

ABONEX[®], s.r.o.

Transport and Spedition SLOVAKIA

ABONEX, s.r.o. is a forwarding company that ships goods for long-standing as well as potential clients, based on their diverse requirements. The rapidly growing number of satisfied customers is evidence of the expanding and permanently improving services we provide our business partners. We smoothly operate in the freight transport market and each year the number of shipments we make for satisfied customers rises. Yet the real product is the quality and flexibility of our services, and also the attention we give to our customers. Our priorities are a fair and honest approach, communication and customer awareness by our dispatchers to the maximum possible extent.

ABONEX, s.r.o. has been a member of the international Five Stars Freight System group since 2007, representing 270 companies in 200 countries around the world. Through this network, we provide "door to door" forwarding over air, sea and land practically worldwide.

We cooperate directly with partners located in the sender's or recipient's country who know conditions in each country and are able to guarantee everything needed for smooth and trouble-free transport.

AIR FORWARDING

Air forwarding services are recommended whenever you need to forward goods quickly anywhere in the world. Transportation prices reflect customer-determined criteria such as destination and delivery date, size and weight of the shipment and other delivery conditions. All of the above factors can considerably affect the final forwarding price. For our customers we can optimise air transport costs through convenient air connections, using scheduled and charter airline links in our STANDARD, EXPRESS and PRIORITY services. In addition to providing air transport, we can have goods stored through our network of partners for the necessary time and forwarded by lorry from the airport at arrival and also to the airport for departure.

MARITIME FORWARDING

The advantage of forwarding by sea is that it can be done at the lowest price compared to other transportation modes. This type of transport is available for both overseas export and import. We can design the most appropriate procedure for any type of shipment based on customer requirements, while providing full and comprehensive service. Both full-container (FCL) and less than container (LCL) loads can be taken. ABONEX works with major shipping companies and their agents. In addition to providing maritime forwarding, we can have goods stored through our network of partners for the necessary time and transported by lorry either to or from port directly to the consignee.

ROAD FORWARDING

Road transport is the most widespread and affordable way of delivering goods to the desired destination. Our job is to choose an efficient way of forwarding, taking into consideration the nature, volume and weight of the shipment, either in a full-load or less than full load consignment. Flexibility, speed and quality characterise the road forwarding services we provide our customers. Road transport also allows us to tranship to other means of transport and to export or import goods right to the customer's door.

COMBINED FORWARDING

Affordable forwarding of heavy and bulk goods environmentally combines road, sea, air and rail transport with the aim of shipping your goods as efficiently as possible.
