Shrink Tech & CAB

SQUIX

Industrial label and heat shrink tube printer

- Reliable and fast printing
- Accurate print images
- Easy to operate, compact design
- Maximum quality standards
- Basic and label peel-off version

- Cutters CU and perforation cutters PCU for front-side mounting available
- Label roll diameter: up to 205 mm
- Wide-range of accessories

CU, PCU

PRINTER	DESIGN	mm/s	DPI	PRINT WIDTH UP TO
SQUIX2	Slim	250/150	300/600	56.9/54.1 mm
SQUIX4	Universal	300/150	300/600	105.7 mm
SQUIX4.3	Universal	250	203/300	104/108.4 mm
SQUIX6.3	Wide	250	203/300	168/162.6 mm

XC

Label printers for **two-color** printing

- Two print units to achieve simultaneous printing with two colors on one label
- Ribbon-saver mechanism

- Picking up large label rolls with up to 300 mm diameter
- Wide-range of accessories

PRINTER	mm/s	DPI	PRINT WIDTH UP TO
XC4	125	300/600	56.9/54.1 mm
XC6	125	300/600	105.7 mm

A8+

Pallet and drum label printer

- Two print units to achieve simultaneous printing with two colors on one label
- Ribbon-saver mechanism
- Print speed: 125 mm/s

- Picking up large label rolls with up to 300 mm diameter
- Wide-range of accessories

Shrink Tech & CAB

Label and heat shrink tube printer series

EOS

- Highest operating comfort
- Reliable and fast printing
- Accurate print images
- Maximum quality standards
- Print width up to: 108/105.7 mm

- Cutter and perforation cutter for front-side mounting available
- Wide-range of accessories

PRINTER	mm/s	DPI	LABEL ROLL DIAMETER
EOS2	150	203/300	up to 105.6 mm
EOS5	150	203/300	up to 162.6 mm

Label printers for desktop applications

MACH1/2

- For thermal transfer and direct thermal printing
- Ideal for small to medium-volume printing
- Processing of label widths up to 118 mm

- Solid double-walled construction
- Printable resolution: 203/300 dpi
- Print width up to: 108/105.7 mm

PRINTER	DESIGN	mm/s
MACH1	buttons and LED display	127/102
MACH2	colored LCD display + navigator pad	177/127

Label printers for industrial applications

MACH4S

- Reliable and fast printing, accurate imprint, little footprint
- Print width up to: 105.7 mm
- Print speed: 300/150 mm/s
- Printable resolution: 300/600 dpi
- Ideal for: PCB labels - When only little space is available, min. label size 5x5 mm

- Type plates - Pin sharp fonts, graphics and barcodes up to 600 dpi
- Cardboard box and pallet labels - up to a passage width of 120 mm
- Types:
  „B" - with a tear-off edge,
  „P" - with a peel-off function,
  „C" - with a cutter

CAB Label and heat shrink tube printer ACCESSORIES

Stand-alone label dispensers

Every label size can be dispensed easily using the HS and VS dispenser. The labels can be stamped or cut without any space in between. Two dispersing directions:
• **HS** – Horizontal: for label rolls with bottom leading print image
• **VS** – Vertical: for label rolls with top leading print image

External unwinders and rewinders

Unwinders EU enable labels to be fed easy and consistent even if rolls are heavy.
Rewinders ER allow you to automatically wind up labels onto a roll during the printing process. They pick up materials wound either on the outside or the inside.
• Material width: up to 180 mm
• Roll diameter: up to 300 mm

Cutters and perforation cutters

In our assortment you can find two series:
• **CU** – Intended to cut paper labels, self-adhesive labels, cardboard, textile and plastic materials, as well as shrink tubes.
• **PCU** – Perforate continuous materials such as textile tapes or shrink tubes to simplify separation by hand. Cutting the material is also possible. Two perforation distances: 2,5 mm or 10 mm.

Applicators

Ensure labeling in real time. Applicators provide a cost-effective solution if operated semi-automatically or integrated in vertical orientation in production lines.
• **S1000** – A stroke cylinder applies the labels to products.
• **S3200** – Printed labels are applied to products automatically. For this purpose, labels are adjusted 45° to 95° to the horizontal by a rotary cylinder and moving towards products by means of a short-stroke cylinder.

ShrinkTech
Service and Support

Service of printers and ordering spare parts

ShinkTech® offers warranty and post-warranty repair service for all distributed printers. We also provide spare parts for printers and accessories. In case of any questions please do not hesitate to contact us.

Technical support for products CAB & ShrinkTech®

In order to create your labels, tags and prints comfortably, quickly and efficiently, we will help you choose the right labels, ribbons, printers and accessories. A wide range of accessories enables to significantly shorten the preparation time for marking and labeling your products.

Preprinted symbols and descriptions on labels

Should you want to order special labels with pre-printed texts, symbols and descriptions, ShrinkTech® will provide you the solution. After a mutual consultation, we can prepare pre-printed labels in the required quantity and quality for you.

Providing individual labels for special applications

ShrinkTech® also offers the production of individual labels for special applications and environments. After agreeing on technical details, we will produce and deliver special labels for your application in the required quantity and quality.
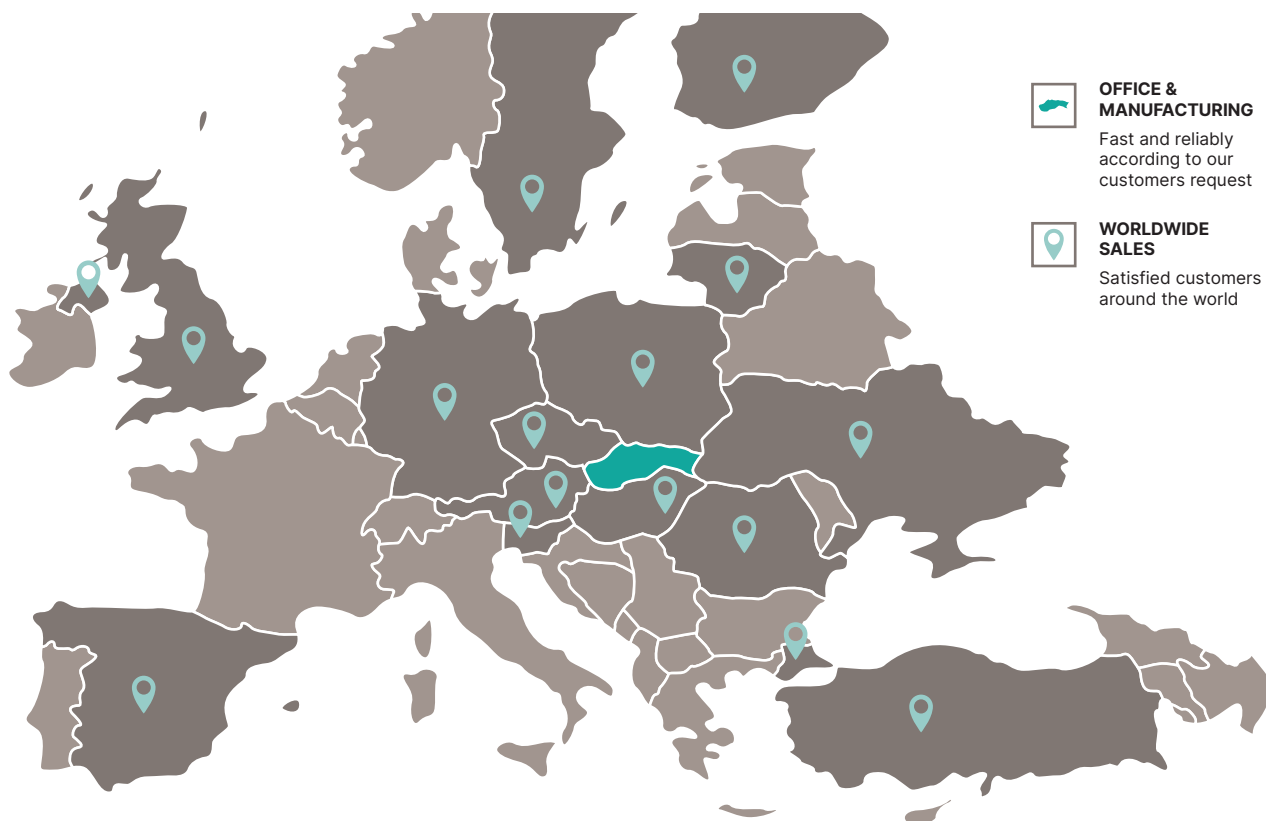

CAB & ShrinkTech® product training programs

ShrinkTech® organizes different training programs aimed at explaining functions, settings, use of printers and accessories for customers and business partners. If you are interested in our training programs, please, contact our office.

Asset management software Kodys®

Asset management software Kodys® provided by SchrinkTech® is a software solution for advanced asset management and effective inventory count of all your assets. It is suitable for small, medium or big companies able to work as an extension of your information system or run as a stand-alone solution. You can choose desktop application running under the operation system Windows and/or a mobile application for Android devices.

Commitment for the success of our partners

GUARANTEED QUALITY
