- set of instruments for molecular biology and biotechnology, such as equipment for recombinant protein expression and purification, fermentation technologies
- set of instruments for cell biology, such as confocal microscopy or flow cytometry
- set of instruments for geology and geophysics, such as equipment for the analysis of physical properties of natural and anthropogenic moulds, high-pressure reactor system, magnetometer

## VISION: TODAY WE DEVELOP YOUR FUTURE

### Biomedicine for the 21st century

- in the fields of genomics and proteomics, new diagnostic procedures
- are developed and the latest methods for the detection of the genetic nature of monogenic and polygenic as well as infectious diseases based on the whole-genome sequencing principles are actively used
- in the field of metabolomics, the major goal is to broaden the knowledge, develop new methods and individualized approaches for the detection, diagnostics and screening of the chosen groups of human diseases
- developing new substances and materials for research, diagnostics,
- and for the use in the molecular medicine

### Enviro-medicine for the 21st century

- developing methods for the detection, minimization and prevention of negative effects caused by biotic and abiotic factors on the health of the population acting in anthropized ecosystems
- evaluation of the impact of the environment on the health of the population
- using the geographical information systems (GIS)

### Biotechnology for the 21st century

- design, selection and production of specific recombinant proteins and peptides with therapeutic potential
- construction of express systems for heterologous expression
- bacteriophages isolation and creation of phage collection usable in medicine and food industry

## ACTIVITIES

- as a specialized research entity with the focus on the biomedicine, genomics, biotechnology, metabolomics, and enviro-medicine, CUSP offers infrastructure capacity not only to staff members, but also scientists and researchers from other faculties of Comenius University and private partners and integrates research activities of different university departments
- CUSP serves as a complex technological, life-sciences oriented spin-off/start up incubator for Comenius University in Bratislava and the private sector
- CUSP offers help and active support with technology transfer
- an inherent part of CUSP activities is to train students of Comenius University

## BRIDGE TO THE WORLD OF BUSINESS

Dear Partners,

Your decision to do business in Slovakia is a wise one. The Slovak Republic is well known for its high level of culture, qualified workforce, advantageous geographical position in the centre of Europe on the border between the West and the East, favourable taxation system, and extensive transport communication network. To do business in Slovakia means to hold a stake in the expansion of a region which, in the future, will have increasing significance for European trade and prosperity. Your investments and personal effort will therefore soon be rewarded with a fast return and high profit. During the course of your business activities, you will often need help and advice from someone who is familiar with this environment and who has been active in it from the very beginning. That is why the Slovak Chamber of Commerce and Industry (SCCI) wants to be your first point of contact and your partner when entering Slovakia. The SCCI is an independent public and legal institution which, in a similar way to the Chamber of Commerce in your home country, provides a full range of services to its members and other domestic business groups, as well as interested parties from abroad.

### We will provide you with valuable contacts!

Some things that the SCCI will arrange for you:

- ✓ contacts with domestic businesses
- ✓ contacts with professionally-oriented sections
- ✓ finding suppliers
- ✓ finding manufacturers
- ✓ finding importers
- ✓ finding companies suitable for joint ventures and acquisitions
- ✓ the corporate profiles of companies and institutions
- ✓ in the event of your visit, recommendations and the organisation of meetings, including secretarial services, accommodation, transport, etc.
- ✓ advertising in the SCCI newsletter, which is distributed to all SCCI members, as well as foreign consular offices in the Slovak Republic, consular offices of the Slovak Republic abroad, representative offices of foreign companies in Slovakia, government institutions, and Slovak businesses.

### We will prepare the ground for you!

For your trade mission in the Slovak Republic, the SCCI will arrange:

- ✓ meetings with Slovak businesses
- ✓ a comprehensive programme for mission participants (accommodation, transport, cultural programmes, and other services on request)
- ✓ background information required for negotiations

### We will meet all your needs!

For seminars, lectures, or training the SCCI offers:

- ✓ the attendance of Slovak participants
- ✓ a venue, including the necessary equipment (audio-video), translations, and refreshments
- ✓ advertising, invitations, and media publicity
- ✓ accommodation, transport, and transfers

### We will introduce you to a specific environment!

In addition, upon request, the SCCI can arrange:

- ✓ marketing studies
- ✓ statistical overviews
- ✓ consultations on legal, financial, taxation, and customs matters
- ✓ information on business conditions and opportunities
- ✓ translations of acts, rules, and regulations
- ✓ information on import regulations (limits, quotas, restrictions, and certifications)
- ✓ participation at exhibitions and trade fairs
- ✓ information about options and conditions for investing, capital investment, and private ownership in the Slovak Republic
- ✓ interpreting and translation services
- ✓ other services upon request

### Arbitration Court

The Arbitration Court of the SCCI is an independent body that also offers its services to you. It resolves property claims between entrepreneurs arising from business and economic relations. It realises consultation and advisory activities to settle such claims.

Information on investment conditions in the Slovak Republic is available in all offices of the SCCI.

## The Region of Zilina NORTH-SLOVAKIA COUNTY

The situation of Slovak Republic's economy is frequently discussed in Slovakia and abroad, and the debate is greatly confused. The analysis is often mixed up with wishful thinking, simple lobbyism etc.

GDP IN CONSTANT PRICES – changes in %, Slovakia

Twenty-seven years have elapsed since the Slovak Republic acquired independence. In these approximately 27 years the Slovak Republic had to prove evidence of its capability to manage the development of the county, assuring its political stability and economic development.

After three years of independence, the economy of the Slovak Republic acquired from the London „The Economist Intelligence Unit“ the best rating among Czech Republic, Poland and Hungary - countries in transition. The rating was supported mainly by agreed aims and practical economic policy of individual states within the goals of the International Monetary Fund, macro-economic indicators etc.

The members of R.C. SCCI Zilina come from the most industrial sectors including engineering, machinery, metallurgy, building industry, wood processing, paper industries, chemical industries, textile, food industries, electrotechnical, electronic industries, automotive, energy, tourist and travel, etc. **The most important companies**, suppliers, hotels you can watch in "CATALOGUE FIRMS of SCCI Zilina County" – [www.interbiznis.sk](http://www.interbiznis.sk).

The region is connected to the international trucks roads, Core European Corridors:

Slovak Chamber of Agriculture and Food (SPPK) represents non-governmental, autonomous and statutory organisation, which was established in line with the Law No. 30/1992 Coll. as amended. The basic role of the Chamber is to enforce the justified common interests of its members, mainly in the process of the agricultural and social policy field. Chamber also takes part in the creation of the state policy concerning the support and protection of its member entrepreneurs to ensure the further development of agricultural production and food processing in the Slovak Republic.

### Membership

The members of SPPK are natural and legal entities providing the business activities in agriculture, food industry and in biological, technical and commercial services for agriculture and food processing industry, as well as the other non-governmental organisations operating in the agri-business. The membership in the Chamber is voluntary since January 2005.

### Internal organization

Headquarters of SPPK is placed in Bratislava with 15 employees. SPPK also has 38 Regional agricultural and food chambers (RPPK) operating in regions of Slovakia. The "regional" chamber can be established also on the other than just territorial basis. There are also four subjects with the statute of RPPK in accordance to the Statute of SPPK and the Law above. The activities of the Chamber are supervised by the official bodies – the General Assembly, the Board of Directors, the President and the Supervisory board.

### Internal Communication

The Chamber is using the wide-spread net of its regional chambers in the whole territory of Slovakia. The central office communicates with the regional chambers using the internet and

emails, but also regular meetings to discuss the actual issues. The Slovak Agricultural and Food Chamber is the only autonomous organisation in the Slovak Republic combining the entrepreneurs operating in agricultural primary production, food processing industry and services for agriculture. SPPK is communicating also to its member associations as well as to the other agricultural autonomous organisations. All the members of SPPK have direct access to the regional office in which they are registered, but also to the central office in Bratislava.

### Activities

The Chamber's activities are focused to:

- Lobbying for interests of its members at national and international level
- Legislation – legal sector
- Providing of business information service
- Guidance and education
- Co – operation with the international organizations

### Co-operation with national and international partners

The Chamber is cooperating and communicating also with the state bodies accordingly to the conditions set out in the Law and in the Agreement on a Co-operation between the Council of the Agricultural Statutory Undertakers and the Ministry of Agriculture of the Slovak Republic to search for the solutions of the problems in agriculture and food sector. SPPK pays extra attention to development of the international contacts and representatives of the SPPK participate at the regular meetings of the representatives of the agricultural chambers from the "Visegrad four" countries (Slovakia, Czech Republic, Hungary and Poland). The representatives of Chamber cooperate also with other agricultural chambers within the European Union.

### Opportunity to restart

We are in a difficult situation when the whole world is struggling with a new coronavirus pandemic. For many people, life began to flow somewhat slower. However, some sectors have not slackened at all and people work harder and more diligently than ever. These days we are talking about food security and self-sufficiency much more than ever. Our society had to fall very low to realize what really matters.

The heroes of these days are the health care employees, the police, and all who are in the front line in the fight against the pandemic. However, these days we must also thank all our farmers, the manager of each agricultural cooperative and company, and all staff on the Slovak farms who grow, breed, produce and process food. Hats off to their work, because in such difficult times when human health and nutrition begin to take on a completely different dimension, these people work under difficult conditions to ensure a smooth supply of food for our people.

In stores we have enough food for everyone. However, it is necessary to say that it's mainly due to the fact that every day 700 trucks with agri-food products are imported to Slovakia. That is why we set another unflattering record last year. The balance of foreign trade in agri-food commodities had reached passive level of more than EUR 1.8 billion in 2019. We import hundreds of thousands of tons of food into our territory, which we can grow or produce in Slovakia. We have enough land, favourable climatic conditions, and possibilities as well. Practice shows us that the consumers are interested in Slovak production and their confidence is therefore a motivation for us.

The primary task of any modern state in the world is to ensure food sovereignty in at least basic commodities. Today we have a huge opportunity to restart the food industry.

More and more we listen about so called food patriotism and with uncertainty we observe the situation in Europe, where member states are starting much more value and protect their food stocks. At the time of the pandemic situation, national governments in Europe are bringing concrete measures to increase the consumption of domestic food. Support for food production and consumption should be a priority in the current situation in our country as well.

Farmers and food producers, we need to feel that our country needs us. At the same time, we want to participate in building our agri-food industry, which has long been marginalized not only by politicians but also by society. We want to see clear systemic measures that will contribute to the increase of our country's food sovereignty.

In the times of a pandemic, we cannot close our eyes in front of various other challenges that significantly affect business on land, regardless of the size of the business. We must not neglect the preparation of the future Common Agricultural Policy after 2020, which is currently being created and will have a significant impact on our bread industry. We need to have competent people in the right places who understand the issues and can bring real proposals and solutions. The common goal of the agri-food community should be a lively countryside and a larger number of agri-food producers who bring added value in the form of employment and supplying the Slovak population with a balanced diet.

The pandemics of the new coronavirus has set us a mirror and confirmed that agri-food is to be a strategic sector of the national economy, not just on paper. Our bread industry is bouncing from the bottom very uncertainly and slowly. The current crisis may deepen the sector's problems even more. However, we will try to turn everything that is negative into a positive attitude, hard work and determination to build a new strong foundation of Slovak agriculture and food industry.
