The First Fully Adjustable, Folding Bike in the World.

Growing.

There is probably nothing more satisfying than giving the world something new – a groundbreaking, innovative product, never seen before. This is how the engineers at LPH Group Slovakia utilized more than 30 years of experience in the automotive industry to produce the Sharvan bike, a high-end city bike, the first of its kind on Earth.

Sharvan's unique, patented design, using the latest plastic and metal components, contains three features that, combined, make it unlike any other mass-produced bicycle. The frame of the bike expands easily, to comfortably fit both children and adults. It folds to a very compact size when not in use. And, thanks to its removable

Folding.

color frame covers, you can change its look for any occasion or style. For example, by paintings of famous artists.

The Sharvan bike's first prototype premiered in 2019 at the prestigious EUROBIKE FAIR in Friedrichshafen, Germany. Now, in 2021, its first series is going into production. The Sharvan bike currently comes in three standard models – Classic, City, and Country, and an e-bike version is coming soon.

To learn more about the Sharvan bike, visit our website, [sharvan.bike](https://www.sharvan.bike), as well as our Facebook and Instagram fan pages.

Ladies and gentlemen,

I am glad to put down a few words for this year's Directory that represents a useful publication to point your business ventures in the Slovak Republic in the right direction. Moreover, development of trade and investment cooperation with foreign business partners represents one of the cornerstones of my ministry's activities. Our network of economic diplomats currently operating in 63 countries and their knowledge and expertise is at your disposal together with the EU representations in the rest of the world.

Year ago, at the outset of the pandemic, I wished I would be commenting today on a positive note. Although the global economy starts to witness first signs of its recovery, cautiousness is still the common denominator of every economic forecast. The COVID-19 crisis shocked the world leading to a decline in every macroeconomic indicator – economy growth, consumption, world trade, unemployment or direct investments. But while exposing our vulnerabilities, it has also opened up new possibilities and affected our daily *modus operandi*.

One would never say that diplomacy, which is fundamentally based on personal contacts and negotiations, can be executed online using web cameras and computers. And yet the opposite was the truth. I am proud that shifting our strategic and daily activities into the online environment didn't hamper the quality of the Slovak diplomacy performance that have proven once again to be highly professional and adaptable. We were able to come up with innovative and effective tools to defend our political and security interests, protect our citizens abroad, support our businesses and promote our cultural values.

Not only diplomacy had to adapt to new circumstances, but also industry, healthcare, education, social systems and many other spheres. Helping to repair the economic and social damage caused by the coronavirus pandemic, the EU have approved an unprecedented recovery plan to lead the way out of the crisis and lay foundations for a modern and sustainable Europe. Simultaneously, the EU started a strategic foresight of its policies making in order to strengthen our resilience. Focal themes of the EU modernization will be green and digital transformation, in which Slovakia has plenty of space to catch up. The adopted European Green Deal and emerging digital agenda represent tools to bolster innovations, technological progress, modern education, connectivity and digital technologies.

Green and digital transformation should be the main driving forces behind economic development of the Slovak Republic in the coming decades. Our country has an excellent prerequisite to be successful in this endeavour. We have been in situation of fundamental economic transformation not so long time ago. As a result of our decision to pave the way along with our European and Trans-Atlantic partners, Slovakia in the last decade became one of the front-runners in terms of economic growth. Moreover, we were one of the favourite destinations for foreign direct investments having become the world leader in car production per capita. In addition to that, Slovakia has always been perceived as a stable country from political, economic and international standpoint.

And now, the COVID-19 crisis has shown us that a new form of transformation is needed again. Modern and innovative economy based on productive and environmental principles has proved to be a necessity to withstand the current global economic, environmental or pandemic challenges.

Hence, modern principles are at the core of a new strategic document, that my ministry in cooperation with the Ministry of Economy is currently finalising. It will reflect the latest economic trends in the green economy, digitalization, science, research and innovation. The document will also include new tools and forms of presentation of economic diplomacy using new innovative ways to promote and support Slovak companies. Its purpose would be also to redesign the current setting of economic diplomacy pushing it towards more synergy, cooperation with other state stakeholders, usage of modern information technologies and adjusting the activities of our economic diplomats towards current national needs and requirements of business entities.

The future geographical network of economic diplomacy would reflect well balanced system between the EU markets, our closest neighbourhood and the perspective third markets. At the same time, our priorities must be based on the complementarity of exports, investments, innovations and development objectives.

It is not a secret that the EU represents our primary trade partner with its export share amounting up to 85%. Since joining the EU in 2004, our entrepreneurs were able to adapt to the European Single Market that helped them to increase production quality, productivity

and implementation of new technologies. Nevertheless, for both sides painful Brexit has made us realise that the common market is not eternal.

In our close neighbourhood, we are going to exploit the trade and investment potential of our Western Balkan and Eastern European partners while providing our transformation assistance and expertise.

At the global level, the new US administration creates a space for overcoming several past trade disputes and strengthening our trade and investment cooperation. Unique trade opportunities are opening up for Slovak exporters in growing Asian markets, especially thanks to important trade agreements concluded at the end of 2020 and the beginning of 2021, notably the EU-Vietnam Free Trade Agreement, the Regional Economic Partnership Agreement (RCEP) and the EU-China Comprehensive Agreement on Investment (CAI). Last but not least, economic diplomacy will seek new business opportunities in the Middle East, Africa and Latin America.

Science, research and innovation start to occupy more prominent place on the agenda of economic diplomacy. We see great potential in streamlining the efforts of the government, private sector and the academic community. We were happy to introduce a new format called „Innovation days“ designed to present Slovak unique innovation companies to the foreign ambassadors in our country. At the same time, we are ready to explore possibilities in the space industry and smart cities concept. New chapter on international cooperation in science and innovations needs to be opened with our partners with strong scientific and innovation systems such as USA, South Korea, Japan, Canada or Israel.

The basic precondition for the Slovak export-oriented economy to thrive is the preservation of the highest possible degree of freedom of international trade and respect for equal, fair and agreed rules on the world market. Unfortunately, the current era shows tendencies of protectionism, economic nationalism, egoism and further questioning of multilateralism. We strongly disagree with such distortions of the global environment and want to use momentum of the new leadership elected in the international economic organizations, such as OECD and WTO, to promote the development of an open and transparent multilateral trading system.

Furthermore, pandemic crisis has not only proven the necessity of global cooperation, but also of global solidarity. I am glad that we were able to help our partners to tackle COVID-19 pandemic through our humanitarian assistance and thanks to unique innovative solutions of our companies.

But there are still many goals to be achieved in this matter. Besides fulfilling our target to increase Official Development Assistance to at least 0,33% of GNI, we will engage our businesses into more development aid projects. Slovak companies have limited historical experience with participation in development markets and sustainable projects driven by international financial institutions, and I deem necessary this to be changed. From the business standpoint active engagement in development assistance helps companies to better penetrate new markets and broaden their geographical business portfolio. From the development point of view, the involvement of private sector helps to mobilize more resources, thus make our development activities more sustainable.

Dear readers,

Year 2020 will come into history books as a year of pandemic, but I prefer to regard it also as a year of opportunities. History taught us that every crisis enriches us with new ideas, new visions, new trends. While exploring our weaknesses, testing our resilience and disrupting our ties, we were able to come up with inventions that should shift our economies on the new qualitative level. And I am proud, that Slovakia is not alone on this path, as our country is bound to participate in world trade processes.

Hence, with this foreword, I would like to encourage all foreign entrepreneurs and investors not to hesitate and engage in all forms of businesses with their Slovak counterparts, as they have all the necessary preconditions for your cooperation to thrive. The world has a lot to offer to Slovakia, just as Slovakia has a lot to offer to the world.

Ivan Korčok
Minister of Foreign and European affairs
of the Slovak Republic

The year 2020 cannot be compared to any other period in the history of the independent Slovak Republic in terms of its economic and social development. From the perspective of both the economic downturn and its extent. It should also be mentioned that the first symptoms of the declining pace of the economic growth appeared already in 2019, before the outbreak of the current pandemic, which has significantly accelerated this process. On the other hand, this decline is not as strong as expected at the end of the first half of 2020. I am cautious when it comes to the optimistic growth forecasts for 2021. There are several reasons for that. First and foremost, the beginning of the year 2021 is quite different from the first quarter of the last year in that the companies entered it with rather negative expectations, many of them exhausted their reserves and deferred their payments of social insurance contributions, taxes, and loans that they will probably have to pay already in the course of 2021. The overall business and consumer sentiment is extremely low. In general, I expect that the decline will stop, however, the growth will remain at a low level.

We often forget about the microsphere when assessing the economy, or we perceive it only marginally. However, it is the microsphere that creates material and financial resources for normal functioning of the state and for the remediation of its policies in the social and educational fields, as well as in the field of healthcare, infrastructure, defence, or foreign policy. Such awareness has been largely missing in the philosophy of existing state aid to companies. This aid should not be perceived as help to specific companies, but rather as a tool to maintain society-wide activities, employment, as well as a path to an effective restart of the economy as a whole. It makes a big difference whether the economy enters the process of recovery and restart weakened and in bad mood, or whether it is ready for changes. The best, yet not only example in this regard is Germany.

From my point of view, the year 2021 is a big question mark; it is a bit like divination from a glass ball, and its forecasting therefore represents considerable risks in terms of its credibility. The key issue from today's perspective is vaccination and its final effect, which conditions all subsequent considerations. The global reduction of investment activities, the fact that the vast majority of the key economies has gone into recession, that China is in fact the only major economy with real economic growth, is a reality which will affect the development in the forthcoming period. From the point of view of Europe, the situation in the European Union and, specifically, in the eurozone, is not good; the economic downturns, mainly in its southern wing, are striking. From January 1, 2021, there is also the long-awaited Brexit phenomenon after the end of the mutual transition period. All this weakens the position of the European Union within the global economy and global relationships as such. The European Union should clearly define its European continental policy in the economic field. It should clearly review its relationships with the Russian Federation, especially with respect to the continuation of the economic sanctions which naturally weaken both sides.

Slovakia entered the year 2021 not in the best condition, although the country's economic downturn in

2020 is lower than predicted last year. However, the social erosion appears to be a very high-risk factor right from the beginning of the year. The high level of dissatisfaction and distrust may largely influence this year's social, political, and economic story. It is disappointing that the government was unable to come to a common position regarding the Recovery Plan not even until the end of the last year and to present it, an expert discussion, as a complex at the level of the European Commission after. The roundtable debates on the individual parts of the Slovak Recovery and Resilience Plan at the stage of the inter-ministerial consultation procedure were disappointing, too, as they were rather limited to the presentation of the particular components of the Recovery Plan by the executive branch. According to the Slovak Chamber of Commerce and Industry (SOPK), all the requirements of the European Commission in the field of the greening of the economy have been implemented in the Recovery Plan which, given the current needs and structure of our economy, are not necessarily a priority. SOPK considers the Recovery and Resilience Fund as a long-term investment loan with the main objective of ensuring the resilience of the Slovak economy in the event of any future crises and to guarantee the competitiveness and sustainability of the development of the public and private sectors in Slovakia. We are of the opinion that the current process of preparation of this plan, especially the non-involvement of the wider professional business community, is a missed opportunity.

I am fully aware of the fact that our internal economic development will be largely dependent on the development of the global economy, especially on the internal development of the European Union's internal market, but in no case should we forget about our own responsibility, about the responsibility of those who manage this country and whose duty is to create a climate of trust in the legal system and not to misuse power. Slovak firms have the capacity to carry this economy through necessary changes, having the managerial and logistic potential, however, this will be overly complicated without the government's support and understanding.

Any war and any change, including the one we are currently experiencing in connection with the fight against the coronavirus, has winners and losers. It depends on the strength and intellect of the individual, company or society which side they join. Those who believe that the world will return to its pre-pandemic state, are lost already now. Those who are able to find their place in the newly created space have a big chance not only to survive, but also to be successful. Let us therefore think also in Slovakia what side we are about to join. I personally see the human dimension, as well as the most part of the social or economic microsphere, to be sound and able to accept changes and develop progressively. The failures we are witnessing today are the consequence of the lack of professionalism and perspective in addressing the present and, simultaneously, in preparing for the future. Because future is not what we are dreaming of today, it is what we are doing today.

SLOVAKIA - Regions and Districts

SLOVAKIA - Geographical Map

Total area:	49 035 km ²
Capital:	Bratislava
Length of state border:	1652,6 km
Population:	5 443 120 (as of 2018-01-01)
Political system:	Parliamentary democracy
Official language:	Slovak
Currency:	Euro, 1€ = 100 cents
Population density:	111,1 (per 1 km ²)
Time zone:	Central European Time (GMT +1 hour)
Country Telephone Code:	++421-

Location:

Slovakia is located in Central Europe. The relief of the country is characterised by great differences. In central and northern Slovakia the countryside is hilly, it is covered with the Carpathian mountain range. The countryside of the southern and eastern Slovakia is low.

Climate:

The territory of Slovakia is situated in the mild climatic belt with regular alternation of four seasons of the year. The average temperature is in winter - 2° C and in summer +21° C. January is the coldest month with night temperatures -10° C and -15° C, the warmest month is July with a daily maximum temperature of approximately +32° C.

National Holidays:

January, 1 st	Establishment of the Slovak Republic
July, 5 th	St. Cyril and St. Methodius Day
August, 29 th	Slovak National Uprising Day
September, 1 st	Slovak Constitution Day
November, 17 th	Day of Fight for Freedom and Democracy

Public holidays:

January, 6 th	Epiphany (The three Sages and Christmas Holiday of Ortodox Christians)
March/April	Good Friday, Easter Monday
May, 1 st	Labour Day
May, 8 th	Triumph Over Fascism Day
September, 15 th	Lady of Sorrows Day
November, 1 st	All Saints Day
December, 24 th	Christmas Eve
December, 25 th	Christmas Day
December, 26 th	Second Day of Christmas

Important Phone Numbers:

158 (112) Police	0961 011111	Foreigner's Police
155 (112) First Aid	1181	Information on Telephone Numbers
150 (112) Fire-Service	12149	Information on International Telephone Numbers

The national symbols of the Slovak Republic are the national emblem, the national flag, the national seal and the national anthem.

The national emblem of the Slovak Republic has a red, early Gothic shield with a silver double cross mounted on the central peak of the blue three hill group.

The national flag of the Slovak Republic is composed of three horizontal stripes - white, blue and red (with white at the top, followed by blue and red). In the front section of the national flag is the national emblem of the Slovak Republic.

Welcome to Žilina Self-Governing Region

Area: 6 809 km²

Population: 691 584 (2020)

The most visited Slovak region by overnight stays has earned a reputation of attractive tourist destination as well as economic centre of the northern Slovakia.

Natural beauties

Pristine nature is considered one of the most precious gems of the Žilina Region. A predominantly mountainous surface covers four Slovak national parks of Veľká Fatra, Malá Fatra, Low Tatras and Western Tatras as a sub-area of the High Tatras.

There are also three protected landscape areas, more than one hundred smaller national nature reserves and natural sites included in the network of European importance, Natura 2000. These territories altogether compose more than a half of the regional area. The unique world of caves in the Demänovská Valley hides world-famous formations and decorations.

Cultural sights

Apart from beautiful nature, tourists also recognize regional authentic culture and history. Among its historical sites, romantic castles, especially the Orava castle, are eye-catching. Folk

architecture has found its place in open-air museums (Vychylovka, Zuberec, Pribylina and Martin) that present traditions, customs and life of local inhabitants in the past. The most precious architectural sights (articular churches in Tvrdošín and Leštiny and the Vlkolínec settlement) are protected by UNESCO. Folklore festivals in Východná, Terchová and

Zuberec enjoy a long tradition and great popularity.

Sports opportunities

Visitors who search active relaxation will appreciate diverse terrain of the Region. About one fifth of all marked hiking and cycling trails in Slovakia is situated in the Žilina Region. A large number of ski resorts offers top quality cross-country skiing trails and ski slopes in symbiosis with the most modern ski-lifts and cable cars in Slovakia (Jasná in the Low Tatras, Roháče-Spálená in the Western Tatras etc.). The area boasts exceptional thermal and mineral springs which have been utilized for many centuries by local spas (Rajecké Teplice, Turčianske Teplice, Lúčky etc.). Excellent natural conditions, cultural

Economic potential

The Žilina Region is an important European intersection for road and rail transport. The geographical position in the proximity of borders with Poland and the Czech Republic makes favourable conditions for development of logistics. The Region is sought-after among investors for a long mechanical engineering

tradition that was also one of decisive factors for KIA Motors Company to establish the first European plant near the capital Žilina. Other highly developed sectors of regional economy include electrical engineering, woodworking and food industries, information and communication technologies and banking. Companies also appreciate qualified and skilled labour force thanks to four universities that offer education in various fields.

uniqueness, top quality ski resorts, aquaparks and spas attract more than 1 million tourists annually.

Detva

DETVA is situated in the heart of Slovakia, about 220 km from Slovak capital Bratislava. Its area is known

with precious natural and cultural values. Detva is the centre of Podpolanie region, one of the most original Slovak regions, which was named after natural dominant feature of the area – Polana volcano. From 1996 Detva is the centre of the district. Its area is 6,809 hectares and it has about 15,000 inhabitants. Geographical location of Detva in the centre of Slovakia enables good traffic connection with the neighbouring regions as

about roads and railways. The road I/16 (Zvolen – Lučenec – Rožňava – Košice) and the R2 expressway with the connection to Detva is the traffic axis of the area. Detva is connected with the railway line Zvolen – Lenártovce – Košice, which runs through southern part of the town. The nearest cargo railway stations are in neighbouring villages Víglaš and Kriváň. Airport in Sliač is only 27 km from Detva. Good technical and civic infrastructure is available in the town. In the Strategy of Slovak Republic Improvement Detva is one of innovative progress poles. Business and employment support is one of the priorities so that the new business zones are being created. With the EU support of its structural funds (2004 - 2006) Detva town realized reconstruction of some producing parts in PPS factory so that it prepared industrial park for some new investments and for the creation of 538 job positions, mostly in engineering professions. The goal of building of industrial parks and zones for business in Detva and surrounding villages Kriváň and Víglaš is to provide the opportunities for domestic and foreign companies with work-

ing places in production, service and quaternary sectors, so that for domestic companies' goods and services consumption. The Town of Detva prepared an area for the construction of the Detva – Trstená industrial park. The new production will focus on mechanical engineering and will create over 500 new jobs for the inhabitants of the town and of the region. There is also an area for small and medium-sized enterprises in the proximity of the industrial park. In southern part of Detva there are some areas and building sites of stores, services and production. This site is the most lucrative

as about the connection with infrastructure but it is capacity limited because of road R2 and also because of limits of protective zones biotopes around Slatina River. They say that the potential of Detva and its surrounding is not used properly. There is a good opportunity not only for visit and getting known of this region but also for investment into business and living in this environmentally pure, clean and beautiful town in the heart of Slovakia.

The Town of Lučenec

The Town of Lučenec is situated in the south of Central Slovakia, close

to the Hungarian borders. The document from 1247 containing the first mention ever about Lučenec refers to this town as an important crossroad of trade routes and the centre of culture of the historical region of Novohrad. Kubínyi Square lies in the heart of the historical centre

of the town, with roman-catholic and calvinist church and the historical buildings of Reduta and the Municipal Hall as its main landmarks. The Municipal Hall was renovated in 2016, today you can find there a municipal museum and the information center. The neologic synagogue built in Oriental-Byzantine style is another important historical attraction. It is one of the largest in Slovakia. It was reconstructed in 2016 and nowadays it serves as a multinational cultural centre. The city park is one of the most beautiful and most precious parks in Slovakia, thanks to the combination of French, English and woodland garden styles, with artificial lake, mini

ZOO and lot of leisure time zones for the whole family. On the central square there is a newly build shopping center, the biggest in the region with various shops, restaurants, cafes and cinema. According to the Town's Zoning Plan, industrial sites for the purposes of new investors are located in the Industrial Zone South within the cadastral territory of Lučenec. This industrial zone meets all the requirements for technical infrastructure. Industrial Zone South is situated in the south-eastern part of

Lučenec. Its total area is 169.6 hectares. Manufacturing halls, warehouses and technical facilities currently occupy 113.2 ha. The industrial zone houses an Industrial Park at a total area of 6 ha with complex infrastructure, including roads and lighting. Future investors can dispose of 35 ha of free sites within the industrial zone and 0.4 ha within the Industrial Park.

THE TOWN OF SPIŠSKÁ NOVÁ VES

Gateway to the Slovak Paradise

Slovak Republic, Europe
N 48° 56' 39,01"
E 20° 34' 0,32"

Spišská Nová Ves with its more than 750-year long history is an ideal starting point for the lovers of hiking along harsh but picturesque

publicly accessible church tower in Slovakia (87 m high). At the Place of Wishes, which reminds us of the famous gothic bell foundry workshop of Master Konrád (1357), you can express your most secret wishes and send them by ringing a bell to the heavenly heights to be fulfilled. The town has got a unique atmosphere thanks to many architecturally valuable historical buildings which

A wide range of cultural and sport events all year round provides sufficient opportunities for a pleasant stay. Attractiveness of the town is enhanced by theatres, a gallery, museums, 3D cinemas, indoor swimming pool and a lido, wellness and fitness facilities, tennis grounds, skittle and bowling alleys, a high rope park, a skate park, an ice hockey stadium or an indoor

gorges of the Slovak Paradise (Slovenský raj) National Park, for the admirers of the UNESCO World Heritage sites and for those interested in the less spectacular but even more precious Gothic and Iron Routes monuments that can be found in the surrounding Spiš region.

The town features the longest lenticular (spindle-shaped) square in Europe with an unforgettable atmosphere and the highest

include seven wonders, such as the Town Hall, the Art Nouveau building of Reduta and the Provincial House with its so called Levoča gate. One of the four zoological gardens in Slovakia is situated here. Right next to it there is the Monkeyland high rope park. Children can also have fun in Alex park, one of the largest indoor amusement parks in Slovakia or in the experimental gallery called LaborARTorium.

shooting range, as well as suburban sports airfield with an opportunity to enjoy parachute jump or sightseeing flight.

In the close vicinity of the town you can find the largest Slovak ice cave, 25 splendid waterfalls in 9 accessible rocky gorges, more than 300 km of marked hiking trails, 400 km of cycling trails, ski centres, cross-country skiing and nordic walking trails or 13 educational trails.

In the nearby Slovak Paradise you can experience true wilderness. From May 1 to October 31, the admirers of water tourism can enjoy boating on the Hornád river in one of the most attractive parts of the national park – the longest river canyon in Slovakia (Prielom Hornádu, almost 12 km long). You can explore amazing 'Via Ferrata' that will enchant you with its wild beauty and unique environment. The Kyseľ

gorge is passable thanks to new educational trail Kysel' – Ferrata of the Mountain Rescue Service. This secured trail is open from June 15 to October 31.

The combination of nature, history and active relaxation in the Spiš region is complemented by other available natural beauties: first of all the High Tatras (Vysoké Tatry) National Park, which is just 30 km away, but also thermal park in nearby Vrbov, the Pieniny National Park with its raft tours of the Dunajec

river on traditional Goral rafts, the caves of the Slovak Karst (Slovenský kras) National Park, or the cities of Prešov and Košice located in short distances.

Take an opportunity to enjoy advantageous family or romantic stay in Spišská Nová Ves.

'Family stay full of experiences' (3-day package for families) includes accommodation in the hotel** with breakfast and family dinner at the day of arrival,

perfect accommodation, catering services and relax in wellness centre of the 4*hotel, as well as enable you to express your romantic desires and touch an old medieval bell at the unique Place of Wishes. To make your stay unforgettable, use the opportunity to climb up to the highest church tower in Slovakia or dress in gothic costumes and make yourself a romantic photo.

The Town of Nováky

The Town of Nováky is located in the centre of the Hornonitrianska valley. It is situated 140 km away from Bratislava and forms part of the Trenčín Self-Governing Region. The first written mention about Nováky dates back to 1113 and is recorded in the Zobor Document of the Zobor Abbey.

The Town of Nováky is the most industrial town of the Upper Nitra Region. It has chemical industry – Fortischem a.s., energy industry – Slovenské elektrárne a.s., závod Elektrárne Nováky, and mining industry – Hornonitrianske bane Prievidza a.s.

At present, Nováky is a small, but attractive and clean, and absolutely native-Slovak town with approximately

five thousand inhabitants. There are a few athletic clubs in Nováky which have made considerable achievements in Slovakia, especially in waterpolo and canoe. The waterpolo players' team is the multi-champion of Slovakia. The canoeists have achieved considerable results at the European and world level.

The citizens and tourists can spend their free time visiting the swimming hall, the Natio-

nal Water Polo Centre, sports facilities, the town park, or fishing and rowing on the lake or visiting a cultural programme in the cultural centre.

Kremnica

Kremnica was founded in 1328, when the settlement was granted with the privileges of free royal mining and acunation town by the King Karol Robert. Simultaneously, the King made it to be a seat of mining and acunation chamber and placed here the royal mint. Through its ancient charm and charming panorama of surrounding mountains it offers

The square is dominated by the Town Castle with the late Gothic Church of St. Catherine - patron of the town.

to its visitors, besides the visiting the architectonic jewels, also the possibilities for resting and recreation thorough the whole year. The events as The Music below Diamond Arch, The Kremnica Castle Organ or The Kremnica Gags bring the life into the town annually.

In the middle of the square there is a 22 m high Baroque St. Trinity Column erected in 1765-1772.

Sobrance

The center of the region near the state border with Ukraine is the district town Sobrance. It is limited in the north

by the mountain range Vihorlat and in the south penetrates this region into the East Slovakian Plain.

The first written reference dates 1344. The outburst of activities registered Sobrance after World War 2nd. In the following period has become the community center

for administration, commercial, education and cultural activities for 47 villages of this region. Sobrance has more than 6,000 inhabitants and very good organized network of school and medical care. Local culture is ensured by the municipal culture center with its extraordinary and unique Guitar museum. Close surrounding of Sobrance is offering a lot of tourism destinations and wine producing locations, too.

GREAT MORAVIAN EMPIRE – OLD-SLAVONIC EMPIRE (805-905) - 9th century

"I mind the disregard for the culture that is centuries older."

Alexander the Great (356-323 B.C.)

■ NITRA, MIKULČICE, DEVÍN - centres, towns, castles

■ Rulers: **Mojmír I.** (830 - 846), **Rastislav** (846 - 870), **SVĚTOPLUK I.** (870 - 9. 3. 894), **Mojmír II.** (894-907).

Territory of the empire: Slovakia, Moravia, Pannonia, Czechia

■ Slavic gods: Perun, Triglav, Dazhbog – god of the Sun, Radegast, Zhiva (Siva) – goddess of life and bioenergy; Slavic priests used meditations and breathing

exercises to accumulate and balance energy;

■ **863-885** Constantine-Cyril and archbishop Methodius with Rastislav and King Světopluk founded the material, spiritual and culture traditions of Slavonic people and devised the alphabet;

■ **866** They founded the Great Moravian training college – school, where 200 pupils finished their studies; literature – writings, poems, code of law;

■ **869** The Old Slavonic language became the fourth liturgical language in the world along with Greek, Hebrew and Latin;

■ Methodius (815-6. 4. 885) studied law; archbishop in Great Moravia and Pannonia-Sirmium - Srem. Mitrovica

■ Constantine the Philosopher – Cyril (827-14. 2. 869) devised the alphabet and spelling, and created words for communication from Greek;

■ **880** The pope issued the bull *Industriae tuae* by which he took under protection the independent Great Moravian Empire

■ Byzantine writing on Slavonic people: "Slavic tribes are accustomed to freedom and will not let themselves

enslave. They keep open house for foreigners and accompany them as their guests from one place to another, wherever the guests wish. Their way of life is rough, but they are not evil-minded."

■ **~ 889** – Czech lands annexed to the Great Moravian Empire;

■ **~ 906** Magyars invaded Great Moravia from the East, subverted the Empire and settled in Pannonia;

■ **890 - 1000** ➔

Dissemination of material

and spiritual culture From

Great Moravia to Bulgaria, Czech lands (Bořivoj I.- in 882 christened by Archbishop Methodius), to the Yugoslav nations and to Kievan Rus.

Methodius' followers spreading culture and literature: Climent in Ohrid, Sava, Naum, Gorazd.

Centres of Slavic culture after Great Moravia:

Prague, Kiev, Cracow, Novgorod, Ohrid. In Bulgaria, Methodius is commemorated on 17 July; the Methodius' cult was laid by the Czech king Charles IV.

■ **9th century** – Slovakia and Moravia abounded in spiritual Slavic culture reflecting the maturity of the Byzantine and Western-European letters; it was the basis of the civilisation of Central-European culture (**own state, own writing, own church province, accepted by the Frankish Empire - 884, own books, own liturgical language – Old Slavonic, successful foreign diplomatic policy**).

Central-European civilization area – Great Moravia, the cradle of material and spiritual culture; laid the foundations of a new literary language through which the Slavs got involved in the world cultural course of events throughout Europe. MIKULČICE: palace, 10 churches etc.

Air transport

There are 6 international airports in Slovakia that can be used for both passenger and cargo flights:

- M.R.Štefánik airport Bratislava
- Airport Košice
- Airport Poprad-Tatry
- Airport Sliač
- Airport Piešťany
- Airport Žilina

As the potential of Slovak airports is not yet fully exploited, regular and also irregular connection of Slovakia to Europe and the rest of the world is secured through Vienna Schwechat airport. Schwechat airport is the main international airport of Austria and is only 50 km distant from Bratislava. There is also regular train and bus connection between Bratislava and Schwechat. Another large international airport accessible is Budapest airport, main airport of Hungary, distant 250 km from Bratislava. It is also possible to use airport Ruzyne in Prague that has regular flights to M. R. Štefánik airport in Bratislava.

WE BUILD BUILDINGS

WWW.HSFSYSTEM.SK

HSF System SK: Quality, Expertise, Reliability

Construction company HSF System SK is one of the 15 largest construction companies in Slovakia.

HSF System SK has been a reliable general building contractor since 2010. It was established as a subsidiary of HSF System, joint stock company, which has operated on the Czech construction market since 2002. In 2020, HSF System SK had, despite the overall economic recession, revenues of 24.6 mil. EUR and a net profit of 1.97 mil. EUR. During its existence, the company has completed contracts totalling 174,834,000 EUR.

The company today uses Building Information Modelling (BIM) throughout the entire project life, from the design through implementation phases. It therefore covers the whole range of areas as well as cooperation with investors or suppliers. In the future, it plans the application of a physical model in the future administration and maintenance of the building as the next step in implementation.

In 2016 and 2017, the company acquired experience in the construction of green buildings in line with the German DGNB (German Green Building Council) certification system. It was the construction of the first such certified building in Slovakia (DS Logistic).

HSF System SK is headquartered in Žilina, with other branches in Bratislava and Prešov.

Selected references:

Store units Hornbach (home improvement retailer) SIKO (bathrooms), ASKO-NÁBYTOK (furniture seller) for Hobby Park Sekčov in Prešov. Production and warehouse halls in Immopark Košice. Construction of a logistics complex in Immopark Žilina. Lookout tower in Dubeň near Žilina. Expansion of warehouse premises of DS Logistic in Dunajská Streda. Hall extension for VW Slovakia in Bratislava. Office building for Hagleitner Hygiene in Senec.

TwinSpin®

SPINEA

EXCELLENCE IN MOTION

SPINEA, s.r.o. is a modern Slovak engineering company, engaged in the development, manufacturing and sales of high-precision reduction gears, sold under the trademark TwinSpin®. An invention of a Slovak engineer was the impulse for the company establishment in 1994. The TwinSpin® high precision reduction gears are serially manufactured, based on the grant of an international patent. The TwinSpin® gears belong to the category of hi-tech products and represent a unique technical solution, which integrates radial-axial bea - rings with high precision reduction gear into a single compact unit.

The company products are suitable for applications, which require high reduction-gear ratio, high kinematic precision, zero-backlash motion, high torque capacity, high rigidity, compact design in a limited installation space as well as low weight. They are widely used in automation and industrial robotics, in the field of machine tools manufacturing, in navigation and camera equipment, medical systems, and in many other fields.

MSM GROUP SPECIALISTS FOR THE DEFENSE AND CIVILIAN INDUSTRIES

MSM GROUP is a company covering subsidiaries with a portfolio in the segment of the defense and civil engineering industries.

The goal of the group is the strategic management of subsidiaries to effectively obtain and manage orders within their offer and to deliver reliable and top products and services to their customers.

The main portfolio of companies belonging to the group covers the entire life cycle of ammunition, radio navigation systems for airports, the production of special custom containers, mobile and air traffic control towers.

The First Fully Adjustable, Folding Bike in the World.

Growing.

There is probably nothing more satisfying than giving the world something new – a groundbreaking, innovative product, never seen before. This is how the engineers at LPH Group Slovakia utilized more than 30 years of experience in the automotive industry to produce the Sharvan bike, a high-end city bike, the first of its kind on Earth.

Sharvan's unique, patented design, using the latest plastic and metal components, contains three features that, combined, make it unlike any other mass-produced bicycle. The frame of the bike expands easily, to comfortably fit both children and adults. It folds to a very compact size when not in use. And, thanks to its removable

Folding.

color frame covers, you can change its look for any occasion or style. For example, by paintings of famous artists.

The Sharvan bike's first prototype premiered in 2019 at the prestigious EUROBIKE FAIR in Friedrichshafen, Germany. Now, in 2021, its first series is going into production. The Sharvan bike currently comes in three standard models – Classic, City, and Country, and an e-bike version is coming soon.

To learn more about the Sharvan bike, visit our website, sharvan.bike, as well as our Facebook and Instagram fan pages.

Viper
SD4

Skyper
GT9

Viper
SD4

an all-metal two-seater UL / LSA / CS-LSA aeroplane, ideal for travel, flight training, sport flying and towing of gliders. Viper SD4 is a perfect combination of excellent design, unique comfort, excellent flight characteristics and a wide range of top equipment. That's why the Viper has become a popular tool for experienced and novice pilots, flight schools as well as flying fans.

Viper SD4 models

- » **Viper SD4 RTC** - Sport aircraft certified by EASA. Brilliant way to become a professional pilot
- » **Viper SD4 Night-VFR** - Certified and eligible aircraft for night flying, night flight operations
- » **Viper SD4 AFT** - Air Force Trainer - Thanks to strong all-metal design a great choice for an Air Force
- » **Viper SD4 Attack** - Extraordinary harmony of luxury, comfort and uniqueness

Skyper
GT9

an all-metal UL / LSA high-wing, side by side aircraft, ideal for travelling, pilot training, relax and adventure flying. Its excellent flight characteristics, flight stability and short take-off and landing distance will be appreciated not only by beginning pilots, but also by flight training centers (schools), flight instructors and experienced "flying" pilots. The spacious, modern cabin and the excellent view from it provide exceptional experiences and the ideal solution for creating photo and video documentation. After successful tests, Skyper GT9 is also a great choice for towing gliders as well as a parachuting aircraft.

**TOP FLIGHT CHARACTERISTICS • MODERN DESIGN • FIRST-CLASS COMFORT • WIDE USABILITY
SPACIOUS COCKPIT • WIDE VARIETY OF INSTRUMENT PANELS • EXCELLENT OUTLOOKS**

Enjoy an excellent, easy, and safe flying

STUDY SYSTEM

The University offers study within accredited study programmes, in degree courses leading to Bachelor's, Master's and Doctoral degrees. The credit system is compatible with the ECTS (European Credit Transfer System under Bologna Declaration of the ministers of EU countries), enabling the bilateral student mobility in EU countries' universities, as well as within the framework of the broader European and world-wide area. The STU has been an ECTS label holder since 2012.

The system of education is compatible with the prestigious partner universities in the framework of international programmes (Erasmus+) using modern method of education, laboratories and practical training. It is aimed at branches of study that offer stable opportunities for students employability in the labour market. Teaching process takes place in modern classrooms furnished with the top laboratory and programming equipment.

STUDY PROGRAMMES IN ENGLISH LANGUAGE

The STU offers university education in the English language mainly in technical, technological, technical-economic, technical-information and technical-artistic fields of study. Study programmes are updated for each academic year. Detailed information with description of study programmes, course structure, key learning outcomes and programme directors can be found at: www.lnk.sk/hGV9

SERVICES FOR STUDENTS

Well-equipped libraries and study rooms; online access to international databases; modern approaches to education (e-learning, distance studies, etc.); special workshops and labs, PC labs; free Internet access; 6 dormitories with a capacity for 5,700 students; canteens and buffets in student dorms and faculty premises; basic medical care in student dorms; sport facilities (sport centres, playgrounds, fitness centres and swimming pools).

COMENIUS UNIVERSITY IN BRATISLAVA

THE BEST PLACE FOR YOUR STUDY

Comenius University in Bratislava is a modern European university which in 2019 celebrated its 100th anniversary. It is the only Slovak university to be regularly ranked in the international rankings of the best universities in the world. With thirteen faculties, it offers the widest selection of study programmes (over 800) at three levels, and several of these study programmes are the only ones of their kind offered in Slovakia. There is a wide range of areas of human knowledge to choose from when studying, be it in medicine, the humanities and social sciences, the natural sciences, mathematics, theology, and much more.

Comenius University is a research institution that runs hundreds of domestic and international research projects. As a result, many of our students engage in important research during their studies and can actively participate in projects, grants, and professional internships (including abroad).

Every year Comenius University sends the highest number of students abroad out of all Slovak universities, and it receives the most international students, including from such places as Germany, Norway, Greece, Iran, Austria, and Iceland.

Comenius University Science park (CUSP),

as a research centre, performs concentrated innovative research primarily in the fields of biomedicine, biotechnology, enviro-medicine and interdisciplinary research and cross-connects these fields with the practice. CUSP serves as a bridge among academia and industry whereby its primary purpose is to effectively respond to public requirements and needs. CUSP possesses state of the art research infrastructure, top scientists and know-how which further enhances the possibility to actively collaborate with private and public sector, as evidenced by the current collaboration with 12 companies. In conjunction with this, an inherent part of CUSP activities is the popularization of science and research in the form of active presentations, interactions with various business entities and active support of innovative ideas, and innovative start-ups, spin-offs regionally as well as internationally through the action of CUSP Incubator.

Within the CUSP operates Technology transfer office with major task of mediation the transfer of science and research results into the economic practice, in other words it supports research departments in the process of technology transfer and provides guidance in the whole process of legal protection and commercialization of intellectual property. CUSP has laboratories fully equipped for research activities in the fields of genomics and proteomics, metabolomics, research of new substances and materials for diagnostics, biotic and abiotic factors of the environment, environmental health and molecular biology and biotechnology. CUSP infrastructure can be actively used by over 180 employees from Comenius University and other partner entities. Except scientists and researchers, PhD. and pre-graduate students are intensively involved in the research projects.

WHAT KIND OF UNIQUE EQUIPMENT CAN BE FOUND AT CUSP?

- set of instruments for genomics, such as Next Generation DNA sequencers, Microarray readers, systems for digital PCR
- set of instruments for metabolomics and analysis of molecules such as GC tandem MS and LC-MS/MS or high-resolution spectrometer
- set of instruments for molecular biology and biotechnology, such as equipment for recombinant protein expression and purification, fermentation technologies
- set of instruments for cell biology, such as confocal microscopy or flow cytometry
- set of instruments for geology and geophysics, such as equipment for the analysis of physical properties of natural and anthropogenic moulds, high-pressure reactor system, magnetometer

VISION: TODAY WE DEVELOP YOUR FUTURE

Biomedicine for the 21st century

- in the fields of genomics and proteomics, new diagnostic procedures
- are developed and the latest methods for the detection of the genetic nature of monogenic and polygenic as well as infectious diseases based on the whole-genome sequencing principles are actively used
- in the field of metabolomics, the major goal is to broaden the knowledge, develop new methods and individualized approaches for the detection, diagnostics and screening of the chosen groups of human diseases
- developing new substances and materials for research, diagnostics,
- and for the use in the molecular medicine

Enviro-medicine for the 21st century

- developing methods for the detection, minimization and prevention of negative effects caused by biotic and abiotic factors on the health of the population acting in anthropized ecosystems
- evaluation of the impact of the environment on the health of the population
- using the geographical information systems (GIS)

Biotechnology for the 21st century

- design, selection and production of specific recombinant proteins and peptides with therapeutic potential
- construction of express systems for heterologous expression
- bacteriophages isolation and creation of phage collection usable in medicine and food industry

ACTIVITIES

- as a specialized research entity with the focus on the biomedicine, genomics, biotechnology, metabolomics, and enviro-medicine, CUSP offers infrastructure capacity not only to staff members, but also scientists and researchers from other faculties of Comenius University and private partners and integrates research activities of different university departments
- CUSP serves as a complex technological, life-sciences oriented spin-off/start up incubator for Comenius University in Bratislava and the private sector
- CUSP offers help and active support with technology transfer
- an inherent part of CUSP activities is to train students of Comenius University

TECHNICAL UNIVERSITY OF KOŠICE

History of TUKE

The Technical University of Košice was founded in 1952, but its roots must be sought much deeper in the past. As early as 1657 the Universitas Cassoviensis was established in Košice, but technical education in Slovakia was only elevated to higher - education level in 1762, when the Austro-Hungarian monarch Maria Theresa established the Mining Academy in Banská Štiavnica.

The true birth of the Košice Technical College came on 8th July 1952.

Vision

The Technical University of Košice will be

- a leading university of technology on a national basis and
- a respected university of technology on the international scale,
- having a strong degree of autonomy,
- sufficiently diversified financial resources,
- available for a wide range of applicants,
- developing scientific knowledge based on its own original findings,
- providing excellent education on all three levels of tertiary education, as well as
- lifelong education,
- meeting the expected needs of industries, region and society by its research,
- substantially involved in providing services to general public.

Mission

TUKE will provide its environment with scientific and technological knowledge basis, innovation and

workforce, in order to form beneficial and sustainable future and high quality of life. This will be achieved at TUKE by innovative research and excellent education in all scientific branches of respective University Faculties.

TUKE today

- among 5 % of the world's top universities
- 20 % of international students from 44 various countries
- establishment of startup companies in USP TECHNICOM even during studies
- international mobilities in terms of 341 partnerships in 33 countries worldwide
- almost 100 % success of fresh graduates in the job market
- more than 25 kinds of sports, folk and singing ensemble, student television, radio and others

TUKE Faculties

Faculty of Mining, Ecology, Process Control and Geotechnologies

Faculty of Materials, Metallurgy and Recycling

Faculty of Mechanical Engineering

Faculty of Electrical Engineering and Informatics

Faculty of Civil Engineering

Faculty of Economics

Faculty of Manufacturing Technologies

Faculty of Arts

Faculty of Aeronautics

BRIDGE TO THE WORLD OF BUSINESS

Dear Partners,

Your decision to do business in Slovakia is a wise one. The Slovak Republic is well known for its high level of culture, qualified workforce, advantageous geographical position in the centre of Europe on the border between the West and the East, favourable taxation system, and extensive transport communication network. To do business in Slovakia means to hold a stake in the expansion of a region which, in the future, will have increasing significance for European trade and prosperity. Your investments and personal effort will therefore soon be rewarded with a fast return and high profit. During the course of your business activities, you will often need help and advice from someone who is familiar with this environment and who has been active in it from the very beginning. That is why the Slovak Chamber of Commerce and Industry (SCCI) wants to be your first point of contact and your partner when entering Slovakia. The SCCI is an independent public and legal institution which, in a similar way to the Chamber of Commerce in your home country, provides a full range of services to its members and other domestic business groups, as well as interested parties from abroad.

We will provide you with valuable contacts!

Some things that the SCCI will arrange for you:

- ✓ contacts with domestic businesses
- ✓ contacts with professionally-oriented sections
- ✓ finding suppliers
- ✓ finding manufacturers
- ✓ finding importers
- ✓ finding companies suitable for joint ventures and acquisitions
- ✓ the corporate profiles of companies and institutions
- ✓ in the event of your visit, recommendations and the organisation of meetings, including secretarial services, accommodation, transport, etc.
- ✓ advertising in the SCCI newsletter, which is distributed to all SCCI members, as well as foreign consular offices in the Slovak Republic, consular offices of the Slovak Republic abroad, representative offices of foreign companies in Slovakia, government institutions, and Slovak businesses.

We will prepare the ground for you!

For your trade mission in the Slovak Republic, the SCCI will arrange:

- ✓ meetings with Slovak businesses
- ✓ a comprehensive programme for mission participants (accommodation, transport, cultural programmes, and other services on request)
- ✓ background information required for negotiations

We will meet all your needs!

For seminars, lectures, or training the SCCI offers:

- ✓ the attendance of Slovak participants
- ✓ a venue, including the necessary equipment (audio-video), translations, and refreshments
- ✓ advertising, invitations, and media publicity
- ✓ accommodation, transport, and transfers

We will introduce you to a specific environment!

In addition, upon request, the SCCI can arrange:

- ✓ marketing studies
- ✓ statistical overviews
- ✓ consultations on legal, financial, taxation, and customs matters
- ✓ information on business conditions and opportunities
- ✓ translations of acts, rules, and regulations
- ✓ information on import regulations (limits, quotas, restrictions, and certifications)
- ✓ participation at exhibitions and trade fairs
- ✓ information about options and conditions for investing, capital investment, and private ownership in the Slovak Republic
- ✓ interpreting and translation services
- ✓ other services upon request

Arbitration Court

The Arbitration Court of the SCCI is an independent body that also offers its services to you. It resolves property claims between entrepreneurs arising from business and economic relations. It realises consultation and advisory activities to settle such claims.

Information on investment conditions in the Slovak Republic is available in all offices of the SCCI.

Location & Accessibility

- Located at western part of Slovakia at border with Czech Republic
- Trans European corridors (based on historical „The Amber Way“)
- Area: 4 502 km²

Social characteristics

Number of inhabitants 584 569
Unemployment rate. 2.9 %
Ice hockey talent building region: 11 world class players

Economic characteristics

The main industrial fields are mechanical engineering, automotive, chemical, rubber & plastic, electrical engineering, glass production. Tourism benefits from natural attractiveness, historical heritage and thermal spas.

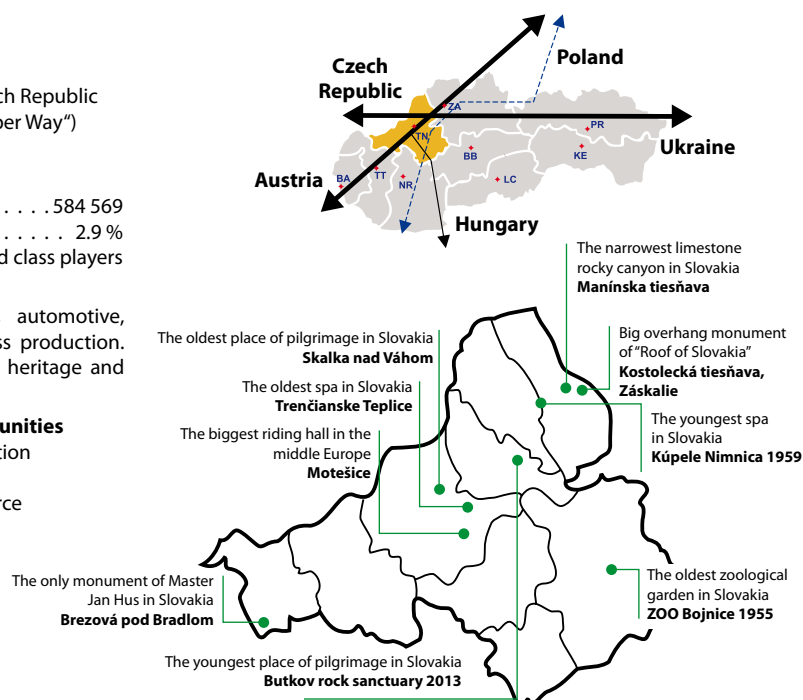

Regional advantages & Emerging investment opportunities

- good qualification level of economically active population
- well established infrastructure in the region
- availability areas for industrial production and commerce
- woody country with favourable composition of forests
- suitable conditions for fishing and hunting

The Region of Zilina NORTH-SLOVAKIA COUNTY

The situation of Slovak Republic's economy is frequently discussed in Slovakia and abroad, and the debate is greatly confused. The analysis is often mixed up with wishful thinking, simple lobbyism etc.

GDP IN CONSTANT PRICES – changes in %, Slovakia

Twenty-eight years have elapsed since the Slovak Republic acquired independence. In these approximately 28 years the Slovak Republic had to prove evidence of its capability to manage the development of the county, assuring its political stability and economic development.

After three years – 1996 of independence, the economy of the Slovak Republic acquired from the London „The Economist Intelligence Unit“ the best rating among Czech Republic, Poland and Hungary – countries in transition. The rating was supported mainly by agreed aims and practical economic policy of individual states within the goals of the International Monetary Fund, macro-economic indicators etc.

The members of R.C. SCCI Zilina come from the most industrial sectors including engineering, machinery, metallurgy, building industry, wood processing, paper industries, chemical industries, textile, food industries, electrotechnical, electronic industries, automotive, energy, tourist and travel, etc. **The most important companies**, suppliers, hotels you can watch in “CATALOGUE FIRMS of SCCI Zilina County” – www.interbiznis.sk.

The region is connected to the international trucks roads, Core European Corridors:

- I. **E 50:** ...-Paris-Praha-Brno-Zlin-Zilina-Martin-Ruzomberok-Liptovsky Mikulas-Presov-Kosice-Dnepropetrovsk...
- II. **E75:** ...-Belgrade-Szeged-Bratislava-Zilina-Zwardon-B.Biala-Katowice/Krakow-Warsaw-Minsk-Moscow...
- III. **R3/59/65:** Krakow-D.Kubín-Martin-Kremnica-Zvolen-Budapest

The distance of the Airport Zilina from Martin is 37 km, to Liptov 70 km.

THE MAIN ADVANTAGES of the Zilina County potential:

- **THE SAVE PROPERTY AND INVESTMENTS.** Territory of **COUNTY PROVED TO BE SECURED AGAINST ANY FLOODS. RELATIVELY THE BEST POSITION OF THE MIDDLE-EAST EUROPE.**
- **High educated labour force for all branches** • four Universities

**SLOVAKIA - SURFACE AREA: 49 035 km²,
DENSITY PER 1 km²: 110,
INHABITANTS OF COUNTY: app. 700 000,

Slovak Chamber of Agriculture and Food (SPPK) represents non-governmental, autonomous and statutory organisation, which was established in line with the Law No. 30/1992 Coll. as amended. The basic role of the Chamber is to enforce the justified common interests of its members, mainly in the process of the agricultural and social policy field. Chamber also takes part in the creation of the state policy concerning the support and protection of its member entrepreneurs to ensure the further development of agricultural production and food processing in the Slovak Republic.

Membership

The members of SPPK are natural and legal entities providing the business activities in agriculture, food industry and in biological, technical and commercial services for agriculture and food processing industry, as well as the other non-governmental organisations operating in the agri-business. The membership in the Chamber is voluntary since January 2005.

Internal organization

Headquarters of SPPK is placed in Bratislava with 15 employees. SPPK also has 38 Regional agricultural and food chambers (RPPK) operating in regions of Slovakia. The "regional" chamber can be established also on the other than just territorial basis. There are also four subjects with the statute of RPPK in accordance to the Statute of SPPK and the Law above. The activities of the Chamber are supervised by the official bodies – the General Assembly, the Board of Directors, the President and the Supervisory board.

Internal Communication

The Chamber is using the wide-spread net of its regional chambers in the whole territory of Slovakia. The central office communicates with the regional chambers using the internet and

emails, but also regular meetings to discuss the actual issues. The Slovak Agricultural and Food Chamber is the only autonomous organisation in the Slovak Republic combining the entrepreneurs operating in agricultural primary production, food processing industry and services for agriculture. SPPK is communicating also to its member associations as well as to the other agricultural autonomous organisations. All the members of SPPK have direct access to the regional office in which they are registered, but also to the central office in Bratislava.

Activities

The Chamber's activities are focused to:

- Lobbying for interests of its members at national and international level
- Legislation – legal sector
- Providing of business information service
- Guidance and education
- Co – operation with the international organizations

Co-operation with national and international partners

The Chamber is cooperating and communicating also with the state bodies accordingly to the conditions set out in the Law and in the Agreement on a Co-operation between the Council of the Agricultural Statutory Undertakers and the Ministry of Agriculture of the Slovak Republic to search for the solutions of the problems in agriculture and food sector. SPPK pays extra attention to development of the international contacts and representatives of the SPPK participate at the regular meetings of the representatives of the agricultural chambers from the "Visegrad four" countries (Slovakia, Czech Republic, Hungary and Poland). The representatives of Chamber cooperate also with other agricultural chambers within the European Union.

How do we get on the running train?

The second ending wave of the coronavirus pandemic and the measures and consequences associated with the virus have set up a mirror for us. For us as farmers and food producers, but also for us as societies. Under the influence of the global crisis, we have tried to believe that the political leaders of this state will realize that our inhabitants will not satiate from ordinary phrases about increasing food self-sufficiency. We need an active approach from all those involved - from ordinary farmers and food producers, through sober thinking self-governing organizations to our politicians, to talk once without worries and misleading political marketing which sounds kind to ordinary consumers - a country can feed own nation with home-made food and can also withstand the temporary food shortages on the European market in the event of other global crises.

It is no secret that the agri-food sector is also struggling as a result of coronavirus pandemic. Inputs to food production, inputs affecting plant and animal production, have become significantly more expensive for agricultural and food businesses. Prices of key agricultural commodities on European and world stock exchanges have risen rapidly since the beginning of the year. The market also responds to the current crisis development in the world.

It is no secret that in such a serious situation, Slovak farmers and food producers have not received the well-deserved amount of compensation that the surrounding countries granted to their food producers. For example, secondary food processing companies were excluded from the first covid aid for the food industry.

Nor is it a secret at all that Slovak farmers and food producers will receive one big zero from the Recovery and Resilience Plan. ZERO. The Slovak Republic is so far the only country that does not have agriculture and food in the Recovery Plan. In this context, it is necessary to point out (according to the arguments of the Ministry of Finance of the Slovak Republic) that none of the EU member states had agriculture and food in the recommendations under the European Semester and all countries are part of the EU Common Agricultural Policy.

All submitted recovery plans include agriculture and food. They are different in the allocated volume of resources (0-13%

of the total volume of grants) as well as the content focus. In all Recovery Plans agriculture and food are considered as important parts of the green transition and also a strategic sector for countries' resilience (especially in the light of corona crisis). We can also see, that member states are targeting on identified priorities with specific measures reflecting their specific situation. Among the measures, the resilience and competitiveness of the sector play an important role. In some cases, food sovereignty is explicitly mentioned. Several proposed measures of member countries are consistent with the priorities of the Slovak agri-food sector (competitiveness, food sovereignty, storage capacities, irrigation systems, reduction of energy intensity, adaptation of the sector to climate change, land consolidation, restructuring of the slaughterhouse network, etc.).

However, it remains a secret, how under such unequal conditions and with less support for our food producers, we can guarantee in the future that we grow, for example, enough vegetables, fruit, potatoes or keep enough livestock to feed all of us. Phrases about increasing food self-sufficiency under such unequal conditions will remain only phrases.

We also have to tell, that we don't need so much to reach food self-sufficiency. Because to be self-sufficient, for example, in the production of onion, we need to grow it on an area 240 hectares larger than today.

If we plant 300 hectares of fruit trees every year for 5 years, we will increase the food self-sufficiency in fruit production to the desired 100%. Seemingly simple tasks, but ... To solve them, we need to have real experts who use sober reasoning, constructive thinking and courage instead of fiery speeches in front of the media.

This is one of the reasons why Slovak farmers and food producers are well asking if they will be able to jump on a running train crossing through the European food market.

Bc. Emil Macho
President of the Slovak Agricultural
and Food Chamber
