"You must primarily help yourself" is a principle encoded in the genes of Slovak entrepreneurs. They believe that not many authorities and not many governments have provided particular support to the business environment. It is therefore important that businesses are associated in various organisations and structures, thanks to which they can advocate their requirements. The Slovak Chamber of Commerce and Industry (SCCI) is one such place.

Chambers of commerce and industry play an important role in each country – they represent the interests of the business community vis-à-vis domestic representatives, especially the political sphere, as well as foreign countries. Thus, their task is to represent the interests of entrepreneurs, the interests of the country and, at the same time, protect these interests against unfair practices.

The principal added value of membership in the SCCI is that its members have access to qualified information that we can provide them, that we can open the door for them to any country in the world and, on the other hand, we can represent their interests mainly in the field of the legislative process. After all, we know very well that the legislative process, whether in Brussels or in Slovakia, has a significant impact on the operations of our businesses. Positive, as well as negative.

Entrepreneurs, regardless of whether they are members of the SCCI or not, receive services from us that no one else can provide. Worldwide, chambers of commerce issue Certificates of Origin. When a company exports goods outside the European Union, it needs the goods to pass through customs. This is very important for business, and no less important is the fact that the SCCI has achieved such a position that its certificates have never been questioned.

The SCCI is the only institution in Slovakia that is authorised to issue ATA carnets both for its members and non-members, which allows for temporary duty-free export of goods abroad without entrepreneurs paying customs duties. These carnets are issued for goods that return, that is, goods that travel to fairs and exhibitions, or musical instruments for which music ensembles would have to pay customs duties when travelling abroad. Even though they would be reimbursed for these charges at a later stage, their funds would be blocked by then. Or it also concerns goods that are exported to be processed abroad and return for final consumption or for finishing to Slovakia. This activity significantly helps businesses.

We know that, especially during the COVID-19 pandemic, many companies objectively found themselves unable to meet their obligations, which normally results in a contractual penalty or withdrawal from contract. Chambers of commerce and industry worldwide issue Force Majeure Certificates, which prove to business partners that, in particular cases, the defaults were not caused directly by the suppliers under the contractual conditions, but that the failure to deliver was due to force majeure. It should be noted that these certificates are generally accepted worldwide and have significantly helped numerous Slovak companies, especially during the period of the pandemic, as well as at times of crises, insolvency or periods affected by other factors.

Finally, there is one more very important activity that we should not forget about and which historically began to be carried out by chambers of commerce and industry – arbitration. The Court of Arbitration at each chamber of commerce has a very important position in terms of settling commitments and liabilities between two contracting parties outside general courts. It should be said that the Court of Arbitration of the SCCI is internationally highly recognised and the arbitrators on our list come from all continents: Asia, China, India, the USA, and certainly, we also have European arbitrators. This ensures an objective assessment of disputes. However, this does not mean that if someone is a member of the SCCI, they will automatically win the dispute. Nevertheless, everyone, regardless of whether they are a member of the SCCI or not, is guaranteed that the dispute will be resolved within a reasonable time, that is, not within several years, but within several months, unlike in the case of general courts. In addition, the fees are not high and the enforceability of such decisions is definitive, whether it is in the Slovak Republic or in any country that is a member of the International Chamber of Commerce (ICC), a global institution covering chambers of commerce from around 137 countries worldwide. Thus, all key business partners are also members of the ICC, which ensures the enforceability of these decisions globally.

The advantage of the SCCI, unlike many other associations, is that it is not a lobbying centre, it does not lobby for any specific partial interests, or for financial or other preferential interests. It lobbies for the economy as such. This means that companies that wish to operate in a certain economic environment, in this case in Slovakia, should look for a structure that ensures the purity and transparency of the business environment and, at the same time, has a structure that allows them to provide services close to their

place of operation. After all, we are one of the few organisations that consistently covers the entire territory of Slovakia. There is a regional chamber in each regional capital, thanks to which entrepreneurs can reach our office within an hour, if necessary. Even though we provide most of our services electronically today, we also communicate in person. Entrepreneurs can come to us for a consultation, for a meeting with foreign entrepreneurs who have come to Slovakia, they can travel with us abroad, where, thanks to international structures, we can provide the highest quality of services. There are many advantages and it is up to the company to decide. In any case, we are an open organisation that makes no selection.

The only selection made in our country is that our members must conduct their activities in conformity with the relevant laws and rules. We would definitely not accept a member who has a bad reputation; we would definitely get rid of a member who has committed fraudulent activity, because it is not only against our rules, but also against the rules applying internationally.

One of the serious problems of entrepreneurs in Slovakia is that there are few of them. According to the latest statistical data, 660.000 business entities are active in Slovakia, which means that one in eight or nine inhabitants does business. Compared to our neighbours, the Czech Republic, Poland, and Hungary, we lag well behind. There are 2.5 million businesses in the Czech Republic, which means that one in four citizens of the Czech Republic does business. In Hungary, it is one in five, and in Poland one in six.

And it is also where there is room for the Slovak Chamber of Commerce and Industry to operate, as its task is to serve entrepreneurs so that they can create values and resources necessary for the development of all sectors of society. It is the voice of entrepreneurs. It can convey its views to the executive bodies and the legislator with the sole aim of making the environment in which entrepreneurs operate more favourable, so that entrepreneurship becomes more popular in Slovakia.

Peter Mihók,
Chairman of the Slovak Chamber of
Commerce and Industry

Basic information

The Slovak Republic (short form: Slovakia) is a landlocked state in Central Europe. It has a population of over 5,5 million and an area of about 49,000 square kilometres (19,000 sq mi). Slovakia is bordered by the Czech Republic and Austria to the west, Poland to the north, Ukraine to the east, and Hungary to the south. The largest city is the capital, Bratislava, and the second largest is Košice in Eastern Slovakia. Slovakia is a member state of the European Union, NATO, the United Nations, the OECD, and the WTO among others. The official language is Slovak, a member of the Slavic language family.

The Slavs arrived in the territory of present day Slovakia in the 5th and 6th centuries during the migration period. In the course of history, various parts of today's Slovakia belonged to Samo's Empire (the first known political unit of Slavs), Principality of Nitra (as independent polity, as part of Great Moravia, and as part of the Hungarian Kingdom), Great Moravia, Kingdom of Hungary, the Austro-Hungarian Empire or Habsburg Empire, and Czechoslovakia. A separate Slovak state briefly existed during World War II, during which Slovakia was a dependency of Nazi Germany between 1939–1944. In

1945, Slovakia once again became a part of Czechoslovakia. The present-day Slovakia became an independent state on 1 January 1993 after the peaceful dissolution of Czechoslovakia.

The country joined the European Union in 2004 and the Eurozone on 1 January 2009. Slovakia together with Slovenia and Estonia are the only former Communist countries to be part of the European Union, Eurozone, Schengen Area, and NATO simultaneously.

Establishment of the Slovak Republic

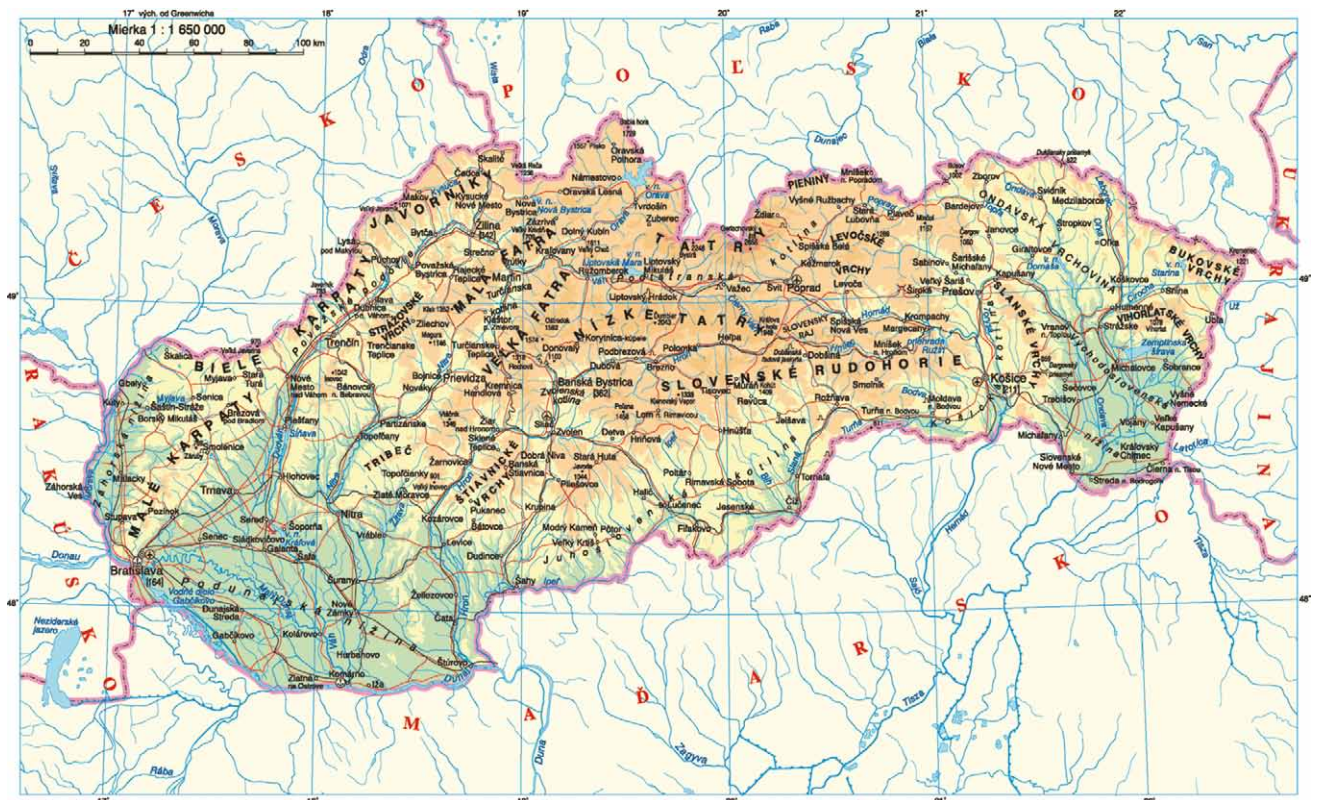

The end of Communist rule in Czechoslovakia in 1989, during the peaceful Velvet Revolution, was followed once again by the country's dissolution, this time into two successor states. In July 1992, Slovakia, led by Prime Minister Vladimír Mečiar, declared itself a sovereign state, meaning that its laws took precedence over those of the federal government. Throughout the autumn of 1992, Mečiar and Czech Prime Minister Václav Klaus negotiated the details for disbanding the federation. In November, the federal parliament voted to dissolve the country officially on 31 December 1992.

The Slovak Republic and the Czech Republic went their separate ways after 1 January 1993, an event sometimes called the Velvet Divorce. Slovakia has remained a close partner with the Czech Republic. Together with Hungary and Poland, the two countries created the Visegrád Group regional platform. Slovakia became a member of NATO on 29 March 2004 and of the European Union on 1 May 2004. On 1 January 2009, Slovakia adopted the Euro as its national currency.

Location and geography

Slovakia lies between latitudes 47° and 50° N, and longitudes 16° and 23° E.

Slovakia is a landlocked country in Central Europe. The Slovak landscape is characterised by great differences. It is noted primarily for its mountainous nature, with the Carpathian Mountains extending across most of the northern half of the country. Amongst these mountain ranges are the high peaks of the Tatra mountains. To the north, close to the Polish border, are the High Tatras which are a popular skiing destination and home to many scenic lakes and valleys as well as the highest point in Slovakia, the Gerlachovský štít at 2,655

SLOVAKIA – Geographical Map

SLOVAKIA – Regions and Districts

metres (8,711 ft), and the country's highly symbolic mountain Kriváň. The largest lowland is the fertile Danubian Lowland in the southwest, followed by the Eastern Slovak Lowland in the southeast. Forests cover 41% of Slovak land surface. Major Slovak rivers are the Danube, the Váh and the Hron. The Tisa marks the Slovak-Hungarian border for only 5 km (3.1 mi).

Climate

Slovakia lies between the mild and continental climatic zone with regular change of four seasons and is characterised by relatively warm summers and cold, cloudy and humid winters. The average temperature is -2°C in winter and + 21°C in summer. January is the coldest month with night temperatures between -10°C and -15°C; the warmest month is July with a daily maximum temperature of approximately +32°C.

Administrative divisions

As for its administrative divisions, Slovakia is subdivided into 8 regions ("kraje"), each of which is named after its principal city. Regions have enjoyed a certain degree of autonomy since 2002. They are referred to as self-governing regions or higher territorial units (abbreviation: VÚC).

1. Bratislava Region (capital Bratislava)
2. Trnava Region (capital Trnava)
3. Trenčín Region (capital Trenčín)
4. Nitra Region (capital Nitra)
5. Žilina Region (capital Žilina)
6. Banská Bystrica Region (capital Banská Bystrica)
7. Prešov Region (capital Prešov)
8. Košice Region (capital Košice)

The regions are subdivided into many districts. Slovakia currently has 79 districts.

Economy

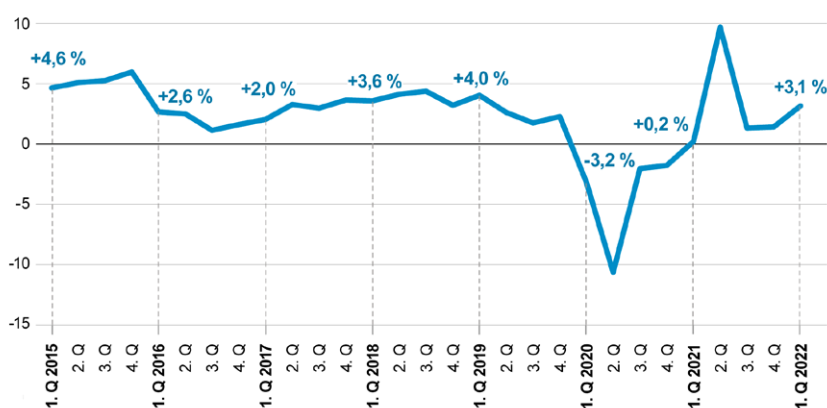

The Slovak economy was considered a developed economy with the attribute "Tatra Tiger". During the post-revolutionary years at the beginning of the 1990s, Slovakia transformed from a centrally planned economy into a market economy. Large-scale privatisation processes were completed, the banking sector is in private hands, and foreign investments increased.

Slovakia was noted for its permanent high economic growth. In 2006, it achieved the highest GDP growth (8.9%) among OECD members. According to Eurostat data, Slovakia's GDP per capita in PPS in 2008 reached 72% of the EU average.

The Slovak economy has moved away from the EU average by 8 percentage points over the last ten years. According to official Eurostat data, Slovakia has been overtaken by all three Baltic countries, neighbouring Hungary, and Poland, and even Romania and Croatia. Within the European Union, Bulgaria has the lowest GDP per inhabitant, followed by Greece and Slovakia as the third poorest country in the EU.

In recent years, Slovakia has fallen relatively sharply in the ranking of EU countries. While in 2011 it was the third strongest economy in the Central and Eastern European region after Slovenia and the Czech Republic, in 2021, it became the second weakest after Bulgaria.

The economic model based on cheap labour and on attracting foreign investments, on which the growth of the economy and the catch-up of the EU at the beginning of this millennium was built, is gradually being exhausted. The state fails to transform its economy into a knowledge-based economy. In a knowledge-based economy, the key role is played by the quality of human capital. And it is precisely investments in the quality of education and the support of innovations in the economic sector that Slovakia has been lagging behind in recent years and decades.

Gross domestic product at constant prices (year-on-year change in %, quarters)

Source: Statistical office of the Slovak Republic

The unemployment rate, which reached its peak of 19.2% at the end of 1999, dropped to 7.51% in October 2008, according to the Slovak Statistical Office. In addition to economic growth, this reduction was due to labour migration to other EU countries. After a slight increase in the period affected by the pandemic, the development of the unemployment rate took a favourable trend, except in some less developed districts. In 2022, the unemployment rate in Slovakia is 7.09%.

Inflation fell from an average annual rate of 12.0% in 2000 to just 3.3% in 2002, which was an election year, but rose again in 2003–2004 due to rising labour costs and excessive taxes. In 2005, it reached 3.7%. After a steadily low inflation rate until 2021, the National Bank of Slovakia expects in its latest forecast that it will grow faster this year and in the next year. Considering a scenario with a relatively moderate development of the conflict in Ukraine, the inflation rate can reach 7.6% this year and 9.7% next year.

Slovakia adopted the euro on 1 January 2009 as the 16th member of the eurozone. The euro in Slovakia was approved by the European Commission on 7 May 2008. The Slovak crown (koruna) was revalued on 28 May 2008 to 30.126 for 1 euro, which also became the euro exchange rate.

In March 2008, the Ministry of Finance announced that the Slovak economy was sufficiently developed to stop receiving aid from the World Bank. Slovakia became an aid provider at the end of 2008.

Slovakia is an attractive country to foreign investors mainly because of low wages, low tax rates, and a qualified labour force. In recent years, Slovakia has promoted a policy of supporting foreign investments. The inflow of FDI increased by more than 600% since 2000 and cumulatively reached a historical maximum of USD 17.3 billion in 2006, or approximately USD 22,000 per capita by the end of 2008.

Despite the sufficient number of researchers and a decent secondary education system, Slovakia, together with other post-communist countries, still faces major challenges in the field of the knowledge economy. Business and public spending on research and development is well below the EU average. The international student assessment programme, coordinated by the OECD, currently ranks Slovak secondary education the 30th in the world (just behind the USA and just before Spain).

The poorly managed pandemic caused significant and, in the tourism sector, even existential problems.

The current energy crisis points to the inability of the current government to solve this, from the point of view of the economy, existential problem. The effects of the massive increase in energy prices are felt by everyone, and without the immediate implementation of systemic measures, the following months will be disastrous. Mass layoffs, production cuts, and business closures are becoming a reality in Slovakia.

At the same time, ill-advised “privatisation” and the inability to buy back energy companies has been revealed for all to see.

Industry

Although Slovakia's GDP comes mainly from the tertiary (services) sector, the industrial sector also plays an important role within its economy. The main industry sectors are car manufacturing and electrical engineering. Since 2007, Slovakia has been the world's largest producer of cars per capita, with a total of 571,071 cars manufactured in the country in 2007 alone. There are currently three automobile assembly plants: Volkswagen's in Bratislava, PSA Peugeot Citroen's in Trnava, Kia Motors' Žilina Plant, and Land Rover near Nitra. In 2022, Volvo will also start building its plant in eastern Slovakia.

Bratislava's geographical position in Central Europe has long made Bratislava a crossroads for international trade traffic. Various ancient trade routes, such as the Amber Road and the Danube waterway, have crossed territory of present-day Bratislava. Today, Bratislava is the road, railway, waterway, and airway hub.

- Current Slovak companies that are known or have their activities all over the world include, for example:
- MicroStep, spol. Ltd. Bratislava – manufacturer of CNC cutting machines, control systems and CAM software;
- Sharvan bike – Project M1 Ltd. Prešov – manufacturer of the first growing and folding city bike in the world;
- TOMARK, Ltd. Prešov – producer of modern all-metal UL • LSA • EASA certified aircraft Viper SD4 and Skyper GT9;
- SPINEA® s.r.o. Prešov – modern Slovak engineering company, engaged in development, manufacturing and sales of high precision reduction gearboxes, which are sold under the trademark TwinSpin®;
- SEZ DK a. s., Dolný Kubín – Slovak producer of electrical installation material;
- ZTS TEES VOS, j.s.c. Martin – custom engineering production, stable partner for German and French customers on the engineering market; and many others.

Transportation

Traffic

Bratislava is a large international motorway junction: The D1 motorway connects Bratislava to Trnava, Nitra, Trenčín, Žilina and beyond, while the D2 motorway, going in the north-south direction, connects it to Prague, Brno, and Budapest in the north-south direction. The D4 motorway (Bratislava's outer bypass) is smoothly connected to the A6 Austrian motorway.

Air Transport

Bratislava's M. R. Štefánik Airport is the main international airport in Slovakia. It is located 9 kilometres (5.59 mi) northeast of the city centre. It serves civil and governmental, scheduled, and unscheduled domestic and international flights. The current runways support the landing of all common types of aircraft currently used. The airport has enjoyed rapidly growing passenger traffic in recent years. Smaller airports served by passenger airlines include those in Košice and Poprad.

Ship transportation

The Port of Bratislava is one of the two international river ports in Slovakia. The port connects Bratislava to

international boat traffic, especially the interconnection from the North Sea to the Black Sea via the Rhine-Main-Danube Canal. In addition, tourist lines operate from Bratislava's passenger port, including routes to Devin, Vienna, and elsewhere.

Rail transport

Railways of the Slovak Republic (ŽSR) is a state-owned enterprise managing the state-owned railway infrastructure (including railway transport until 2001) in Slovakia.

According to the law, ŽSR is the railway operator on Slovakia's territory, having the obligation to provide and service national and regional railways and to organise transport on these railways for

all transport operators in accordance with the state's transport policy, without any discriminatory restrictions.

As of December 31, 2021, ŽSR managed 3,626 kilometres of tracks, i.e. 6,820 km of rails. It also manages 8,243 switches, 2,071 crossings, 2,326 bridges with a total length of 52,244 metres, and 76 tunnels with a total length of 45,007 metres. They also own 4,802 buildings. There were 1,585 kilometres of electrified tracks and 1,022 transport lines within the ŽSR network, including 293 railway stations and 22 border stations.

Tourism in Slovakia

Slovakia – A country of tourism

Although Slovakia is small in area, it offers rich tourist attractions.

In terms of its location and the diversity of tourist attractions, Slovakia can be compared to Switzerland and Austria. Slovakia features natural landscapes, mountains, caves, medieval castles and towns, folk architecture, spas, and ski resorts. More than 1.6 million people visited Slovakia in 2006, and the most attractive destinations are the capital of Bratislava and the High Tatras.

Karst areas and caves, water areas

The vast karst areas form a unique whole. The total size of the karst area is approximately 3,000 km², however, only 20 out of 7,500 are open to public. Slovakia is noted for the fact that all three types of caves can be found within its territory: stalactite (dripstone) caves,

Road network in the Slovak Republic

ice caves, and aragonite caves. The aragonite cave in Slovakia is one of the three in the world.

Slovakia also offers many water areas suitable for yachting, surfing, and other water sports. There is a total of over 200 tourism centres in Slovakia with large bodies of water.

Healing mineral springs and healing spas

A number of spas of international importance on the basis of healing mineral waters can be found in Slovakia, in which diseases of the locomotor system, digestive tract, and post-operative conditions are treated. The best known spas include Piešťany, Trenčianske Teplice, Dudince, and Bardejov. The climatic spa for the treatment of the respiratory system diseases in the High Tatras – Štrbské Pleso and Nový Smokovec Spa, or caves for the treatment of allergic diseases of the respiratory tract, suitable mainly for children (Bystrá cave), should also be mentioned.

Thanks to the large number of thermal water springs, recreational resorts offering the possibility to spend a vacation are being constructed in southern Slovakia.

When it comes to water, there are more than 1,300 mineral water springs in Slovakia, which are suitable for drinking and are also used for medicinal purposes.

Folk architecture and folklore

Slovak regions offer a number of folk architecture museums, which show the history of Slovakia in architecture and folklore. Well preserved are the Slovak open-air museums in Jahodníky near Martin, Zverovka in Orava Region, and Pribylina in Liptov Region.

Castles and chateaux

Numerous castles and chateaux testify the ancient settlement of our territory, as well as its importance in terms of location, the most interesting being the Devín Castle, the Bratislava Castle, the Trenčín Castle, the Spiš Castle, the Orava Castle, the Chateaux of Bojnice, and the Zvolen Castle.

Sacral monuments

The sacral monuments throughout Slovakia are genuine pearls of culture, with numerous exhibits of incalculable value, such as the altar of Master Paul in Levoča, which was exhibited at the EXPO in Montreal. The cathedral complexes in Trnava and Nitra should also be mentioned, as well as many preserved and restored synagogues.

The peculiar, highly valuable wooden churches and chapels of the Orthodox, Catholic, and Evangelical Churches in Slovakia, are unique, featuring architecture that naturally harmonises with the landscape. Some of them are built without the use of metal fasteners.

Souvenirs

Typical souvenirs from Slovakia include dolls dressed in folk costumes, ceramic objects, crystal glass, carved wooden figures, črpáks (wooden pitchers), fujaras (a folk instrument inscribed on the UNESCO list), valaškas (a decorated folk hatchet), and above all products made from corn husks and wire, notably human figures.

Souvenirs can be bought in the shops run by the state organisation ÚĽUV (Ústredie ľudovej umeleckej výroby – Center of Folk Art Production). Dielo shop chain sells works of Slovak artists and craftsmen. These shops are mostly found in towns and cities. Prices of imported products are generally the same as in the neighbouring countries, whereas prices of local products and services, especially food, are usually lower.

Slovakia's strategic location

Looking at the map of Europe, Slovakia's strategic location is obvious at first glance. It is a natural crossroads in West-East direction as well as in North-South direction. Slovakia is easily accessible, as the network of Western European motorways extends through Austria up to Bratislava. The Bratislava – Prague motorway connection is also very useful. When arriving by plane, visitors can make use of the airport in Bratislava, Vienna, or Budapest.

Thanks to its location, Slovakia offers ideal opportunities for combining visits to Slovakia with visits to its neighbouring countries, thus allowing for getting to know the entire Central European region.

In 2019, an increased number of tourists found their way back to Slovakia, as confirmed by the latest visitor statistics. According to them, a total of 6,432,934 people visited Slovakia, which represented a 15% increase compared to 2018. These figures also show that tourism in Slovakia was experiencing its best times, with increasing numbers of both domestic and foreign tourists. Slovakia as a tourist destination is traditionally sought for mainly by tourists from neighbouring countries. Most visitors have long come from the Czech Republic, Poland, Germany, and Hungary. Nevertheless, the year 2021 brought different results. The situation related to the Covid-19 pandemic caused the number of visitors to drop to 2.7 million, of which 79% were domestic visitors and 21% from abroad.

The following regional and area tourism organisations provide for the promotion of tourism in Slovakia.

Register of area tourism organisations (OOCR):

• OOCR High Tatras Region • OOCR SEVERNÝ SPIŠ - PIENINY • OOCR Visit Košice • OOCR Dudince • OOCR HOREHRONIE REGION • OOCR "ŠARIŠ" - BARDEJOV • OOCR Region Gron • OOCR Trenčianske Teplice • OOCR Region Horné Považie • OOCR Trnava Tourism • OOCR Rajecská dolina • OOCR Horný Zemplín and Horný Šariš • OOCR Turiec • Nitra OCR • Zemplínska OOCR • OOCR Central Slovakia • OOCR Malá Fatra • OOCR Banská Štiavnica Region • OOCR High Tatras Foothills • OCR Kysuce • OOCR RESORT PIEŠTANY • OOCR LIPTOV REGION • OOCR

TOURIST NOVOHRAD AND PODPOČENIE

• OOCR Cluster Orava • OOCR Region Horná Nitra – Bojnice • OOCR TATRAS – SPIŠ – PIENINY • OOCR Senec Region • OOCR Záhorie • OOCR DANUBE • OOCR Trenčín and surroundings • OOCR Malé Karpaty • OOCR Slovak Paradise & Spiš • OOCR Tekov • OOCR GEMER • OOCR Šariš Region • OOCR Žitný ostrov – Csallóköz • Bratislava Tourism Organisation • OOCR Štúrovo – Parkan • Regional tourism organisation Matúšova zem – Mátyusföld

Register of regional tourism organisations (KOCR):

• Tourism of the Bratislava Region • Regional tourism organisation of Northeast Slovakia • Košice Tourism Region • Regional tourism organisation of the Trenčín Region • Banská Bystrica Tourist Region • Žilina Tourist Region • Regional organisation of the Nitra Tourism Region • Trnava Region

Science

- Several Slovaks have made notable technical contributions:
- Jozef Murgáš contributed to development of wireless telegraphy;
- Ján Bahýľ constructed the first motor-driven helicopter (four years before Bréguet and Cornu);
- Štefan Banič constructed the first actively used parachute;
- Aurel Stodola created a bionic arm in 1916 and pioneered steam and gas turbines.
- John Dopyera constructed a resonator guitar, an important contribution to the development of acoustic string instrument.
- American astronaut Eugene Cernan (Čerňan), the last man to visit the Moon, has Slovak heritage.
- Ivan Bella was the first Slovak citizen in space, having participated in a 9-day joint Russian-French-Slovak mission on the space station Mir in 1999.
- Nobel Prize winners Daniel Gajdusek and David Politzer have Slovak ancestors.

Demographics

According to the 2021 census, the majority of the inhabitants of Slovakia are Slovaks (83.82%). Hungarians are the largest ethnic minority (7.75%).

Other ethnic groups include Roma (1.23%),[135] Czechs (0.53%), Rusyns (0.44%) and others or unspecified (6.1%). [136]

Languages

The official language is Slovak, a member of the Slavic language family. Hungarian is widely spoken in the southern regions, and Rusyn is used in some parts of the Northeast. Minority languages hold co-official status in the municipalities in which the size of the minority population meets the legal threshold of 15% in two consecutive censuses.

Religion

The Slovak constitution guarantees freedom of religion. In 2021, 55.8% of population identified themselves as Roman Catholics, 5.3% as Lutherans, 1.6% as Calvinists, 4% as Greek Catholics, 0.9% as Orthodox, 23.8% identified themselves as atheists or non-religious, and 6.5% did not answer the question about their belief.[142] In 2004, about one third of the church members regularly attended church services.

Slovak cuisine

Pork, beef, and poultry are the main meats consumed in Slovakia, with pork being substantially the most popular. Chicken is the most widely eaten poultry, followed by duck, goose, and turkey. A blood sausage called jaternice, made from any and all parts of a butchered pig, also has its fans. Game, especially boar, rabbit, and venison, are generally available throughout the year. Lamb and goat are eaten but are not widely popular.

Wine is enjoyed throughout Slovakia. Slovak wine comes predominantly from the southern areas along the Danube and its tributaries; the northern half of the country is too cold and mountainous to grow grapevines. Traditionally, white wine was more popular than red or rosé (except in some regions), and sweet wine more popular than dry, but in recent years tastes seem to be changing. Beer (mainly of the Pilsner style, though dark lagers are also consumed) is also popular throughout the country.

GREAT MORAVIAN EMPIRE – OLD-SLAVONIC EMPIRE (805-905) - 9th century

"I mind the disregard for the culture that is centuries older."

Alexander the Great (356-323 B.C.)

■ NITRA, MIKULČICE, DEVÍN - centres, towns, castles

■ Rulers: **Mojmír I.** (830 - 846), **Rastislav** (846 - 870), **SVĚTOPLUK I.** (870 - 9. 3. 894), **Mojmír II.** (894-907).

Territory of the empire: Slovakia, Moravia, Pannonia, Czechia

■ Slavic gods: Perun, Triglav, Dazhbog – god of the Sun, Radegast, Zhiva (Siva) – goddess of life and bioenergy; Slavic priests used meditations and breathing

exercises to accumulate and balance energy;

■ **863-885** Constantine-Cyril and archbishop Methodius with Rastislav and King Světopluk founded the material, spiritual and culture traditions of Slavonic people and devised the alphabet;

■ **866** They founded the Great Moravian training college – school, where 200 pupils finished their studies; literature – writings, poems, code of law;

■ **869** The Old Slavonic language became the fourth liturgical language in the world along with Greek, Hebrew and Latin;

■ Methodius (815-6. 4. 885) studied law; archbishop in Great Moravia and Pannonia-Sirmium - Srem. Mitrovica

■ Constantine the Philosopher – Cyril (827-14. 2. 869) devised the alphabet and spelling, and created words for communication from Greek;

■ **880** The pope issued the bull *Industriae tuae* by which he took under protection the independent Great Moravian Empire

■ Byzantine writing on Slavonic people: "Slavic tribes are accustomed to freedom and will not let themselves

enslave. They keep open house for foreigners and accompany them as their guests from one place to another, wherever the guests wish. Their way of life is rough, but they are not evil-minded."

■ **~ 889** – Czech lands annexed to the Great Moravian Empire;

■ **~ 906** Magyars invaded Great Moravia from the East, subverted the Empire and settled in Pannonia;

■ **890 - 1000** ➔

Dissemination of material

and spiritual culture From

Great Moravia to Bulgaria, Czech lands (Bořivoj I.- in 882 christened by Archbishop Methodius), to the Yugoslav nations and to Kievan Rus.

Methodius' followers spreading culture and literature: Climent in Ohrid, Sava, Naum, Gorazd.

Centres of Slavic culture after Great Moravia:

Prague, Kiev, Cracow, Novgorod, Ohrid. In Bulgaria, Methodius is commemorated on 17 July; the Methodius' cult was laid by the Czech king Charles IV.

■ **9th century** – Slovakia and Moravia abounded in spiritual Slavic culture reflecting the maturity of the Byzantine and Western-European letters; it was the basis of the civilisation of Central-European culture (**own state, own writing, own church province, accepted by the Frankish Empire - 884, own books, own liturgical language – Old Slavonic, successful foreign diplomatic policy**).

Central-European civilization area – Great Moravia, the cradle of material and spiritual culture; laid the foundations of a new literary language through which the Slavs got involved in the world cultural course of events throughout Europe. MIKULČICE: palace, 10 churches etc.

Air transport

There are 6 international airports in Slovakia that can be used for both passenger and cargo flights:

- M.R.Štefánik airport Bratislava
- Airport Košice
- Airport Poprad-Tatry
- Airport Sliač
- Airport Piešťany
- Airport Žilina

As the potential of Slovak airports is not yet fully exploited, regular and also irregular connection of Slovakia to Europe and the rest of the world is secured through Vienna Schwechat airport. Schwechat airport is the main international airport of Austria and is only 50 km distant from Bratislava. There is also regular train and bus connection between Bratislava and Schwechat. Another large international airport accessible is Budapest airport, main airport of Hungary, distant 250 km from Bratislava. It is also possible to use airport Ruzyne in Prague that has regular flights to M. R. Štefánik airport in Bratislava.

Airport M. R. Štefánika Bratislava (BTS)

**Skiing, golf, mountains, spa & wellness
and much more are what you'll find at Tále**

- 18 hole golf course, Winter ski resort
- An active holiday destination, an ideal place to relax with the family
- Three stylish restaurants and a traditional Folk restaurant
- Spa & Wellness centre, including a salt water pool
- A comprehensive service for meetings and training courses
- A wide range of activities in the beautiful countryside of the Low Tatras

TECHNICAL UNIVERSITY OF KOŠICE

History of TUKE

The Technical University of Košice was founded in 1952, but its roots must be sought much deeper in the past. As early as 1657 the Universitas Cassoviensis was established in Košice, but technical education in Slovakia was only elevated to higher - education level in 1762, when the Austro-Hungarian monarch Maria Theresa established the Mining Academy in Banská Štiavnica.

The true birth of the Košice Technical College came on 8th July 1952.

Vision

The Technical University of Košice will be

- a leading university of technology on a national basis and
- a respected university of technology on the international scale,
- having a strong degree of autonomy,
- sufficiently diversified financial resources,
- available for a wide range of applicants,
- developing scientific knowledge based on its own original findings,
- providing excellent education on all three levels of tertiary education, as well as
- lifelong education,
- meeting the expected needs of industries, region and society by its research,
- substantially involved in providing services to general public.

Mission

TUKE will provide its environment with scientific and technological knowledge basis, innovation and

workforce, in order to form beneficial and sustainable future and high quality of life. This will be achieved at TUKE by innovative research and excellent education in all scientific branches of respective University Faculties.

TUKE today

- among 5 % of the world's top universities
- 20 % of international students from 44 various countries
- establishment of startup companies in USP TECHNICOM even during studies
- international mobilities in terms of 341 partnerships in 33 countries worldwide
- almost 100 % success of fresh graduates in the job market
- more than 25 kinds of sports, folk and singing ensemble, student television, radio and others

Faculty of Materials, Metallurgy and Recycling

Faculty of Mechanical Engineering

Faculty of Electrical Engineering and Informatics

Faculty of Civil Engineering

Faculty of Economics

Faculty of Manufacturing Technologies

Faculty of Arts

Faculty of Aeronautics

Slovak University of Technology in Bratislava

The Slovak University of Technology in Bratislava provides university education in engineering disciplines. Our education system is based on scientific research, as well as on artistic, engineering and other creative activities. Our faculties, departments, institutes and experts cooperate directly with industrial companies and social organisations, actively taking part in the international cooperation.

STU holds the ECTS Label certificates (as one of the three universities in the Slovak Republic) and the DS Label certificates (as one of the five universities in the Slovak Republic). It provides an attractive and high-quality university education, as evidenced by the high employment rate of its graduates, reaching almost 100%, while their starting salaries being the highest in the economy of Slovakia. A long-term positive trend in education of the STU graduates is cooperation with practice, as evidenced by numerous awards of the STU students.

STU IN THE WORLD RANKINGS

The Slovak University of Technology is ranked in three important world rankings: QS World University Rankings®, THE (Times Higher Education) World University Rankings and U.S. News Best Global Universities. STU is the only Slovak university among the 550 evaluated ones in the QS Graduate Employability Rankings. In all three rankings, STU is rated as the best university of technical focus in Slovakia.

RESEARCH

Research plays the key role in the education process. Thanks to the research, we are able to prepare well educated and highly trained experts. The STU graduates work with the up-to-date knowledge and receive hands-on experience with the advanced technologies, while discovering new knowledge and technical solutions.

COOPERATION WITH INDUSTRY

Intense cooperation with private sector is inevitable for a university of technology. By discovering unique solutions to the contemporary technical issues, the University enriches its research activities and accelerates transfer of knowledge, while gaining financial support for its development.

UNIVERSITY TECHNOLOGY INCUBATOR

The STU Technology Incubator in Bratislava is the oldest university incubator in Slovakia, established in 2005. Its mission is to help ambitious people to develop their innovative ideas into successful startups. It is open for all the students of the Slovak University of Technology in Bratislava, and also for all the students and graduates across the Slovak universities. The STU Incubator offers its active members entrepreneurial education, mentoring, networking, participation in the Slovak startup ecosystem and in local or international competitions, as well coworking and offices.

NETWORKING

The University, its faculties and employees are active in many recognised European and international professional, educational, scientific and artistic organisations. The international bilateral and multilateral framework agreements create favourable conditions for cooperation between faculties, departments, institutes and individuals. Partnerships within the Lifelong Learning Programme and its Erasmus subdivision also play an important role. As of today, STU cooperates with 604 partnership universities from all around the world.

SERVICES FOR STUDENTS

The University provides extensive social support and services to its students, including three types of scholarships. Social scholarship is provided to the socially disadvantaged groups to cover their living expenses; motivation scholarships are awarded to the most successful students for their achievements in the previous academic year; and special scholarships are provided for excellent achievements in the research, artistic and sport activities, as well as for outstanding study results during the entire course of study.

STU

STUDENT LIFE AND ACCOMMODATION

Students can use many facilities for studying as well as spending their free time:

- Well-equipped libraries and self-access rooms,
- Online access to international databases,
- Modern approach to education (e-learning, distance studies, etc.),
- Special workshops and labs,
- PC labs,
- Free Internet access,
- Six dormitories with a capacity for 5,900 students,
- Accommodation located within 10 minutes (on foot or by public transportation) from the education facilities,
- Single-, two- and three-bed rooms with standard facilities (individual or shared showers),
- Internet access, shared kitchenettes,
- Canteens and buffets in student dorms and faculty premises.

SLOVAK UNIVERSITY OF AGRICULTURE IN NITRA GREEN UNIVERSITY

SUA
Slovak University
of Agriculture
in Nitra

The Slovak University of Agriculture in Nitra is the centre of agricultural education, science and research in Slovakia with emphasis on production of healthy and safe food, environmental protection, conservation of biological diversity and sustainable development. As the only Slovak university, it provides education focused on the direction of our agriculture and rural development.

It was founded in 1952 and raised almost 90,000 graduates during its existence.

OUR RANKINGS

The Slovak University of Agriculture in Nitra is a modern, recognised and competitive educational and scientific research institution. Its qualities are also evidenced by its ranking in the most prestigious global rankings of universities:

- Times Higher Education World University Ranking,
- QS World University Ranking,
- The Academic Ranking of World Universities (ARWU), known as the Shanghai Ranking,
- it is the fifth best Slovak university in the ranking of SCIMAGO Institutions Rankings 2023, focused on research, innovation and social impact as measured by website traffic and scale,
- in the ranking of UI GreenMetric World University Ranking, which focuses on the current state of university campuses and monitors sustainability at universities, it is the most successful Slovak university and belongs to the TOP10 in V4 countries.

WHAT DO WE OFFER?

High quality education

The SUA offers study in accredited bachelor, master and doctoral study programmes in a full-time and part-time form. Applicants can choose from more than one hundred study programmes focused on agriculture and landscape engineering, food sciences, biology, biotechnology, engineering, economics and management.

Top research

Supporting science and research is one of the main tasks of the SUA in Nitra. The construction of the AgroBioTech Research Centre, equipped with the most modern infrastructure, has expanded the possibilities of applied research with close links to innovations in practice. Together with excellent workplaces focused on basic research on biodiversity, integrated river basin management, soil protection and sustainability, and white-green biotechnology, the SUA actively participates in the development of agriculture and food sciences.

Open path to the world

The SUA in Nitra has extensive contacts with universities and scientific research institutions around the world. Through exchange programmes, students can take part of their studies at one of the partner universities in or outside the European Union or take advantage of the offer of joint study programmes with foreign universities and obtain a double or multiple degree.

Inspiring environment

The university campus, full of greenery, offers a unique space for study, sport and relaxation. It was built in 1961-1966 by architects Vladimír Dedeček and Rudolf Miňovský and is one of the most important works of domestic post-war modernism. In 2014 it was

declared a national cultural monument. The symbol of the university and one of the dominants of the city of Nitra is the famous Aula maxima, which also adorns a postage stamp since 2017.

Emphasis on ecology and sustainability

Addressing climate change, waste management and transport management in line with sustainability and eco-efficiency are among the priorities that bring education and science to the world. This philosophy is also fulfilled

by the project Green Infrastructure at Green University, aimed at improving environmental aspects of the SUA campus.

Modern accommodation

The SUA offers students accommodation in newly refurbished student dormitories directly in the campus of the university. There are student dining rooms, buffets, kitchenettes, laundry rooms and of course there is a Wi-Fi and LAN connection.

Rich student life

Students have wide opportunities to actively use their free time, relax, engage in culture, sports, hobbies. For sports activities they can use playgrounds near student dormitories or in the University Sport Centre, where there is also an indoor swimming pool, a sports hall, a fitness centre, tennis courts, a workout field or a beach volleyball court. There are many clubs and student associations at the university.

COMENIUS
UNIVERSITY
BRATISLAVA

TOP CHOICE WITH 100 YEAR TRADITION

Comenius University Bratislava is a modern European university. It is the only Slovak university to be regularly ranked in the international rankings of the best universities in the world. With thirteen faculties, it offers the widest selection of study programmes (over 900) at three levels, and several of these study programmes are the only ones of their kind offered in Slovakia. There is a wide range of areas of human knowledge to choose from when studying, be it in medicine, the humanities and social sciences, the natural sciences, mathematics, theology, and much more.

Comenius University is a research institution that runs hundreds of domestic and international research projects. As a result, many of our students engage in important research during their studies and can actively participate in projects, grants, and professional internships (including abroad). Every year Comenius University sends the highest number of students abroad out of all Slovak universities, and it receives the most international students, including from such places as Germany, Ukraine, Austria, Norway, Iceland, Iran, and Spain.

trains pedagogues and prepares professionals for their careers in schools and social services. The faculty also engages in the development of study programmes as well as science and research in pedagogy, humanities and social sciences.

www.fedu.uniba.sk

THE FACULTY OF PHARMACY OF COMENIUS UNIVERSITY

is the only faculty of its kind in Slovakia that trains future specialists on medicaments by integrating knowledge from several disciplines such as natural sciences, medicine and pharmaceutical sciences.

www.fpharm.uniba.sk

THE FACULTY OF PHYSICAL EDUCATION AND SPORT OF COMENIUS UNIVERSITY

is the oldest and only educational institution of its kind in Slovakia that trains highly-qualified specialists for a variety of professions related to physical education and sport.

www.fsport.uniba.sk

THE JESSENIUS FACULTY OF MEDICINE OF COMENIUS UNIVERSITY

with its seat in Martin, can boast of its reputation as the best-performing school in the ranking of Slovak universities in the field of medicine and health-care sciences. It offers study programmes in general medicine, dentistry, nursing and also non-medical specialties such as midwifery and public health.

www.jfmed.uniba.sk

THE FACULTY OF MATHEMATICS, PHYSICS AND INFORMATICS OF COMENIUS UNIVERSITY

is regarded as the best faculty of natural sciences in Slovakia according to the Academic Ranking and Rating Agency. The aim of the faculty is to foster scientific knowledge in the field of mathematics, physics and information sciences.

www.fmph.uniba.sk

THE FACULTY OF ROMAN CATHOLIC THEOLOGY OF CYRIL AND METHODIUS OF COMENIUS UNIVERSITY

is one of the biggest educational institutions in Catholic theology in Slovakia, preparing theologians for their priestly vocations.

www.frcth.uniba.sk

THE EVANGELICAL LUTHERAN THEOLOGICAL FACULTY OF COMENIUS UNIVERSITY

offers study programmes in Lutheran theology as part of preparation of clergy for the Evangelical Lutheran Church of the Augsburg Confession in Slovakia as well as abroad.

www.fevth.uniba.sk

THE FACULTY OF MANAGEMENT OF COMENIUS UNIVERSITY

prepares graduates to excel in their future management positions in governmental institutions or businesses, whether they decide to pursue their careers in Slovakia or abroad. It is the only faculty in Slovakia that has regularly ranked as an Excellent Business School in the evaluation of the independent agency EDUNIVERSAL since 2009.

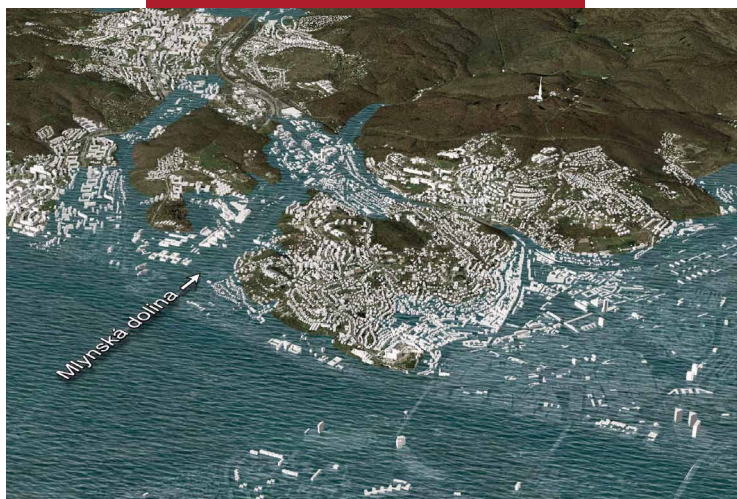

www.fm.uniba.sk

THE FACULTY OF SOCIAL AND ECONOMIC SCIENCES OF COMENIUS UNIVERSITY

develops and successfully applies theoretical knowledge in the fields of social and political sciences, European studies and international relations, social anthropology, public policies and economics, as well as social and occupational psychology.

www.fses.uniba.sk

10 Million Years Ago, Mlynská Dolina was Underwater

Geologists from Comenius University leading by Michal Šujan from Faculty of Natural Sciences discovered, that during the Tertiary Period Mlynská dolina in Bratislava was covered by a large lake. It was inhabited by bivalve molluscs, Ostracods and other animals typical for the brackish waters of sea coasts, with an inflow of fresh water from streams. The inland sea which the scientists named Lake Pannon had brackish water similar to the present-day Caspian Sea. It reached its maximum extent more than 10.6 million years ago, stretching from Vienna to Belgrade and Transylvania in Romania. Lake Pannon was later filled by Danube sediments and receded south towards Serbia, where it disappeared 4 million years ago.

Our students at Youth embassy

On 17 June, 2022, the 12th annual edition of the Youth Embassy project took place in Bratislava. The competition was open to secondary school and university students who presented and implemented their projects. University students were expected to tackle the topic of „Improving the economic situation in the economy and healthcare with emphasis on tourism in Slovakia“. Dominik Kadubiak from the Medical Faculty won the first place and was presented the Palm-tree award. His project was named „Diseases of civilization and reduced performance of active people due to polluted air“. It presented a special respirator designed for athletes who train in cities. The respirator captures harmful particles in the air.

TEDx

The third year of TEDxComenius University was given the symbolic name Renewal. After the pause, life at the university resumed. This year unique TED event, TEDxUniverzitaKomenskéhoLive, introduced ten speakers on Friday, 29 April, 2022, six of them spoke live and four spoke online from at the main TED2022 event. It took place at Unik Mlyny, which was reopened after reconstruction. The event hosted 100 participants. 5 speakers demonstrated ideas worth spreading. In addition, after the online pandemic revolution, the TEDxLive format brought the possibility to participate in events online.

ESET Science Award

For the third year, ESET Foundation has given awards to outstanding personalities of Slovak science for their scientific, research and teaching work. The evening gala took place on 16 October 2021 and was broadcast live on RTVS. An international jury chaired by the Physics Nobel Prize laureate Kip S. Thorne, decided to award the Prize of the Public to associate professor Katarína Mikušová from the Faculty of Natural Sciences.

Slovak emergency lung ventilator in Kenya

The Q-vent mini respiratory support device developed by Slovak scientists is currently helping in Kenya. The device arrived there as part of a humanitarian mission supported by SlovakAid - Slovak Agency for International Development Cooperation. The Q-vent mini was developed at the beginning of the Coronavirus crisis in 2020 by the twin brothers Daniel and Samuel Furka from the Department of Physical and Theoretical Chemistry of the Faculty of Natural Sciences of Comenius University, as well as doctor Patrik Palacka from the National Cancer Institute. They responded to the increased need for lung ventilators and printed the device completely on a 3D printer. The total cost of its production was around €250, which is about 100 times less than the conventional fan costs. Moreover, countries such as the USA, Czech Republic, Portugal, Kenya, India, as well as Brazil and Australia have already shown interest in the Q-vent mini.

Scientist of the year

The most outstanding people of Slovak science received awards at the Scientist of the Year event. The main award, Scientist of the Year 2021, was given to behavioral ecologist Pavol Prokop from the Faculty of Natural Sciences of Comenius University. The 25th year of the event took place on 14 June 2022, in the Moyzes Hall of the Faculty of Arts of Comenius University. Pavol Prokop received the award for clarifying how reproductive strategies and evolutionary aspects of behavioral strategies are involved in avoiding pathogen contamination. He has published more than 170 research papers which are available in the Web of Science (WoS) and Nature Index databases. In 2020 and 2021 his publishing activity generated 961 SCI references.

Future Students and Tourists - Information Centre Welcomes All

Comenius University Bratislava opened a new information and event centre. The Information Centre at 9 Štúrova street is close to the main building of Comenius University at Šafárikovo námestie in central Bratislava. It serves current and future students as well as the general public. The information centre is intended to be the first point of contact for those who are interested in studying at the university. It also hosts various events, trainings, lectures, exhibitions, seminars or art events. Gifts and promotional items of the university are available for purchase and visitors can obtain information about the study and the university.

The centre was created as part of CU's effort to engage with the public more openly and to communicate with current and potential students more effectively. It also aims to increase the involvement of the professional public in the life of the university.

The university transformed what used to be a commercial property into an accessible space. It includes an entrance zone, where visitors can obtain information about studying at the university. The rest of the centre consists of an area which will serve as a cafe during the day and can be converted to an event space as needed.

BRIDGE TO THE WORLD OF BUSINESS

Dear Partners,

Your decision to do business in Slovakia is a wise one. The Slovak Republic is well known for its high level of culture, qualified workforce, advantageous geographical position in the centre of Europe on the border between the West and the East, favourable taxation system, and extensive transport communication network. To do business in Slovakia means to hold a stake in the expansion of a region which, in the future, will have increasing significance for European trade and prosperity. Your investments and personal effort will therefore soon be rewarded with a fast return and high profit. During the course of your business activities, you will often need help and advice from someone who is familiar with this environment and who has been active in it from the very beginning. That is why the Slovak Chamber of Commerce and Industry (SCCI) wants to be your first point of contact and your partner when entering Slovakia. The SCCI is an independent public and legal institution which, in a similar way to the Chamber of Commerce in your home country, provides a full range of services to its members and other domestic business groups, as well as interested parties from abroad.

We will provide you with valuable contacts!

Some things that the SCCI will arrange for you:

- ✓ contacts with domestic businesses
- ✓ contacts with professionally-oriented sections
- ✓ finding suppliers
- ✓ finding manufacturers
- ✓ finding importers
- ✓ finding companies suitable for joint ventures and acquisitions
- ✓ the corporate profiles of companies and institutions
- ✓ in the event of your visit, recommendations and the organisation of meetings, including secretarial services, accommodation, transport, etc.
- ✓ advertising in the SCCI newsletter, which is distributed to all SCCI members, as well as foreign consular offices in the Slovak Republic, consular offices of the Slovak Republic abroad, representative offices of foreign companies in Slovakia, government institutions, and Slovak businesses.

We will prepare the ground for you!

For your trade mission in the Slovak Republic, the SCCI will arrange:

- ✓ meetings with Slovak businesses
- ✓ a comprehensive programme for mission participants (accommodation, transport, cultural programmes, and other services on request)
- ✓ background information required for negotiations

We will meet all your needs!

For seminars, lectures, or training the SCCI offers:

- ✓ the attendance of Slovak participants
- ✓ a venue, including the necessary equipment (audio-video), translations, and refreshments
- ✓ advertising, invitations, and media publicity
- ✓ accommodation, transport, and transfers

We will introduce you to a specific environment!

In addition, upon request, the SCCI can arrange:

- ✓ marketing studies
- ✓ statistical overviews
- ✓ consultations on legal, financial, taxation, and customs matters
- ✓ information on business conditions and opportunities
- ✓ translations of acts, rules, and regulations
- ✓ information on import regulations (limits, quotas, restrictions, and certifications)
- ✓ participation at exhibitions and trade fairs
- ✓ information about options and conditions for investing, capital investment, and private ownership in the Slovak Republic
- ✓ interpreting and translation services
- ✓ other services upon request

Arbitration Court

The Arbitration Court of the SCCI is an independent body that also offers its services to you. It resolves property claims between entrepreneurs arising from business and economic relations. It realises consultation and advisory activities to settle such claims.

Information on investment conditions in the Slovak Republic is available in all offices of the SCCI.

The Region of Trnava

Trnava Region

the region with its rich history, spiritual and cultural life, with fertile lowlands and protecting mountains, with rivers connecting people, the region of education, the region of good bread and good wine.

Location

Trnava region spreads across the south-western part of Slovakia. In the west it borders with the Czech Republic, in the south-west with Austria, in the south with Hungary. It takes to reach the capital Bratislava by car about 1 hour and the Vienna International Airport about 2 hours.

Trnava Region in numbers /Statistics 31. 12. 2022/

Number of population:	565 573
Area (km ²):	4 146 km ²
Number of profit companies:	23 794
Number of physical persons /small entrepreneurs/:	43 469
Self-employed.	40 822
Rate of unemployment (%):	3.60 %

Taking into account the big interest of investors the Trnava region is one of the most dynamic regions in Slovakia.

Transport and infrastructure

The region has a well-developed road and railway transport system. Railways and highways connect the region of Trnava with Bratislava, Czech Republic, Austria and Hungary.

Education

In Trnava region there are a great number of technical and vocational schools provide machinery, transport, electrical, chemical, agriculture, food-preparation and other kinds of education. Secondary schools are aimed at business and services. The Slovak Technical University in Trnava offers degrees in industrial technologies, technical materials, industrial ecology, management and applied information systems. The Trnava University and The University of St. Cyril and Method offer possibilities to study in a large scale of humanities and natural sciences.

The most important advantages of Trnava region

- the growth of foreign capital in industry
- the most using of arable soil

Contact:

Trnava Regional Chamber
Slovak Chamber of Commerce and Industry
Kapitulská 12, 917 01 Trnava, Slovakia
Phone: +421 33 55 12 588 / 744

- concentrated presence of foreign investors
- qualified working force
- many of industrial parks
- suitable logistic position
- concentration of national institutions
- existence of three Universities
- important cultural and historical sights
- existence of geothermal and healing spas

Economy

The region of Trnava has its tradition in both kinds of production: industrial and also agricultural. The industrial production includes machinery, automotive, electrical engineering, chemistry, metal working, building construction, pharmaceutical industry, printing. The main industrial centres are these towns: Trnava, Skalica, Senica, Galanta, Piešťany and Hlohovec. The industry of agriculture and food is developed especially in the southern districts of Galanta and Dunajská Streda. The region of Trnava is a significant source of energy production for the whole area of Slovakia with its Nuclear Power Plant Jaslovské Bohunice and Water Power Plant in Gabčíkovo.

Foreign investors in Trnava region

Amylum Group (Holland), Schaeffler Skalica, spol. s r.o. (Germany), Stellantis, SAMSUNG Electronics Slovakia, s.r.o. (South Korea), Bekaert Hlohovec, a.s. (Belgium), ZF a.s. (Germany), SLOVENSKÉ LIEČEBNÉ KÚPELE, a.s., Protherm/ Vaillant (Germany), Johns Manville Slovakia, a.s. (USA), Semikron, s.r.o. (Germany), Bodet & Horst s.r.o. (Germany), JASPLASTIK-SK s.r.o. (Hungary), Eissmann Automotive Slovakia (Germany), Wertheim, s.r.o. (Austria), Fremach Trnava, s.r.o. (Belgium), Boge Elastmetal Slovakia (Germany), Webasto-Edscha Cabrio Slovakia (Germany)

Trnava Regional Chamber SCCI

The Regional Chamber of Trnava is an integral part of the Slovak Chamber of Commerce and Industry, founded on January 1, 1997. The Chamber is a public - legal, non-profit institution, providing activities in order to support and protect its members in their home country and also abroad. The chamber is the major representative of entrepreneurs in the region.

Activities and services of Trnava SCCI

What we offer:

- 1) Information services
- 2) Services in foreign trade relations
- 3) Consultation and counseling services
- 4) Educational activities
- 5) Customs consulting
- 6) Certification agenda
- 7) Issuing customs ATA Carnet

SCCI Trnava Regional Chamber has the following sections: Agro-food Section, Electronics Section, Section of Transport, Section of producers of defensive industry SR.

The Region of Zilina NORTH-SLOVAKIA COUNTY

The situation of Slovak Republic's economy is frequently discussed in Slovakia and abroad, and the debate is greatly confused. The analysis is often mixed up with wishful thinking, simple lobbyism etc.

Thirty years have elapsed since the Slovak Republic acquired independence. In these approximately 30 years the Slovak Republic had to prove evidence of its capability to manage the development of the county, assuring its political stability and economic development.

After three years – 1996 of independence, the economy of the Slovak Republic acquired from the London „The Economist Intelligence Unit“ the best rating among Czech Republic, Poland and Hungary - countries in transition. The rating was supported mainly by agreed aims and practical economic policy of individual states within the goals of the International Monetary Fund, macro-economic indicators etc.

The members of R.C. SCCI Zilina come from the most industrial sectors including engineering, machinery, metallurgy, building industry, wood processing, paper industries, chemical industries, textile, food industries, electrotechnical, electronic industries, automotive, energy, tourist and travel, etc. **The most important companies**, suppliers, hotels you can watch in “CATALOGUE FIRMS of SCCI Zilina County” – www.interbiznis.sk.

The region is connected to the international trucks roads, Core European Corridors:

- I. **E 50:** ...-Paris-Praha-Brno-Zlin-Zilina-Martin-Ruzomberok-Liptovsky Mikulas-Presov-Kosice-Dnepropetrovsk...
 - II. **E75:** ...-Belgrade-Szeged-Bratislava-Zilina-Zwardon-B.Biala-Katowice/Krakow-Warsaw-Minsk-Moscow...
 - III. **R3/59/65:** Krakow-D.Kubín-Martin-Kremnica-Zvolen-Budapest
- The distance of the Airport Zilina from Martin is 37 km, to Liptov 70 km.

THE MAIN ADVANTAGES of the Zilina County potential:

- **THE SAVE PROPERTY AND INVESTMENTS.** Territory of **COUNTY PROVED TO BE SECURED AGAINST ANY FLOODS. RELATIVELY THE BEST POSITION OF THE MIDDLE-EAST EUROPE.**
- **High educated labour force for all branches** • four Universities

**SLOVAKIA - SURFACE AREA: 49 035 km²,

We can impress the world with Slovak food

The world is changing at an enormous speed: one global crisis follows another, military conflicts are increasing. The numbers of migrants and starving people overwrite the statistics. On top of all this, humanity is trying to deal with the increasing impacts of climate change, which for several years have fundamentally affected not only society as such, but also the actors doing business in every single segment of the national economy, not excluding agri-food sector.

Our life in Slovakia is societally turbulent and affected by the impacts of the aforementioned global problems, as well. However, we are still extremely lucky that we do not have to experience military conflicts ourselves. Waking up in the morning and going to work or accompanying the children to school without worrying about our own lives and the lives of our loved ones has not been taken for granted even in the European region for the second year already.

Therefore, every clever country takes fundamental strategic steps in order to strengthen its own security and guarantee its own population a higher standard of living and a sense of security at a time of deepening world crises. This clearly also applies to the agriculture and food industry sector. It is not that long ago in order to forget how, at the beginning of the global COVID-19 pandemic, we worried whether we would be able to produce a sufficient amount of Slovak food and, unfortunately, whether supplies of imported food will also be reduced. I say unfortunately on purpose because the Slovak Republic's dependence on foreign food imports is deepening from year to year. This is also confirmed by the statistics of foreign trade in agri-food products, which continues to increase from month to month and should exceed a record 2 billion euro for the entire year 2023.

Being dependent on foreign food production can be fatal in such a dynamically changing time full of crises that extend beyond the Central European area. This is why we need to change the opinion of society and especially politicians that a country without strong support for its own agri-food industry can very quickly pay the price for high dependence on other countries. And the number of challenges is increasing.

In the next few years, the subject of Ukraine's accession to the EU will also be highly resonant within the European agri-food sector. Liberalization of the market will bring big changes for Slovak farmers and food producers. We will have to think about what we actually want and can continue to grow and produce in our conditions in order to remain competitive. To produce home-grown food that is healthy and safe while caring for the countryside and sustaining rural life and employment.

Slovak agri-food industry can be compared to the Titanic. If you want to direct it somewhere without sinking, it will take some time. However, changes are necessary and they cannot be achieved without strong financial support from the state. The benefits from such a sincere interest of politicians in domestic food production will be felt not only by the country as such in the form of a well-maintained countryside, fed residents and paid taxes and levies, but also by our prestige in the world. Slovak food products, with their quality and exceptionality, have been proving for a long time that they can impress people abroad. The extraordinary successes of, for example, our winemakers or beekeepers at various world competitions are clear proof of this.

Slovak Agricultural and Food Chamber

Emil Macho
President of the Slovak Agricultural
and Food Chamber

Slovak Chamber of Agriculture and Food (SPPK) represents non-governmental, autonomous and statutory organisation, which was established in line with the Law No. 30/1992 Coll. as amended. The basic role of the Chamber is to enforce the justified common interests of its members, mainly in the process of the agricultural and social policy field. Chamber also takes part in the creation of the state policy concerning the support and protection of its member entrepreneurs to ensure the further development of agricultural production and food processing in the Slovak Republic.

Membership

The members of SPPK are natural and legal entities providing the business activities in agriculture, food industry and in biological, technical and commercial services for agriculture and food processing industry, as well as the other non-governmental organisations operating in the agri-business. The membership in the Chamber is voluntary since January 2005.

Internal organization

Headquarters of SPPK is placed in Bratislava with 15 employees. SPPK also has 38 Regional agricultural and food chambers (RPPK) operating in regions of Slovakia. The "regional" chamber can be established also on the other than just territorial basis. There are also four subjects with the statute of RPPK in accordance to the Statute of SPPK and the Law above. The activities of the Chamber are supervised by the official bodies – the General Assembly, the Board of Directors, the President and the Supervisory board.

Internal Communication

The Chamber is using the wide-spread net of its regional chambers in the whole territory of Slovakia. The central

office communicates with the regional chambers using the internet and emails, but also regular meetings to discuss the actual issues. The Slovak Agricultural and Food Chamber is the only autonomous organisation in the Slovak Republic combining the entrepreneurs operating in agricultural primary production, food processing industry and services for agriculture. SPPK is communicating also to its member associations as well as to the other agricultural autonomous organisations. All the members of SPPK have direct access to the regional office in which they are registered, but also to the central office in Bratislava.

Activities

The Chamber's activities are focused to:

- Lobbying for interests of its members at national and international level
- Legislation – legal sector
- Providing of business information service
- Guidance and education
- Co – operation with the international organizations

Co-operation with national and international partners

The Chamber is cooperating and communicating also with the state bodies accordingly to the conditions set out in the Law and in the Agreement on a Co-operation between the Council of the Agricultural Statutory Undertakers and the Ministry of Agriculture of the Slovak Republic to search for the solutions of the problems in agriculture and food sector. SPPK pays extra attention to development of the international contacts and representatives of the SPPK participate at the regular meetings of the representatives of the agricultural chambers from the "Visegrad four" countries (Slovakia, Czech Republic, Hungary and Poland). The representatives of Chamber cooperate also with other agricultural chambers within the European Union.

Member associations of food processing

SPPK organizes associations of the food processing industry – see below:
