

# PROFILES/TUBES

Thanks to our 27-year experience, today we can extrude more than 100 tons of raw materials per year with our 13 extruders. From various raw materials, such as PVC, HDPE, LDPE, PP, PS, POM, etc., we produce profiles and tubes for electrical engineering and automotive industry, agriculture and also white goods technology. We guarantee the benefit on the market due to good quality and securing high-quality raw materials.

## MARKETS SERVED

### AUTOMOTIVE

As a well-known automotive industry supplier, we are offering solutions for electric insulation, noise reduction, sealing as well. Our wide range of products and original development are welcomed at our customers, either it can be extruded or injection-molded part.

### ELECTRONICS

As the MIPOLÁN tube producer we are making insulated tubes with wide color and size selection for electrical industry and electronic producers. In 2016 our product ranges expanded with Shrinktech products, so now are available shrinkable tubes, cable ties, cable glands, cable lugs and terminals.

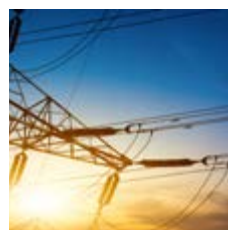

### RAILWAYS

Our products for railways are characterized by innovative solutions and raw materials of excellent quality. For this special application we have developed materials with consistent performance in all conditions.

### BUILDING

We offer protection tubes from various materials according to customers needs. Custom made size and wall thickness and colors are widely available. Tubes can be used for direct contact with concrete and underground installations. We can offer halogen free materials as well.

### ELECTRICAL
